The Debate in the Commons, coloured though it was towards its close by undignified personalities, was nevertheless, on the whole, a fair but most able discussion of the question whether the Treaty Rights and Obligations of England in matters affecting the Government of Turkey admit of, or compel, a resort to coercion with a view to carry into effect the conclusions of the late Conference at Constantinople. It turned on a question of legal and international jurisprudence. To some extent it was technical in its aim, to some extent historical in its substance; but there can be no doubt that it was intended to clear the way for the more interesting and important debate in the House of Lords, which was intended to be practical. An inquiry as to what we have a right to demand and what we are obliged to do, conformably with our national honour, might well precede the further question what, if the way be open to us, are we disposed to do. Mr. Gladstone's opening speech was characterised by moderation, dignity, and breadth. But, perhaps, it did not rise to the height of persuasiveness which he has sometimes displayed. The argument of Mr. Hardy, in reply, would seem to have struck the public as being less subtle, but more plainly stated and more generally accepted. Its purport was this—that you cannot have treaty rights without treaty obligations, a maxim which must be received as correct in the abstract, but which does not necessarily dispose of the practical perplexities which may sometimes arise out of its strict application. The fact is that there are some international rights and obligations which are anterior to any specific stipulations contained in treaties; and, although the letter of treaty obligations may go against this or that mode of dealing with unexpected events, we must be guided in grappling with those events by the broadest rules of humanity and common-sense. If a madman "runs a muck" through the streets, threatening peril to all the neighbours whom he encounters, albeit it may be the law that one man is not authorised to interfere with the liberty of another, a higher law takes its place, and, in the interests of common order and humanity, justifies such an employment of force as the circumstances and reason of the case may require. This is the real ground upon which must be based the justification of England in over-riding, to some extent, what are described as the Independence and Integrity of the Ottoman Empire.

The discussion in the House of Lords turned upon no pivot of technicality. It elicited, as far as could be ascertained at the present moment, not so much what the Government intend to do as what they have resolved not to do. They will not resort to coercion, which means war, or, at any rate, a threat of war. They do not believe themselves justified in voluntarily entering upon so dangerous a course unless absolutely compelled to do so.

by a regard to national honour. Were Austria or France to insist upon a fulfilment of our engagements to them, we should have no option; but this possibility is regarded as too remote to be of any practical worth. Her Majesty's Ministers have agreed upon a policy of moral suasion rather than of coercion. There is much to be urged in support of their determination. In the first place taking their object to be an amelioration of the lot of the Christian subjects in Turkey, it is certainly difficult to conceive how far that problem could be solved by military intervention. In the second place, great risks would be incurred of desperation, followed by cruelty, of the Sultan's Mohammedan subjects, and the last state of the Christian Provinces might become worse than the first. In the third place, although it may be true that an alliance between England and Russia for a forcible insistence upon the decisions of the Conference might operate as a restraint upon Russia in the distribution of territorial power, it might also, to a very large extent, unsettle our relations with Mohammedans in other parts of the world. And, lastly, the sword once drawn no human mind can predict when and under what circumstances it will be returned to the scabbard. That England will not fight in support of Turkey may now be accepted as a moral certainty. That she will, even in concert with the European Powers, resort to force for the attainment of her disinterested ends, is a question of policy which the Ministry have decided in the negative. How far the country will justify the choice they have made remains to be seen. The debate in the House of Lords, on Tuesday last, will help to enlighten it. We commend it to the earnest study of our readers—our only desire being, as theirs must be, that right may be done irrespective of all Party interests.

THE COURT.

The Queen, Princess Beatrice, and Prince Leopold continue at Osborne House.

The Marquis of Salisbury dined with her Majesty on Saturday last, and left Osborne on Sunday, after an audience of the Queen. Her Majesty, Princess Beatrice, and Prince Leopold attended Divine service, performed at Osborne by the Rev. Canon Prothero.

The Queen, accompanied by Princess Beatrice, has taken her usual daily walking and driving exercise. On Monday her Majesty drove through Newport and past Carisbrooke. Prince Leopold has taken frequent drives.

Sir Henry Elliot, her Majesty's Ambassador at Constantinople, arrived at Osborne, last week, and had an audience of the Queen, and afterwards dined with her Majesty. The Rev. Canon and Mrs. Prothero and Commander Fullerton, of her Majesty's yacht *Victoria* and *Albert*, have also dined with the Queen.

By her Majesty's command Commander Fullerton and seven officers and sixteen men of the Royal yacht *Victoria* and *Albert* attended at the funeral of the late Captain Campbell, at Hampton, and the men carried their lamented Captain to his grave.

Large parcels of old linen, from Buckingham Palace, of great value for surgical purposes, have been presented by command of the Queen to the London and University College Hospitals, the Samaritan Free Hospital for Women and Children, Lower Seymour-street, Portman-square, and other benevolent institutions. Her Majesty has also sent a present of pheasants for the use of the patients in the Royal National Hospital for Consumption.

The Queen has granted a pension of £150 per annum to the widow of Mr. Noble, the eminent sculptor.

The appointments of Sir James Paget, Bart., to be one of her Majesty's Surgeons in Ordinary, and of Mr. Prescott Hewett to be Surgeon Extraordinary, and Mr. Eric Erichsen to be Surgeon Extraordinary to her Majesty, have been gazetted.

The Marchioness Dowager of Ely has left, and the Hon. Horatio Stopford, arrived, at Osborne. The Hon. Caroline Cavendish has succeeded the Hon. Evelyn Paget as Maid of Honour in Waiting to the Queen. Lieutenant-General Sir Thomas Biddulph and Mr. Royle have left, and Major-General H. Ponsonby and the Hon. A. Yorke have arrived, at Osborne. Captain Edward Hardinge has been appointed a Naval aide-de-camp to her Majesty, vice Captain Oldfield.

The Prince of Wales will, by command of the Queen, hold a Levée at St. James's Palace, on behalf of her Majesty, on Monday next. The Queen will hold Drawingrooms at Buckingham Palace on Friday next, and on March 14.

THE PRINCE AND PRINCESS OF WALES.

The Prince of Wales hunted with her Majesty's staghounds yesterday week, near Maidenhead. In the evening his Royal Highness and the Princess of Wales, with their children, went to Covent Garden Theatre. The Prince presided, on Saturday last, at a meeting of her Majesty's Commissioners for the Paris Universal Exhibition of 1878, held at Marlborough House. The Princess was present at the Saturday Popular Concert at St. James's Hall. On Monday Prince and Princess Christian arrived at Marlborough House on a visit to the Prince and Princess. In the evening their Royal Highnesses, with Prince and Princess Christian, were present at the performance of Verdi's "Requiem," at the Royal Albert Hall. Tuesday was the tenth anniversary of the birthday of Princess Louise of Wales, eldest daughter of the Prince and Princess. The Prince and Princess and Prince and Princess Christian attended the debate in the House of Lords. On Wednesday the Prince presided at a meeting of the council of his Royal Highness, held at the office of the Duchy of Cornwall, Buckingham-gate.

Princess Louise of Lorne, accompanied by the Marquis of Lorne, distributed the prizes to the students of the South Kensington Schools of Art on Tuesday.

The Duke of Cambridge has been confined to the house by an attack of bronchitis, aggravated by a sharp fit of the gout, which prevented his Royal Highness dining at Lord Beaconsfield's full-dress Parliamentary dinner, attending the opening of Parliament by the Queen, and the Levée on Thursday week. The Duke is now better.

The Duke of Sutherland has left Stafford House for Dunrobin Castle. The Duchess went to Torquay on Saturday last.

The Duke and Duchess of Somerset have arrived at their residence in Grosvenor-gardens, from Stover Lodge, Dover.

The Duke of Devonshire has left Devonshire House for Holkar Hall.

The Marquis and Marchioness of Ormonde have arrived at Kilkenny Castle.

The Marquis and Marchioness of Bristol and Lady Mary Hervey have arrived at Ickworth Park, Bury St. Edmunds.

The Earl and Countess of Stradbroke and Lady Augusta Rous have arrived at Henham Hall, Suffolk.

The Earl and Countess of Wilton have arrived at Egerton Lodge, Melton Mowbray, from Grosvenor-square.

The Right Hon. the Speaker gave his first Parliamentary full-dress dinner on Wednesday; after which the Hon. Mrs. Brand had her first reception, at which a numerous company assembled. The Speaker will hold his levées on the evenings of Wednesday, March 7, and of Wednesday, March 14.

Entertainments have been given by his Excellency the Austrian Ambassador, Countess Frances Waldegrave and Lord Carlingford, Lord and Lady Egerton of Tatton, Lady Molesworth, Baroness Burdett-Coutts, and the Right Hon. W. E. Gladstone.

The *Morning Post* states that marriages are arranged between Lord Fermoy and the Hon. Cecilia O'Grady, only daughter of Standish, third Viscount Guillemore, and between Sir Thomas Dancer, Bart., of Modreeny House, in the county of Tipperary, and Miss Gardiner, only daughter of the late Mr. J. W. Gardiner, of Coombe Lodge, Reading, and niece of Sir Lawrence Palk.

THE CHINESE MINISTERS IN LONDON.

The presence in London of the Chinese Ministers, whose Portraits we give this week, is another of the indications which, of late years, China has given of her having at last awakened to a sense of her position amongst nations. Hitherto she has held herself aloof from the rest of the world, indulging in dreams of her former greatness, but now a gleam of light has broken in upon her. The halo of antiquity, once her pride, and which still hangs around her institutions, she now sees has mystified and obscured her vision. She is now aware that, while she has been laboriously toiling up the ascent of centuries, other nations, of which she never dreamt, or thought of only in her scorn, have come round the hill and, somehow or other, got between her and the summit. It would be unkind to allude to the causes which have led to this awakening, since the lives of the men she has singled out as her pioneers in the region of diplomacy are in themselves guarantees of her having forgotten or forgiven them.

Kuo-Sung-Tao and Liu-Hsi-hung, respectively the first and the second Ministers, though in some respects the very antipodes of each other, have in their career each suffered for their plain speaking on matters connected with foreign diplomacy—Kuo-Sung-Tao, for having condemned the policy of San-Ko-Lin-San when he proposed attacking the English fleet at Taku, in 1858; and Liu-Hsi-hung, for the unpalatable advice he gave to Yeh-Ming-Chên, the famous Viceroy of Canton. It would be interesting to speculate on what might have been the course of events had the wise counsels of the two Ministers fallen on more willing ears. The Summer Palace, with its magnificent collection of art-treasures, might still have been in existence; and Yeh, the great but obstinate Viceroy, might have yielded up his breath in his native land, instead of as a captive on the banks of the Ganges. But had these events not occurred would the state of China have been what it is to-day? Would she have been on the road of progress and sent her Ministers to-day to the Court of St. James's? It is questionable whether she would. But be this as it may, we feel confident she could not have been better represented at the Court of our Queen than she is in the persons of the two Envoys who presented their credentials to her Majesty on the 7th inst. Kuo-Ta-jên, the senior Envoy, is a man of about fifty-nine years of age, whilst Liu-Hsi-hung is some four or five years younger.

In manners and appearance Kuo-Sung-Tao, or, to call him by his title, Kuo-Ta-jên (for it is not considered complimentary to pronounce the last two characters of a Chinese gentleman's name) is about as fine a specimen of the Mandarin class of Chinese as it would be easy to find. When still a young man he carried off some of the highest literary honours, and, having become a Han-lin, his learning and pleasing manners recommended him to the notice of the Emperor Hien-Fung, who appointed him to a post of a literary nature in the Nan-Sheeh-Fung, a department of the Palace, where occasionally the Emperor passed such time as he could spare in literary disquisitions with his favourite. If space permitted, many interesting incidents in his political career might be mentioned; but we will only add that at different times he has held the offices of Governor of the Province of Canton, Vice-President of the Board of War, and Vice-President of the Wung-li-Yamen, or Chinese Foreign Office.

Liu-Ta-jên, though also a man of great literary attainments, never carried off such high honours as his superior; and, with the exception of being Under-Secretary in the Board of Punishments, where he much distinguished himself, he seems never to have held any high civil office. It was otherwise regarding military appointments, he having held high military commands in both the Tai-ping and Nünfu rebellions, and distinguished himself by his activity and daring, as well as by the admirable discipline he preserved amongst his troops. But it is not only against native forces he has fought, for he has also had the honour of meeting our own English troops in the field. We need scarcely remark that not the less but all the more will he be honoured because of this, for the English know how to honour bravery wherever it may be found, and not less when it happens to fight under the opposing standard. On the heights of Canton he made one of the most determined stands shown by the Chinese troops, when last that city was besieged by the English. General Straubenzee was not aware of this when, as Governor of Malta, he received the Chinese Envoys on their voyage through to England, or we might safely assert he would have been, if that were possible, all the more cordial. The most favourable opinion is entertained towards the Embassy by the people of every class throughout the whole of this country. On their way to the House of Lords on the day of the opening of Parliament, and again at places of amusement which the Envoys have honoured by their presence, their Excellencies must have found proof of this in the hearty welcome shown them by the cheering of the people. Kuo-Ta-jên is accompanied by Lady Kuo, who may be said to be the first lady of position who has ever ventured beyond the shores of the Central Kingdom. During her voyage to England, in conformity with Chinese ideas of propriety, she remained during the whole time in the strictest seclusion, never once having even taken a seat on deck. Of course, she interchanged visits with some of the foreign ladies on board, but always in their private state-rooms. Since coming to London she has persevered in the same custom, visiting and receiving persons only of her own sex. This being so, we cannot but think that the correspondent of a morning paper who, in his account of the landing of the Embassy, described his introduction to her and the fascinating smile she gave, must have drawn on his imagination, misled, no doubt, by his gallantry, and stated what never happened.

LATE SIR AUGUSTUS CLIFFORD, BART.

Our last week's obituary contained a brief memoir of the late Gentleman Usher of the Black Rod at the House of Lords. Sir Augustus Clifford would have been ninety years of age on May 26 of the present year. He entered the Royal Navy at the age of twelve as a midshipman on board the *Ville de Paris*, 110, the flagship of Earl St. Vincent and Admiral Sir William Cornwallis. He served under Admiral Sir John T. Duckworth and other distinguished commanders of that period, and was present in several important actions, particularly off the coast of Egypt in 1809, when he was engaged in the boats under Lieutenant Taillour against some French vessels defended by strong batteries in the Bay of Rosas. Afterwards he was appointed to command the *Cephalus*, sloop, eighteen guns, which vessel contributed to the destruction of ten armed feluccas on the beach near Cetraro, in the Gulf of Policastro. He was actively employed on the Italian coast, and had much severe fighting with the enemy, until he obtained his post rank in July, 1812. He returned to England with despatches from Lord William Bentinck. He was subsequently appointed to the *Bonne Citoyenne* and *Euryalus*, in which vessel he escorted Sir William Hamilton, the British Ambassador, to Naples. In May, 1826, he was appointed to the command of the *Herald* yacht, to attend the late Duke of Devonshire on his Extraordinary Embassy to Russia. For some time, as Captain Clifford, he was employed in attendance on the Lord High Admiral, the Duke of Clarence, afterwards King William IV.; and in 1828 he took out Lord William Bentinck as Governor-General to India. This was his last service afloat; and he was not actively employed after 1831. Sir Augustus sat in Parliament for Bandon-bridge in 1818, for Dungarvan in 1820, and again for Bandon-bridge in 1831. In July, 1832, he was appointed Gentleman Usher of the Black Rod, in the room of Sir Thomas Tyrwhitt, which office he held ever since. Sir Augustus was created a Baronet in 1838. He married, Oct. 20, 1813, Lady Elizabeth Frances Townshend, sister of John, fourth Marquis Townshend; and by her, who died April 10, 1862, he leaves surviving issue, Admiral Sir W. J. Cavendish Clifford, C.B.; Colonel Robert Clifford, late of the Grenadier Guards, Yeoman Usher of the Black Rod; Mr. Charles Clifford, M.P. for Newport, Isle of Wight, formerly private secretary to Viscount Palmerston, and two unmarried daughters. Sir Augustus, during his service as Usher of the Black Rod, occasionally discharged the duties of Lord Great Chamberlain. He was the senior flag officer on the Retired List, his commission as Captain dating from July 28, 1812; Rear-Admiral, March 23, 1848; Vice-Admiral, Sept. 27, 1855; and Admiral, Nov. 7, 1860. The portrait is from a photograph by Mr. Charles Watkins, of Parliament-street.

FORTRESSES OF THE BOSPHORUS.

Our Special Artist at Constantinople has made a trip up the Bosphorus to sketch the old castles and other picturesque features of the scenery along its shores. That famous strait of maritime passage, from the Sea of Marmora to the Euxine or Black Sea, varies in width as it bends to and fro between Europe and Asia, sometimes dividing the two great continents by only half a mile of water, sometimes forming bays on one side or the other, with a breadth of two or three miles. Our readers know that Stamboul, the properly Turkish city of Constantinople, stands at the south-west entrance to the Bosphorus, overlooking the Sea of Marmora; and that it is separated by an inlet called the Golden Horn from the town suburbs of Galata and Pera, the former being inhabited by the Greek Christians, and the latter by other European residents. On the Asiatic shore of the Bosphorus, directly opposite Stamboul, is the Turkish village, or rather town, of Scutari, where the military hospital of the Allied armies was established in 1855, and where in the cemetery lie numbers of our brave officers and soldiers. From these points one may proceed by steamer up the Bosphorus, a length of more than twenty miles, enjoying a continual succession of beautiful and interesting views on both sides of the strait. Nearest to Constantinople, on the European side, are the Imperial arsenal of Tophané, for the Sultan's artillery, and the Imperial Palace of Dolma-baghtché; but the Sultan has two or three other palaces on the Bosphorus. Several miles further on, the opposite shores are guarded respectively by the ancient fortresses of Rumeli Hisar and Anadolu Hisar, which were completed in 1451, three years before the Turkish conquest of Constantinople, by the conqueror, Mohammed II., he being then already in possession of the adjacent provinces. Beicos Bay soon opens to view on the Asiatic side, with the Giant's Mountain rising beyond it. Opposite Beicos Bay, on the European shore, is the pleasant village of Therapia, with the summer residence of the British Ambassador. At the foot of the Giant's Mountain is a small port named Unkar Skelessi, which is celebrated in diplomatic history for the signature of the Treaty of 1833 between Turkey and Russia, whereby the Sultan agreed to open or close the Dardanelles at the request of the Czar. The summer palace of the Sultan at this place has been converted into a paper manufactory, with its costly marble floors.

North of Beicos Bay, on the promontory which bore the ancient name of Argyroconium, about fourteen miles from Constantinople, stands the fortress of Mahdjar, shown in one of our Artist's sketches. Its name is derived from a Hungarian or Magyar prisoner, of some distinction, who was here confined during the old wars between the Austrian and the Turkish Empires. On the other side of the strait, in Europe, is the harbour of Buyukdere, and the Russian Ambassador has his summer residence there. Passing on still further towards the Black Sea, one finds the Bosphorus suddenly narrowing to its least breadth, where the Bithynian mountain range of Olympus, on the right hand, seems approaching a junction with the Thracian range of Mount Hæmus, on the left hand. Here are the opposing fortresses of Anadolu Kavak and Rumeli Kavak; the name of "Anadolu," or "Anatolia," being Greek for the Levant, or quarter of the rising sun, and commonly applied to Asia Minor; while "Roumelia" was the name given to the whole metropolitan territory of Constantinople under the Roman Emperors. When the Byzantine or Eastern Empire was overthrown in the Middle Ages these positions were occupied by the Genoese, in connection with the Crusades; and a desperate struggle took place afterwards between them and the Ottoman Turks for the possession of Rumeli Kavak, formerly a Genoese stronghold. We have not mentioned all the castles and fortresses along the Bosphorus. At its north-eastern extremity, opening to the Black Sea, are two lighthouses, one for each shore. "Poiras Bournou" means "the North Cape," the word "Poiras" being a Turkish corruption of "Boreas." Here is the fort shown in one of our Illustrations; opposite to which, on the Tashlanjik or "Stony" promontory, is the fort of Karibjeh, built on European ground.

We shall continue this series of Illustrations of the Bosphorus in our next.

The first meeting of the Fox Club this season took place at Brooks's on Saturday evening last.

THE FORTIFICATIONS OF THE BOSPHORUS.

FROM SKETCHES BY OUR SPECIAL ARTIST.

FORTRESS OF MAHDJAR, ASIATIC SIDE.

POIRAZ BOURNOU FORTRESS, ASIATIC SIDE.

asking for a certain telegram not included in the Eastern Bluebook, and for the names of the "important personages" with respect to whom Sir Henry Elliot stated, in his despatch of Sept. 18, that "they have made a declaration that the Turks must be driven out of Europe"? There was the customary large gathering which always assembles to hear a set speech from the most eloquent and illustrious member of the House. Mr. Gladstone began by disowning the soft impeachment to which currency had been given in a North of England paper to the effect that Prince Bismarck, the Emperor of Russia, the Earl of Beaconsfield, and Mr. Gladstone had leagued together to place the Duke of Edinburgh on the throne of the Sultan. Laughter greeted the demolition of this *canard*; and, when the mirth of hon. members had subsided, the ex-Premier plunged into the subject-matter of his motion with characteristic earnestness. Taking for his text the following despatch from Lord Derby to Sir Henry Elliot, Mr. Gladstone called particular attention to the words we print in italics:—

Foreign Office, Sept. 5, 1876.

Sir.—For your guidance as to the language to be held by you to the Turkish Ministers in the present juncture, it is right that you should be accurately acquainted with the state of public opinion in England on the subject of Turkey. It is my duty to inform you that any sympathy which was previously felt towards that country has been completely destroyed by the recent lamentable occurrences in Bulgaria. The accounts of outrages and excesses committed by the Turkish troops upon the unhappy, and, for the most part, unresisting population, has raised an universal feeling of indignation in all classes of English society, and to such a pitch has this risen that in the extreme case of Russia declaring war against Turkey her Majesty's Government would find it practically impossible to interfere in defence of the Ottoman Empire. Such an event by which the sympathies of the nation would be brought into direct opposition to its treaty engagements would place England in a most unsatisfactory and even humiliating position; yet it is impossible to say that if the present conflict continues the contingency may not arise. The speedy conclusion of a peace, under any circumstances most desirable, becomes from these considerations a matter of urgent necessity. Her Majesty's Government leave it to your Excellency's discretion to choose the arguments which you shall employ, but you will see from what I have stated how essential it is that the Turkish Ministers should be made alive to the position in which the conduct of their own authorities has placed them, and you will understand that you are warranted in using the strongest language, should occasion require it, to enforce upon the Porte the expediency of a pacific policy and of moderation in the terms to be proposed.—I am, &c.,
DANBY.

Protesting, in the first place, against this declaration that we had treaty engagements which the sympathies of the nation would not allow us to carry out, and that that would place England in "a most unsatisfactory and even humiliating position," Mr. Gladstone minutely examined the Treaty of Paris, the Tripartite Treaty with France and Austria, and the Treaty of London, with the view of showing that Lord Derby must have referred to the Treaty of Paris in the despatch in question. With reference to the guarantees in this treaty, he quoted, in passing, an opinion of Lord Palmerston, to the effect that they gave us the right to intervene in the affairs of Turkey, but did not impose upon us the obligation to do so. He staunchly defended the action of the late Government in agreeing to the treaty of 1871, which he contended simply reinstated the treaty of 1856 in its former position prior to Russia's repudiation of the Black Sea clauses. Finally, he wished to know how far the Government considered themselves bound by our treaty engagements, and formally put the following questions:—"First of all, whether the humiliating position mentioned means the position of a State bound by treaty to go to war in a certain event. Secondly, it having been the opinion of the Government on Sept. 5 that we were bound to go to war for Turkey if she were attacked by Russia, did they consider that her title to aid was not affected by her breach of faith in respect of promised reforms? And, lastly, which is really the material question, is that still their opinion, or do they consider that we are absolved from the obligations of the Treaty of 1856, and that we are free to act as policy, as justice, and as humanity may seem to require?"

Mr. Hardy was very explicit in his reply, the pith of which was contained in the second sentence of his speech:—"Now, Sir, let me say at the beginning that her Majesty's Government do not consider themselves set free from the treaty obligations to which they were a party in 1856 as well as in 1871." To argue that, whilst Turkey should be bound by the Treaty of Paris, we were free to act as we liked in the matter, was unjust to Turkey, in his opinion. The true meaning of the Treaty was that the Powers who were parties to it conjointly guaranteed the integrity and independence of Turkey; but the Treaty did not bind us to go to war for Turkey. Proceeding with his usual rapidity of utterance (a rapidity for which he is not blessed by the reporters), the Secretary for War declared with much animation, amid cheers from the Ministerial benches, that those who agreed to the Treaty of 1871 had "no right to turn upon us now and say that we are to be blamed because we say it is our duty to fulfil the obligations which you then undertook." The fact that this treaty guaranteed the integrity of Turkey was recognised by the Conference; and, as for the treaty alluded to in Lord Derby's despatch, that was the Tripartite Treaty, which certainly did bind us to go to war for Turkey if called upon by Austria and France. The Government would not renounce our treaty engagements, Mr. Hardy said, in conclusion; nor would they consent to coerce Turkey by force; but he was not without hope that the Porte would yet yield to the moral influence of the European Powers.

Lord Robert Montagu cannot be said to have sustained the liveliness which the Secretary for War infused into the debate; but cordial commendation is due to Mr. Courtney for a maiden speech of much ability, and to Mr. P. J. Smyth for an address which, though evidently prepared, was pitched in a high and eloquent strain. Without giving a dry list of the other hon. members who previously delivered themselves on the Eastern Question; but merely mentioning, in passing, that Mr. Forsyth maintained that independent position he has taken up with regard to the Ministry, and made a flank attack upon the Government from his place on the Conservative side of the House, we come to the event of the sitting, the acrid attack upon Mr. Gladstone.

Mr. Chaplin, pointedly addressing the right hon. member for Greenwich, accused him, in scolding tones, of fomenting the agitation on the Eastern Question last autumn, and of lacking the courage to meet the Government face to face in that House. What he wanted to know was, whether he intended, by a definite motion, to test the opinion of Parliament upon the misconduct which he alleged against the Government. Warning to his work, Mr. Chaplin had the hardihood to say that, as a man of honour, there was only one course for Mr. Gladstone to take. The ex-Premier and Colonel Mure rose at the same moment; and, the gallant Colonel having protested against the personalities of Mr. Chaplin, Mr. Gladstone appealed to the Speaker to decide whether it was for the hon. member to instruct him "as to the only course which it was competent for a man of honour to follow." Whereupon the Speaker gravely declared "the hon. gentleman in making use of that expression has exceeded the limits of Parliamentary discussion."

A humble apology was tendered by Mr. Chaplin; but, he added, that it was true by the forms of the House the right hon. gentleman could not challenge their opinion that night, but, to enable him to do so another night, he moved the adjournment of the debate. The House was now in a thoroughly stormy

condition. Cheers had been met by counter cheers, and the Liberal cheers broke out afresh as Mr. Gladstone rose to second the motion and answer the allegations made against him. He showed some emotion in his opening words; but speedily recovered himself, and, in a fine vein of irony, corrected the mis-statements of Mr. Chaplin, and snubbed Lord George Hamilton for some interruptions which escaped him in the excitement of the moment. Mr. Gladstone reminded his now subdued opponent that he had simply joined in the national demonstration of hostility to Turkey for the perpetration of the Bulgarian atrocities; and the right hon. gentleman, while declining to accept at present the challenge thrown out to him, said "When the time arrives, and the whole matter is finished, I don't think he will have any reason to complain of any reticence or suppression on my part." Sir Stafford Northcote having repeated the challenge of Mr. Chaplin, but in more Parliamentary language, the Marquis of Hartington replied in a speech marked by much spirit and common-sense, Sir W. Harcourt vigorously attacked the policy of the Government with zest; and, after a desultory conversation, the debate was adjourned for a week. Before the House separated, Mr. E. Stanhope introduced his Maritime Contracts Bill; Lord Elcho, a Scottish Game Laws Amendment Bill; and Sir M. Hicks-Beach nominated the Select Committee on the Sunday Closing Bill for Ireland.

On Monday the inevitable Eastern Question cropped up in the shape of Mr. Gladstone's query as to who were the "important personages" Sir Henry Elliot alluded to in the despatch to which he had called attention on the previous Friday. The Chancellor of the Exchequer could not say for certain; but neatly implied that there was a widely-entertained opinion in this country that the right hon. member for Greenwich was one important personage who had recommended a policy favourable to the expulsion of the Turks from Europe. The quieter theme of the Universities was taken up by the House on the motion of Mr. Gathorne Hardy, who said that the Oxford and Cambridge Bill intrusted to his charge was practically a combination of the two bills of last Session, and that its objects were to enable the rich colleges to assist the poor, to regulate University fellowships more efficiently, to establish additional fellowships, and improve the professoriat. Mr. Lowe ("who owed so much to Oxford," according to Mr. Hardy) found grave faults in the constitution of our Universities, but did not think the bill would remedy many of the evils, and therefore opposed it—a course which Mr. Mowbray regarded with surprise, as showing lack of "filial affection." Mr. Osborne Morgan, Mr. Beresford Hope, Dr. Lyon Playfair, Sir John Lubbock, and others, having spoken pro. and con., Mr. Gorchen supported the measure, which the Chancellor of the Exchequer, not unnaturally, thought a wise one, and which was read a second time. Among the other bills read a second time were the Irish Judicature Bill and the Justices' Clerks Bill; and among the most important intimations with regard to the future was the promise by Mr. James of a motion respecting the City Companies.

As Mr. Forster remarked this week, in a postprandial speech, anyone who went to St. Stephen's on Tuesday evening "might well have supposed there was only one House, and that the House of Lords; for, while the House of Commons was counted out rather early, a great number of the members of that House went to the Upper House" to hear the set debate upon the Duke of Argyll's motion. Indeed, beyond the explanation of Mr. Ward Hunt that Captain Pim had in his question greatly exaggerated the strength of the Russian squadron in the Pacific, and the peaceful statement that our relations with Russia are of a friendly character, nothing of interest came before the Lower House, save the presentation by Mr. Ritchie of a monster petition bearing 15,300 signatures, complaining against the formation of a smallpox hospital in Limehouse, and the hon. member's motion (subsequently withdrawn) that a Committee should inquire into the grievance.

On Wednesday the subjoined bills were read the second time:—Ecclesiastical Offices and Fees Bill (moved by Mr. Cowper-Temple); Scottish Game-Law Bill, with regard to which the Lord Advocate raised a laugh by saying it "would include everything, from a woodpigeon to a sparrow, from a reindeer to a rat;" and the Voters (Ireland) Bill. Leave was then given to Mr. A. Mills to bring in a bill to make better provision for the union of contiguous benefices; to Mr. Pease for a bill to abolish the punishment of death; to Mr. Sheridan for a bill to protect railway passengers; to Mr. Pease for a bill to amend the law as to vaccination, so far as accumulating penalties are concerned; and to Sir H. Jackson for a bill to amend the law as to the taxation of costs.

On Thursday Mr. J. D. Hutchinson took his seat for Halifax, Mr. Sidney Herbert for Wilton, and Mr. King Haman for Sligo. Replying to Mr. Potter, Lord J. Manners said that, looking at the great cost of the postal service with India, he could hold out no hope of a reduction in the rate of postage between this country and India. Mr. Bourke, in answer to Mr. Rylands said that, according to a telegram received from Constantinople, there was no truth in the statement in the *Times* that Sheket Pasha had been appointed to an army corps on the Danube. Lord Sandon, responding to a question from Sir W. Barttelot, informed the House that there had been outbreaks of the cattle plague in the metropolis and parts of the country; but the most prompt measures had been taken to stamp out the disease, and so far with success. The most serious outbreak had occurred at Hull, but directions had been given to the local authority to prevent all cattle exposed for sale leaving the town. From Germany and Belgium the importation of cattle was prohibited. From the Netherlands and France the cattle were ordered to be slaughtered on landing; but, as regarded Spain, Portugal, and Denmark, they were allowed to enter, as there was no disease existing amongst them in those places, and ample precautions had been taken to prevent its introduction therein. Mr. Bourke informed Dr. Lush that the attention of the Foreign Secretary had been directed to the inconveniences which would result to British invalids and residents from the proposal before the French Legislature to prohibit medical practice in France by foreign surgeons; and he was still in communication with the French Government. Some discussion took place in consequence of an inquiry made by Sir C. Dilke as to the course to be pursued with reference to the resumption of the adjourned debate on Eastern affairs initiated by Mr. Gladstone last Friday. The Speaker intimated that the notices standing upon the paper as amendments to the motion for going into Committee of Supply must take precedence if they were persisted with. Mr. Trevelyan was willing to withdraw his motion if the House generally desired it. Sir W. Frazer, however, declined to postpone his notice, except in favour of a definite motion challenging the policy of the Government. The Marquis of Hartington, on behalf of the front Opposition bench declined to submit such a motion, and stated that though he did not think the debate ought to be left where it was left by the Secretary for War last Friday, he did not see what good could arise from widening the question beyond the limits within which it had originally been confined; and if by continuing the debate the Government

would be at all embarrassed, he should advise that it should not be resumed. The Chancellor of the Exchequer said he could not offer facilities for resuming the debate unless it was to take a definite shape. The matter then dropped. The Prisons Bill upon its second reading was the great subject of discussion during the rest of the night.

THE CHURCH.

A dining-room clock has been presented by the parishioners to the Rev. H. M. Davey, Vicar of Portfield, on the occasion of his marriage; also an egg-stand, by the choir.—The Rev. A. L. Foulkes has received a gift of £80 from the congregation of St. Paul's, South Hampstead.

The Church and the missions in connection with it have sustained a great loss in the death, last week, of Miss Mackenzie, sister of the late Bishop Mackenzie, of the Universities' Mission in Central Africa, and compiler of the well-known missionary periodical the *Nel*.

The report of the Bishop of London's Fund for the past year states the receipts at £27,055, the bulk of which was given for its general purposes. One third of the available resources was appropriated to the maintenance of living agents, and a sum of nearly £12,000 was paid under the head of churches.

The chancellorship of Salisbury Cathedral has been conferred upon the Rev. R. G. Swayne, M.A. (Oxon), Rector of St. Edmund's, and one of the canons residentiary. The prebendal stall of Gillingham Major in the cathedral has been conferred on the Rev. Charles Tower, M.A., Rural Dean and Rector of Chilmark.

By the permission of Dean Stanley, a marble slab has recently been placed over the grave of Muzio Clementi, in the cloisters of Westminster Abbey, with the following inscription:—"Muzio Clementi, called 'the Father of the Piano-forte.' His fame as a musician and composer procured him the honour of a public interment in this cloister. Born at Rome, 1752. Died at Evesham, 1832."

Application was made last Saturday to Lord Penzance, on behalf of the three aggrieved parishioners of St. James's, Hatcham, for the release of the Rev. Arthur Tooth, on the ground that, by his imprisonment, the law of England had been sufficiently vindicated and sustained. Lord Penzance granted the application, and made an order for the prisoner's immediate release, without prejudice to the recovery from him of the costs incurred in consequence of his contumacy.

An influential meeting, presided over by the Bishop of Lincoln, and attended by the Duke of St. Albans, Earl Manvers, and others, was held at Nottingham, yesterday week, when it was proposed that, as Lincoln is the largest diocese in England, containing over two million acres, 800 benefices, and 1000 clergy, it ought to be divided, and Nottinghamshire being a rapidly-increasing county, should be a separate see. It was decided to petition the Home Secretary on the subject. £5000 has already been subscribed. The Bishop of Lincoln and the Bishop of Lichfield are prepared to surrender £500 a year towards the endowment of the new diocese.

The usual monthly meeting of the Incorporated Society for Promoting the Enlargement, Building, and Repairing of Churches and Chapels was held, at the society's house, Whitehall, on Monday. Grants of money amounting to £1335 were made in aid of the following objects, viz.:—Building new churches at Harrow Green, parish of Leytonstone, Essex, and Wolverhampton, All Saints; towards increasing or otherwise improving the accommodation in the churches at Ashurst, near Steyning; Granston, Fishguard; Heigham, Norwich; Llan-guillo, Radnor; Long Sutton, Langport, Somerset; S. Pinnock, Liskeard; Selborne, Alton, Hants; Slapton, Towcester; Sternfield, Saxmundham; Sunningwell, Abingdon; Undy, Newport, Monmouth; Weaverham, Cheshire; Witham, Essex; and Woodland, Ashburton, Devon. The society also accepted the trust of sums of money as repair funds for St. Luke's Church, Prestonville, Brighton; and Woodlands, parish of Kingsclere, Hants. The society closed its financial year, 1876, on Dec. 31, instead of, as formerly, on March 31. During the nine months remaining in 1876 grants amounting to £9075 have been voted in aid of building twenty-five new churches, rebuilding ten, and restoring, &c., fifty-seven. The carrying out of the above works has called from the promoters of them the sum of £247,012. The society has also voted the sum of £745 in aid of twenty mission or school churches.

"LISTENING FOR THE FOOTSTEP."

The romance of history and poetry has invested the social life of the Italian cities, in the Middle Ages, with a sort of dramatic interest which enhances the attraction of Italian scenery and works of fine art. But the reality was not of such a character as we should like to see revived in any country of Europe. Honest and faithful Christian folk, good husbands and wives, fair-dealing neighbours, law-abiding citizens averse to privy conspiracy, sedition, and rebellion, may have dwelt in Florence under the Medici, and in Mantua or Verona, with the Montagues and Capulets and other powerful aristocratic houses of those turbulent times. But the peaceable and well-disposed part of the community was quite overborne, as it seems, by the pride and violence of those rival clans and factions which rallied around the leading families of the nobility, and waged continual war against each other in the very streets of the town. The practice of stealthy assassination was then more frequent than the less villainous though equally wicked custom of duelling, as single combats were usually avoided; but it often happened that a band of half a dozen kinsmen, or a leader accompanied by his friends and servants, would meet and fight with a similar company of their foes, just come out of the neighbouring palace. We need only recall to mind those scenes of "Romeo and Juliet," a subject borrowed by Shakespeare from the Italian tale by Luigi da Porto, of Vicenza, in which we see Tybalt and Mercutio as ready to exchange their deadly cuts and thrusts, as the swaggering servants are to bite their thumbs at one another. In the other plays of Shakespeare dealing with Italian stories—for instance, that of "Othello," there is evidence of the regular art of assassination being perfectly familiar to most of the vicious people of that age and nation. The contemptible young fool Roderigo, for example, at the beginning of the fifth act, is led by Iago into the street at midnight, when the following instructions are given him for the killing of Cassio:—

Iago. Here, stand behind this bulk; straight will he come.
Wear thy good rapier bare, and put it home—
Quick, quick, fear nothing; I'll be at thy elbow—
It makes us, or it mares us; think on that,
And fix most firm thy resolution.
Roderigo. I have no great devotion to the deed;
Yet he hath given me satisfying reasons.
'Tis but a man gone; forth, my sword; he dies.

And so the would-be murderer of Cassio takes his stand for the infamous deed in contemplation. Our Engraving of the picture, by a foreign artist, entitled "Listening for the Footstep," shows the figure of an Italian "bravo," or hired assassin, in this attitude of waiting for a most wicked purpose.

"LISTENING FOR THE FOOTSTEP." BY H. J. DUWÈK.

THE LATE SIR AUGUSTUS CLIFFORD, BART., USHER OF THE BLACK ROD.

CHILDREN'S HOME, METROPOLITAN CONVALESCENT INSTITUTION,
KINGSTON-ON-THAMES.

NEW SCHOOL AT BREEDON-ON-THE HILL, LEICESTERSHIRE.

METROPOLITAN

CONVALESCENT INSTITUTION.

The building shown in our Illustration is the "Home for Children," at Kingston-on-Thames, connected with the Metropolitan Convalescent Institution, which has its principal establishment at Walton-on-Thames. There is accommodation at Walton for three hundred adults, and at Kingston for a hundred and fifty children under fourteen years of age. This beneficent charitable institution was founded in 1840, at the suggestion of the late Mr. Theodore Monro. It is designed "to provide an asylum in the country for the temporary residence of the convalescent and debilitated poor, whose restoration to health is impracticable in the hospitals and at their own unhealthy and ill-provided homes, but may be speedily effected by pure air, rest, and nutritious diet." Every subscriber of one guinea annually has the privilege of recommending one patient; and whoever knows anything of the real wants and sufferings of his poorer neighbours, must often have wished for the means of helping them precisely in this way. It may be the saving of many a working-class family from ruin, to procure for the husband and father, or the wife and mother, or some other working member of the household, after partial recovery from sickness or accidental hurt, such an opportunity of regaining complete strength. The separate branch of this institution for children was added, some years ago, by taking a house and garden at Hendon for the reception of forty girls, and subsequently by an amalgamation with the late "Home for Convalescent Children," at Mitcham, which gave accommodation for an equal number of boys. These two establishments are now superseded by the "Children's Home" erected on Kingston-hill, which was opened, on July 12, 1875, by their Royal Highnesses the Prince and Princess of Wales. The building, of which Mr. Saxon Snell was the architect, is well adapted to its purpose, with the best arrangements for ventilation, drainage, warming, and water supply, as well as for the complete supervision of the children by day and night, and for the isolation, in case of need, of any who may be attacked by an infectious disorder. During the last year, 1876, the numbers of children admitted were, boys 469, girls 457. The neighbouring clergy give weekly services; besides which those of the children who can go out attend church at Norbiton and at St. Paul's, Kingston-hill. The average length of time during which the children remain is four weeks, at an average cost of £2 5s. 2½d. for that period, besides which there are expenses of fuel and washing, conveyance of children, salaries, and wages, repairs, furniture, and other charges, making the annual expenditure £2093 for the children's branch alone. The main establishment at Walton costs nearly £5000 a year, receiving last year 1222 male patients and 1203 females. The Metropolitan Convalescent Institution has funded property to the amount of nearly £10,000, as a sort of reserve; but it is dependent on annual subscriptions, and we feel that it ought to be commended to public support. It has a good board of management, under the presidency of Colonel W. F. Grant, with Lord Jocelyn Percy, as vice-chairman, and Mr. Russell Gurney, M.P., as treasurer. The offices of the institution are at 32, Sackville-street.

SCHOOL AT BREEDON.

Our Illustration represents the new school at Breedon-on-the-Hill, Leicestershire, which has been just opened. It was built by Mr. Abney Hastings, at the desire of his wife, the late Countess of Loudoun. The building is of stone, from the designs of Mr. Joyce, of Stafford. It is calculated to accommodate a hundred and thirty children. The front gables bear two inscriptions in Latin—the first inscription being, "Has ædes Editha, Comitessa Loudouniæ, Domina de Hastings, fieri fecit;" that is to say, "Edith, Countess of Loudoun, Baroness Hastings, caused this building to be raised;" while the second inscription is part of a verse of the 18th Psalm, "Deus meus, illumina tenebras meas," or "O Lord, my God, make my darkness to be light." The sunk panel under the belfry bears the monogram and coronet of the deceased Countess of Loudoun.

NATIONAL INSTITUTION for DISEASES

of the SKIN, Gray's Inn-road and Mitre-street, London. Established 1864. Physician, Dr. Barr Meadows, 47, Victoria-street, S.W.

A DIVIDEND at the rate of 30 per cent per annum was paid this month to the shareholders of HOLMBUSH, LIMITED. (A Pamphlet containing full particulars of this successful mine may be had free of charge by sending name and address to Mr. S. BOOME, 133, Palmerston-building, Bishopsgate street, London, E.C.)

MANUETTO, BRAZILIO and TAMBOURIN. GLUCK and HALLE.
 Price 3s. each, may now be had of FORTY-THREE, 37A, Regent-street, Oxford-street, Liverpool, and other streets, South King-street, Manchester; and all Music Publishers.

PIANIST'S ROYAL ROAD. KUHE. The most perfect course of study and Library of high-class Music. Edited by Kuhe. Each Book, 16 pages, full size, from engraved plates, 1s., post-free. Prospectus on application.
 CUNNINGHAM BOOSEY and Co., 2, Little Argyll-street, W.

CHAPPELL and CO. HAVE ON VIEW PIANOFORTES by BROADWOOD, COLLARD, ERARD, and also those of the best French and German Manufacturers, which may be HIRE on the THREE-YEARS' SYSTEM, at 50, New Bond-street.

CHAPPELL'S ENGLISH 20-GUINEA or SCHOOL-ROOM PIANOFORTE, with Check Action, in Canadian Walnut or Mahogany. This instrument combines good quality of tone and excellence of workmanship. Capable of enduring hard school practice without going out of order. In Solid Oak or White Ash, 25 gs.; Rosewood or Walnut Case, 27 gs.

CHAPPELL and CO.'S ORIENTAL MODEL PIANOFORTE. Iron Frame, Trichord throughout. Check Action, Seven Octaves, Solid Walnut Case, FIFTY-FIVE GUINEAS; or in Solid Mahogany or Black Walnut Case, and Check Action, FORTY-THREE GUINEAS; with Plain Action, THIRTY EIGHT GUINEAS.

Made expressly to withstand the heat and moisture of extreme climates. Every part that is glued is also secured with screws. The felt on the hammer, &c., is fastened with pins. The back and the silk frame are lined with perforated zinc to keep out damp and insects; and every precaution taken that has been suggested by persons who have had many years' experience in the care of musical instruments in India and China. Testimonials of the durability of these instruments can be seen at 50, New Bond-street. The price includes—1. Packing-cases of tin and wood; 2. A suitable tuning hammer or key; 3. A tuning fork; 4. Some additional strings; 5. A Book on Tuning and Preserving the Instrument; 6. And the Carriage to the Docks. Show-rooms, 50, New Bond-street. Factory, Chalk Farm-road.

CHAPPELL and CO.'S MIGNON IRON GRANDS, with Transverse-String Bass, 75 gs. to 85 gs. The smallest Horizontal Piano made; length only 5 ft. 9 in.

CHAPPELL and CO.'S THREE-YEARS' SYSTEM OF HIRING HARMONIUMS, from 5 gs. per year and upwards.

CHAPPELL and CO.'S ALEXANDRE ORGAN HARMONIUMS, from 4 gs. to 120 gs. Full Illustrated List free by post.

L'HARPE EOLIENNE, ORGUE DE SALON. with eighteen stops, fourteen half stops of reeds, perfect action, double expression, pneumatic action, &c., of the finest workmanship. This organ has been commended highly by

KUO-TA-JÊN, THE MINISTER OF CHINA IN LONDON.

LIU-TA-JÊN, THE ASSISTANT CHINESE MINISTER.

THE DISCOVERIES AT MYCENÆ.

We are indebted to Mr. Marwood Tucker for some Illustrations, made from recollection, of the interesting exhibition of Dr. Schliemann's Mycenæ antiquities, privately shown to Lord and Lady Salisbury and their party at Athens. All the articles which have been brought from Mycenæ are in the custody of the Royal Bank of Greece, and had not previously been exhibited. They covered completely the large table on which they were laid out, the place of honour in the centre being

given to (No. 2 in our Illustrations) the singular and really beautiful cow's head of silver, with golden horns. The object marked No. 1 in our Illustration is one of the thin gold masks which had covered the faces of the skeletons in Agamemnon's tomb. These are extremely curious, but, alas! extremely ugly, the features being very coarsely fashioned, with sharp lines and angles, like the face a child might make out of wood with his pocket-knife. If Agamemnon is to be judged by the portrait of him, thus disinterred, he cannot certainly have represented the Greek traditional beauty; and if his brother

was like him it is little to be wondered at that Helen should have preferred Paris.

No. 2 is the finest piece of art in the collection. It is by far the most delicately worked of all the articles now at Athens. The head of the cow, about 4½ in. or 5 in. long, is of silver, much discoloured, but very carefully modelled, and still showing the marks of the finishing-chisel. The horns are nearly 7 in. long, and are of pure gold. As they have become detached from the head at each side of the crest, it can be seen that they are hollow. The head itself is solid.

1. Gold Mask, supposed to be of Agamemnon, found with Skeleton in Agamemnon's Tomb.
2. Silver Cow's Head, with golden horns, emblematic of the goddess Hera, or Juno.

3 and 4. Golden Tankard and Goblet.
5 and 6. Thin Gold Plates and Buttons, dress ornaments, found with Skeletons.

DR. SCHLIEHMANN'S DISCOVERIES AT MYCENÆ: MASK, ETC., FROM AGAMEMNON'S TOMB.

No. 3 is a tankard of very thin but pure gold, with low repoussé ornament. There are several of these, some with handles and some without; but all when found were much battered. The one drawn has been in some degree restored to its shape. They are about 3½ in. high and 2½ in. in diameter at the top.

No. 4 is a tazza-shaped goblet of silver, with bands of gold ornament. The silver in this, as in all the other articles discovered, is crusted and discoloured as if by the action of fire, while the gold remains almost as fresh as when first made. The workmanship is very good, except that the handle is roughly fixed on by little pegs or nails. This goblet is about 8 in. high and 6½ in. in diameter. It is the largest of the objects as yet brought to Athens.

No. 5. Very thin gold ornaments, of indifferent repoussé work. There are many of these, almost identical in shape and pattern, but of various sizes, from 2 ft. to 6 in. long and proportionately broad. The larger ones were probably belts; the smaller were perhaps frontlets, worn above the forehead. They are, as well as the buttons next described, almost as thin as gold-leaf.

No. 6. Gold buttons or discs, about 2½ in. in diameter, also of poor repoussé work. The skeletons found rested on layers of these singular ornaments, and Dr. Schliemann accounts for their quantity by supposing them to have studded thickly the robes, which would naturally have long since fallen to pieces.

We lately presented, from sketches taken on the spot by our Special Artist, Mr. Melton Prior, several Views of the Ruins of Mycenæ. The excavations begun by Dr. Schliemann, with the permission of his Majesty King George, have been more than once noticed in this Journal. At a recent meeting of the British Archaeological Association in London, Mr. Thomas Morgan, the treasurer, read an instructive paper on the Ruins of Mycenæ, with reference to the late discoveries there. Although, he said, the shores of ancient Argolis and the Ægean Isles might seem altogether beyond the range of such archaeology as their Association took cognisance of, yet the great interest excited by Dr. Schliemann's discoveries quite justified their stepping out of the beaten path to look at them. In his remarks he would endeavour to keep in mind the unities of time and place. Accordingly, he spoke of the traditional date for the capture of Troy by the army of Agamemnon, King of Mycenæ, as given by the great chronologist of antiquity, Eratosthenes—viz., B.C. 1184—and of other determinations of the same epoch by others of the ancients, as well as by some modern authorities. Whatever haze of mythical obscurity might hang over these times, it was now quite clear that some notice must be taken of historical events that happened before the age of Pisistratus and Cyrus. Mr. Morgan appealed in proof of this position to the great progress made in the present century in the knowledge of facts many hundred years older than what used to be deemed the highest limit of trustworthy record. The interpretations of hieroglyphical and cuneiform inscriptions, made accessible to all in the valuable publications of the Society of Biblical Archaeology, and the writings of Sir Henry Rawlinson, Dr. Birch, Messrs. Chabas, Lenormant, and other scholars, could no longer be ignored. Under the Pharaoh Thothmes III. B.C. 1600-1550—one of whose splendid obelisks, the so-called "Cleopatra's Needle," it was not to the credit of its owner, the British nation, to leave at Alexandria—Egypt had reached the height of its power; and there was reason to believe that Greece and its isles were then subject to Thebes on the Nile. During Egypt's next dynasty, the nineteenth, reigned the great Sesostris, whose accession was placed by the French critics in B.C. 1410. He conquered the powerful Kheta, with part of whom Mr. Gladstone had identified the Keteloi, whom Homer places in the Troad. Under Menephtha, son of Sesostris, hieroglyphical inscriptions recorded an unsuccessful invasion of Egypt, in which Greeks took part. About a century later, under Rameses III., of the twentieth dynasty, a similar attempt was made, just like what is related in the "Odyssey," in which, as in the poem, Pelasgi from Crete really fought. Reference was also made to the contact of the Phœnicians with the Greeks, who borrowed much from that great seafaring and civilised people in the earliest times. Coming to Greece itself, and to the rule of the Perseids and Atridae in Argolis, where, as the bard says, they held Argos, and Tiryns, and Hermione, and Asiné, and Eionæ, and Epidaurus, and Ægina, and Mases, and Mycenæ, Mr. Morgan cited from the "Iliad" the famous passage giving the history of Agamemnon's sceptre from the time when it was first wielded by Pelops. The trilogy of Æschylus was also referred to for the traditions relative to Agamemnon's matricide son Orestes. The text of Pausanias, the Greek topographer, on which Dr. Schliemann so much relies for his identification of the tombs of Agamemnon and other members of the great house of the Atridae, was cited and commented upon at length. "The Gateway of the Lions," "The Treasury of Atreus," and other circular buildings in the oldest style close by, were described in detail, and illustrated by constant reference to drawings exhibited on the walls of the room. The strong points of Dr. Schliemann's case were put with much force, and yet with all due candour, before the audience. At the same time, while expressing the greatest admiration of Dr. Schliemann's self-sacrificing devotion to his archaeological enterprises, both in the Troad and Hellas, and recognising fully the great worth (as throwing light on the earliest history of Greece and Asia Minor) of his extraordinary discoveries, the need for caution was not left unmentioned. Such excellent judges of these matters as Mr. Newton, of the British Museum, and Ernst Curtius, the great historian of Greece, are about to follow in Dr. Schliemann's footsteps and to test the truth of his statements. Their report will be looked for with great eagerness; we hopefully await the result.

The Chatham Dockyard Branch Railway was opened for traffic yesterday week, and a service of goods-trains now runs daily between the dockyard and Chatham station.

From the *Newspaper Press Directory* for 1877 we extract the following statistics on the present position of the newspaper press:—"There are now published in the United Kingdom 1692 newspapers, distributed as follows:—England: London, 320; provinces, 991-1311; Wales, 56; Scotland, 164; Ireland, 141; Isles, 20. Of these there are 103 daily papers published in England, 2 in Wales, 18 in Scotland, 20 in Ireland, and 2 in the British Isles. On reference to the edition of this useful Directory for 1847 we find the following interesting facts—viz., that in that year there were published in the United Kingdom 557 journals; of these, 16 were issued daily—viz., 13 in England, 1 in Scotland, and 12 in Ireland; but in 1877 there are now established and circulated 1692 papers, of which no less than 145 are issued daily, showing that the press of the country has greatly extended during the last thirty years, and especially so in daily papers—the daily issues standing 145 against 16 in 1847. The magazines now in course of publication, including the quarterly reviews, number 808, of which 275 are of a decidedly religious character, representing the Church of England, Wesleyans, Methodists, Baptists, Independents, Roman Catholics, and other Christian communities."

ROYAL INSTITUTION LECTURES.

THEORY OF MUSIC: MUSICAL SOUNDS.

William Pole, Esq., F.R.S., Mus.D. Oxon, gave the first of a course of six lectures on the Theory of Music, on Thursday week, the 15th inst. He began by remarking that music is distinguished among the fine arts by its requiring elaborate provision for its performance, to which public attention is chiefly directed, while composition is too much neglected, to which the term "theory of music" more especially applies. His object would be a discussion of the philosophical principles on which music is founded, so as to distinguish those which have a real physical origin from those which are the result of æsthetical choice. Little information was to be had on this subject till the publication of the "Harmonik und Metrik" of Hauptmann, in 1853, an abstruse work, in which music is explained by metaphysics; but a far more successful attempt was made by Helmholtz, at once a physicist, physiologist, and musician, in his great work, published in 1863, and translated by Mr. A. J. Ellis, in which he has bridged over the gulf previously existing between music and acoustics. The physical parts of Helmholtz's work have been popularly explained and illustrated, especially by Dr. Tyndall in his lectures on sound; but the application of his discoveries and investigations to the technicalities of music has received much less attention. In endeavouring to supply this deficiency Dr. Pole said that he would consider his subject in the following order:—1. The material, musical sounds; 2. The elementary arrangement of the material, such as the formation of scales; and 3. The structure of music, in the more complex forms of melody, harmony, and counterpoint. After exemplifying these on a pianoforte, and explaining the distinction between mere noise and a musical tone which is formed by regular vibrations transmitted to the ear by aerial waves, he proceeded to illustrate the three characteristics of a musical sound. 1. Pitch was shown to depend upon the frequency of the vibrations; thus, if a note is formed by 64 its higher octave will be 128 vibrations; and it was shown by the "Siren" of Cagniard de la Tour, and by other methods, how the number of vibrations of any note may be readily found. 2. Loudness was explained to be due to the amplitude of the vibrations. 3. The cause of the quality ("timbre" or *klängefarbe*) of a note, such as that of a violin or a clarinet, was very obscure, till much light was shown upon it by the researches of Helmholtz, who demonstrated the compound nature of a musical sound by analysing it into its harmonics or over-tones, varying in strength. After illustrating this by means of "resonators," Dr. Pole, with organ pipes, built up a powerful note by means of its harmonics.

SOLID WATER.

Professor Frederick Guthrie, F.R.S., of the Royal School of Mines, gave the discourse at the evening meeting on Friday, the 16th inst. After speaking of the possibility of maintaining the proposition that things the most abundant are, in their nature, most exceptional, he pointed out how this might be applied to the elements, and how remarkably it is applicable to water, which is pre-eminent in its hardness, its athermancy, its thermal conductivity, its specific heat, its refractive index, and its possession of a state of maximum density. He then referred to its power of dissolving bodies, especially salts, and its forming, either alone or with them, solid matter; and pointed out the differences between ice, the water of slaked lime, the water of gelatinisation, and the water of crystallisation. With regard to the last, he commented on the apparently arbitrary peculiarity of some salts, in associating themselves with the water of solidification, and that of others in rejecting it. It was next shown that this difference is less marked than is usually supposed, and that all salts soluble in water can be got as perfectly definite hydrates by subjecting either their strong or weak solutions to cold. In the first case the solution is weakened by the separation of salt; in the second strengthened by the separation of ice, until, in both cases, a certain strength and temperature are reached, at which the salt and water solidify together, and form what the Professor proposes to call "cryohydrates." Diagrams were exhibited showing at what temperatures solutions of various salts of various strengths give up ice or salt as they are cooled, showing, also, the ratio between the water and the salt in the various cryohydrates, and the identity of the temperature of the melting-point of the cryohydrate of any given salt with the temperature attainable by using that salt with ice or snow as a freezing mixture. The ratio between the salt and the water in these cryohydrates, as compared with ordinary atomic ratio, was very briefly considered. The similarity between cryohydrates and silicious minerals was hinted at, and the importance of the former as an element in oceanic circulation was insisted on. Their similarity also to the alloys of certain metallurgical processes was made clear; and, finally, the similarity between the decomposition of a salt solution by heat and by cold was traced out. Lastly, the Professor commented on colloids (such as gum and glue) and Graham's division of matter into crystalloids and colloids. The absence of "grip" between these two was illustrated by showing how incompetent colloids are to form freezing mixtures, how their aqueous solutions freeze exactly at 0 deg. centigrade and boil even below 100 deg. (the freezing and boiling points of water). In respect to this, a series of tubes was shown exhibiting the vapour tensions of water of crystallisation, of saturated salt water, of water, of size, and of gum-arabic solution. A brief reference having been made to the probable structure of jellies, and to the transpiration of water through caoutchouc, Professor Guthrie concluded by insisting that much remains to be done, not only in the multiplication of series of new bodies of complicated structure, but also in the study of the simplest properties of the simplest things.

FLORENCE AND THE MEDICI.

Mr. John Addington Symonds gave his third and concluding lecture on Saturday last. He began with remarks on the intellectual versatility of Lorenzo de' Medici, and his power of adapting himself to all kinds of society. Beside his deathbed, in 1492, were two men, Poliziano and Savonarola—the one representing the voluptuous spirit of the Classical Revival, the other the conscience of Italy. When Savonarola demanded the restitution of freedom to Florence as the condition of absolution, Lorenzo turned his face to the wall; it was then impracticable. This same year (1492) was very important for the future destinies of Italy, for a series of events led to the French invasion under Charles VIII., to whom the folly and precipitancy of Piero, the son of Lorenzo, betrayed Tuscany, and caused the exile of the Medici. A new form of government was founded in 1495, under the influence of Savonarola. The main features of this republic resembled those of Venice; but the magistracy of a permanent president was wanting. While Savonarola lived this was not felt severely; but after his execution, in 1498, it was found necessary to create a Gonfalonier for life, like a Venetian Doge. Factions soon destroyed this artificial constitution; and after the siege and sack of Prato, in 1512, the Cardinal Giovanni de' Medici, and his brother Giuliano, sons of Lorenzo, aided by Spanish soldiers, entered Florence and restored the rule of their family.

Giovanni, elected to the papacy as Leo X. in 1513, governed Florence through his nephew Lorenzo, Duke of Urbino, and strove to acquire a sovereignty for his brother Giuliano in South Italy. The prosperity of the Medici was short-lived. Between 1516 and 1521 they were all cut down by death, except three bastards, the Cardinal Giulio and two lads, Alessandro and Ippolito. Mr. Symonds dilated on Giulio's crafty policy in ruling Florence, and the futile attempts of the burghers to regain their freedom. When Giulio became Pope as Clement VII., in 1523, he delegated his authority and influence to the Cardinal of Cortona, who proved so distasteful that, on the news of the sack of Rome in 1527, the citizens expelled the Medicean bastards and restored the Republic. But Clement, with the army which had ruined Rome, mastered the city in 1530 and set up Alessandro as Prince. It was then briefly told, how Alessandro poisoned Ippolito, and was himself murdered by his cousin Lorenzino, so that the whole line of the old Cosimo was extinguished, except Caterina, who became Queen of France in 1547. But the Medici had become necessary to Florence, and thus, supported by the influence of the Emperor Charles V., in 1539, Cosimo, the youthful son of Giovanni, surnamed the Invincible, a Captain of Black bands (a descendant of Lorenzo, the brother of Cosimo, "the father of his country"), was chosen duke, and, afterwards becoming grandduke, transmitted the title to his posterity. The lecture concluded with a contrast of the constitution of Florence with that of Venice, and allusions to some of the great men whose genius shed lustre on the last days of Florentine liberty.

THE MUSCULAR SYSTEM.

Professor Alfred H. Garrod, M.A., F.R.S., in his sixth lecture on the Human Form, given on Tuesday last, reverted to his illustrated description of the skeleton, by referring to its symmetry, to the similarities and distinctions between the upper and lower limbs, and to the evidence given of the existence of a modified common plan of structure in the highest and lowest members of the animal kingdom. Having alluded to the small space occupied by our feet in standing or walking, which requires careful adjustment of the centre of gravity (determined by Weber's experiments to be in a well-formed man between the sacrum and the last lumbar vertebra), the Professor referred to some excellent diagrams, exhibiting the positions adopted by persons carrying various kinds of burdens, and said that artists often make mistakes through inattention to this principle. He then proceeded to describe the muscles, as fleshy masses, composed of very minute fibres, covering the bones, to which they are sometimes attached directly, and sometimes indirectly, by means of tendons or gristle, the whole forming a most perfect and economical apparatus of motion, well contrasted with a steam-engine, in which about three-fourths of the power is wasted. The muscles act by contraction when excited, becoming shorter and broader, and thereby affect the external configuration of a limb, by change in their shape or change in the surface of the skin, dependent on the approximation of their points of attachment. After referring to different kinds of levers, as exemplified in the human frame, the Professor concluded by alluding to the muscles employed in bending the arm and knee, and to the various beautiful curves formed by muscular contraction, also noticing the flexor and extensor muscles, by which we double ourselves up or expand ourselves.

Professor Huxley will give a discourse on the History of Birds at the next Friday evening meeting, March 2.

The first annual distribution of prizes to the successful students of the Bricklayers' Technical Educational Classes was made on the 15th inst., at the hall of the Society of Arts, by Mr. C. Barry, president of the Royal Institute of British Architects. The chairman, in opening the proceedings, said he was present through the request of Mr. Thicke, the originator of the movement, and his solicitation to the Royal Institute of British Architects to take the movement under their patronage. In bringing together and forming these classes he and the council of the institute thought Mr. Thicke had initiated a movement which would be productive of very beneficial results, its object being to increase a true friendly spirit between employers of labour and employed. Mr. F. E. Thicke gave a short outline of the origin of the movement, and spoke of the success which had attended it to the present time. The great difficulty, however, with regard to technical education in London was the want of places and appliances. Up to the present they had held their classes at the Artisans' Institute in Upper St. Martin's-lane, through the kindness of the Rev. H. Solly, the principal. Other gentlemen spoke, and resolutions in support of the movement were passed.

An illustrated lecture on "English Glee Writers" was delivered, the same day, by Mr. W. A. Barrett, Mus. Bac. Oxon, in the theatre of the London Institution.

Lord Northbrook, presiding at a meeting at the Society of Arts, yesterday week, when a paper on "Indian Railways," was read by Mr. Danvers, referred to the famine in India, and stated that the extension of railways in India was the most effective means of guarding against such a calamity.

General Sir W. Codrington presided at the Royal United Service Institute, the same day, on the occasion of the delivery of the second part of a lecture by Major-General T. B. Collinson, R.E., on "The Present Facilities for the Invasion of England and the Defence thereof." The lecturer pointed out the new elements of danger to our island fortress which have arisen in the course of the last generation, and contended that no defences exist at present in Chatham or London worth mentioning.

Baroness Burdett-Coutts distributed the prizes to the successful candidates in connection with the Westminster Teachers' Association last Saturday, and among the speakers were Lord Hatherley, Canons Barry and Farrar, and Mr. H. Danby Seymour, who presided. The proceedings took place in the new Townshend Schools, Rochester-row, Westminster. It was announced that Baroness Burdett-Coutts intends giving prizes for Scriptural knowledge, to be distributed next year.

Cardinal Manning took the chair at the Society of Arts in the evening, when Dr. Corfield resumed his discourse on the Air we Breathe. The subject of foul air was considered, with special reference to the warming and lighting of houses.

Professor Guthrie, F.R.S., gave the free science lecture at South Kensington Museum the same evening, his subject being Waves. After a clear exposition, with experiments, of some of the principal facts known with regard to the wave motion of water and air (in relation to sound), he went on to speak of a subject in connection with this, which, he said, has occupied his attention for some years. He floated a thin indiarubber ball filled with air on water. Near this he held a large tuning-fork, set in vibration. The floating ball followed the fork. The question he raised was, Is this the attraction? His reply was a decided negative. He had, in the course of the lecture, explained how each oscillation of a wave was followed by a reflection. Here, he argued, the reflection pushed on the further side of the ball. He believed that soon we shall

learn that there is no such thing as attraction—that the apparent pull will be found to be a push in the opposite direction. The approach, as in the case of the ball, need not necessarily be called attraction; and it was better in all cases to substitute the word approach, which was a fact, for attraction, which was a theory.

The Victoria (Philosophical) Institute held a meeting, on Monday evening—Dr. C. Brooke, F.R.S., in the chair—when Mr. Morhead read a paper on Comparative Psychology. It was announced that the society will hold the first of a series of large meetings on April 9, at the Society of Arts' house; and that the next paper, in March, will be read by Professor Birks, of Cambridge.

The second of two lectures on Modern Agriculture was given, on Monday afternoon, at the London Institution, by Professor Armstrong, F.R.S.

Lady Anna Gore-Langton, who has recently returned from India, where she has been staying with her brother, the Duke of Buckingham and Chandos, Governor of Madras, gave an address, last Tuesday, on the Social Condition of Women in India, at the office of the National Society for Women's Suffrage, Berners-street. Sir George Campbell, M.P., presided.

FINE ARTS.

WORKS BY THE LATE MR. J. F. LEWIS, R.A.

The Graphic Society held its fourth soirée of this season at University College, on the 14th inst., on which occasion, in addition to the allotted contributions of the evening, a most interesting selection of the works of the late Mr. J. F. Lewis, R.A., were exhibited to a numerous assemblage of members and visitors, who, familiar with the high repute of this artist's productions, gladly availed themselves of this—probably the last—opportunity of seeing any number of them brought together; for, though the sale of Mr. Lewis's remaining works is announced, no completed pictures are likely to be then offered. Prominent among the examples the society were privileged to exhibit were the almost priceless contributions of Mr. Quilter, Mr. Matthews, Mr. Bowman, Mr. Vokins, and other collectors, who liberally placed at its disposal works representing an aggregate value of many thousand pounds. Mr. Quilter's contributions comprised the well-known and beautiful picture "The Prayer of Faith," exhibited at the Royal Academy in 1872, and possessing to a large degree many of the finest qualities of the artist. From the same collection also was "The School," a picture singularly interesting as being what may justly be termed one of the representative works of its author; but a larger picture, "The Liliun Auratum," the gem of Mr. Quilter's Lewises—a striking feature of the Academy Exhibition of 1872—attracted universal admiration by its vivid perception of Eastern character and physiognomy, precision of detail, marvellous effects of light and surface texture, but, above all, by its brilliance and beauty of colour. By Mr. Matthews the collection was enriched by three important works, with one of which the name and fame of the artist is, perhaps, more intimately identified than with any other single production—viz., "A Frank Encampment in the Desert of Mount Sinai," painted in oil, and exhibited at the Academy in 1863; a similar design, though larger in size, having been shown at the Society of Painters in Water Colours in 1856. With the subject matter of this work, on a canvas not three feet in width, but valued at one thousand guineas, the art-world are familiar, as also with its marvellous representation of the details and incidents of desert camp life as viewed under the cloudless brilliance of an Eastern sun. In "A Turkish School," also from Mr. Matthew's collection, was seen a work of somewhat different character, an illustration of indoor life, and of most powerful tone in contrast of colour, in which respect the artist appears to have exhausted the resources of his palette. At a value of two thousand guineas, this remarkable picture, painted in oil, forms one of the chief attractions of its owner's collection. A third picture, "The Reception," from the same collection, most charming from its delicacy and skill, though but small in size, found a large circle of admirers. But around an unfinished water-colour drawing, the property of Mr. Vokins, "A Cairene Girl Reclining on a Divan," surrounded by the elegant accessories of Eastern luxury, was a pressing crowd of brethren of the brush, who, in the suggestive beauty of its light and colour, found material for speculation and discussion beyond what more finished works presented. In its simplicity of composition and the foreshadowing of its ultimate effect nothing could be more charmingly artistic, and when viewed at a little distance the want of further finish was not felt. Mr. Bowman's fine oil-picture, a recent example of Lewis's work, was the subject of much admiration, as also were the contributions of Mr. Henderson, Mr. Crosier, Mr. Burnett, and Mr. Nettelford. Artists possessing Lewis's drawings aided in the gathering, in which list of contributors were Mr. Pickersgill, R.A. (Mr. Lewis's executor), who sent an interesting selection of sketches, Mr. Street, R.A., Mr. T. M. Richardson, and Mr. A. Sevens; Mr. Charles Lewis, the well-known engraver, brother to deceased, contributing many very early works in oil and water colour. A large number of studies in chalk and colour of various subjects, scenes, and dates, made up the collection, which, though only selective, afforded ample opportunity for judging of the artistic calibre of their author. Mr. Lewis's power in the representation of animals is well known, and a fine example was contributed by Mr. Croxford in the full-sized head of a lion, painted from life at the Surrey Zoological Gardens for Mr. B. Bond Cabell when the artist was yet a young man. Many other admirably-drawn studies of animals were placed in the rooms. Mr. Lewis commenced work at an early age, and, like all true artists, remained an ardent student to the close of a long, laborious life. He was elected an Associate of the Royal Academy in 1859, and made a full Academician in 1865. Those only whose recollections extend far back in the present century will be familiar with the appearance of his early efforts, which, like the later elaborations of his pencil, glowing with all the wealth and subtle refinement of colour, were marked by the closest study of nature. Mr. Lewis travelled much, both on the Continent and in the East, and was long popularly known by his works of Spanish life and character.

The exhibition, as in this instance, of a selection from the works of a deceased artist is a custom the Graphic Society have, when practicable, long adopted, viewing it as a passing tribute to the memory of a fellow-worker, and as, probably, the last opportunity of comparing side by side the various characteristics of a closed career.

SOUTH KENSINGTON SCHOOLS OF ART.

Princess Louise (Marchioness of Lorne) distributed the prizes to the students of the schools of art at the South Kensington Museum on Tuesday. These prizes were won in the local and national competition of 1876, the works to which they were awarded having been executed in the twelve months preceding last April. The successful students were pupils of the two schools at South Kensington, which were in competition with each other and with all those of the

United Kingdom. The prizes—including three silver and nine bronze medals, and nine Queen's prizes of books—represented only the highest grades of distinction obtainable by the students. The total number of students in the schools was 843, being an increase of eighty-eight over the preceding year. After the distribution, Mr. Poynter (Principal of the School of Art) delivered an address, in which he reviewed the course of instruction in the schools of and in the country for the past year, and spoke of the changes that had been and were about to be made with regard to the methods of working. Referring to the honour of the reception of their awards from an illustrious lady who was peculiarly fitted to sympathise with the students, Mr. Poynter expressed a doubt whether, without the greatest interest which the various members of the Royal family had taken in the institution, it would have risen to the important position it now occupied in the country. Sir Francis Sandford thanked her Royal Highness for her kindness in attending and distributing the prizes. The compliment was acknowledged by the Marquis of Lorne, who expressed the pleasure the Princess had experienced in distributing the prizes. That task had been a pleasure, which was enhanced by the sympathy she felt with the students from having herself had the advantage of the excellent instruction given in the institution. The Princess, therefore, had some claim to be considered one of the students. After thanking Mr. Poynter for his address, as being an admirable exposition of the principles which should guide the exertions of the students, the Marquis of Lorne said that both the Princess Louise and himself desired the success of those who had received prizes, and heartily wished them godspeed in the noble career they had chosen. Her Royal Highness, having shaken hands with many of the teachers and students, retired.

THE ROYAL SCOTTISH ACADEMY.

The dinner given on the eve of the opening of the exhibition of the Royal Scottish Academy in Edinburgh was held, yesterday week, in the centre octagon of the picture-galleries. The President, Sir Daniel Macnee, occupied the chair, and Mr. William Brodie, R.S.A., was croupier. The toast of the evening, "The Royal Scottish Academy," was proposed by Mr. Cowan, M.P., and replied to by the President. "The Royal Academy of London" and a number of other toasts were proposed.

The fifty-first exhibition of the Academy was opened to the public last Saturday morning. It contains 1016 works of art, or about seventy fewer than last year. The number of pictures rejected was about 1200, being the works of upwards of 600 artists. So far as the quality of the pictures is concerned, the exhibition is superior to that of last year. Members of the Academy, including the three new Academicians—Mr. George Reid, Mr. J. B. Macdonald, and Mr. John Smart—are nearly all well represented.

The execution, in bronze, of the equestrian statue of the late Lord Canning, Governor-General of India, from the model commenced by the late J. H. Foley, R.A., but completed by his assistant, Mr. Brock, is rapidly proceeding, several portions being already cast and in the hands of the chaser. The group will be erected on the open space near Government House, Calcutta, and will complete the trio of equestrian figures erected on that spot by the same sculptor. Unlike the chargers in the Hardinge and Outram groups, the fire and action of which will be remembered, Lord Canning's horse stands at rest.

MUSIC.

The specialty of this week has been the opening of the sixty-fifth season of the Philharmonic Society with the first of the eight evening concerts, to which are to be added, as last year, two afternoon performances, as already mentioned by us in a notice of the prospectus. Mr. W. G. Cousins retains the office of conductor, which he has held for ten previous seasons; and the analytical and historical programmes continue, as heretofore, to be written by Professor G. A. Macfarren. Thursday evening's selection comprised Beethoven's C minor symphony, Mendelssohn's "Melusine" overture, and Weber's "Oberon"; Grieg's pianoforte concerto, played by Mr. Dannreuther; and Spohr's dramatic concerto for violin, executed by Mr. Henry Holmes. Madame Edith Wynne and Mr. W. H. Cummings were the vocalists. Of the performances we must speak next week.

The Popular Concert of Monday evening brought forward, for the first time here, a new string quartet by Herr Brahms. The work consists of the orthodox series of four divisions. The opening movement ("Vivace"), although diffuse and occasionally laboured, has many points of interest, including some good rhythmical contrasts. The beginning of the slow movement ("Andante") is charming in its simple flow of melodious beauty, but this is succeeded by much that is laboured and dry. The "Scherzo" and its Trio have much quaint character; and the finale—a series of variations on a pleasing theme—is full of ingenious and skilful treatment. Great, however, as is the constructive mastery displayed in this quartet, the impression left by it is rather that of laboured workmanship than inventive genius. It was admirably played by Herr Joachim, Mr. L. Rice, Herr Straus, and Signor Piatti. The first and last named of these gentlemen and Mr. Charles Hallé gave a fine rendering of Mendelssohn's pianoforte trio in D minor, and Mr. Hallé played with great effect, as his solo, Schubert's sonata in B flat. Herr Henschel produced a highly favourable impression by his effective delivery of Handel's song, "Sibillar" (from "Rinaldo"), and Schubert's lieder, "Der Neugierige" and "Ganymed," which were well accompanied by Mr. Zerbini. At the afternoon concert of today (Saturday) Madame Schumann is to make her first appearance.

Last Saturday's Crystal Palace concert included fine orchestral performances of Haydn's symphony in G, known as the "Oxford Symphony," Cherubini's overture to "Medea," a characteristic overture to "Saul," by Signor Bazzini (which was given for the first time here), and Beethoven's fourth pianoforte concerto (in G), with Miss Marie Krebs as pianist. Vocal pieces were contributed by Miss Sophia Löwe and Madame Antoinette Sterling.

On Tuesday evening Haydn's "Creation" was performed at the Crystal Palace, with the co-operation of the orchestra and choir associated with the establishment, and conducted by Mr. Manns. The solo singers were Miss Robertson (who made a successful début), Mr. Barton McGuckin, and Signor Federici.

We have already spoken of the excellent quartet concerts given by Mr. Carrodus and Mr. Edward Howell at the Langham Hall. The programme of the second, which took place on Tuesday evening, included the third of Beethoven's "Rasoumowsky" quartets, Sterndale Bennett's pianoforte trio, Molique's pianoforte quartet in E flat (op. 17), and miscellaneous pieces.

A fine performance of Verdi's "Requiem" was given by the Royal Albert Hall Choral Society on Monday evening, when the Prince and Princess of Wales were present. The

orchestral and choral portions of the work were excellently rendered by the large band and choir conducted by Mr. Barnby; special effect having been produced by the "Domine Jesu Christe," and the "Lacrymosa." The vocal solos were well sung by Madame Lemmens-Sherrington, Miss Anna Williams, Mr. E. Lloyd, and Signor Foli. The duet, "Agnus Dei," for the two ladies (with chorus) was encored; and among other noticeable points was Mr. Lloyd's fine delivery of the solo, "Ingemisco." Dr. Stainer presided at the organ.

We noticed the opening of Mr. Kuhe's Brighton Festival last week. This week's proceedings commenced with a miscellaneous concert on Monday. Tuesday's programme comprised a selection from Wagner, including the overture to "The Flying Dutchman," the prelude to "Lohengrin," the "Funeral March on the Death of Siegfried," Signor Ardit's grand operatic selection from "Tannhauser," besides which Mr. Arthur Sullivan was to conduct his symphony in E. Wednesday's selection included Sterndale Bennett's overture "The Naiades," and Mozart's to "Il Flauto Magico;" Beethoven's symphony in C minor; Mendelssohn's concerto, in G minor (Madame Arabella Goddard); David's violin concerto (M. Sainton); Wagner's bridal procession, "Lohengrin;" and Mr. A. Sullivan's incidental music to "The Merchant of Venice," conducted by the composer. On Thursday Madame Sainton-Dolby's cantata, "The Legend of St. Dorothea," was to be given, conducted by M. Sainton; and Mr. J. F. Barnett's cantata, "The Ancient Mariner," conducted by himself. The festival is to conclude to-day (Saturday) with "The Messiah."

Mr. Walter Bache's annual concert always presents features of special interest. The thirteenth will take place, at St. James's Hall, next Tuesday evening.

Mr. Henry Leslie's Choir will open the twenty-second season, on March 2, at St. James's Hall, as heretofore. The first part of the programme will consist of sacred music, including the first performance in England of Bach's sublime motet, for double choir, "I will sing unto the Lord." The second part of the concert will comprise madrigals, part-songs, and vocal solos.

The Sacred Harmonic Society's concert of yesterday (Friday) evening consisted of a selection from the works of Handel and Mozart. The "Occasional Overture," the "Coronation Anthem" ("Zadok the Priest"), and extracts from the oratorios of "Joshua," "Saul," "Theodora," "Athaliah," "Redemption," and the "Utretch Jubilate," of the former composer; and the Litany (in B flat) of Mozart were to be given.

The concert of the students of the Royal Academy of Music, to be given at the institution this (Saturday) evening, will bring forward a new cantata, "The Fishermidens," for female voices, composed by Mr. Henry Smart.

THEATRES.

Little in the shape of novelty presents itself in the week's dramatic chronicle. At the Princess's, the withdrawal of Mr. G. Wills's successful play of "Jane Shore" has been immediately followed by a revival of the late Watts Phillips's "Lost in London." The drama has lost none of its old popularity, still retaining its hold upon the sympathies of the audience. Mr. S. Emery once more essays the character of Job Armoyd, and by his vigorous rendering contributes not a little to the success of the piece. The acting of this gentleman is exceedingly graphic, especially in the second act, where the old miner, deserted by his young wife, in the presence of his fashionable guests, demands her from her betrayer. This situation is eminently dramatic. The part of the heroine, Nelly Armoyd, originally represented by Miss Neilson and afterwards by Miss Lydia Foote, now finds an able exponent in Miss Rose Coghlan, who evinces much emotional power, and places vividly before us the misery inevitably resulting from the sin the most unpardonable in woman. The lady deservedly shared in the honours of the evening. Mrs. Alfred Mellon, as Tiddy Dragglethorpe, is again imitable; and Mdlle. Marie deserves a word of praise for her pleasing rendering of Signora Sismondi. We may mention that the scenic artist, Mr. Frederick Lloyds, was, on the first night, summoned to the footlights for his exceedingly graphic presentation of London by night. A ballet pantomime on "Robert Macaire" concluded the entertainments, in which the Martinetti troupe exhibit their marvellous agility and make a display of their unquestionably comic powers. Of these the portrait of Jacques Strop, presented by Mr. Paul Martinetti, is particularly noticeable.

The Folly revives Tom Taylor's "Nine Points of the Law," a facetious comedy in one act, which is richly enjoyed by the audience, and bids fair to retain possession of the bills for some time to come. The dialogue is sprightly and the situations telling; and the whole affords scope for some very vivacious acting on the part of Miss Lydia Thompson, who appears as the beautiful Mrs. Smylie, and wins all hearts by her coquettish and fascinations. The manner in which the artful widow, when threatened with ejection from the cottage bequeathed her by her dead friend—which bequest is afterwards revoked by a codicil—turns the heads of all her adversaries, first working upon the sensibilities of the legal claimant, and then, carrying the warfare still further into the enemy's camp, seduces the opposing lawyer from his allegiance, is in itself amusing, and is rendered more so by the clever manipulation of the actress. The touch of genuine feeling, towards the close of the comedy, where the widow throws off her disguise and responds to the generous, disinterested conduct of her opponent, was also well depicted. Mr. Lionel Brough gave a vigorous rendering of the honest, rough, plain-spoken Joseph Ironside, who ultimately succumbs to the widow's fascinations and makes her a tender of his hand. Mr. Philip Day was excellent as Rodmont Rollingstone, a gentleman lately arrived from the New World, well versed in prairie statistics, and whose proclivities are decidedly of the wild Indian order. Mr. Willie Edouin, as the lawyer who turns tail, was also good, his "make-up" being especially happy. The other characters were efficiently rendered by Mr. W. Forrester, Miss Emily Duncan, and Miss Lina Merville.

Mr. Burnand's burlesque, "Black-Eyed Susan," is performed at the Royal Aquarium every afternoon.

The programme for the performance in aid of the testimonial fund for the popular comedian Mr. Compton, at Drury-lane Theatre, on Thursday morning next, March 1, has been issued. After the overture, the entertainments will begin with the council scene in "Othello," Mr. Creswick playing the Moor and Mr. Ryder Iago. Miss Heath will recite "The Charge of the Light Brigade," and the first act of Lord Lytton's "Money" will follow. Mr. Irving recites "The Uncle," and Mr. Joseph Jefferson appears as Rip Van Winkle. Once more the public will have an opportunity of seeing Mr. Phelps play a scene from "The Man of the World." Mr. Charles Mathews, Mr. Byron, Mr. Buckstone, and a phalanx of celebrities are to be seen in the last act of "The Critic."

The well-known Austrian dramatist, Herr Mosenthal, died at Vienna, last Saturday, aged fifty-six.

THE CRISIS IN TURKEY: EXTRA SOLDIERS TO STRENGTHEN THE STREET GUARDS.
FROM A SKETCH BY OUR SPECIAL ARTIST AT CONSTANTINOPLE.

THE LATE GENERAL CHANGARNIER.

General Changarnier died on Wednesday week. He was born at Autun, in April, 1793, and had, therefore, nearly completed his eighty-fourth year. He was educated at the military school of St. Cyr, served in the campaign in Spain in 1823, and from 1830 to 1848 was employed in Algeria, where he took an active part in the various campaigns against the Arabs, and at the Revolution of 1848 the Duc d'Aumale resigned the governorship of Algeria into his hands. When General Cavaignac became Chief of the Executive he appointed General Changarnier to the command of the Paris National Guards, and he held this post when Prince Louis Napoleon was elected President, when he was also appointed by the National Assembly Commander of the Army of Paris, then 100,000 strong. In 1851, having shown himself hostile to the policy of the President, he was deprived of his command, and at the Coup d'Etat he was arrested and banished from France. He resided at Mechlin until the general amnesty granted by Napoleon III., when he returned to his estate in the department of Saône-et-Loire. When war broke out in 1870 Changarnier offered his services to the Government, but they were declined. He was, however, afterwards more successful with the Emperor, with whom he had an interview at Metz. After Sedan he was shut up in Metz with Marshal Bismarck, and after the capitulation remained in Germany for some time as a prisoner of war. In 1871 he was elected a member of the National Assembly, and on the formation of a Senate, in 1875, he was elected a senator.

The funeral service of the late General Changarnier took place at the Invalides on Saturday. A large military force took part in the ceremony, and among those present were Marshal MacMahon, M. Jules Simon, the Duc d'Aumale, the Duc de Nemours, and the Prince de Joinville. The service was conducted by the Cardinal Archbishop of Paris, Mgr. Guibert. The actual interment took place at Autun.

The portrait is from a photograph by Hermet, successor to Maunoury, Rue des-Saints-Pères, Paris.

THE LATE GENERAL CHANGARNIER.

THE CRISIS IN TURKEY.

Our Special Artist at Constantinople, Mr. Melton Prior, supplies the series of sketches illustrating the sudden overthrow of Midhat Pasha, the late Grand Vizier, and the installation of Edhem Pasha in his place. We have already given some account of this extraordinary transaction; but the following narrative, by the Special Correspondent of the *Daily Telegraph*, may be read with the greater interest in connection with our Artist's illustrations presented in this Number:—

Pera, Feb. 7.

Of the vicissitudes of life much has been written; the ups and downs of this singular existence have been food for comment for thousands of years. Yet, since the days when the good Caliph Haroun al Raschid made and unmade Viziers till now, have never been witnessed such reckless experiments in statecraft as have taken place in these latter days. I was sitting in the room of the Mutesarrif Alexandrine Caratheodory, Under-Secretary of State for Foreign Affairs, about eleven o'clock on Monday morning, when his Excellency

entered, and, offering me a cigarette, began to chat about Turkish affairs. "What news have you to give me, Monsieur?" he demanded, as he lit his tobacco and lounged back languidly in his chair. "That is my question, Excellency," was my reply. "What have you to tell me?" "Rien, absolument rien," said the Minister. "All goes well, mon ami. We have told Serbia that all we require of her is a fair guarantee that in future she will not misbehave herself. We have foregone the six points which we at one time demanded, and in which we asked for a money indemnity, the surrender of their fortresses, and the diminution of their armies, together with other things. We shall send equally favourable conditions to Montenegro to-day. In fine, all is as satisfactory as could be wished." At this moment there entered the room the Russian First Dragoman, accompanied by Blaque Bey. Each made a salaam, each took a chair. For a moment neither spoke; but at length the Russian broke silence. "Have you

heard the news?" said he. "What news?" replied M. Caratheodory. "Why, that Midhat Pasha is embarking at this very moment for the Archipelago?" "What?" cried the Mutesarrif. "Have you not heard it?" ejaculated Blaque Bey. "It is impossible that you know nothing about it," added the Russian. "I have not heard a word," rejoined Caratheodory; "tell me what has happened." "Well," said the Dragoman, "it is this: Midhat Pasha has been sent for to the palace; in a few moments he will be exiled, and Edhem Pasha will take his place." I have been present before at strange incidents, but never have I seen such faces as of those who at this moment sat on the chairs and divan of Caratheodory's house. For myself, I at once left the room and went into the corridor, where I received confirmation of the strange news from one of the English dragomans. Without a moment's hesitation I dashed down the staircase to the street, where a horse was waiting, and, jumping into the saddle, directed my course for the telegraph station for Pera. But I had very nearly reckoned without my host; for, in an instant, I found myself arrested by an officer, who demanded whither I was going. It was then that I perceived that the Porte was surrounded by troops; that more soldiers were marching up every moment; that, in fact, the gate which is called "Sublime" was besieged. Fortunately, I was recognised by an influential friend and was enabled to pass, after some parley. Riding over the old bridge of boats, I now met thousands of people pressing toward Stamboul. Women are in every crowd. Why should they not be in attendance when Turkey's last anchor was hauled up, and the Moslem ship of State cast finally adrift? They came by hundreds, accompanied by their husbands and sons, veiled, inquisitive, voluble, over the rickety bridge, paying the toll with complacency in the hope of seeing some great catastrophe. "Hasten! hasten!" cried one of them; "it will all be over when we get there. Allah grant that we may see the new Vizier!"

My object, of course, was the telegraph office, in the hope of sending word of the event, but official wisdom had already blocked the wires, and I had to forward a message in cipher to a district office before I could be certain that the intelligence would be sent. Then I galloped back to Stamboul in order to witness the installation of the new Grand Vizier. Again fortune favoured me. I was passed through the crowd, admitted into the corridor, and thence taken into the great audience chamber, where almost all the dignitaries and functionaries of the Empire waited the advent of the new Premier.

Who was it that remarked, "A throne supported by bayonets is, after all, but an insecure seat?" For the moment, I forget; yet to me the idea came back as I passed through the long lines of troops which held the approaches of the Porte. Rifles bayoneted, at attention, were everywhere; the soldiers were taking a prominent part in the proclamation of the new Minister—so did the Prætorian Guards before the final fall of the great Roman Empire. Perhaps it was needful, for the crowd which stood close by was excited to a degree I have seldom before witnessed in Turkey. They pressed against the armed men; they struggled and fought; they did their utmost to enter the room; it was just as well that there were plenty of troops in readiness. I cannot say what would have happened had they succeeded in getting there. As it

THE CRISIS IN TURKEY: OFFICIALS GOING TO COMPLEMENT THE NEW GRAND VIZIER.
FROM A SKETCH BY OUR SPECIAL ARTIST AT CONSTANTINOPLE.

was, they had to content themselves with waiting outside till the Grand Vizier should come. But what a crowd it was! Greeks, Armenians, Turks, and Englishmen, oddly attired Mohammedan women and Greek dames, all huddled together in the entrance hall. Yet, strange as they appeared, a far more curious throng was to be witnessed in the room itself, where the Grand Vizier's arrival was being awaited by the dignitaries of the Empire. I am afraid to try to say who was there. As I looked over that little sea of anxious faces I could scarcely miss one of all my acquaintances at the Porte—chiefs of departments, secretaries, people who had charge of offices, and those who had long waited for such posts; all Midhat's protégés, his secretaries, his friends, his right-hand men, in waiting no longer for the kindly creature who had so intelligently ruled them, but for his successor and supplanter. "Le Roi est mort! Vive le Roi!" Midhat was at that moment on the Sea of Marmora, an exile, disgraced. They knew not who might come to be his successor: it might be Mahmoud, the Sultan's brother-in-law; it might be Safvet Pasha; it might be Redif, the chief of the War Department; it might be Edhem—but who could tell? Nevertheless, they were anxious to offer him homage. They would have done the same had the Sultan's nominee been Beelzebub himself. Such strange stories meanwhile began to circulate in that crowded room! It was said that Abdul Hamid had suddenly been shown the report of a speech which Zeyir Pasha, a friend of Midhat's, had lately delivered in Smyrna; that his Majesty had read the words, "In future the Sultan will be the servant of his people," and had demanded, in the name of Allah, who allowed such language to be used; that then the underlings of the palace, who never liked Midhat, replied, "It is thus that the reforming Vizier whom thou hast set over thy Empire teaches;" and that upon this his Majesty was pleased to give orders for the exile of his Premier and the appointment of the successor. But by others it was told that the reason for the fall of the great man was that he had, so lately as last Saturday, found the Sultan intractable in regard to certain appointments which he had considered necessary for the good of the Empire. "He told his master," quoth they, "that he must have more Christians in office, and that to effect this he must turn more Moslems out." "What!" cried the Sultan, according to that account, "turn out a man without a trial? Is that your Constitution?" Whereupon Midhat is said to have retired in haste, somewhat after the fashion of one unhappy person known to all time as Haman; while Ahasuerus, or rather Abdul Hamid, fearing further trouble, gave orders for his ruin. "He had reason," said some one who stood by me; "for I happen to know that as Midhat left the palace he said, 'If Abdul Hamid cannot see his way clear to do as he is told, he will have to go the way of either Murad or Aziz!' "You are wrong in what you are saying," struck in a Bey; "the reasons you give are silly. Midhat has simply been sent to exile because he was actually plotting to overthrow the Sultan and to restore Murad." Now this announcement caused some little stir, for the man who made it was of a certain rank; and I was wondering what would be said to it, when a person whom I have long known as owing his all to Midhat's kindness, and at whom I greatly marvelled, seeing him standing a courtier to the new Vizier in that crowded room, whined out, "Then, if Midhat has offended against the Constitution, I feel that even I must abandon him. I can no longer support a man who is not sincere." It was vain to reply, "But has that clause of the Constitution which refers to justice been so strictly observed by the Sultan in thus exiling a Minister without trial, that even you should spurn him?" Not a word was given in response; the miserable traitor stood waiting for his master's rival.

As the only Englishman in the room, I found myself in strange company. At the far end of the chamber in a long divan sat ten of the Ulema, all save one wearing huge turbans, the exception being arrayed in green. There were officers of the army and of the navy; there were diplomatic servants in embroidered coats, and people in plain dress. But I believe I was the only man in the room who did not wear a fez. These red skull caps gave to their owners a very curious appearance, which I had noticed before. All was involved in the deepest mystery—not a soul could tell who would be the newly-appointed Vizier. Some said that Redif had been summoned, and then sent away; that Safvet had declined the honour on the ground that he was not strong enough for the work; that the Sultan's brother-in-law Mahmoud—who, by-the-way, only speaks Turkish, and knows nothing of anything or anybody save what may be picked up in a Moslem harem—had been chosen; that not he, but Edhem was the man. Nobody knew—it was all the merest guesswork. A very short time would tell—till then we must wait. Yet, Turks though they all were, they could not at such a moment wait stolidly. I have seen them lounging on chairs in the battle-field, making cigarettes and drinking coffee the while that shells were falling and bursting all around; I have watched them as, without the slightest tremor, they have moved slowly forward to face what appeared to be certain death—quiet, self-possessed, and determined. But in that audience-room they were all in excitement. Not a man could keep still. When, presently, the noise of the bands which were stationed outside was heard to herald the approach of the Sultan's Premier, they all rushed to the windows and struggled for places like boys playing at football. How they peered through that wretched window-glass down into the crowded street below, to see who it was that rode on horseback through the long lines of troops and the dense crowds of people! How they jammed each other into corners—generals, clerks, priests, pashas, all bending forward to see whom the new comer might be! For to them the horse on which the Grand Vizier sat might bring honour or disgrace, power or ruin, wealth or poverty, reward or punishment. They actually trembled with excitement as the procession came up and the bands raised their tones. Nearer and nearer moved the horsemen who heralded it, nearer marched the soldiers who guarded its progress, and then came into view, on horseback, the Sheikh-ul-Islam, clad in white and gold, followed by Edhem Pasha, the Sultan's choice. "Edhem! Edhem!" echoed all round the room. There were some who smiled, many who sighed, others who looked doubtful, as though they knew not what the new possessor of power might do to or with them. But this was only observable for a moment, for now all were anxious to get as near to the new Premier as possible, and then another rush was taking place to the centre of the apartment, down which on either side of a narrow passage formed from the door ranged all those who were in the room. A minute elapsed, then was heard a great noise in the outer hall as of people being thrust back by the soldiery in order that room should be made for the Grand Vizier; and then entered the Sheikh-ul-Islam, his gold-embroidered turban and his long white robe being conspicuous as he advanced, followed immediately afterwards by Edhem Pasha, the Sultan's Secretary, Safvet Pasha, and others. There was such a scene of cringing and bowing as I had never seen even in Turkey before. Those who could lean forward and almost touch the ground with their faces did so, and were happy; but not so the unfortunate ones crammed together behind them. For them it was only reserved to beat their faces with their hands in a demonstrative fashion, in the hope that perchance by some accident

the new lord of their destinies might happen to see them. They did the same thing when Mahmoud was made Vizier, now many years ago; they beat their foreheads to Mehemed Ruchdi and Midhat. Now it was Edhem's turn to receive their salutations. I am bound to say he did not lack for lowly bows.

At length he ceased to acknowledge these tokens of humility, and stood as though he awaited something; whereupon the Sultan's secretary—a little man, covered with gold embroidery, and wearing across his breast the ribbon of the Medjidie—opened a violet satin envelope and produced therefrom a sheet of paper. As he drew it forth, with the air of a man who might have been presenting his testimonials to some one whom he wished to employ him, the document was taken by Edhem, who, kissing the seal at the top and the seal at the bottom, pressed the paper to his forehead, and then handed it to a young man who, in an official dress, stood before him. It was the Sultan's Hatt, and to read it a man had been chosen whose sonorous voice and excellent power of utterance might be heard all over the room. Writing as I now am, in the middle of the night, endeavouring to catch the post which will go early to-morrow, I am unable to send you a copy of the Imperial speech. But you will long since have learnt how it indicated that the new Constitution would still be supported, how changes would take place in the Ministry, how Edhem Pasha would be Grand Vizier, and how Sadyk Pasha would become Governor in Bulgaria; Johannes Effendi, Minister of Commerce; and Odian Effendi would be recalled.

During the reading of that decree, which once more effected a revolution in the Turkish Empire, there was perfect silence. At the end it was handed back once more to Edhem, who kissed it again; and then the Sheikh-ul-Islam, in a loud voice, offered prayer for the Padishah. I did not understand a word of what was said, but its effect seemed great, for as the Turks stood with raised hands listening to the words, they ever and anon cried out "Amen." I dare say that supplication conveyed no thought of blame to the Sultan, who had wrought all this mischief; but, on the contrary, it congratulated the universe on the wisdom of the new appointment. Such words have been offered before on similar occasions in all kinds of tongues and in all ages. They are as necessary to the various ceremonies with which they are connected as the crown in a coronation scene. We waited till the prayer was finished and then quitted the apartment. I imagined all was over and that now my work lay in another direction. But, having need to return to the room about a minute afterwards, I saw that, the lesser dignitaries having been turned out, the great ones of the Empire had seated themselves on the divans and chairs of the room, had already lit their long chibouks, and were quietly smoking, in perfect silence, a pipe of peace. Through the clouds of smoke I could see the new Grand Vizier, and my thoughts reverted to his predecessor, who, only three days before, I had also seen sitting in similar fashion, and smoking as calmly as he. To me it seemed that there was, after all, very little difference between the moment after success and that before ruin. A few days, and Midhat might once more be seated in the Divan, and Edhem relegated to Syria. Who could say? "Do you see that boat going along the Marmora shores?" said a Greek to me, as I moved along the corridor, a minute afterwards. "Yes," I replied. "In that vessel is Midhat," said the Greek, "a prisoner, ruined and disgraced. The ship has just stopped at his house in order to embark a few of his things, and now he is off on his voyage." I need not try to tell you the thoughts which flew through my mind as I remembered what Midhat was and what he would have had Turkey become.

The following account was given, by persons in immediate relations with Midhat Pasha, to a correspondent who assumes the signature of "Veritas," and who got his information on board the yacht which was about to convey the fallen Minister from Constantinople:—

"On the morning of the 5th inst. Midhat received a summons to the palace, which he immediately obeyed. On his arrival he was shown into a room (outside the palace itself) which was at once surrounded by soldiers previously held in readiness. The first Chamberlain of the Sultan demanded from him the seals of office; then showed him a report signed by the Minister of Police affirming that some person had been heard to state in a café that Midhat Pasha was plotting to depose the Sultan and to substitute in his stead a Republic with himself as President. Midhat Pasha naturally treated an accusation founded on such grounds with the contempt it so justly merited, remarking that it could not concern him. The Chamberlain after a short absence then returned and informed his Highness that it was the Sultan's pleasure that he should leave the country at once on board a yacht which was lying opposite the palace with steam up, giving him at the same time the following message from his Majesty:—

"Do not be cast down. I hope soon to see you back, but consider that at present your absence is desirable for the good of the country." Midhat Pasha then asked permission to send a servant for clothes and money, which was granted. While he was away the fallen Grand Vizier was conveyed to the steamer in a boat, accompanied by a guard of several officers. In a short time the servant returned, bringing £T150, which was all he could collect in the house on the spur of the moment. This information being sent to the Sultan, he ordered £T500 more to be sent. The yacht then steamed round the Seraglio Point to Koom Kapoo, to allow his Highness to take his heavier baggage on board and to communicate with some members of his family. The steamer left, at about three o'clock in the afternoon, direct for Brindisi, with strict orders not to touch at any intermediate ports. The Sultan is said to have wept like a child as the yacht steamed out of the harbour.

The same correspondent, "Veritas," is enabled to contradict flatly the following statements which have been circulated:—

"1. That letters were shown Midhat Pasha bearing his own signature inculcating him in a conspiracy. 2. That Midhat acknowledged his guilt to his Sovereign, and threw himself at his feet to beg for mercy. 3. That a Council of Ministers was held and judged him to be worthy of death. Midhat was shown no document except the malicious fabrication of the Minister of Police. He did not even see the Sultan on the day he was exiled. The only persons who knew what was to befall Midhat Pasha were the Minister of War, Damad Mahmoud Pasha; Omer Fevzi Pasha, the Minister of Police; and the First Chamberlain of the Sultan. When the Council which was summoned arrived at the palace Midhat was already condemned and on board the steamer. A proof of the utter baselessness of the charge trumped up against Midhat is that he alone is named as having conspired, no other arrests were made, no one else suspected, as though one man, without the aid of a single soul besides himself, could hope to overthrow a Government. When Abdul Aziz was deposed, he was regularly judged by the Ministers, and judicial sentence obtained against him from the Sheikh-ul-Islam, before any steps were taken against him."

Captain R. Calvert, Captain and Adjutant of the Royal Bucks Yeomanry Cavalry, has been appointed Chief Constable of Cambridgeshire.

ASTRONOMICAL OCCURRENCES IN MARCH.

(From the "Illustrated London Almanack.")

There is this month a Partial Eclipse of the Sun, not visible from Europe. Its greatest phase is about one third of the Sun's diameter. It begins on the 15th, at 1h. 15m. a.m., Greenwich mean time, in longitude 75 deg. nearly, east of Greenwich, and latitude 34 deg. north. At the time of greatest phase—viz., 2h. 38m., Greenwich time—in latitude 61 deg. 11 min. north, and longitude 56 deg. 35 min. east of Greenwich; and the eclipse ends at 4h. 1m. a.m., in north latitude 87 deg. 19 min. and longitude 82 deg. 46 min. east of Greenwich.

The Moon, on the morning of the 8th, will be very near both to Jupiter and Mars, she being a little south of those planets, to the left of Jupiter and to the right of Mars, till a little after six o'clock, when the Moon and Mars will be at their nearest approach. She is near Mercury and Venus on the morning of the 13th, and near Saturn on the morning of the 14th. Her phases or times of change are:—

Last Quarter	on the 6th	at 1 minute after 10h.	in the afternoon.
New Moon	" 15th "	" 54 "	" 2h. " morning.
First Quarter	" 22nd "	" 9 "	" 1h. " afternoon.
Full Moon	" 29th "	" 49 "	" 5h. " morning.

She is nearest the Earth on the afternoon of the 26th, and furthest from it on the afternoon of the 10th.

Mercury is a morning star, rising on the 2nd at 6h. 4m. a.m., or 42m. before sunrise; on the 7th at 6h. 3m. a.m., or 33m. before sunrise; this interval gradually decreases to 25m. by the 12th, to 16m. by the 17th, to 10m. by the 22nd, and to 7m. by the 27th, the planet rising on this day at 5h. 43m. a.m. He is in aphelion on the 3rd, near the Moon on the 13th, near Saturn on the 19th, and near Venus on the 26th.

Venus is a morning star, rising on the 2nd at 6h. 21m. a.m.; on the 12th at 6h. 6m. a.m.; on the 22nd at 5h. 49m. a.m.; and on the last day at 5h. 32m. a.m., being 25m., 18m., 12m., and 9m. respectively before sunrise on each of these mornings. She is in aphelion on the 7th, near the Moon on the 13th, and near Saturn on the 16th. She is due south on the 1st at 11h. 10m. a.m., and on the last day at 11h. 32m. a.m.

Mars is a morning star. The following are the times of the rising of this planet at ten-day intervals throughout the month:—On the 2nd at 3h. 29m. a.m., on the 12th at 3h. 18m. a.m., on the 22nd at 3h. 5m. a.m., and on the last day at 2h. 52m. a.m. He is near Jupiter on the 1st and near the Moon on the 8th. He is due south on the 1st at 7h. 22m. a.m. on the 15th at 7h. 7m. a.m., and on the last day at 6h. 49m. a.m.

Jupiter is a morning star, rising on the 2nd at 3h. 24m. a.m., or 3h. 22m. before sunrise; on the 12th at 2h. 50m. a.m., or 3h. 34m. before the Sun; on the 22nd at 2h. 15m. a.m., or 3h. 46m. before sunrise; and on the last day he rises at 1h. 43m. a.m. He is near the Moon on the 8th, and in quadrature with the Sun on the 22nd. He is due south on the 1st at 7h. 24m. a.m., on the 15th at 6h. 35m. a.m., on the 31st at 5h. 38m. a.m.

Saturn rises on the 1st at the same time as the Sun; on the 12th at 6h. 17m. a.m., or 7m. before sunrise; on the 22nd at 6h. 39m. a.m., or 22m. before sunrise; and on the last day of the month at 5h. 6m. a.m., or 35m. before the Sun. He is near the Sun on the 1st, and near the Moon on the 14th. He is due south on the 1st at 0h. 14m. p.m., on the 15th at 11h. 25m. a.m., and on the last day at 10h. 29m. a.m.

Lord Hardwicke presiding at the annual dinner of the Cambridgeshire Hunt, on the 15th inst., said that probably no Prince in Christendom threw himself more heartily into the sports of the people, or associated more with all classes, than the Prince of Wales.

A Parliamentary paper has been issued containing the text of the treaties relating to the Ottoman Empire. The treaties are as follow:—The Convention between Great Britain, Austria, France, Prussia, Russia, and Turkey respecting the Straits of the Dardanelles and of the Bosphorus, signed at London, July 13, 1841. The General Treaty between Great Britain, Austria, France, Prussia, Russia, Sardinia, and Turkey for the re-establishment of peace, signed at Paris, March 30, 1856. The Treaty between her Majesty, the Emperor of Austria, and the Emperor of the French guaranteeing the independence and integrity of the Ottoman Empire, signed at Paris, April 15, 1856. The Declaration annexed to Protocol No. 1 of the Conferences held in London respecting the Treaty of March 30, 1856, signed in London, Jan. 17, 1871; the Treaty between her Majesty, the Emperor of Germany, King of Prussia, the Emperor of Austria, the French Republic, the King of Italy, the Emperor of Russia, and the Sultan for the Revision of certain Stipulations of the Treaty of March 30, 1856, signed at London, March 13, 1871.

Steps are being taken to erect a permanent memorial—in Kidderminster, where he was born on Dec. 3, 1795—of Sir Rowland Hill, to whom the nation is indebted for the uniform penny postage system. At a town's meeting convened by the Mayor (T. Radford, Esq.), a committee, consisting of most of the leading inhabitants, manufacturers, and others, was appointed. The chairman is the Rev. G. D. Boyle, M.A., Vicar of Kidderminster; vice-chairman, F. Burcher, Esq., deputy magistrates' clerk; treasurer, James Chambers, Esq., actuary, Savings Bank; and hon. secretaries, James Morton, Esq. (Town Clerk), and A. W. Beale, Esq. It is thought that no one who has ever received a letter by post will refuse to give at least the value of a postage-stamp towards the object in view. The committee have therefore issued an appeal for a national penny subscription, and collecting-cards have been prepared to enable postmasters and other friends in every locality to assist in the movement. The notices which have already appeared in the English papers have elicited communications from Vienna and Leipzig, where subscription lists have been spontaneously opened, and the sums received duly acknowledged in certain newspapers which have taken up the matter in those cities.

While the Duke and Duchess of Cleveland were entertaining a dinner party, on the 15th inst., at their residence, Battle Abbey, near Hastings, the mansion was entered by burglars, who succeeded in carrying off money and jewels of the value of several thousands of pounds. The details of the robbery show that it was committed by persons who must have known the premises well, and been acquainted with the customs of the family. The ladders used for the purpose of reaching the window of the dressing-room were taken from spots half a mile distant from each other. The jewels were kept in a fine old carved chest of drawers in the Duchess's drawing-room, and the thieves gained admittance by forcing open the window and entering the room. The thieves (it is supposed three in number) got clear off with their booty, which is variously valued at from £5000 to £10,000. The jewellery consisted of articles of personal adornment, one of the necklaces (a handsome combination of diamonds and ruby stars and emeralds) being a precious gift. It was given to the Duchess by her Majesty on her marriage, the Duchess being one of her Majesty's bridesmaids. A quantity of silver and other plate in one of the drawers was left untouched. A reward of £200 is offered for the apprehension of the person or persons who committed the robbery.

OBITUARY OF EMINENT PERSONS.

THE EARL OF BANDON.

The Right Hon. Francis, third Earl of Bandon, Viscount Bernard and Viscount Bandon, of Bandon Bridge, in the Peerage of Ireland, one of the representative Peers, M.A. Oxon, D.C.L., Lord Lieutenant and Custos Rotulorum of the county of Cork, and Hon. Colonel Royal City of Cork Artillery, died at his seat near Bandon on the 17th inst. His Lordship was born Jan. 3, 1810, the eldest son of James, second Earl of Bandon, D.C.L., F.R.S., by Mary Susan Albinia, his wife, daughter of the Hon. and Most Rev. Charles Broderick, D.D., Archbishop of Cashel. He succeeded his father Oct. 31, 1856, having previously, in the year 1842, sat in the House of Commons as member for Bandon. He married, Aug. 16, 1832, Catherine Mary, eldest daughter of Thomas Whitmore, Esq., of Apley, in the county of Salop, and by her (who died Dec. 15, 1873) leaves issue one son, James Francis, Viscount Bernard, now fourth Earl of Bandon, State Steward to his Grace the Lord Lieutenant of Ireland, born Sept. 12, 1850; married, June 22, 1876, the Hon. Georgiana Dorothea Harriet Evans-Freke, only child of Lord Carbery; and six daughters, of whom the eldest, Lady Mary, is wife of Colonel Aldworth, and the fifth, Adelaide Mary Lucy, of Sir Henry Monson De la Poer Beresford-Peirse, Bart.

SIR H. W. BAKER, BART.

The Rev. Sir Henry Williams Baker, third Baronet, of Dunstable House, died on the 12th inst., at Horkesley House, near Leominster. He was born May 27, 1821, the eldest son of Vice-Admiral Sir Henry Loraine Baker, Bart., C.B., by Louisa Anna, his wife, only daughter of William Williams, Esq., M.P. for Weymouth, and was grandson of Sir Robert Baker, of Dunstable House, Surrey, on whom a baronetcy was conferred May 14, 1796. Sir Henry, who graduated B.A. Trinity College, Cambridge, 1844, and entered holy orders, held the vicarage of Monkland, in the county of Hereford. He succeeded his father Nov. 2, 1859; and, as he never married, is himself succeeded by his cousin, now Sir Sherston Baker. The name of the Baronet whose decease we record will be long remembered as the original promoter of a very popular hymn-book, entitled "Hymns Ancient and Modern."

SIR J. E. HARRINGTON, BART.

Sir John Edward Harrington, tenth Baronet, of Ridlington, Deputy Lieutenant of the county of Middlesex, died at Paris on the 9th inst. He was born May 22, 1821, the only son of Sir James Harrington, ninth Baronet, by Sophia, his wife, daughter of Charles Steer, Esq., and was the representative of the Ridlington branch of the ancient baronial family of De Harrington. He was educated at Christ Church, Oxford, where he graduated B.A., and, subsequently entering the Army, served in the 48th Foot and in the Coldstream Guards, from which he retired with the rank of Captain. He married, Oct. 26, 1846, Jane Agnes, daughter of John Studholme Brownrigg, Esq., M.P., but had no issue. Consequently the baronetcy, created in 1611, the year of the institution of the order, devolves on Sir John's cousin, now Sir Richard Harrington, eleventh Baronet, Judge of the Northamptonshire County Court.

SIR WILLIAM HAMILTON.

Sir William Hamilton, Knt., died at Boulogne-sur-Mer, on the 14th inst., aged eighty-eight. He was originally in the Royal Navy, which he entered in 1803, and, having been made a prisoner of war, was detained in France from 1805 till 1814. In 1822 he was appointed Consul at Boulogne, and continued as such until the year 1873, when, on his retirement, he received the honour of knighthood.

The deaths are also announced of—

Henry Brunning Marsh, M.D., of Upton-on-Severn, Coroner for the county of Worcester, in his seventieth year.

Hugh Goldcutt, Esq., formerly Captain H.M. 60th Rifles, on the 6th inst., in his ninetieth year.

The Rev. John Salter, M.A., Hon. Canon Bristol Cathedral, and for nearly half a century Rector of Iron Acton, Gloucestershire, on the 9th inst., aged eighty-five.

The Hon. William Frederick Byng, late Captain in the 13th Light Dragoons, eldest son of John, first Earl of Stafford, by Marianne, his second wife, daughter of Sir Walter James James, Bart.

Anne, widow of Thomas Tryon, Esq., of Bulwick Park, in the county of Northampton, J.P. and D.L., daughter of Sir John Trollope, Bart., and sister of the late Lord Kesteven, on the 12th inst.

The Rev. Edward Stuart, Vicar and founder of the Church of St. Mary Magdalene, Munster-square, and last surviving son of the late Daniel Stuart, Esq., of Wykeham Park, Oxon, and Harley-street, London, on the 15th inst., aged fifty-eight.

The Lady Augusta Emily Vivian, at Cannes, on the 11th inst., in her thirty-eighth year. Her Ladyship was second daughter of Edwin Richard Windham, late Earl of Dunraven, K.P., married, March 4, 1867, Arthur Pendarves Vivian, Esq., M.P., of Glanafon, Glamorganshire, and leaves issue.

The Rev. John Owen Parr, M.A., Vicar of Preston, Lancashire, Hon. Canon of Manchester and J.P. for the county, on the 12th inst., aged seventy-seven. Mr. Parr was the descendant of a long line of eminent Liverpool merchants, and his ancestors were settled at Rainford, in the neighbourhood of St. Helen's, centuries ago.

William Matthew Coulthurst, Esq., of New-street, Spring-gardens, and Streatham Lodge, Surrey, senior partner of the great banking house of Coutts and Co., on the 10th inst., in his eighty-fifth year. He was second son of John Coulthurst, Esq., of Gargrave, in Yorkshire, and great-grandson of Henry Coulthurst, Esq., of Gargrave, lord of the manor of Cold Couston.

CHESS.

T T (Holloway).—We regret your disappointment; but letters requiring attention in the following week should, to secure it, reach us not later than Saturday morning.

H E B (Montreal).—Many thanks for your interesting report upon the present state of chess in Canada. The papers referred to in your letter have not come to hand. Of course some of your games will be very acceptable.

G I de B (Heerenveen).—We are not yet satisfied of the accuracy of your problem. You shall have a definite report in our next issue.

A Bick (Thanks for the problems. We can learn nothing of those said to be missing, although we have not failed to make inquiry.

J W B (Kingsland-road).—Our distinction to recommend teachers of chess applies with equal force to the recommendation of pupils. In any case, the letter containing the address you ask for was not preserved.

E P V (Glasbury).—Only by constant practice can you attain the power of solving problems quickly. No good problem can be solved "at a glance" even by experts.

H R L (Coventry).—There is a chess column in the Coventry Independent.

CORRECT SOLUTIONS OF PROBLEM No. 1720 received from (Edipus, H B Jun, J Sheppard, Tredunnock, Latta, Kegypalos, T Letchford, Florentia, A F Eaton, P M Rail, J Middlemiss, H M Prudeaux, J Harnden, H C B, J Lonadale, S W B, F O Eggers, and P S Shenale.

CORRECT SOLUTIONS OF PROBLEM No. 1721 received from H B Latta, Triton, Only Jones, A F Eaton, P S Shenale, R Roughed, F O Eggers, Simplex, Zeus, J Williams, F Myers, Woolwich Chess Club, B R Stone, Amersham, W Alston, E Frau, Société Littéraire de Gand, R T King, E Worsley, Drapers' College, Mechanic, J Woods, J S W R H Brooks, B Burgher, G A Messenger, Black Knight, D H, E P Vulliamy, J Wontone, L S R, Tippet, H W Trenchard, Cant, Harrovian, J de Houteyn, Benet, Little Go, Vir, W Nelson, Florentia, Americaine, W Lesson, S Western, East Marden, Rev T Smith, Leonora and Leon, H Vellam, and Long Stop.

SOLUTION OF PROBLEM No. 1721.

WHITE. BLACK.
1. B to Q 4th. P takes Kt.
2. Kt to B 2nd (ch), and * If K takes B, then 2. Q takes P (ch), &c.
3. Q mates.

PROBLEM No. 1723.

By W. GRIMSHAW.

BLACK.

WHITE.

White to play, and mate in three moves.

CHESS IN LONDON.

An interesting Game played recently between two of our strongest English amateurs, the Rev. G. A. MACDONNELL and Mr. BODEN.

(The Knight's Game of Ray Lopez.)

WHITE (Mr. M.) BLACK (Mr. B.)
1. P to K 4th P to K 4th
2. Kt to K B 3rd Kt to Q B 3rd
3. B to Kt 5th B to K 2nd

This divergence from the "authorities," who have pronounced either P to Q R 3rd or 3. Kt to K B 3rd to be the best move at Black's command, is characteristic of Mr. Boden's play, which is at all times original.

4. Castles Kt to K B 3rd
5. Kt to Q B 3rd P to Q 3rd
6. P to Q 3rd B to Kt 5th
7. B to K 3rd Castles
8. Kt to K 2nd

White is willing to submit to the doubled Pawn consequent upon the exchange of Kt for B, in view of the attack he would thus obtain upon the open Kt's file.

9. Kt to Kt 3rd B to Kt 3rd
10. Kt to R 4th P to Q 4th
11. P to K B 3rd

Apparently his best move.

12. K Kt to B 5th Kt to Q 3rd
13. P takes P

If White had retreated the B, Black could have continued with 14. B takes Kt, and thus doubled the pawns on the K B's file.

14. P takes Kt Kt takes B
15. Kt takes B (ch) Q takes Kt
16. Kt to K 4th K R to Q sq

16. P to K B 4th seems a strong move at this juncture, but it is open to the objection that it would have the effect of weakening the K P.

17. Q to K 2nd Kt to Q 5th
18. Q to B 2nd P to Q R 4th
19. P to K B 4th

An exceedingly well-timed move. Black's reply appears to be forced.

and the game was abandoned as drawn.

CHESS IN POLAND.

A Game played at Warsaw, between Mr. HAMEL, of Nottingham, and Mr. D. WINAWER, a strong Polish amateur. (King's Bishop's Game.)

WHITE (Mr. H.) BLACK (Mr. W.)
1. P to K 4th P to K 4th
2. B to B 4th Kt to K B 3rd
3. P to Q 3rd

A livelier attack can be obtained by 3. P to Q 4th. The move in the text enables Black to resolve the game into a variation of the Giuoco Piano.

4. B to Kt 5th B to B 4th
5. Kt to K B 3rd P to Q B 3rd
6. B to Kt 3rd P to Q 4th
7. P takes P P to K 5th

The combination upon which Black now advances is obviously unsound; but Mr. Winawer—who is not to be confounded with his brother, the winner of the second prize in the Paris tourney—is evidently a player disposed to risk much for the sake of attack.

8. P takes P B takes P (ch)
9. K to B sq B to Kt 3rd
10. P to K 5th

The comp. just. Black must now lose a piece.

11. B takes Q Kt takes P
12. K to K 2nd Kt takes Q

WHITE (Mr. H.) BLACK (Mr. W.)
13. B takes B R P takes B
14. R takes Kt B to Kt 5th
15. Q Kt to Q 2nd Kt to Q 2nd
16. P to K R 3rd B to R 4th
17. P to Kt 4th B to Kt 3rd
18. Kt to B 4th Q R to Q sq
19. Kt to Q 6th Kt to B 4th
20. R to K 2nd R to K 2nd
21. Kt to R 4th R to K 2nd

Better to have exchanged Kt for B at once.

22. Kt takes B R P takes Kt
23. K to B 3rd R takes P
24. R to K 2nd Kt takes B
25. R P takes Kt P to Q 4th
26. Kt to B 4th P to Q Kt 4th
27. Kt to K 3rd P to K 4th
28. Q R to K sq P to K B 4th
29. P takes P P takes P
30. Kt to Kt 2nd R to Q 4th
31. Kt to K R 4th R to K B 3rd
32. R to K 5th (ch) K to R 2nd
33. Q R to K 2nd P to Kt 4th

After this mistake, Black has no resource.

34. Q R to Q 7th (ch) Resigns.

CHESS INTELLIGENCE.

CITY OF LONDON CHESS CLUB.—The annual meeting of this important chess association was held on Wednesday last, when the report of the committee, which was altogether of a congratulatory kind, was unanimously adopted. Mr. Gastineau was elected president and Mr. H. F. Down honorary secretary for the ensuing year. It was arranged that the annual dinner should be held on the 7th proximo.

WILLS AND BEQUESTS.

The will, dated Feb. 16, 1876, of the Right Hon. Robert Henley, Lord Onley, late of Bushey Lodge, Teddington, who died on the 21st ult., was proved on the 10th inst. by Colonel George Edmond Lushington Walker, and Montague Turner, the executors, the personal estate being sworn under £180,000. The testator gives a life interest in £20,000 to his sister, the Hon. Mrs. Frances Tucker; to Mrs. Charles Radcliffe, £20,000; to Colonel Walker, Lady Peers, Mrs. Fanny Cockerell, Miss Ann Lascells, Sir John Rae Reed, and Samuel Burgoyne, £10,000 each; to the Bedford Infirmary, £500; and there are a large number of other legacies, both pecuniary and specific. The rest of his property, real and personal, he leaves to the Misses Priscilla and Anna Ottley.

The will and codicil, dated Aug. 21 and Sept. 17, 1876, of Mr. Richard Palin, late of Abbey House, Shrewsbury, who died on Sept. 28, last, were proved on the 20th ult. by Andrew Good Brookes, Charles Smith Thomas, and Henry Wade, the executors, the personal estate being sworn under £60,000. The testator bequeaths various legacies; among others, £100 to the Salop Infirmary; a sum of £10,000 is settled upon his daughter and only child, Miss Mary Anne Frances Matilda Palin, on her marriage; and the residue of his property he gives to his wife, Mrs. Mary Anne Palin.

The will, dated Jan. 30, 1872, of Miss Caroline Braun, late of Rosenau, Durdham Downs, Clifton, Bristol, who died on Dec. 31 last, was proved on the 30th ult. by George William Bahr, the nephew, and Walter Lanyon Nickels, the executors, the personal estate being sworn under £35,000. The only persons benefited by the will are the testatrix's nephews and nieces.

The will, dated Nov. 27, 1873, of Mr. Joseph Child, late of Fair Mile, Henley-on-Thames, and of No. 43, Leicester-square, who died on Dec. 29 last, was proved on the 22nd ult. by John Child, the son, and Henry Markham Pike, the executors, the personal estate being sworn under £30,000. The testator leaves all his freehold and copyhold estate to his said son; to his daughters Martha and Sarah, £2000 each, and all his household furniture and effects between them; he also leaves them each £12,000, which is to be placed in trust; to his brother, Richard Bartholomew Child, £2000; to his daughter-in-law, Mrs. Emma Child, and to his senior clerk, Henry Gould, £500 each; to his executors, £100 each; and there are legacies to the clerks and other persons in his employ and his domestic servants, according to length of service. The remainder of his estate he gives to his son.

The will, dated June 22, 1868, of General William Prescott, late of Blackheath, who died on Dec. 2 last, at Genoa, was proved on the 7th inst. by Mrs. Maria Prescott, the widow and sole executrix, to whom he gives and bequeaths all his property. The personal estate is sworn under £10,000.

Letters of administration, with the will annexed, of Mr. George Grey, late of Grappenhall, Cheshire, and of Lincoln's Inn, barrister-at-law, who died on Jan. 1 last, have been granted, the personal estate being sworn under £25,000.

In our notice of the will of Colonel Charles Towneley, of Towneley, in a recent number, it was, by a typographical error, stated that the legacy given by the testator to Mr. Henry James Stonor, joint executor with the testator's son-in-law, Lord Norreys and Lord A. F. C. G. Lennox, was £100; it should have been £1000.

The Royal Dublin Society has resolved to appoint delegates to treat with the Government regarding the establishment of a national science and art museum for Ireland, which shall be independent of South Kensington.

The Home Secretary has received a letter from the wife of the Claimant, signed "M. H. Tichborne," and, in reply to "Mrs. M. H. Castro," states that her husband has the same opportunities that all convicts have of making any complaint he pleases, and declines to grant a personal interview.

An imposing Masonic ceremony took place at Truro, on Tuesday afternoon, when the Earl of Mount-Edgcumbe was installed as Grand Superintendent of the Royal Arch Masons of Cornwall, the principal Grand Chapter of which has been revived.

According to a return presented to the Manchester Board of Guardians, the number of paupers, including lunatics, maintained by the Manchester township has decreased from 13,633 in 1870 to 4611 in the present year. This satisfactory state of things is attributed to the restrictions placed by the guardians upon the administration of outdoor relief.

The Astronomer Royal having undertaken to register the hours of sunshine in comparison with the number of hours the sun is above the horizon, some interesting results have been obtained. Thus, last week, the sun was above the horizon 69.3 hours; but his light was intercepted, and he only shone on London 9.3 hours—four days not at all; Sunday, 5.3 hours; Friday, 3.4 hours; and Saturday half an hour.

Two subjects of considerable interest were discussed by the Chester Chamber of Agriculture last week. Captain Smith, Chief Constable of Cheshire, made a statement with reference to cattle disease in the county; and the chairman (Mr. G. W. Lathom) subsequently spoke on the very severe competition which the English stock-breeder was likely to feel from the importation of American meat. Mr. Rigby, the secretary, had been told that American beef had been coming over for eighteen months, but it had been kept quiet "because the meat had been sold as English meat."

In connection with the National Union for the Education of Women, a public meeting was held at Sheffield, on Monday night, with the object of promoting the establishment of a girls' high-class school. The meeting was addressed by Mrs. Grey, the foundress of the movement, and it was resolved to establish a school as proposed. Miss Becker laid, on Saturday last, the memorial stone of a new board school in Harpurhey. This, the fifth school that has been erected by the Manchester School Board, is intended for girls and infants. Miss Becker spoke of the advantages of schools for cookery, and said if she could have her way every boy should be taught to "darn his own socks and cook his own chops."

A heavy gale from the north was experienced on our western coasts last Tuesday, and several shipwrecks took place. The ship Marietta, of Liverpool, was lost on the bar of the Mersey. The Liverpool life-boat and the New Brighton tubular life-boat of the National Institution proceeded out to her, and with great difficulty saved nineteen of the shipwrecked crew, who had taken refuge on the poop and in the foretop. The Donna Nook life-boat saved the crew of three men from the stranded schooner Helen, of Rye. The Padstow life-boat, Albert Edward, assisted to save three of the crew of a French brigantine; she also rescued from her moorings and drifted on the rocks. The Fishguard, No. 2, life-boat gallantly saved the crew of eleven men from the stranded barque B. F. Marsh, of New York, and four men from the schooner Adventurer.

1844, 1846, 1848, 1850, 1852, 1854, 1856, 1858, 1860, 1862, 1864, 1866, 1868, 1870, 1872, 1874, 1876, 1878, 1880, 1882, 1884, 1886, 1888, 1890, 1892, 1894, 1896, 1898, 1900, 1902, 1904, 1906, 1908, 1910, 1912, 1914, 1916, 1918, 1920, 1922, 1924, 1926, 1928, 1930, 1932, 1934, 1936, 1938, 1940, 1942, 1944, 1946, 1948, 1950, 1952, 1954, 1956, 1958, 1960, 1962, 1964, 1966, 1968, 1970, 1972, 1974, 1976, 1978, 1980, 1982, 1984, 1986, 1988, 1990, 1992, 1994, 1996, 1998, 2000, 2002, 2004, 2006, 2008, 2010, 2012, 2014, 2016, 2018, 2020, 2022, 2024, 2026, 2028, 2030, 2032, 2034, 2036, 2038, 2040, 2042, 2044, 2046, 2048, 2050, 2052, 2054, 2056, 2058, 2060, 2062, 2064, 2066, 2068, 2070, 2072, 2074, 2076, 2078, 2080, 2082, 2084, 2086, 2088, 2090, 2092, 2094, 2096, 2098, 2100, 2102, 2104, 2106, 2108, 2110, 2112, 2114, 2116, 2118, 2120, 2122, 2124, 2126, 2128, 2130, 2132, 2134, 2136, 2138, 2140, 2142, 2144, 2146, 2148, 2150, 2152, 2154, 2156, 2158, 2160, 2162, 2164, 2166, 2168, 2170, 2172, 2174, 2176, 2178, 2180, 2182, 2184, 2186, 2188, 2190, 2192, 2194, 2196, 2198, 2200, 2202, 2204, 2206, 2208, 2210, 2212, 2214, 2216, 2218, 2220, 2222, 2224, 2226, 2228, 2230, 2232, 2234, 2236, 2238, 2240, 2242, 2244, 2246, 2248, 2250, 2252, 2254, 2256, 2258, 2260, 2262, 2264, 2266, 2268, 2270, 2272, 2274, 2276, 2278, 2280, 2282, 2284, 2286, 2288, 2290, 2292, 2294, 2296, 2298, 2300, 2302, 2304, 2306, 2308, 2310, 2312, 2314, 2316, 2318, 2320, 2322, 2324, 2326, 2328, 2330, 2332, 2334, 2336, 2338, 2340, 2342, 2344, 2346, 2348, 2350, 2352, 2354, 2356, 2358, 2360, 2362, 2364, 2366, 2368, 2370, 2372, 2374, 2376, 2378, 2380, 2382, 2384, 2386, 2388, 2390, 2392, 2394, 2396, 2398, 2400, 2402, 2404, 2406, 2408, 2410, 2412, 2414, 2416, 2418, 2420, 2422, 2424, 2426, 2428, 2430, 2432, 2434, 2436, 2438, 2440, 2442, 2444, 2446, 2448, 2450, 2452, 2454, 2456, 2458, 2460, 2462, 2464, 2466, 2468, 2470, 2472, 2474, 2476, 2478, 2480, 2482, 2484, 2486, 2488, 2490, 2492, 2494, 2496, 2498, 2500, 2502, 2504, 2506, 2508, 2510, 2512, 2514, 2516, 2518, 2520, 2522, 2524, 2526, 2528, 2530, 2532, 2534, 2536, 2538, 2540, 2542, 2544, 2546, 2548, 2550, 2552, 2554, 2556, 2558, 2560, 2562, 2564, 2566, 2568, 2570, 2572, 2574, 2576, 2578, 2580, 2582, 2584, 2586, 2588, 2590, 2592, 2594, 2596, 2598, 2600, 2602, 2604, 2606, 2608, 2610, 2612, 2614, 2616, 2618, 2620, 2622, 2624, 2626, 2628, 2630, 2632, 2634, 2636, 2638, 2640, 2642, 2644, 2646, 2648, 2650, 2652, 2654, 2656, 2658, 2660, 2662, 2664, 2666, 2668, 2670, 2672, 2674, 2676, 2678, 2680, 2682, 2684, 2686, 2688, 2690, 2692, 2694, 2696, 2698, 2700, 2702, 2704, 2706, 2708, 2710, 2712, 2714, 2716, 2718, 2720, 2722, 2724, 2726, 2728, 2730, 2732, 2734, 2736, 2738, 2740, 2742, 2744, 2746, 2748, 2750, 2752, 2754, 2756, 2758, 2760, 2762, 2764

THE AMERICAN PRESIDENTIAL ELECTION: THE HON. RUTHERFORD HAYES, REPUBLICAN CANDIDATE.

will be willing to assent to them." Here, again, rumours may be not warranted by facts; but here again their prevalence at Constantinople may well be supposed to indicate a tone of feeling strongly averse from precipitating a war with Russia. The proposal, even if contemplated by the Porte, would be little likely, one might suppose, to win the favourable consideration of the Powers. It might, if assented to, postpone war for the present; but the conditions it would involve are so vague, so impractical, and so illusory, that it is difficult not to class them with the mass of that unnegotiable paper which the Home Secretary said, some time since, had ceased to have current value among the Governments of Europe.

The Parliamentary storm which heavy clouds upon the horizon seemed to prelude about a month ago has passed off for the present, leaving behind a somewhat electrical condition of the atmosphere, but no little uncertainty as to the eventual direction it will take. There have been lambent flashes of discussion in both Houses during the past week upon the Eastern Question, but they have made no noise, and can hardly be said to have aimed at any practical result. No doubt there will be more of them as the weeks roll on, but for some time to come both her Majesty's Government and the Opposition feel themselves bound to watch and wait the progress of events. Diplomatic interchange of ideas has not ceased between the guaranteeing Powers—has not, perhaps, wholly ceased between them and Turkey; and until some movement has been made, either by Russia or the Porte, calculated to put an end to the present apparent lull, materials for useful Parliamentary discussion are non-existent. The question cannot be altogether excluded from Parliamentary notice. It is sure to start up once and again, as it has already done, in the form of interpellations of Ministers; but no serious or decisive issue can as yet be joined between those who have the direction of the foreign policy of the country and those who look upon it with suspicion, if not with positive disapprobation. This is not a satisfactory state of things, so far as the mutual duties of Parliamentary Parties are concerned. But it may turn out to be the best thing that could happen. The country certainly does not wish, nor, so far as we can understand intend to risk a general war in Europe, and it seems not by any means unlikely that the settlement of the Eastern Question may be more effectually promoted by the internal decay of the Ottoman Empire than by any combination of European Powers to impose upon Turkey Administrative Reforms. Events do not stand still, even when best intending diplomacy is obliged to own itself baffled.

THE COURT.

The Queen received the Right Hon. R. A. Cross at an audience, on Saturday last, at Osborne. Mr. Cross dined with her Majesty. The Queen, Princess Beatrice, and Prince Leopold attended Divine service on Sunday, performed at Osborne by the Rev. W. Barker, Vicar of St. Mary's, West Cowes. Captain Buckle, H.M.S. Hector, and Lieutenant-Colonel Lockhart, 16th Regiment, at Parkhurst, dined with her Majesty on Monday. Vice-Admiral G. T. P. Hornby came from Portsmouth to Osborne, on Tuesday, and had an audience of the Queen. Admiral Elliot and Lieutenant-General Sir Hastings Doyle dined with the Queen, at Osborne, last week. Her Majesty, with Princess Beatrice, arrived at Buckingham Palace on Thursday.

The Queen will hold a Levée, at Buckingham Palace, on Monday, the 12th inst., and a Drawingroom on Wednesday, the 14th inst.

The Countess of Erroll has succeeded Lady Churchill as Lady in Waiting to her Majesty.

THE QUEEN'S LEVÉE.

By command of the Queen, a Levée was held on Monday, at St. James's Palace, by the Prince of Wales, on behalf of her Majesty. Presentations to his Royal Highness at this Court are, by the Queen's pleasure, considered as equivalent to presentations to her Majesty. The Prince of Wales, attended by his Gentlemen in Waiting, and escorted by a detachment of the Royal Horse Guards, arrived at the palace from Marlborough House at two o'clock, and was received by the great officers of State and the Royal household. Prince Christian of Schleswig-Holstein, Prince Edward of Saxe-Weimar, and the Duke of Teck were present at the Levée. The customary state ceremonial was observed. The presentations numbered nearly 200.

THE PRINCE AND PRINCESS OF WALES.

The Prince of Wales, accompanied by Prince Christian, hunted with her Majesty's staghounds, near Maidenhead, yesterday week. Their Royal Highnesses paid a visit to Mr. Headington, of Redstone Farm, on whose land the hind, The Duchess, was uncared, and gave a short run, and was taken near Holyport, after which The Princess was released, and she, too, gave but a short run, being taken at Winkfield. The Royal party then rode to Windsor and partook of luncheon with Colonel Ewart and the other officers, at the barracks. The Duchess of Teck visited the Princess of Wales and Prince Christian at Marlborough House. In the evening the Prince, with Prince and Princess Christian, went to the Prince of Wales's Theatre. The Prince left Marlborough House on Monday, after the Levée, for Cirencester, on a visit to the Earl and Countess of Shannon. The Prince hunted, on Wednesday, with the Cotswold Hounds, the meeting being at Five Mile House, on the Cirencester and Gloucester road. The field was a large one, and his Royal Highness was warmly received. On Thursday his Royal Highness hunted with the Vale of White Horse Hounds, which met at East Court House, the seat of Mr. Walter Powell, M.P. The Princess has, during the last few days, been confined to the house from slight indisposition arising from cold. Prince and Princess Christian returned to Cumberland Lodge, on Saturday last, from visiting the Prince and Princess of Wales at Marlborough House. Prince Albert John Charles Frederick, second son of their Royal Highnesses, completed his eighth year on Monday.

THE CHURCH.

PREFERMENTS AND APPOINTMENTS.

Archdall, T. H., to be Vicar of Tanfield.
Backhouse, J. H.; Curate (sole charge) of Laverton, Somersetshire.
Baker, C.; Rector of Hinton-on-the-Green.
Bickelstaff, Marcus John; Vicar of Cookley, Worcester.
Briccoe, James Rynd; Vicar of Ilminster.
Brown, Henry; Vicar of St. John's, Little Ouse.
Brown, Robert Skelton; Curate of Scarborough.
Burnaby, J. C. W.; Rector of Wyton.
Brymer, Frederick Augustus; Rector of Charlton Mackerell.
Crawford, John; Vicar of East Knottingley.
Crook, James Sutcliffe; Vicar of Weobly, Hereford.
Crowther, Samuel Bryan; Vicar of Lodswoth.
Curtis, W. Fitzh.; Perpetual Curate of Thornton-le-Fen and Langrville.
Davidson, Randall Thomas; Chaplain to the Archbishop of Canterbury.
Earl, Francis; Rector of West Tanfield; Rural Dean of East Catterick.
Early, J. B.; Rector of Holy Trinity, Colchester.
East, Sidney; Vicar of Pillerton-Horse, Warwick.
Fairfax, Charles H.; Vicar of Hackthorne and Rector of Cold Handworth.
Fellowes, E. L.; Vicar of Arrington.
Forrest, T. G.; Vicar of Upton, near Peterborough.
Gardner, Thomas J. C.; Perpetual Curate of Buddesley, Enzor, Warwick.
Gillett, Hugh Hodgson; Rector of Compton.
Gooder, Joseph Hulme; Perpetual Curate of Holy Trinity, Ripon.
Gough, Edwin Spencer; Vicar of Burley, Leeds.
Graham, J.; Vicar of St. James's, Bristol.
Grantham, H.; Chaplain of the Chester Infirmary.
Gurney, H. F. S.; Perpetual Curate of Stoke St. Gregory.
Hackman, A.; Vicar of Brecon.
Hall, John Robert; Rural Dean of North Malling.
Harris, C. S.; Rector of Mepal.
Harrison, Henry Chespe; Curate of Ackworth.
Hatten, James Wright; Vicar of Calverley.
Holditch, Charles Walter; Perpetual Curate of Werrington-cum-Walton.
Hughes, David; Vicar of Little Waddingfield.
Huxley, T. S.; Rector of Keeton, Kent.
Jackson, Robert; Rector of Tibberton.
Jarratt, F.; Chaplain of Barnstable Workhouse.
Jex-Blake, William Francis; Rector of Hungarton, Norfolk.
Johnson, Anthony; Perpetual Curate of St. John's, Healey.
King, E. G.; Vicar of Madingley.
Klambowski, L.; Vicar of Denston.
Leaman, William Luther; Vicar of Rosedale.
Lloyd, Joseph; Perpetual Curate of Llanpumpain, Carmarthenshire.
MacKenzie, Duncan C.; Curate of Whelford; Vicar of Shephall.
Macnaghton, Henry Alexander; Vicar of Wentworth.
Marshall, H. B. D.; Perpetual Curate of Knowbury, Hereford.
Maude, Arthur; Rector of Burgh, Suffolk.
Mooyart, Henry; Vicar of Benhall, Suffolk.
Nettlehip, Arthur; Rector of Barton-on-the-Heath, Warwickshire.
Patterson, W. S.; Rector of Barlow; Vicar of Deane, Lancashire.
Philpott, N. G.; Rector of Thwaite, Norfolk.
Pigott, C. F. C.; Rector of Edmond; Prebendary of Wolvey, Lichfield.
Powell, Edwin Palmer; Vicar of Heptonstall.
Richardson, T.; Vicar of Aberdovey.
Robinson, Eustace; Vicar of Grimley, Worcester.
Sanders, Lewis; Perpetual Curate of St. Paul's, Newcastle.
Smith, Josiah; Vicar of Waterperry, Oxon.
Smith, Matthew Henry; Vicar of Wilberfoss.
Walker, P. C.; Perpetual Curate of Borrowdale and Grange in Borrowdale.
Walsh, Henry Westmac; Rector of Hollestone, Wilt.
Wallas, G. I.; Rector of Shobrooke.
Webb, Albert Brook; Rector of Lullington.
Whitledge, Vicar of Widnes; Vicar of Bramford Speke.
Wilcox, C. B.; Curate of Christchurch, Sparbrook, Warwick.
Wood, Horace S.; Sole Charge of Coalbrookdale.—*Guardian*.

On Shrove Tuesday a new church at Stanley, near Crook, was consecrated by the Bishop of Durham.

The New Testament Company of Revisers assembled, on Tuesday, in the Jerusalem Chamber for their sixty-seventh session, and proceeded with the revision of the twelfth chapter of the Epistle to the Hebrews.

The churchwardens of St. Peter's, Eaton-square, have been authorised by the Consistory Court to sell a painting, by W. Hilton, of "Our Lord Crowned with Thorns," formerly over the communion-table, to Sir Francis Grant for £1000.

On Tuesday the old colours of the 66th Royal Berkshire Regiment were deposited in St. Mary's Church, Reading. The colours, tattered from long service, had been sent home from India for this purpose, the regiment having been presented with new colours by the Viceroy.

The late Mr. Nathaniel Greenhalgh, cotton-spinner, of Thornidylkes, Sharples, near Bolton, has, it is said, bequeathed £40,000 for the erection and endowment of two churches—one at or near Astleybridge, a populous village a mile and a half from Bolton; and the other in the neighbourhood of Pikes-lane, in that town.

Lord Hatherley presided at the annual meeting of the Clergy Orphan Corporation on Wednesday, and in the course of the proceedings testified that the organisation is deserving of the liberal support of the members of the Church of England, and pointed out that a very considerable effort is necessary to maintain the institution, the numbers of the pupils having increased since 1856 from 131 to 220.

The National Committee for Promoting the Restoration of Tewkesbury Abbey are about to make an earnest appeal to the public to provide funds for completing the work of restoring this noble specimen of mediæval architecture to something of its former grandeur. In promotion of this object a meeting is to be held in the library of Lambeth Palace this (Saturday) afternoon.

A handsome pulpit has lately been presented to Trinity Church, South Hampstead, by Mr. Basil Woodd, of Hampstead, in memory of his father. It is of Caen stone, with marble shafts at the angles, and marble columns carrying small arches, which form the base or lower portion of the pulpit. Around the upper part are six panels with subjects in alto-relievo, illustrating the life of St. Paul. It has been designed by the architect of the church, Mr. Legg, of Bedford-row, and erected, under his superintendence, by Mr. Bradford, sculptor.

The Church of St. Peter, Woodmansterne, near Epsom, was consecrated recently by the Bishop of Winchester, assisted by the Rector, the Rev. A. Roberts, and Canon Bridges. The church has been rebuilt almost entirely at the cost of Mrs. Mildred, of Court-How, who is also one of the churchwardens, from the designs of Mr. Clarke, F.S.A., and it is in the Early Decorated style. The cross and candlesticks were gifts of Mr. Glyn. The embroidered altar-cloth was the work of Mrs. Chambers, and the other work that of the foundress. The lectern and fald-stool were the gift of Mrs. Glyn.

The treasurers of the Additional Home Bishops' Endowment Fund have this week purchased £10,000 four per cent railway debentures towards the endowment of St. Alban's bishopric, and the *Guardian* is informed that the stock will be immediately transferred to the Ecclesiastical Commissioners. It appears, therefore, that on the payment by Government of the purchase-money of Winchester House there need be no delay in the issuing of their "certificate of sufficient endowment," upon which her Majesty may, by Order in Council, found the new see.

At a meeting of the Governors of the Birmingham General Hospital, Mr. R. Peyton said the accounts of the late musical festival had been audited, and showed a net balance in favour of the charity of £6071, nearly the same amount as in 1870.

A meeting held in Edinburgh passed resolutions in favour of continuing the Board of Education for Scotland, with an improved constitution and enlarged powers. Sir James Gardiner Baird, Bart., presided.

THE CRISIS IN TURKEY.

The Sultan's Government has made peace with Serbia, and will make peace with Montenegro; both these Principalities that they cannot, after all, depend on Russia going to war against Turkey, at least not soon enough to save them from being utterly crushed. Yet there is no sure promise of the continuance of peace between Turkey and Russia, and the vast military preparations on both sides are unabated, bringing the Sultan's Government daily nearer to financial ruin, while imposing heavy burdens on the Russian Empire. The time is approaching for the first meeting of the new Turkish Imperial Parliament, under the Constitution lately decreed; but there are many political observers at Constantinople who doubt whether it will ever be assembled, or who expect that it will not be allowed to exercise any freedom of legislative deliberations and enactments. The arbitrary dismissal and exile of the late Grand Vizier, Midhat Pasha, by the mere personal act of the Sultan, three weeks or a month ago, has destroyed all confidence in the working of Constitutional Government for Turkey. Our Special Artist at Constantinople, finding no incidents of more recent date worthy of his pencil, has sent us a few additional sketches, over and above those we have already engraved, showing the curious scenes that he witnessed at the Sublime Porte, or official Palace of the Imperial Ottoman Government, upon the occasion of Midhat Pasha's downfall, and the appointment of Edhem Pasha to be Grand Vizier in his stead. These are but scenes in the corridor or vestibule, at the doors of the Ministry of State, among the crowd of venal sycophants, courtiers, subservient officials, contractors and place-hunters, who were frightfully eager to solicit the patronage of the new man in power, whoever he might be, and to show themselves among the first and foremost worshippers of his ascending star. They almost threatened to force their way into the Ministerial apartments, so that the soldiers on guard had to make a feat of using their bayonets, to keep them off. The manner in which this guard saluted the Minister of War, as he passed out of the door after a visit to Edhem Pasha, was in the usual Turkish fashion, which is not very soldierly or manly; it is done by touching the ground with one hand, then with the same hand touching the lips and the forehead, as a token of profound humility before a person of superior rank. As for Edhem Pasha, it is generally believed that he will not remain many days in office; there are different rumours about his probable successor. The Turkish Government, on Tuesday last, sent despatches to the representatives of the Porte abroad, again informing them that there is absolutely no foundation for the reports which are continually being circulated in foreign journals to the effect that the Sultan is ill, that a change in the Grand Vicerate is imminent, and that the population of Constantinople gives evidence of an unquiet attitude.

The condition of most of the Asiatic provinces, arising from the drain of all the Mussulman male population from agricultural labour to fill the ranks of the army, is described as deplorable, and almost sure, if continued, to lead to a more disastrous famine than that of 1874.

The news that the Shireef of Mecca, who enjoys the highest priestly position in the dominion of Islam, has sent a decree to the Sheikh-ul-Islam demanding a declaration of war against Russia as a religious necessity, is now confirmed from various trustworthy quarters. The Sheikh-ul-Islam will bring this question before the Great Council of the Porte or Turkish Parliament, if it should assemble.

The agreement for a treaty of peace with Serbia was signed last Wednesday. It consists of three points—namely, the maintenance of the *status quo ante bellum*, the granting of an amnesty, and the evacuation of Serbian territory twelve days after peace is signed. The Serbian delegates will subsequently deliver to the Porte a note giving guarantees for the future. This note will deal with the four points already known—namely, the prohibition of the erection of new fortifications in Serbia, the hoisting of the Ottoman flag by the side of that of Serbia on the existing forts, the recognition of the equal rights of Jews and Christians in the Principality, and the prevention of armed bands from crossing the frontier. The question of appointing an Ottoman agent in Belgrade and the future position of Little Zvornik are set aside. Prince Milan will send a telegram to the Grand Vizier approving the conditions of peace as arranged with the Serbian delegates. The Sublime Porte will reply, taking cognisance of the Serbian declarations, and a new firman will be used by the Sultan. These conditions of peace have already been ratified by the Skupatchina, or Serbian Parliament at Belgrade, in a secret deliberative Session held this week. The armistice with Montenegro has been renewed for twenty days, and the delegates from that State were to arrive yesterday at Constantinople. It is thought that there will not be any difficulty in making peace with Montenegro.

The force of gendarmerie, for the organisation of which Mr. Valentine Baker is to form a plan, is to consist of 60,000 men.

The statement is repeated, upon what appears fresh authority, that Russia demands some compensating concession from the Powers if she is to consent to the proposal of granting the Porte a term of grace. The concession suggested is a guarantee of joint measures for the protection of Christians in Turkey should the Porte not carry out the promised reforms.

The Board of Trade inquiry into the circumstances attending the stranding of the ship *Ellen Goudey*, in the South Pacific, whilst on a voyage from San Francisco to Antwerp, ended, at Liverpool, on Monday, in the acquittal of the master, the Court attributing the casualty to misadventure.

Mr. Morley, M.P., writing to the Secretary of the Prison Labour Reform Association, says he believes he is guilty of no breach of confidence when he says that the Home Secretary proposes to add a clause to the bill now before Parliament, which shall require returns to be made every year of the trades in connection with which work is done in all prisons.

A letter has been addressed, by order of the Lord President of the Council, to the secretaries of the Royal Agricultural Society of England, the Highland and Agricultural Society of Scotland, and the Royal Agricultural Society of Ireland, relative to Mr. Andrew Murray's proposition for extirpating insects injurious to agriculture. The Duke of Richmond and Gordon thinks that the subject well deserves consideration, though he feels that it does not fall within the province of the Science and Art Department of the Committee of Council to take action in the manner suggested by Mr. Murray.—A meeting of the Essex Chamber of Agriculture was held yesterday week, at which Lord Carlingford presided, and spoke in favour of reforming the present system of county administration, and of establishing a truly representative county board. A resolution was passed in favour of county representative boards, to which should be intrusted all county business and finances other than the maintenance of public order and the administration of justice.—The Cambridgeshire Agricultural Society, on Saturday last, appointed a committee to communicate with similar associations in the neighbouring counties, with a view to an amalgamation.

FOREIGN AND COLONIAL NEWS.

FRANCE.

(From our Correspondent in Paris.)

Thursday, March 1.

The sittings of the Versailles Parliament have been of late comparatively devoid of interest. In the Chamber of Deputies, on Friday last, M. Martel, the Minister of Justice, asked for authorisation to prosecute one of the members for certain newspaper articles which violently attacked the Republic and the Government. M. Paul de Cassagnac, to whom the demand pointed, at once rose and acknowledged that it was directed against him; but said he should reserve the remarks which were suggested "by the conduct of those Republicans in power who now ask leave to apply the principle of liberty of the press in a sense very different from that in which they have been in the habit of claiming for themselves." The matter, following the usual course, was referred to a Committee. On Monday a proposal was made to restore to Senegal and Guiana the right of returning deputies to the Legislative Chamber, which was contested by the Minister of Marine, who said the colonies in question had scarcely any local manufactures or commerce, and that they depended mainly on the transportation of convicts. As to Senegal, the population was mainly Mohammedan, and prone to rebellion, while the few Europeans resident there cared little for electoral privileges. The bill nevertheless obtained a majority of 161.

On Tuesday M. de Gavardie, an eccentric partisan of the Comte de Chambord, surprised the Senate with a series of attacks against the Government. He proposed, amongst other things, to invite the President of the Council to fulfil his duties as Minister of the Interior at Versailles instead of Paris. Further, that the President of the Republic should dismiss from his councils a man who formerly belonged to the International and other secret societies. This personal attack on M. Jules Simon created considerable sensation, on the subsidence of which M. de Gavardie's motions were ruled to be out of order, and the subject dropped.

At a banquet held at St. Maude, on Sunday evening, to celebrate the anniversary of the Revolution of 1848, M. Louis Blanc reviewed the state of society in France preceding that event, and paid a tribute to the patriotism of the men who, after directing the revolution, voluntarily remitted their powers into the hands of the people.

A grand charity ball was given at the Opera House, on Tuesday evening, in aid of the distressed Lyons operatives. The élite of Parisian society were present, and the profits resulting from the entertainment amounted to £5000. It is announced that several dockyards are to be opened to provide employment for the operatives out of work.

The Marquise de Caux (Madame Adeline Patti) has instituted a suit in the Paris Courts against the Marquis her husband for a judicial separation. An order has been made authorising the Marquise to reside with her sister and to fulfil her engagements in Paris, Vienna, and London.

The *Suffrage Universel*, a Charente journal, has been condemned to pay a fine of 2500f. for libelling Madame Simon, the wife of the Prime Minister, in accusing her of having had a crucifix fixed in a public school-room chopped up for firewood during the siege of Paris.

A retired tradesman named Godefroy has escaped with a sentence of ten years' penal servitude after being found guilty of shooting an importunate creditor named Courtefois who had called upon him respecting his claim.

SPAIN.

The marriage of King Alfonso to the daughter of the Duke de Montpensier is announced to take place at the end of April. His Majesty has been visiting some Mediterranean ports, where he has been cordially received.

Official intelligence of the pacification of the district of Cinco-Villas, in Cuba, has been sent from Havannah.

HOLLAND.

By a majority of two votes (39 against 37) the Second Chamber, on Monday, adopted a motion in favour of the abolition in the Dutch Indies of the police regulation in virtue of which native workmen and domestics are punished for breach of contract.

GERMANY.

The Reichstag met, yesterday week, to constitute its bureaux and to elect its officers. Herr von Forckenbeck was elected president, Baron von Stauffenberg first vice-president, and Prince von Hohenlohe-Langenburg second vice-president.

The Prussian Lower House passed, on Monday, by 189 against 182 votes, the bill concerning the transference of the Berlin-Dresden Railway administration to Prussia. As, however, the Government opposes most energetically this transference, on the grounds of some stipulations of a treaty concluded with Prussia in 1872, when the concession was granted to the Berlin-Dresden Railway Company, the Prussian Government has called for the decision of the Federal Council, according to clause 76 of the Imperial Constitution. This is the first time that the council has been called upon to settle a dispute between the Federal States.

AUSTRO-HUNGARY.

The Upper House of the Austrian Reichsrath has adopted, without debate, the bill granting to the Government a credit of 600,000fl. to defray the expenses of Austria's participation in the Paris International Exhibition of 1878.

The Hungarian Bank question seems to be at last settled, only waiting the decision of the Austrian and Hungarian Parliaments.

CANADA.

We hear from Halifax that the Government of Nova Scotia intends taking part in the conference to be held respecting the legislative union of the maritime provinces. In a question which came before the Supreme Court, last Saturday, evidence was adduced to the effect that the seal attached to certain Commissions was not the great seal of the province, but the old seal, which was ordered to be returned to the Imperial Government in 1869. The Premier, who was examined, admitted that the Government had been using the old seal, and the Court expressed its opinion that all Acts requiring the great seal since 1869 were void. But in Tuesday's sitting of the Legislative Assembly the Provincial Secretary stated that there was no ground for the alarm which had been felt in consequence of the irregularity which had occurred in the use of the great seal.

The Legislature of British Columbia was opened by the Lieutenant-Governor, at New Westminster, on Feb. 22. A despatch from the Earl of Carnarvon was read recommending the Province to accept the money indemnity offered by the Dominion Government as an equivalent for the extension of the railway to Esquimalt, and expressing his belief that the work on the main line would be opened in the spring. His Lordship's despatch has tended to calm the strong feeling which existed here on this question.

INDIA.

The *Times'* correspondent at Calcutta says, in his weekly telegram, that the official weather and crop report for the week

ending the 22nd ult. states that rain has fallen in the Madras districts of Kistna, Nellore, Kurnool, Coimbatore, and Tinnevely. The number on the relief works is 775,777. There is a decrease in every district except South Arcot. The condition of the public health in the city of Madras is said to be most alarming. This is due to the influx of famine-stricken people and to the lowness of the water in the tanks which supply the town. There is no material change in the prospects of Bombay. There has been a little rain in Sholapore.

The University of St. Petersburg has elected M. Freeman, the historian, an honorary member.

The *Pekin Gazette* announces the death of the hereditary Duke of Kung, the lineal descendant of Confucius, in his twenty-ninth year.

The Direct United States Cable Company, following the example of the Anglo-American Company, have reduced the rates for messages to New York and Canada to a shilling per word from March 1.

A Hungarian officer has invented an apparatus to be attached to a horse in order to enable it cross a river without sinking. The invention has been tested in the Danube, at Pesth, completely answering its purpose.

Gordon Pasha, the new Governor-General of the Soudan, is authorised by the Khedive to negotiate with King Johannes of Abyssinia for the conclusion of a treaty of peace and commerce, and for opening up the country to trade.

Advices from the West Coast of Africa state that the blockade of Dahomey continued, but apparently with little effect upon the King, who was said to be preparing for his annual raid on Abeokuta.

The Italian Scientific Association has conferred on Sir William Thomson, Professor of Natural Philosophy in the University of Glasgow, the prize instituted by Carlo Matteucci, for the Italian or foreigner who, by his writings or discoveries, has contributed most to the advancement of science.

Intelligence received in New York from Mexico to the 18th ult. states that Porfirio Diaz had then been elected President of the Republic, and Ignacio Villarte Chief Justice. An unsuccessful attempt had been made to stab the Archbishop of Mexico. His assailant was arrested.

The *Morning Post* has news from its correspondent at Berlin that the Russian Synod has published a Russian version of the Bible, the result of twenty years' labour. The version is sold at three roubles each copy; but copies are being distributed by the British and Foreign Bible Society gratuitously.

Trinity Church, Boston, United States, which has cost £150,000, and which is wholly out of debt, was consecrated on the 8th ult. by the Bishop of Massachusetts, in the presence of the Bishops of New York, New Hampshire, and Central Pennsylvania.

The golden Bacr medal has been awarded this year, by the St. Petersburg Academy of Sciences, to Professor Bunge, for his various works upon the flora of Russia. The Lomonosoff premium, value 1000 roubles, was awarded to Professor Beilstein, of Kazan, for researches on the properties of bodies of the tuzoil series.

A Parliamentary return issued on Monday shows that the total amount of the East India loans raised in England outstanding on Sept. 30 last, and bearing interest, was £53,876,116, in addition to East India Bonds to the amount of £20,917, which do not bear interest. The total of the loans raised in India up to the same day, and bearing interest, was £72,973,611, in addition to £58,390 not bearing interest.

A telegram has been received by the owners of the steamship *Fianconia*, reported as wrecked near Colon, that she has been got off and is now in safety.—The steamship *Bavaria* has been burned at sea, off the American coast. She sailed from New Orleans on the 1st ult., and on the 6th was discovered to be on fire. The crew, forty-one in number, took to the boats, and were soon picked up by an English barque.

Tuesday's *Gazette* officially announces the appointment of Sir Richard Temple as Governor of Bombay. Her Majesty has also appointed Mr. Whitley Stokes, barrister-at-law, to be an ordinary member of the Council of the Governor-General of India. The *Morning Post* announces that the Queen has appointed Colonel Laffan, Royal Engineers, to the Governorship of Beiruda, which will shortly become vacant by the retirement of Major-General J. H. Lefroy, C.B., Royal Artillery. Dr. Gouldsbury, C.M.G., has been appointed to be Administrator of the Gambia.

The Alexandra Palace and grounds, comprising the entire property, have been purchased by the London Financial Association for £380,000.

The Mansion House committee have recently made the following grants towards the relief of the sufferers by the floods—namely, to Weston Zoyland, Somersetshire, £497; Middlezey, £45; Burtle, £57 15s.; Borough Bridge, £37 10s.; Bramber, Sussex, £50; Langport, £40; Maidenhead, £85 16s.; St. Clement's, Worcester, £50; Hurley, Berks, £15; Tirley, Tewkesbury, £20; Lewisham (second grant), £57 1s. 2d.; and Great Oakley, Harwich, £10. The committee have still a balance in hand of over £4000.

The West Yorkshire Coal-Miners' Association have resolved to give the miners notice of a 10 per cent reduction on their present wages.—Messrs. Crawshaw's colliers in the Forest of Dean have begun working under a new arrangement of weighing their output instead of supplying 21 cwt. to the ton as brought to bank. The large coal will be separated, and two classes of payments made.—Four hundred men and boys have struck work at Darfield Main Colliery, near Barnsley, in consequence of readjustment of prices in all departments, which they consider unfavourable to themselves.

The Post Office has announced a relaxation of the rule relating to the transmission of old letters by the book post. For the future old letters, or bundles of old letters—that is, letters which have apparently passed through the post before, and have served their original purpose—will be allowed to pass by book post. And, further, copies of letters, which are so marked, or, if not so marked, are yet clearly copies, and letters which are manifestly intended for publication in a newspaper, or otherwise, may also be transmitted at the book rate of postage.

At the spring exhibition of the Birmingham Society of Artists there will be two or three rooms set apart for a collection of the works of Birmingham engravers. The collection, which will amount to nearly 300 works—which are, it is curious to notice, all engraved in line—will include the works of engravers of great reputation, such as J. T. Willmore, A.R.A., and his brother; Robert and E. P. Brandard, Waud, E. Radclyffe, James B. Allen, T. Jeavons, Samuel Fisher, J. Gcedyear, and others. It will be on view for a day or two next week at Messrs. Henry Graves and Co.'s, 6, Pall-mall.

NATIONAL SPORTS.

We have at last experienced a slight visitation of frost, yet such is the vigour of the executive at Sandown Park, that, owing to the precautions that had been taken, steeplechasing was not delayed even for an hour. The Sandown Park Club is now taking the position to which it is entitled, and, under the able management of Mr. Hwfa Williams, there is every promise of a most successful season. A capital little book has been issued, containing the rules of the club and a list of members, and a perusal of the latter shows that a very large number of the most influential patrons of racing have recently joined. The programme on Tuesday was a fairly strong one, and some good fields ran for the various events. Abdallah showed some of his Croydon form in the Wolsey Steeplechase, and the useful Birbeck ran away with a hurdle-race. The Irish division were again successful on Wednesday, when Sultana (11 st. 4 lb.), an own sister to Abdallah, won the Prince of Wales's Steeplechase, after a tremendous finish with Lancet (12 st.). The former was subsequently backed freely for the Grand National, for which her weight, including a 5 lb. penalty, will be 10 st. 9 lb. Birbeck secured another event, and old Silvermere once more caught the judge's eye.

Taking everything into consideration, the late Waterloo Coursing Meeting was about the most successful ever held over the flats of Altcar. The importation of some Scotch does has had a most beneficial effect upon the hares, which now run far more stoutly than they used to do; Mr. Hedley's judging, as usual, gave the greatest satisfaction; and, though Hoystead was somewhat wild on two or three occasions on the first day, he is to be congratulated on a most successful début as slipper. In fact, the only people who had any real reason to complain were the unhappy backers of the favourites, as crack after crack succeeded in the most extraordinary fashion. In the second course Barabbas ran a perfect wretch against Master Sam; then Barker was unlucky in his spin against Flageolet, and suffered an easy defeat. Rondeletia, though much faster than Controversy, ran unsteadily, and the latter, putting in some good work at the finish, just won. Hematite gave Darius no chance; and old Gallant Fox scarcely allowed Myocotis, who has recently been amiss, to score a point. To wind up the first round, The Squatter led Meleman by several lengths; but he went so wide at the turns, and finished the course in such a slovenly manner, that he had no chance. In the first ties, odds of 2 to 1 were laid on Master Sam against Coomassie; but, though he reached the hare first by favour, she was far too clever for him; and then Scapis fairly smothered Hematite, who displayed none of the dash and fire that was so conspicuous in his course with Darius. The round was concluded by Beardwood leading and beating Meleman easily. In the second ties, Aunt Fleda had been too hard run on the previous day to have any chance against Coomassie; Haddo was beaten by Conster in an unlucky trial; and Scapis, after being led, beat Busy Bee by superior cleverness. After a short undecided with Conjur, Braw Lass had little trouble in gaining the verdict; and Kilkenny, though he ran well, was greatly favoured by luck in his spin with Gallant Fox. Coomassie was too good at all points for Conster in the third ties; and Braw Lass and Kilkenny had no difficulty in defeating Master Banrigh and Beardwood respectively, both the trials being very good ones. The fourth ties saw Coomassie and Braw Lass again successful, the former dashing away from Scapis in brilliant style, and picking up a weak hare at once; while the latter beat Kilkenny handsomely after a long trial. Coomassie, therefore, was the fresher of the two when they were put into the slips for the final course, and she reached the hare fully two lengths in front of Mr. Briggs's representative, and, having the best of the trial all the way through, wound up with a good kill. We think there is little doubt that the two best greyhounds in the stake were left in until the last, and, though luck favoured the winner slightly, we should be very sorry to say that she did not fully deserve her position. She is a veritable little wonder, as she weighs only 44 lb., has won twenty courses without suffering a single defeat, and appears able to lead everything she meets. We append the final course of the Cup, Purse, and Plate:—

THE WATERLOO CUP.

(E) Mr. R. F. Wilkins' bk w d Coomassie, by Celebrated—Queen, beat (E) Mr. J. Briggs's bk b p Braw Lass, by Blackburn—Happy Lass, and won.

THE WATERLOO PURSE.

(S) Mr. R. B. Carruthers's bk b p Change, by Contango—Hannah, beat (I) Mr. R. M. Douglas's (Mr. Watson's) f d p Hornpipe, by Light Cavalry—Humming Bee, and won.

THE WATERLOO PLATE.

(S) Mr. D. J. Paterson's bk w d Pouchet, by Peasant Boy—Nancy, beat (B) Mr. T. L. Reed's (Mr. G. Carruthers's) f b Coupland Lass, by Cashier—Cannonette, and won.

The Cambridge University Billiard Cue has been won by Mr. Burnett, of Catherine's, who beat Mr. Phillips, of Downing, in the final game by eighteen points.

On Monday evening last a very interesting billiard-match was played at the Gaiety Restaurant, Strand, between Joseph Bennett (ex-champion) and S. W. Stanley. The game was 1000 up, level, on an ordinary table, and such is the general opinion of Stanley's spot-hazard play, that odds of 6 and 7 to 4 were freely laid on him. Bennett has been terribly unlucky in his recent matches, and once more fortune refused to smile; for though he played wonderful well—well enough to win nine games out of ten—and was 120 points in front at the interval, yet, on resuming play, Stanley made two spot breaks which numbered no less than 455, and eventually won by 207 points. The winners best contributions were 115 (3 and 25), 91 (14 and 13), 55 (14), 47 (4 and 5), 42 (13), 229 (75), 226 (28 and 43), and 68 (17); while Bennett ran up 194 (44 and 2), 128 (10 and 9), 76 (3), 35 (3), 188 (58), and 47 (2 and 10). An American billiard tournament, promoted by the liberality of Messrs. Burroughes and Watts, who have given £100 in prizes, is now being played at the Gaiety; and there will be four games each day—to-day (Saturday), Monday, and Tuesday next. Cook, Joseph Bennett, Taylor, Stanley, Kilkenny, Timbrell, Shorter, and F. Bennett are engaged in it; and all of them play every day. We shall write fully of the play next week, but we cannot pass over without some allusion one of the most remarkable achievements ever performed in public. This was accomplished by F. Shorter, one of the limit men, who was playing against Joseph Bennett on Tuesday evening. After the usual misses by each, Shorter made a losing hazard off the red, and then failed to bring off a long stab shot. Bennett, however, did not score, and then Shorter went right out with the grand break of 295, which included 45 and 47 consecutive spot strokes. This is probably the first time that a love game was ever won in any handicap or match, and the performance was the more extraordinary from the fact that Shorter is a young player who has scarcely played a dozen games in public, and yet the entire break was made with the coolness of a veteran, and many hazards from awkward positions were brought off with wonderful precision. Shorter's performance was so thoroughly appreciated by his brother professionals that they at once decided to present him with a silver cup in remembrance of it. The figures in brackets denote the number of consecutive spot strokes in each break.

METROPOLITAN NEWS.

On Tuesday the Lord Mayor entertained at dinner at the Mansion House the chief members of the Corn Exchange.

The Company of Leathersellers have given £10 10s. to the funds of the North-Eastern Hospital, Hackney-road.

The second annual meeting of the London Society for the Extension of University Teaching was held on Wednesday—Mr. Goschen, M.P., president of the society, in the chair.

The annual festival dinner of the Warehousemen and Clerks' Schools was held, on Thursday week, at the City Terminus Hotel—Mr. Charles Leaf presiding. Subscriptions were announced to the amount of £4750.

Lord Houghton presided, last Saturday, at the annual meeting of the Newspaper Press Fund, at which a report of a satisfactory character was presented. The anniversary festival is to take place on May 5, Lord Hartington in the chair.

The Chancellor of the Exchequer received a deputation of working men last Saturday, who sought his support to a bill which will remove the property qualifications for members of town councils and local boards.

Serjeants' Inn, Chancery-lane, was, yesterday week, disposed of by public auction by Messrs. Norton, Trist, and Company. The bidding started at £40,000, and proceeded by small amounts to £57,100, at which price it was knocked down to Mr. Serjeant Cox.

Sir Bartle Frere was, on Wednesday night, entertained at a banquet at the Langham Hotel previous to his departure to the Cape Colonies, of which he has been appointed Governor. Amongst the speakers were Mr. Goschen, who presided, the Earl of Carnarvon, and the Marquis of Salisbury.

At the weekly meeting of the London School Board, on Wednesday, an offer from the Drapers' Company to give two scholarships, for boys and girls, of £30 each, tenable for four years, was accepted, making nine scholarships which have been presented to the board by the same body.

A meeting in behalf of the Serbian Relief Fund was held at Grosvenor House on Wednesday—the Duke of Westminster presiding. Dr. Sandwith gave a lecture upon the condition of Serbia at present, and upon the nature of the Turkish administration there before the province obtained its independence.

The annual show in connection with the Notting-hill Workmen's Flower Show and Home Encouragement Society, of which the Dukes of Argyll and Westminster and the Earl of Shaftesbury are vice-presidents, was held, last Saturday, in the London School-Board Rooms, Saunders-road, Shepherd's-bush.

The Lord Mayor, at the request of the general committee for the celebration of the 400th anniversary of the introduction of printing into England by William Caxton, has called a public meeting in furtherance of the scheme, to be held in the Egyptian Hall of the Mansion House, on Monday, the 26th inst., at half-past two o'clock.

Lord Alfred Churchill, yesterday week, introduced to the President of the Local Government Board a deputation which asked the assistance of the Government in obtaining a return bearing upon the sanitary condition of the metropolis. Mr. Slater-Booth admitted the importance of the subject, and expressed his readiness to supply the desired information if it could be procured.

The vestry of St. Martin's in-the-Fields have resolved—at the suggestion of Miss Octavia Hill, who contributes some portion of the cost—to lay out with flower beds and walks the old burial-ground in Drury-lane, which has so long remained in an unsightly condition, and to open the ground to the public for the purposes of recreation.

On Thursday week the third and concluding sitting of the Associated Chambers of Commerce was held at the Westminster Palace Hotel—Mr. Sampson Lloyd, M.P., in the chair. Bankruptcy Law, the facilities for admission to the Library of Patents, and Mr. Cowen's County Courts Jurisdiction Bill were amongst the subjects discussed.

The forty-fifth anniversary festival of the Linen and Woollen Drapers' &c., Institution took place, yesterday week, at Freemasons' Hall; Mr. John Scott presiding. The chairman's list of donations and subscriptions in connection with the festival amounted to £1820; he himself gave 100 guineas, and there were other contributions of the same amount; the total was £2735.

The Hon. T. G. Grosvenor, C.B., gave a lecture in aid of the deaf and dumb, at St. Saviour's, Oxford-street, on Tuesday, his subject being a Journey through China. The lecturer had been sent by the Government to inquire into the circumstances of the murder of Mr. Margary, and he described his journey as the first successful one ever undertaken by a European through China.

The Metropolitan Board of Works had a long discussion, yesterday week, on the projected purchase of the metropolitan water companies, and, by twenty-six votes against six, adopted a report authorising the works and general purposes committee to prepare a bill empowering the board to take under its control the water supply of the metropolis, to purchase the companies and to extend existing works.

Dr. Lyon Playfair, M.P., presided, yesterday week, at a general meeting of the Corporation of the Hall of Arts and Sciences, which was held at the Royal Albert Hall. A statement which was circulated among the members showed that the estimated annual expenditure for the repair and maintenance of the hall was £4898. The estimated receipts were the seat rates on 2136 seats at £2 per seat—£4272.

The London Stereoscopic Company have presented the Compton committee with 105 copies of their excellent carte de visite of Mr. Compton, to each of which that gentleman has appended his signature. Anyone, therefore, wishing to possess so interesting a memorial should send 2s. 6d. in stamps or P.O.O. to Mr. Alfred Mackenzie, of 56, Queen's-road, St. John's-wood, to whom the committee have intrusted the disposal of them.

The weekly return of metropolitan pauperism shows that the total number of paupers last week (the third week of February) was 85,871, of whom 39,179 were in workhouses and 46,692 received outdoor relief. Compared with the corresponding week in the years 1876, 1875, and 1874, these figures show a decrease of 3185, 12,480, and 22,674 respectively. The number of vagrants relieved on the last day of the week was 739, of whom 534 were men, 168 women, and 37 children under sixteen.

The sixth annual festival of the United Kingdom Railway Officers' and Servants' Association and Railway Orphan Fund was held, on Wednesday evening, at the City Terminus Hotel—the Lord Mayor in the chair, supported by the Sheriffs and Under-Sheriffs of London and Middlesex. One of the results of the civic patronage thus conferred upon the institution was that one hundred more guests had attended the dinner this year than on any former occasion, making about 300 in all, whose contributions amounted to £1100.

An additional bed has been added to the Hospital for Sick Children, Great Ormond-street, which is designated "The Mayfair Cot," as it is entirely supported by the children who attend the children's service, held each Sunday afternoon, in Berkeley Chapel, Mayfair.—Through the liberality of Mr. Arthur Sullivan and Mr. W. S. Gilbert, two additional beds have been added to the Victoria Hospital for Children, Gough House, Chelsea, to be called "The Sullivan Cot" and "The Gilbert Cot." There are now eleven special cots in the hospital, nine of which have been established within the last two years.

The twenty-ninth annual meeting of the Milliners and Dressmakers' Provident and Benevolent Institution was held, yesterday week, at the Langham Hall; Dr. Brewer, the president of the institution, occupied the chair. The report of the directors stated that the receipts for the year were £5767s., of which £375 18s. 6d. was from dividends, and the remainder from members and subscribers. The sum of £359 8s. had been devoted to the relief of eighteen members during the year. The meeting was addressed by Mr. Bland, the Rev. Mr. Vignolles, the Rev. Mr. Blackett, Dr. Williams, Mr. Bury, and other gentlemen, who dilated on the advantages of the institution.

The annual meeting of the "Maritime League for the Resumption of Naval Rights by Great Britain" was held, yesterday week, at the Charing-cross Hotel. In its manifestoes the league states that the sole object for which it exists is to procure the withdrawal of Great Britain from the Declaration of Paris of 1856. Its members regard as a vital matter to the interests of this country "the retention and the exercise to their full extent of those naval rights founded on the law of nature and sanctioned by the law of nations" which what they regard as the unauthoritative Declaration of Paris, that the neutral flag should cover enemy's goods not being contraband of war, assumed to abolish. Mr. Stewart E. Rolland, chairman of the council of the league, presided.

The Royal Commissioners of the Paris Universal Exhibition of 1878 have taken possession of their new offices at Canada-buildings, Westminster. The immediate result of the meeting of the Commissioners, under the presidency of the Prince of Wales, last Saturday, was that printed documents describing the French arrangements for the Exhibition, and others containing applications for space were immediately forwarded to all firms in Great Britain and Ireland who have taken part in recent Exhibitions, as well as to all Chambers of Commerce. All communications in reference to the disposal of space, or relating to the British section generally, should be addressed to Mr. P. Cunliffe Owen, C.T., secretary to the Royal Commission, Canada-buildings, Westminster, S.W.

The general annual meeting of the governors of the Merchant Seamen's Orphan Asylum and election of inmates was held, on Monday, at the Mansion-House Rooms, Queen Victoria-street—Mr. Nehemiah Griffiths, the treasurer presiding. Forty-five admissions took place during the year by election and one by purchase, whilst during the same period forty-six children had completed their term of residence, one child died at home, and six were removed; 169 boys and seventy-five girls were now resident, and the committee regretted that they could only increase that number by fifteen on the present occasion. The educational work had proved very efficient, and had been, as usual, examined and reported on by the inspector of the British and Foreign School Society, who states of the boys' school, "That the discipline is good, and the standard of attainment satisfactory throughout," and that "the general tone of the girls' school is very commendable, and the teachers earnest and painstaking." The report concludes by an earnest appeal on behalf of the little ones of those who, having "gone down to the sea in ships and done business in great waters," have, in the dispensation of Providence, left so sad but so sacred a legacy behind them.—The Earl of Northbrook has consented to preside at the Jubilee Festival, which will be held at the asylum, Snaresbrook, early in June.

Last week 2450 births and 1495 deaths were registered in London. Allowing for increase of population, the births were 62, and the deaths 221, below the average numbers in the corresponding week of the last ten years. The deaths included 104 from smallpox, 14 from measles, 16 from scarlet fever, 5 from diphtheria, 38 from whooping-cough, 17 from different forms of fever, and 14 from diarrhoea; thus to the seven principal diseases of the zymotic class 208 deaths were referred, against 207 and 187 in the two preceding weeks. These deaths were 35 below the corrected average number from the same diseases in the corresponding week of the last ten years. The fatal cases of measles, scarlet fever, whooping-cough, and fever were considerably lower than the corrected weekly average. The deaths referred to fever were 21 below the corrected average: 2 were certified as typhus, 11 as enteric or typhoid, and 4 as low or simple fever. The deaths from smallpox, which had been 103, 90, and 72 in the three preceding weeks, rose last week to 104, which was, with but one exception, the highest weekly number recorded during the present epidemic; 42 were certified as unvaccinated, 25 as vaccinated. In the remaining 37 cases the medical certificates did not furnish any information as to vaccination, or contained statements that the medical practitioners were unable to certify whether the deceased had or had not been vaccinated. Different forms of violence caused 54 deaths; 48 were the result of negligence or accident, including 13 from fractures and contusions, 3 from burns and scalds, 6 from drowning, and 14 of infants under one year of age from suffocation. Four deaths were caused by horses or vehicles in the streets. Two deaths were referred to hydrophobia. Last week the mean temperature at the Royal Observatory, Greenwich, was 40 deg., being 1 deg. above the average.

The Estimates for the effective and non-effective services of the Army for the ensuing year have been issued. They show a net decrease of £742,900, the total being £14,538,700, as against £15,281,600 voted last year.

The estate of Grellons, in Bow, near Crediton, North Devon, consisting of a handsome residence and 116 acres of far-famed pasture-land, has been sold to Mr. W. H. Kelland, of Lincoln's Inn, for £11,000, being at the rate of nearly £100 per acre—an extraordinary price for Devonshire land.

Last Saturday the memorial stones of three new schools of the Manchester School Board were laid in different parts of the city. The schools will accommodate upwards of 3000 children, and the cost, including purchase of land and furniture, will be about £30,000.

Post-Office Telegraph Stamps of the following denominations are now in use in addition to those previously issued—viz., 4d., 6d., 3s., 10s., £1, and £5. These stamps will be kept at all the larger post offices; and, on application being made beforehand, they can be obtained at any office.

Mr. Gladstone has written to the Plumstead-common Protection League expressing his fear that he cannot undertake, in the midst of his Parliamentary engagements, to attend a public meeting on the subject of Plumstead-common, and doubting whether he should by such attendance gain information sufficiently specific.

The Extra Supplement.

AVONMOUTH DOCK, BRISTOL.

A new dock, constructed for the port of Bristol on the shore of the Bristol Channel, at the mouth of the river Avon, a few miles from that ancient and important commercial city, was formally opened, last Saturday, by the Mayor and Corporation. This work has been eight or nine years in progress, being actually commenced in August, 1868. The total cost of dock, lock, warehouses, machinery, and plant is something like £600,000 or £200,000 more than the original capital of the company. The basin of the dock contains a clear area of sixteen acres, being 1400 ft. long and 500 ft. wide, and has a depth of water at ordinary tides of 31 ft. 3 in., while a depth of 26 ft. can always be maintained. The dock gates are the highest in the world, having a depth of no less than 49 ft. and a width of 70 ft. The lock is 600 ft. long and 70 ft. wide, with a depth of water over 40 ft. The engineer was Mr. Brunlees, C.E., and the contractor Mr. Lawrence, of King's Lynn. The apparatus for opening and closing the gates, and for supplying the six large cranes which surround the dock with motive power, was provided by the firm of Sir W. Armstrong and Company, of Newcastle. The dock is in direct communication with the Great Western and Midland Railway systems, by means of the Port and Pier Railway, which runs from Avonmouth along the side of the river to the Suspension Bridge, whence the Clifton Joint Extension, under Durdham Down, runs into the Great Western at the Bristol terminus and the Midland at Fishponds. Within the past ten years the river Avon has had its bed deepened and its dangerous angles cut off, and new basins have been provided by the city authorities at the cost of nearly half a million sterling; and a dock quite as large as the Avonmouth Dock will be opened next year at Portishead, about twelve miles below Bristol, to which the Corporation, having a large area of property near the docks, contributed £100,000. By next year, therefore, a million and a half will have been spent in the endeavour to attract a share of the large ocean-going steam trade to the West of England port, and in the hope of recovering the position Bristol once held of the second city in the kingdom.

The opening ceremony, on Saturday, was simple but effective. The Mayor and Corporation, High Sheriff, Dock Company's directors, and several hundreds of invited guests left Cumberland Basin in the Irish steamer *Juno*, which, as it entered the new dock, cut in two a line of blue ribbon, as a signal that all obstructions had been removed. At this moment the rifle band struck up the National Anthem, a salvo of artillery was fired from the dock bank, and was replied to by the guns of the training gun-boat *Fervent*, manned by the volunteer naval artillery, and by the formidable training-ship and the battery at Portishead. The *Juno* then steamed round the dock, and the Mayor made a short speech declaring the dock opened. Other speeches were also delivered.

In the evening the Mayor, Mr. George Edwards, entertained the Corporation, directors, and a select party at a banquet in the hall of the Merchant Venturers. It was then announced that the Great Western Railway Company were going to advertise at once for tenders for the completion of the tunnel under the Severn, and that they contemplated making Bristol the centre of their system of railways.

FISHING-SMACKS IN THE NORTH SEA.

We are glad to announce that the Lord Mayor of London has intimated his willingness to assist in raising a fund for the widows and orphans of the crews of the fishing-smacks which were lost in the gale of the 6th ult. There are eighteen smacks missing from Yarmouth and seven from Lowestoft. The Admiralty, in the week before last, sent out two steamers, the *Valorous* and the *Seamew*, cruising up and down the North Sea, to look for these unlucky fishing craft; but their search proved to be of no avail. Our illustration, drawn by Mr. Joseph Wells, an artist of much talent and promise, represents the appearance of such vessels, labouring in a rough sea, perhaps on the Doggerbank, or some accustomed fishing-ground. We hope that the charitable subscription opened by the Lord Mayor will be considered to have a good claim on public liberality; as it should be remembered that these sea fisheries, which have just now cost the lives of nearly a hundred men and boys on the Norfolk coast, supply an important article of food to the people of London.

LIFE-BOAT SERVICES.

At a meeting of the Royal National Life-Boat Institution, on Thursday, at its house, John-street, Adelphi, the third service-clasp of the institution and £3 were voted to Mr. James White, coxswain of the Fishguard life-boats, and £28 to the crews of those boats, in acknowledgment of their recent gallant services in going out in a strong gale and heavy sea, and bringing safely ashore the crews numbering altogether twenty men, of the sloop *Adventurer*, of Bridgewater; the brigantine *B. F. Nash*, of New York; the smack *George Evans*, of New-quay; and the schooner *Supply*, of Newport. Rewards amounting to £214 were granted to the crews of other life-boats of the society for services rendered during the past month, in which period they had been instrumental altogether in saving eighty-two lives from various wrecks, besides assisting to save two vessels from destruction. One of the crew of the Aberystwith life-boat perished from the cold and exposure incurred in going out in the boat to rescue a shipwrecked crew. The meeting expressed its deep sympathy with his widow and two children, and voted £100 towards the local subscription for their relief; £46 10s. was also awarded the crew of the life-boat for their arduous services on this occasion.

The silver medal of the institution and its thanks inscribed on vellum were granted to Mr. Henry Carr, examining officer of H.M. Customs at Wexford, Ireland, and £4 to four other men, for rescuing, at much risk of life, by means of a small boat, the crew of six men from the fishing-boat *Morning Star*, of Wexford, which had stranded on the bar of that port in a strong wind from the S.S.W. and a rough sea, on Jan. 22.

Other rewards were granted to the crews of shore-boats for saving life from wrecks on our coasts, and payments amounting altogether to £1150 were made on some of the 256 life-boat stations of the society. The receipt of several contributions and legacies was announced. Reports were read from Inspectors Wood, Macdonald, and Gray Jones, R.N., on their recent visits to the coast.

The annual meeting of the institution is to take place at Willis's Rooms, St. James's, on the 15th inst., the Duke of Northumberland, president of the institution, in the chair.

Vice-Admiral Sir Charles T. Shadwell, K.C.B., has been awarded the good-service pension which became available by the promotion of Admiral Sir Henry Codrington.

The roll of the House of Lords for the present Session contains 508 names, but seven peers are twice named in the roll. The junior Baron on the list is Lord Airey.

CKS IN THE NORTH SEA.

PARLIAMENT. LORDS.

Something similar to that filling of benches generally resulting from the engagement of a "star" of the first magnitude at a theatre suffering from public inattention might be said to have taken place in the Upper House a third time this Session, did the comparison not smack of irreverence for our hereditary legislators. That languid interest in human affairs deemed proper to the Chamber of Peers was partially roused yesterday week by Earl Delawarr, who made an effective appeal on behalf of railway servants—no less than 5000 met with fatal accidents in 1875—but only drew from Earl Beauchamp a statement that the House of Commons Committee on the question of compensation of servants would be reappointed.

The Turkish flag was unfurled to the breeze again on Monday; and, once again this Session, there was a gaily gathering, which included one or two Princes of the Blood Royal—by marriage—and, among the ladies in the galleries, a Countess whose beauty is of European fame. But, if this notable audience had assembled with the expectation of hearing the voice of one particular charmer after enduring a foretaste of purgatory in listening to the somewhat inarticulate deliverance of Lord Stratheden and Campbell on the Eastern Question, they were disappointed. They did not hear the noble Earl, who, even in the grandeur of his gilded cage, may, as he not disapprovingly regards a hand exceptionally white and shapely, long for the liberty of that freer if humbler House, where he was not tied down to chapter and verse as he is now by a lordling of precocious wisdom, backed up by a noble Earl whose smile is as child-like and bland as that of the "Heathen Chinese." Lord Stratheden's rambling speech was delivered in support of the following motion:—

That an humble address be presented to her Majesty, praying that her Majesty will adopt such measures as appear to be the best calculated to prevent hostilities, to secure adherence to the treaties of March 30 and April 15, 1856, so far as the Conference of 1871 has re-established them, and to promote the welfare of the races subject to the Ottoman Empire.

Earl Grey having, with that air of sagacity natural to him, declared the motion objectionable because it implied that if the House were not to adopt the address the Government would not "pursue a beneficial course," Lord Derby declined to go all over the ground he had traversed in his two previous speeches in that House on the Eastern Question, but replied to the criticisms of the mover and Earl Grey, to whom he paid a graceful compliment for the counsel offered in his speech. The Duke of Argyll then asked the Government to adopt some means by which civilised Europeans might be appointed to see the promised reforms carried out in those provinces of Turkey which had been the scene of the outrages on Christians. By this time the number present had diminished considerably. Declining to accede to a suggestion from Viscount Ashford that the motion had better be withdrawn, Lord Stratheden proceeded to the bitter end, and was rewarded by being outvoted by 4 to 1 in a House of five members.

If the Government think short sittings make long friends in the House of Lords they are going the right way to work to effect their purpose. On Tuesday the House sat for half an hour only, the sole business transacted being the second reading of the Public Record Office Bill, the object of which, as explained by the Lord Chancellor, is to enable the Master of the Rolls to burn a lot of waste paper that has accumulated in the Record Office.

In the course of a short sitting, on Thursday, the Earl of Carnarvon, replying to the Earl of Belmore, stated that for the last two years the kidnapping trade in the South Seas had been reduced to very narrow limits, and might be said to have been entirely suppressed except for occasional transgressions. Still, if the supervision were relaxed, the iniquities of the trade might be expected immediately to revive.

COMMONS.

From the point of view of those who glance over the debates for the same reason that they go to the play—for distraction—there is little of interest in the weekly record of the Lower House. A peal of laughter enlivened the House spasmodically when the member for Stoke gave a fresh illustration of the proximity of the sublime to the ridiculous by announcing his intention of moving a resolution on the Eastern Question, with which it is presumed his Wapping experiences may have familiarised him. A shadow may almost be said to have fallen on the House when it became known that the hon. and gallant member who is wont to relieve the tedium of debate after the dinner hour (Major O'Gorman) had been stricken with erysipelas. As for action on the interminable topic of the day, that may be said to have resolved itself into marking time, not to mention a military phrase which can scarcely be considered complimentary.

The business of the House might be compressed into a nutshell. Colonel Sir J. Hogg, whose lofty bearing is, perhaps, proper to a personage intrusted with the functions of Edile of the metropolis, relieved the minds of many worthy people by assuring them that the steps of St. Martin's Church would not be touched by the new thoroughfare which the Metropolitan Board of Works is to make from Bethnal-green, via Clerkenwell and Bloomsbury, to Trafalgar-square. With this understanding, Mr. Beresford-Hope and Lord Elcho withdrew their opposition, on Thursday week, and the Bill was read the second time. In Committee on the Prisons Bill, the same evening, a division was taken on Mr. Macdonald's amendment antagonistic to the sale of work done by prisoners in gaols, and the amendment was defeated by 218 votes to 70.

Next day Mr. Trevelyan made his motion—"That, in the opinion of this House, the principle of open competition for first appointments, which prevails in the Army and in most of the public departments, should be extended to the Foreign Office and the Diplomatic Service." The hon. member expounded his argument in favour of the motion logically and ably, but was met with a defence of the present system on the part of Mr. Bourke and Sir Stafford Northcote; and, though Mr. Lowe put in a few pithy remarks in his support, the motion was negatived, but by a comparatively small majority, the votes being 112 to 159. Thereafter ensued a debate long drawn out on the subject of the neglect of Scotch business last Session, to remedy which hon. members from beyond the Tweed have not followed the example of some of their impulsive Irish brethren and formed a Home-Rule Association, but have cannily brought their grievances before the House. Sir George Campbell (who can hardly complain that he is not permitted to catch the Speaker's eye with sufficient frequency) having delivered what Mr. Cross called "a good-natured grumble all round," other Scotch members aired their eloquence, and the upshot was that the Home Secretary pledged himself to give due attention to any Scotch business brought before him by Scotch members. The claims of his constituents on Plumstead-common as a playground having been advocated by Mr. Beed, only to be met with an equally earnest argument from Mr. Hardy in favour of using the common as an exercise-ground for the artillery at Woolwich, the rest of the sitting was taken up with the consideration of Mr. O. Morgan's remarks on the delay in the administration of justice under the Judicature Acts.

Dr. Kenealy's formidable motion, the reading of which, on Monday last, elicited mirth, is to be formally brought before the House on Monday next, and runs thus:—"That it is incumbent on this country to maintain the independence and integrity of the Ottoman Empire, not only as being bound by various treaties to do so, but also for the security of our Eastern possessions and the peace of the world; and that this House disapproves of the despatch of the Secretary of State for Foreign Affairs to Sir Henry Elliot, dated Aug. 29, 1876, 11.55 p.m." Bulgaria came in for a fair share of the questions on Monday, when Mr. Anderson inquired whether the Government had received from Tatar-Bazardjik a petition similar to one published in that morning's *Daily News*, and complaining that the promised reforms had not been effected by Turkey in Bulgaria. Mr. Bourke not only said such a petition had been received, but added that it would be sent on to Constantinople—an answer which Mr. Anderson thought might be taken to mean that the paper had been forwarded to the Porte with the names of the petitioners, who might thereby get into hot water for their zeal. To which Mr. Bourke made reply that, of course, he simply meant the petition would be dispatched to our Chargé d'Affaires there. In passing, the Under-Secretary for Foreign Affairs mentioned, in response to Mr. Gladstone, that additional papers respecting Bulgaria would be laid on the table. (Parenthetically, it may be added that Mr. Bourke on the morrow stated, amid marks of approbation from the Opposition, that the original of the Bulgarian petition would be kept at the Foreign Office, and a copy, without the names of the petitioners, sent to Constantinople.) As the Civil Service Estimates this year amount to £21,750,000, and show an increase of £300,000 over last year's, Mr. Goldsmid considered it opportune, on the motion to go into Committee of Supply on the Supplementary Estimates, to move an amendment to the effect that a proper explanation of these Estimates should first be given by a responsible member of the Government. This idea having been warmly supported by Mr. Rylands and Mr. Childers, and others, a brief and business-like statement was made in passing by Mr. W. H. Smith to show the increase was mainly owing to the expenses of works in connection with the Courts of Justice and the War Office. Sir Stafford Northcote replied to the criticisms of Mr. Childers and Mr. Goldsmid by saying he was not to be induced to make his Budget speech prematurely that night; that although the present state of the revenue was not exactly satisfactory, it might not turn out to be so bad as was expected this year; and that he would consult with Mr. W. H. Smith to see whether the suggestion of Mr. Goldsmid could be carried out next year. Then, after a variety of criticisms, the following sums were voted:—£12,337 for public buildings (hon. members indulging in a laugh at the item for repainting the prison-room of the House); £14,0 for the National Gallery; £1200 to repair the breach in Dover Pier caused by the late storms; £10,975 for the new Courts of Justice, which are rapidly being proceeded with, and one portion of which, the First Commissioner of Works said, would be completed by the end of the year; £69,400 for the purchase of land in Westminster to build new Government offices upon—carried by 96 votes to 61; £47,000 for the purchase of Winchester House for the War Office—a vote strongly objected to by Mr. Childers; £21,180 for the purchase of embassy and consular buildings in Rome—a vote which Mr. Rylands objected to and Dr. Kenealy stigmatised as a "vile extravagance," but which was agreed to by 167 votes to 53; £10,110 for additional salaries and expenses of the Foreign Office, mostly incurred through the complications in the East; £15,796 for supplementary salaries and expenses for the Board of Trade—no agreed to until Mr. Plimsoll and Mr. E. J. Reed had vigorously protested against the inactivity of the ship inspectors, to whom good wages were given; £11,400 for expenses of the law officers of the Crown; £2000 for the Science and Art Department; £30,210 for the suppression of the slave trade. At this stage, midnight, Dr. Kenealy declared he was quite worn out after discussing "these figures" for five or six hours; and Mr. Whalley subsequently gravely threatened to resign if these late sittings continued to be indulged in, and Mr. Butt's followers persisted in their course of obstructing the business of the House.

On Tuesday the question of most moment had reference to a telegram which appeared in the second edition of the *Times* of that afternoon, and which asserted that at a Council of Ministers at St. Petersburg it had been resolved to demobilise the Russian army on the conclusion of peace between Turkey and Servia and Montenegro. Sir H. Drummond-Wolff inquired whether the intelligence had reached the Foreign Office; and Mr. Bourke replied that it had not, nor had the Foreign Secretary received any confirmation of the news from the Russian Ambassador, whom he had seen that afternoon. Still harping on the East, another hon. member, Mr. Henry Samuelson, asked for information regarding the number of British consuls in Bulgaria, and elicited from the Chancellor of the Exchequer the reply that he had better move for a return on the subject, and a further statement to the effect that Mr. Dupuis was, and is still, our Consul at Adrianople. "Is it not a fact that Mr. Dupuis was paralytic and totally incapable of travelling?" queried Mr. Gladstone. "I have made inquiries, but have not yet got an answer," said Sir Stafford. Those dignitaries of the City of London who form the Irish Society were not spared in the speech of Mr. C. Lewis, introducing the appended motion:—"That a select committee be appointed to inquire into the constitution, management, and annual expenditure of the Irish Society of London; and, further, to report as to what, if any, change can be made in the governing body or the mode of administration, in order to ensure a more economical and advantageous application of the property, or whether such result can be best attained by placing the property in the hands of public trustees resident in Ireland." He complained of the anomaly of a place like Derry being governed by a society sitting in London, said that in five years the expenses of management "and refreshment" had amounted to nearly £22,500, and pointed out that in 1851 a Royal Commission reported that the Irish Society ought to be dissolved. Sir Sidney Waterlow, as a governor of the Irish Society, flew to the rescue. He said he did not even receive his travelling expenses to Derry, where he simply put the society to the expense of feeding him, though he admitted all the members were not so moderate. Like Silas Wegg, Sir Sidney Waterlow dropped into poetry, informing the House that on a stone in the cathedral of Derry there was inscribed 260 years ago—

If stones could speak, they London's praise would sound,
That built this church from out the ground.

The House laughed at the reading of this couplet, and laughed again when Sir Sidney gravely added that there was not a stone in Derry which would not make the same proclamation. Among the other hon. members who relieved their minds on the subject were Mr. R. Smyth, who was in favour of reforming the Irish Society; Mr. Alderman M'Arthur, who defended it; Mr. Whalley, who rejoiced that the Corporation of London "had been more than a match for that desolating and destructive power, the Church of Rome;" and Sir M. Hicks-Beach, who opposed the motion on behalf of the Government. Mr. Lewis suffered defeat by 108 votes to 53. The

Training of Teachers was the next subject debated. Mr. Samuelson's motion for the appointment of a Select Committee to inquire into the system of apprenticeship of pupil-teachers in elementary schools and the constitution of training colleges for teachers received the support of Mr. Fawcett and Mr. W. E. Forster; but, being opposed by Lord Sandon and Sir Stafford Northcote, it was rejected by 104 votes to 46.

Wednesday was a red-letter day for those who are of opinion that questions exist in the consideration of which even the Ministry of a Conservative majority may not be infallible. Mr. Mundella's bill for abolishing the property qualification now requisite for members of town councils and local boards, and for rendering every burgess eligible for election to those representative institutions—the Town Councils and Local Boards Bill, in short—having been read a second time on the understanding that it should not go into Committee until April 10. Government suffered defeat upon a subject which it was scarcely wise to make a party question of. Mr. Knatchbull-Hugessen moved the second reading of the Colonial Marriages Bill, the purport whereof is to declare the children of marriages which are legitimate in Australia legitimate in England, so that there may be no obstacle to their inheriting any property to which they may be heirs in this country. The mover added that a provision in the bill requiring the parents to be residents in the colonies would prevent British home subjects taking advantage of the measure to evade the law of England. This remark was unfortunate for Mr. Beresford-Hope, who delivered a prepared speech, in which he seemed to imply that by this bill two brothers might be able to marry their widows' sisters, and who feared that, if the measure were to be adopted, hon. members might see at the foot of Ludgate-circus an advertisement by Messrs. Cook of "Marriage Trips to Australia at 10 per Cent Reduction." Mr. Young, formerly a resident in Australia, thought such an argument was "enough to make people's hair stand on end." The bill was opposed by the Attorney-General (who remarked that he would not have been an opponent if it was simply proposed by the measure to make marriage with a deceased wife's sister legal), and by the Attorney-General for Ireland; but was emphatically supported by Mr. Forster, Mr. Keble, and Sir Henry James; and was read the second time by 192 to 141 votes, the Opposition indulging in prolonged cheering when it became clear that there was a majority of 51 against the Government. The Metropolitan Open Spaces Bill was then read the second time, on the motion of Mr. Whalley; and the only other incident of the sitting worth mentioning was that Mr. Biggar, in pursuance of a fell mission he has set himself this Session, talked out Mr. Chaplin's Threshing-Machines Bill.

Amongst the numerous inquiries made of Her Majesty's Ministers on Thursday, Sir G. Campbell occupied the position of chief querist. The hon. gentleman's questions embraced the reported construction of a new residence for the Viceroy of India at Simla; the employment of Mr. G. Fitzgerald, an officer in our Indian financial department, in the service of the Khedive of Egypt; and the use of a "German title Kaiser" by the Viceroy of India as the new Indian title of her Majesty—a title (he said) as unknown to the natives as the English one, and set out in the Persian language as little known to most of them as the English language. Lord G. Hamilton, replying to the first of those questions, stated that the only expenditure sanctioned by the Secretary of State was one for the carrying out of improved sanitary arrangements; that the residence of the Viceroy at Simla was admittedly inadequate to meet the required accommodation, and that certain enlargements of the building were contemplated, the details in respect of which he (Lord George Hamilton) was not yet in possession of. In reference to the second interrogatory, the noble Lord said that the officer in question, on his return from India, had his leave extended to a year, and that he had accepted a proposal of the Khedive of Egypt to occupy such time in the service of that ruler; that that arrangement did not conflict with the policy announced by her Majesty's Government last year, when it "refused to allow any British officer to undertake any office in connection with Egyptian finances without first resigning the British service." In responding to the third inquiry of the ex-Lieutenant-Governor of Bengal—which, by-the-by, was made amid much derisive laughter and cheers from certain members below the gangway—Lord G. Hamilton observed that since the question appeared on the notice-papers he received a large number of letters from distinguished Oriental scholars, expressing indignant surprise that a gentleman of such large Indian experience as Sir G. Campbell should have supposed the word Kaiser to be German, and unknown to the people of India. The word Kaiser was really an old Arabic word, which had been used in India for centuries, both in writing and speaking. On being further interpolated by the discomfited knight as to the reason of putting it into the Persian language, the noble Lord rejoined that the word was Persian, Arabic, and Greek, and equally well known in all those languages. Lord G. Hamilton, replying to Mr. Gourley, said the cost of the recent ceremony of the proclamation of her Majesty as Empress of India at Delhi was £65,000, but this would be greatly reduced by various items, and he hoped it would be found that a great political object had been attained at a very little cost. The Chancellor of the Exchequer informed Mr. Knatchbull-Hugessen that the Government could offer no facilities for the further progress of the Colonial Marriages Bill. The House having resolved itself into a Committee, occupied itself for nearly the remainder of the sitting with the consideration of the Prisons Bill.

THE TRANSVAAL REPUBLIC.

The speech of her Majesty the Queen, at the opening of this Session of Parliament, made mention of "the Transvaal Republic" as a South African State foreign to her colonial dominions. We have been reminded that the proper style and title of that independent political body is "the South African Republic." But there are still, probably, too many of our countrymen who scarcely know the existence of the two Dutch States adjoining the English Colonies in South Africa. They are both of them offshoots, as it were, from the Cape Colony. The Orange River Free State was, up to 1835, inhabited by small native tribes under petty chiefs. The Bechuanas, Corannas, Basutos, and Borolongs, and also by some settlements of Hottentots and half-castes from the Cape Colony, under Captain Adam Kok, Waterboer, and others. The country at that time was covered with vast herds of game of every description. When the Dutch emigrant farmers, in 1836, passed over the Orange River, the boundary of the Cape Colony, large tracts of country fell an easy conquest to them. A few of them remained in occupation of their lands, living in their waggons and tents, tending their flocks and herds, but being almost as migratory as the game. The great body, however, of these "pioneers of South Africa" passed on inland. One portion of them went over the Drakensberg into what is now the province of Natal, where fierce battles took place with the Zulus. The other portion of these Dutch farmers also had their troubles with the natives of the interior. They had a good

deal of fighting with a nation then powerful, under Mosilikatse, before they conquered the country which is now the Transvaal Republic. The Orange River Free State, and the Transvaal Republic, were for a long time under one general government, if such it could be called. The names of Boshoff, Potgeiter, Pictors, and others, are enrolled as their chief magistrates. In 1811 the last-named President was at the head of both States; but in that year a separation of the Governments took place, and they are now two distinct Governments, with a President and Volksraad, or council, to each. The Orange River Free State passed through two or three phases, and two collisions with the British troops, before it was recognised as an independent State. In 1846 Sir Harry Smith as High Commissioner, took possession of the country. It was held by the British Crown, under the name of the "Orange River Sovereignty," until January, 1852, when it was surrendered by Sir G. Clerk, who was sent out from this country as her Majesty's Special Commissioner, with full powers to relinquish the territory. The Dutch inhabitants now claim and hold both these States as independent republics.

The Transvaal Republic was the second Dutch State in South Africa, but is the more important of the two. It extends, at present, between latitudes 22 deg. to 27 deg. south, and from longitudes 25 deg. to 32 deg. east. It adjoins the Orange Free State, part of Basutoland, Natal, Zululand north of the Tugela, and there is only a small tract of country in possession of natives between the Transvaal territory and the Portuguese settlement at Delagoa Bay. The area of the Transvaal State is said to be 120,000 square miles, with a population of 40,000 whites (Europeans) and 250,000 Africans. The revenue and expenditure is about £72,000 a year, but this sum gives very little idea of the present or future of the country. The people are of primitive habits, and object to taxation, but they are rich in lands and in flocks and herds. The Transvaal, like the Orange River Free State, is situated on a higher plateau than the English colonies, and has a healthy climate for Europeans, but some of the districts north-east are subject to fever and the "tsetse" fly. The pasturage is well adapted for all kinds of stock, and the soil is highly productive. The country is divided into twelve districts—viz., Potchefstroom, Pretoria, Rustenberg, Lydenburg, Marabastad, Waterberg, Heidelberg, Wakkerstroom, Utrecht, Christiania, Nazareth, and Marico. The country is governed by a President (Mr. J. E. Burgers), elected in 1872, with an Executive Council and a Legislative Council, consisting of a Speaker and thirty members. The great future of the Transvaal exists in its mineral wealth. The first diamond discovered in South Africa was found north of the Vaal river in 1866, in a portion of the country claimed by the Griqua chief Waterboer, a territory the boundaries of which are in dispute between the English, the Orange River Free State, and the Transvaal Republic. Diamonds have since been found in the districts of Pretoria, Marico, Rustenberg, and Waterberg. Gold is found in alluvial deposits, and in reefs of quartz, in Marabastad and Pretoria; while the gold-bearing strata extend for 200 miles north of the seat of government (Pretoria); auriferous quartz existing also through Lydenburg and Rustenberg districts down to the Griqua country. The Transvaal is also rich in coal, iron, cobalt, copper, nickel, lead, tin, and silver, besides sulphur and saltpetre. The country is well watered and healthy for both human beings and for stock of every description. The soil is fertile, and suited for the production of all sorts of grain and cereals; some of the districts are semi-tropical, and produce coffee, sugar, cotton, rice, &c., particularly the districts of Rustenberg and Marabastad.

The white population consists mostly of emigrant farmers from the Cape Colony and Natal. The Republic was first founded in 1840, and is recognised as an independent State by the Sand River Convention of 1852. The revenue is derived from simple taxes—viz., quit-rent on farms, transfer and import duties, capitation tax, and Kaffir taxes. The exports consist of gold and other metals; wool, hides, skins, ostrich feathers, and stock—many thousands of oxen being sent to the Cape Colony and Natal for slaughter and draught purposes, and thousands of sheep for the butcher.

Since the discovery of gold and mineral wealth in the Transvaal, many thousands of English and people of other nationalities have proceeded there, and marked effects have been produced. Land and fixed property has considerably risen in value, and this country will soon occupy a most important position in South Africa.

The relationship between the Dutch States and the English Colonies in South Africa has not heretofore been very cordial. Both States considered they had grievances; the one from our assumption of Griqualand West, and our taking the Basutos under British protection, just at the time they were about to be conquered after a protracted war; and the other, on the long-disputed boundary question between the Republic and the natives on the Vaal River, the Free State and Griqualand; and also on their construction of the terms of the Convention of 1852, claiming that the words "free trade" include exemption from custom dues at English ports. The Transvaal Government has been about to open up a trade through Delagoa Bay with a view to save the import duties charged at English ports. It has entered into a treaty with the Portuguese Government upon the subject. But the Transvaal Government has been fatally discredited by its unsuccessful campaign against the hostile Kaffirs last year. At the same time, the Orange River State has recently accepted the terms offered by the British Government for a satisfactory settlement of the points in dispute. This example has had its effect on the people of the Transvaal, and a movement for reunion with the British Colonies is now in progress. The latest intelligence received from the Transvaal is that Sir Theophilus Shepstone had received an address from the inhabitants pointing out the misgovernment that prevails in the Republic, and praying him to exert his influence to bring about promptly the union of the Transvaal with the South African colonies. The Transvaal newspapers urge the acceptance of the bill for the establishment of a Confederation.

IMPORT OF AMERICAN FRESH MEAT.

A new trade of great importance, as we must all hope, to the comfort and welfare of English households is now making rapid progress at the ports of Liverpool, Glasgow, and London, and in the wholesale and retail markets of these cities. Last week the vast area of arched wharfage comprising the western half of the basement premises under the Cannon-street station, extending from Upper Thames-street to the river, was opened for the sale, retail as well as wholesale, of foreign fresh beef. It was the commencement of the operations of a limited liability company called the "Cold Storage Wharf," which undertakes to provide cold storage accommodation for fresh meat, poultry, butter, fish, fruit, and all produce of a perishable nature, from all parts of the world. It has been demonstrated now, beyond dispute, that in a uniformly low temperature, maintained by a continuous current of dry air, all such articles of food can be kept perfectly fresh for months. The first fruits of this discovery we are gathering in the fresh meat trade from the United States of America and from Canada; but it is expected that meat will be brought in equally

good condition from the River Plate, from Australia, and probably from New Zealand. It may also be brought by the continental railways, in carriages with the requisite apparatus, from the extensive grazing plains of Hungary, the Danubian provinces, and Spain.

Mr. T. C. Eastman, of New York, has set an example by making a practical application of the knowledge that in a dry atmosphere, having a constant temperature of from 36 deg. to 38 deg. Fahrenheit, meat may be preserved fresh for a long time. At a slightly lower temperature delicate fruits may be preserved quite fresh and retaining their flavour. Care must be taken that the freezing-point is never reached. There are not so far as we know, any recorded experiments on the limits of the length of time that fresh foods can be kept in this way, but even strawberries have maintained a good condition for three weeks. It is due to the enterprise of Messrs. John Bell and Sons, of Glasgow, that during the last sixteen months beef slaughtered in America has been brought to England in excellent condition. We have from time to time heard of the arrival of consignments of such beef at Glasgow or Liverpool, and how it has been readily sold.

At first, it seems, Messrs. John Bell and Sons commenced bringing live bullocks from America, to see if they could be conveyed here in a condition fit for the butcher; and, this having been successfully done, they enlarged their imports, till now they have brought over many thousands. The first American live cattle shown in the London market were imported by this firm, in the Anchor Line steamer Olympia, in July, 1875, and, being a novelty, attracted great attention. Since then many lots have been shown by various parties. The dead-meat trade, which was the natural sequence of the other, was commenced by Messrs. Bell in October, 1875. It is to Mr. Eastman, of New York, as we have said, that the credit of this new process of refrigeration is due; and his method is a most perfect one. We are informed that while the meat has been constantly shipped, and many thousand carcasses having been sent to Britain, during all the past summer, not one carcass that had undergone this process has been lost. At the same time, many other processes have been tried; and in several cases almost the entire shipments have been lost through the imperfect methods employed. At present, six of the Anchor Line Royal Mail steamers, on the Glasgow line, are fitted each with two refrigerators, these being each capable of holding from 180 to 225 carcasses, making the carrying capacity of each ship from 360 to 450 carcasses; and one of these steamers is due every Wednesday at the port of Glasgow.

The States from which more than nine tenths of the carcasses brought to this country are obtained are Illinois, Kentucky, Ohio, and Indiana. In the spring of the year, a great many stall-fed cattle come from Upper Canada, and as trade in that country has been very much depressed of late, prices are low, and a plentiful supply at a low figure is expected during the spring months. The cattle intended for British use are all taken alive to New York. Those for the Clyde are usually slaughtered on Thursdays. After being dressed, the carcasses are put into a refrigerating-room, where a constant stream of air, passed over ice, is kept up by means of an engine of twenty-five horse-power. The object of this is to extract all the animal heat from the carcass before it is shipped; and the effect of the thorough chilling is that meat brought from New York in the summer time keeps longer after being delivered in this country than the meat of animals killed at Glasgow. It is likewise much more suitable for curing purposes, being older, and the fibres more open. After refrigeration, the quarters are sewn in canvas sacking and shipped on the following day to be in readiness for the Saturday sailing. On board ship the walls of the chambers or safes are about nine inches thick, composed of wood, a layer of resinous paper, a vacuum for the air, then a layer of felt, and, lastly, a covering of wood. The walls are so constructed as to prevent rats gaining entrance to the apartment, for putting out of view the damage they might do to the beef, the injury caused by the hot air issuing from their holes would be infinitely greater. There are two modes at present in use of keeping the meat fresh; the one is known as the fan, and the other as the pipe process. The former, which is exclusively used on board the Anchor Line steamers, is believed to be the best. It is simply a continuous current of air passed over ice, which tends to keep the temperature of the chamber at from 36 deg. to 38 deg. If the temperature were to get below the freezing-point it would injure the meat very much, so that has to be carefully guarded against. The other plan for maintaining a low temperature is by a system of pipes ranged round the chamber, through which is forced a compound of ice and salt. With the latter process the meat has a tendency to become frozen, and only recently one firm in Liverpool lost 800 quarters from that cause alone. The ice is all put on board at New York, and whatever surplus remains after reaching this country is disposed of, as it has not been found profitable to try and make the supply of ice do a second time.

The first shipment of dead meat came to hand on June 1 last, the consignment consisting of 432 quarters of beef and seventy sheep, weighing in the aggregate 81,000 lb. At first the six Anchor Line steamers engaged in the trade were fitted up with only one safe or refrigerator for carrying the meat, but recently the whole of the vessels have had their carrying capacity doubled. Last week's consignment to Messrs. Bell consisted of 1313 quarters of beef, weighing 262,000 lb., or nearly 115 tons, in addition to fifty sheep, weighing close on 4000 lb. In future it is intended to bring over every week 300,000 lb., each of the refrigerating-rooms being capable of accommodating 156,000 lb. The average wholesale price of the meat at the ship's side at Glasgow has been about 6½d. per lb., and it is retailed to the public at from 7d. per lb. for boiling to 10d. for roast, and steak from 10d. to 1s. 1d. Such, however, was the demand for meat at last week's sale that the wholesale price rose to nearly 7d. per lb. all round. The cost of bringing the meat from New York to Glasgow is about 1½d. per lb., as against about 3d. per lb. for live stock.

The introducing of this meat into consumption in Scotland was a matter of peculiar difficulty, as anything in the shape of beef coming to rival "Scotch beef" was considered by our north country friends as rank heresy; but the invariable good quality and cheap price soon told; and now many "stores" are established for the sale of American beef only. The whole quantity shipped from New York to Great Britain in the month of January was 1,796,000 lbs. of fresh beef.

The series of illustrations we give, from sketches taken last week on board the steamships Victoria and Bolivia, in the Clyde, show the arrangements for dealing with the quarters of beef conveyed from New York to Glasgow for Messrs. John Bell and Sons. The Bolivia, on Wednesday week, lay off Greenock, being prevented by the lowness of the tide from coming up the river, and the meat was put on board a steam-lighter, named the Dispatch, to be brought up to Glasgow. This operation, hoisting the quarters of beef out of the ship by the aid of a steam-winch, is shown in one of the sketches we have engraved, at the bottom of the page. The two illustrations in the middle of the page represent the men at work on board the Bolivia; first on the lower deck, where the meat is hung for the voyage. Two men, each with a hook grasped

by a handle, take hold of a quarter of beef and carry it beneath the hatchway. It has been carefully sewn up in canvas, to protect it from dust and flies. Five or six quarters at a time are hoisted together, by the steam-winch, from between decks. The two Engravings placed at the top of our page are from sketches on board the Victoria, which arrived on a later day. One shows the apparatus in the meat-room and refrigerator. This apartment is lined with patent oil-cloth, and also with air-tight boarding; the roof is studded with iron hooks, at such distances as to keep the quarters of beef from touching each other, friction being found to damage their chances of preservation. The place is kept exquisitely clean. On the side of this chamber opposite to the ice-house, are placed wooden flues, open at the top, and perpendicular to another and larger flue, which runs along the same side of the chamber, and crosses the floor into a wooden chest, attached to which is a fan worked from above by a donkey steam-engine. The fan, when set in motion, causes a current which draws the heated air from the top of the compartment down through the wooden flues, and along that running across the floor into the chest, thence passing into the ice-house, with great force, by an orifice at the top. The air becomes cold in the ice-house, and this cold air, passing out of the ice-house at the bottom, is sent into the meat-room. The air is subjected to the same treatment again and again, so that a constant current of pure cold air is being supplied by the refrigerator at a temperature of about 37 deg., or sufficiently cold to preserve the meat, but without freezing. When the fan is in motion the current of air is strong enough to draw into the flues any small pieces of paper thrown into the air. The door of the meat-store, as well as that of the ice-house, is lined with india-rubber, and is fastened on with screws which make it air tight, if required. The ice-house is somewhat smaller than the meat-room; it is packed with block ice. The floor, being covered with coarse canvas, acts as a filter for any sediment which may gather, preventing it from passing away with the water formed by the melting ice. The ice, if allowed to go with the water, would choke the pipes connected with this part of the arrangements.

The fact that beef can be brought over from North America in good condition has therefore been abundantly proved, but the check to the further development of the trade has been that directly the meat is unloaded it must be sold and used. The simple way to meet this difficulty is, naturally enough, to unload the quarters into a wharf with a "refrigerator" that will continue the conditions under which they have been brought over and in which they can be kept till they are wanted in the market. The care taken both in America, and in regulating the temperature in bringing the meat over, is of but little practical value if, on its arrival in England, the meat be allowed to fall into a condition in which it is unfit for use before it reaches the consumer. But, although the remedy is so obvious and so simple, it is not until now that any plan for definite action in the matter has been proposed.

It was Mr. D. Tallerman, managing director of the Australian Meat Agency, who proposed the new arrangement for the reception of foreign beef into London, based upon the adoption on a large scale of a simple principle already well known. Mr. Tallerman's plan was simply to have a large "refrigerator" for the reception of foreign meat, from whatever country it may come, when brought in the ice compartments, and also for fruit, game, and other perishable foods. The company, of which he is managing director, secured the premises under Cannon-street station, having an area of five eighths of an acre, and this, with a flooring of a portion of it, makes a total floor space of an acre. Arrangements are being made for converting this into one vast refrigerator. The building is divided into eleven arches, and by air-tight doors each arch is to be a separate compartment. One compartment is arranged to contain the ice supply, and by earthenware pipes to the different compartments the temperature of each is to be regulated. A fan, worked by a two-horse power engine, will draw the dry cold air from the ice-chamber through the compartments. A large portion of the upper floor is fitted up with shelves, which can be used for the storage of fruit and poultry. To have erected such a building would have cost a large sum; but, fortunately for the public as well as for the company, this place had recently been occupied by a firm which has left fittings that have come in most usefully. It is determined to offer storage room to dealers, giving the advantage of cold dry air-chambers, and charging only the ordinary wharfage rates. There are four landing-stages from the river, three of which are under cover; and there is a sloping road from the station, which itself has communications with all parts of the country; so that, for a first experiment, a more convenient locality could hardly have been found. Two or three gentlemen of medical training are appointed inspectors, with the intention that everything that enters the premises shall pass under their inspection.

When the arrangements of the company are completed the whole of the premises will be one vast refrigerator, in which during the hottest summer the temperature will not rise above 40 deg. F. Passing through an ice-chamber to reach the required point, the air is to be filtered through cotton wool before circulation through the storage refrigerators. These are large enough to hold the meat supply of London for a fortnight, exposed to a continuous gentle current of the coolest, purest, and driest air. An important feature in these arrangements of the London Company is that the transport from Liverpool is effected without any handling after the quarters of beef leave the steamer's hold. For this purpose, Captain Acklom's refrigerating waggons and a Great Western converted van are employed. In these vehicles a low temperature is maintained by the circulation of water outside the central chamber, which is fitted with hooks. As soon as the forty-eight quarters, which one of the Acklom waggons will carry, are placed in them the doors are closed, and the meat can then be transported any distance and in any weather without fear of deterioration. One of Acklom's waggons, containing quarters of beef just as they had come from Liverpool, was exhibited at the entrance of the New Meat Market, and excited much interest.

In order to familiarise the public with the sale and quality of American fresh meat, some hundreds of sides of beef have been daily brought for sale to a market formed by a single arch of the company's premises in Upper Thames-street, and sold to all comers; 7d. per lb. is the average price of the whole side of beef, but fore-quarters are sold at 6½d., while 8d. is charged for boiling and roasting joints, taken together. We believe that many butchers in London have obtained supplies at these prices, to sell in their own shops. Housekeepers who will go or send to Upper Thames-street can buy joints or ribs at less than the butcher's retail price.

Our last illustration shows the selling of meat over the counter. A subordinate scheme in connection with this storage is the distribution of the meat to customers from the wharf without the intervention of middlemen. It is arranged that by a kind of co-operative society and a system of post-cards, joints may be ordered direct from the wharf and delivered by special vans. By this means it is declared that first-class beef can be supplied at a price much below what is usually charged to consumers in London.

THE TRANSVAAL DUTCH REPUBLIC OF SOUTH AFRICA.

PRETORIA, THE CAPITAL OF THE TRANSVAAL.

RIVER MAGALOQUAIN, IN THE TRANSVAAL.

NEW BOOKS AND PUBLICATIONS.

THE THREE MAGAZINES FOR FAMILY READING.

A NEW VOLUME OF EACH JUST COMMENCED.

CASSELL'S FAMILY MAGAZINE.

MONTHLY, 7d.
"Its character is so marked and decided that we have no hesitation in giving CASSELL'S FAMILY MAGAZINE the FIRST POSITION AMONG THE MONTHLIES for the people. The variety of its material is astonishing, yet it has less padding than many of the magazines of high pretensions, and it has less of the hackneyed in its treatment and style, while its illustrations are very numerous and good. The two running novels are full of natural life; its articles on cookery and other domestic matters are not simply instructive, but are also amusing and pleasant reading. It gives sketches combining natural history and personal adventure, and has room, after all this, for notes and articles on all curious out-of-the-way topics. It is an excellent journal for young and old, and cannot fail to please."—Edinburgh Courier.

CASSELL'S FAMILY MAGAZINE is a treasure-house of bright letterpress and pleasing illustrations.—The World.
The MARCH PART now ready, price 7d.

THE QUIVER, for SUNDAY READING.

MONTHLY, 6d.
"A safer and more interesting magazine we do not know than THE QUIVER, nor can we too much admire it, especially for the religious instruction in Christianity without sectarianism which it sets so pleasantly and temptingly before the reader."—Standard.

"AN OUTLAY OF SIXPENCE upon THE QUIVER will not be regretted by those who are desirous of finding something a once easy to understand, and worth the reading, and which is neither dull nor dear. The illustrations are a very pleasant feature in the numbers."—Guardian.

"THE QUIVER is widely known as one of the very best of magazines. We have often commended it as ably edited and attractive. The subjects are well varied, the illustrations are many and good. The devotional or expository papers are thoroughly scriptural."—The Revue.

The MARCH PART now ready, price 6d.
CASSELL, PETER, and GALPIN, London; and all Booksellers.

LITTLE FOLKS MAGAZINE.

MONTHLY, 6d.
"LITTLE FOLKS has out-distanced all competitors, and keeps the position so well won with a boldness and firmness defying competition. Its tales are the best we have ever seen for children."—Derby Mercury.
"LITTLE FOLKS disarms criticism. It is so admirably adapted to the purpose for which it was designed that nothing but praise can be accorded alike to the matter which is provided for youthful readers, and the exquisite pictorial cuts by which it is illustrated and enlivened."—Civil Service Review.
"LITTLE FOLKS is out of sight the best children's magazine we know."—British Quarterly Review.

The MARCH PART now ready, price 6d.
CASSELL, PETER, and GALPIN, Ludgate-hill, London.

CASSELL, PETER, and GALPIN'S COMPLETE CATALOGUE, containing a List of Several Hundred Volumes, including Bibles and Religious Works, Fine Art Volumes, Children's Books, Dictionaries, Educational Works, History, Natural History, Household and Domestic Treatises, Hand-Books and Guides, Science, Travels, &c.; together with a Synopsis of their numerous Illustrated Serial Publications, sent post-free on application to CASSELL, PETER, and GALPIN, Ludgate-hill, London.

With Portraits and Illustrations, 3 vols., 32s.
HARRIET MARTINEAU'S AUTOBIOGRAPHY. With Memorials by MARIA WESTON CHAPMAN.
The First Edition having been exhausted immediately on publication, a Second Edition is being printed as rapidly as possible, and will be ready in a few days.
London: SMITH, ELDER, and Co., 15, Waterloo-place.

23rd Edition, 8vo, cloth, pp. 1,102, 16s.

HOMOEOPATHIC DOMESTIC MEDICINE. By J. LAURIE, M.D. Completely re-arranged and revised by R. S. Gutteridge, M.D. The most comprehensive Guide published for the use of families, emigrants, and missionaries, being free of all technicalities. The present edition contains, in addition to the symptoms and treatment of all general diseases, including those of Females and Children, many important new chapters, comprising among others the specific characteristic effects of all the new American remedies, plain Directions for the Treatment of Accidents, and Illustrations delineating the minor operations in surgery. Hydropathic Appliances, Affection of the Eyes (with a description of the various parts of the eye). Full directions are also given for the Treatment of Diseases prevalent in Tropical Climates. A new and concise Dictionary of Medical Terms and Treatment, with leading indications of Treatment prefixed to the various chapters and divisions. An Epitome of the above, 25th Edition, price 5s.
A case of Medicines adapted to the former Work, in tinctures or pills, price 4s. 6d.; in globules, 2s. 6d.; in capsules, 1s. 6d. To the latter, tinctures or pills, price 2s. 2d.; in globules, 1s. 10s. LAMAR and ROSS, 5, St. Paul's-churchyard; and 9, Vere-street, W.

Price 6d.; post-free, 7d.

FAMILY HERALD for MARCH, Part 106.
THE FAMILY HERALD.
PURE LITERATURE.—The "Literary Gazette" says:—"It must be said of the 'Family Herald' that it is the purest reading of all purely amusing literature; it is, indeed, a family paper."

Part 406. Price 6d.; post-free, 7d.

FAMILY HERALD.
THE FAMILY HERALD.
LEIGH HUNT, in his "Autobiography," says:—"I call out every week for my 'Family Herald,' a penny publication qualified to inform the best of its contemporaries."

Part for March, price 6d.; post-free, 7d.

FAMILY HERALD.
THE FAMILY HERALD.
LEADING ARTICLES and ESSAYS.—The "British Quarterly Review" says:—"There is a well-considered leading article or essay every week, upon some subject of an instructive or thoughtful character."

Part 406. Price 6d.; post-free, 7d.

FAMILY HERALD.
THE FAMILY HERALD.
NOVELS and TALES.—The "Saturday Review" says:—"Its novels and tales are quite as well written as the best circulating library stories."

Part for March, price 6d.; post-free, 7d.

FAMILY HERALD.
THE FAMILY HERALD.
ANSWERS TO CORRESPONDENTS.
The "Saturday Review" says:—"The editor is the confident and confessor in every station of life. The answers to correspondents cannot be fictitious, a romance and a life history being embodied in almost each of them."

Price 6d.; post-free, 7d.

FAMILY HERALD for MARCH. Part 406.—WILLIAM STEVENS, 421, N. Strand, London; and all News-vendors and Railway Stations.

NEW BOOKS AND PUBLICATIONS.

TWO NEW BIRTHDAY BOOKS.

1. FROM THE BIBLE.—2. FROM SHAKESPEARE.

1. THE SOUL'S INQUIRIES ANSWERED IN THE WORDS OF SCRIPTURE. Arranged by G. WASHINGTON MOON, F.R.S.L. With Blank Diary and 13 Copyright Photographs. Cr. 8vo, cloth, 10s. 6d.; roan, 12s. 6d.; mor., 15s. 6d. to 42s. "A very beautiful birthday book."—Standard.
SMALL EDITION, with Diary, 2s. 6d.; roan, 3s. 6d.
SMALL EDITION, without Diary, 1s. 6d.; roan, 2s. 6d.
COMMON EDITION for distribution, 20th Thou., limp, 8s.

2. THE SHAKESPEARE BIRTHDAY BOOK. Edited by MARY FREDERICA DENBAR. With Blank Diary and 14 Copyright Photographs. Cr. 8vo, cloth, 10s. 6d.; roan, 12s. 6d.; mor., 15s. 6d. to 42s. "One of the most elegant books for presentation."—Figaro.
POCKET EDITION, 31st Thou., 32mo, cloth, 2s. and 2s. 6d.; roan, 3s. and 3s. 6d.; mor., 4s. and 4s. 6d. to 12s.

Also, nearly ready
THE POETICAL BIRTHDAY BOOK; or, Characters from the Poets.
Edited by LADY PORTSMOUTH.

HATCHER, 187, Piccadilly, London.

MISS BRADDON'S NEW WORK.

The New Work, by the Author of "Lady Audley's Secret," &c. In 3 vols., at all Libraries.

WEAVERS AND WEAVERS.

GUSTAVE AIMARD'S NEW INDIAN TALE. This Day. Never before published in England. Price 6d.
THE MISSOURI OUTLAWS, 6d.
Translated by PERCY B. ST. JOHN.
London: GEORGE VICKERS, Angel-court, Strand.

CHEAP EDITION OF MR. W. G. WILLS'S NOVELS.

Price 2s.; cloth, 2s. 6d.

THE WIFE'S EVIDENCE: A Novel.

By W. G. WILLS, Author of "Jane Shore," "Charles I.," &c. London: WARD, LOCK, and TYLER, Paternoster-row.

THE MOTHER'S HELP to the RELIGIOUS INSTRUCTION of her CHILDREN.

Cloth, 5s.
"Earnest and instructive."—Guardian.

Glasgow: JAMES GAGNEY, Union-street.
London: HOLLAND and SONS, Paternoster-square.

Now ready (One Shilling), No. 207.

THE CORNHILL MAGAZINE for MARCH.

With Illustrations by George du Maurier and Frank Dicksee.

CONTENTS.
Carla. (With an Illustration.) Chap. XXVIII.—The Fire-evil. XXIX.—The Old Folk and the Young. XXX.—A Reluctant Heart.
Sweet Love is Dead.
Chaucer's Love Poetry.

Erema. or, My Father's Sin. (With an Illustration.) Chap. XXII.—Betty Bowen. XXIII.—Betty's Tale. XXIV.—Betty's Tale, continued. XXV.—Betty's Tale, concluded. London: SMITH, ELDER, and Co., 15, Waterloo-place.

Will be issued shortly, Part I. of

A MODERN MINISTER.

To be completed in Twelve Monthly Parts.

Price One Shilling.
Each containing 50 pp., with Two Illustrations.

Will be published, on Saturday, March 10, 1877.

THE BOAT-RACE: A Reminiscence.

By MICHAEL BYRNES.
London: HENRY VICKERS, 317, Strand, W.C.

PRACTICE OF POTTERY-PAINTING.

A Handbook by JOHN C. L. SPARKES, Head Master of the Lambeth School of Art, &c. Price 1s.; post-free, 1s. 1d. London: LEIGHTON, BARRIE, and Co., 60, Regent-street, W.

DECORATIVE ART NEEDLEWORK.

Practical Hints on Crewel and Silk Embroidery. By Miss TURNER. Post-free, 5s. 6d. Just published.
M. A. TURNER and Co., 38, Lamb's Conduit-street, London.

FORAGE PLANTS, and their Economic Conservation by the new system of "Ensilage," or "Pickling," &c. By T. CHRISTY, Jun., F.R.S. Illustrated with two pages of highly-coloured Lithographs and Thirty Woodcuts. Post-free from a library and Co., 15, Fenchurch-street, London, for One Shilling.

GOOD NEWS FOR BOYS AND GIRLS.

1. GOLDEN CHILDHOOD. Price 3d.

Edited by H. W. DUCKEN, Ph.D.
MARCH NUMBER now ready, containing Beautiful Pictures, Good Stories, Short Articles, &c., all calculated to interest and amuse children.

THE MAGAZINE FOR BOYS AND GIRLS—INTERESTING STORIES, WHOLESOME READING, AND BEAUTIFUL PICTURES.

2. GOLDEN CHILDHOOD. MARCH

NUMBER now ready. Price 3d.

Containing the opening chapters of a New Story, written expressly for "Golden Childhood," by the Author of "A Trap to Catch a Sinner," entitled

ON A PENNY.

London: WARD, LOCK, and TYLER, Paternoster-row, E.C.

A CUT-OUT PAPER PATTERN WITH EMBROIDERY DESIGN OF A DEMI-SALON. JACKETS, A LARGE SHEET OF PARLAIAN PATTERNS FOR CUTTING OUT, AND A COLOURED PLATE OF THE LATEST PARLAIAN PATTERNS.

FASHIONS ARE PRESENTED GRATIS WITH THE MARCH NUMBER OF

1. THE ENGLISHWOMAN'S DOMESTIC MAGAZINE. Price 1s., postage 2d.

THE MOST INSTRUCTIVE, INTERESTING, AND CHARMING MAGAZINE PUBLISHED FOR LADIES.

2. THE ENGLISHWOMAN'S DOMESTIC MAGAZINE for MARCH now ready, price 1s., postage 2d.

London: WARD, LOCK, and TYLER, Paternoster-row, E.C.

A CUT-OUT PAPER PATTERN OF A GIRL'S PRINCESS DRESS IS GIVEN AWAY WITH

1. THE YOUNG ENGLISHWOMAN for MARCH, now ready, price 6d., postage 1d., containing the New Serial Story by the Rev. E. F. ROE, entitled

NEAR TO NATURE'S HEART.

2. THE YOUNG ENGLISHWOMAN for MARCH, price 6d., postage 1d., also contains in FASHIONS and NEEDLEWORK

A Cut-out Paper Pattern of a Girl's Princess Dress—Large Coloured Plate of the Paris Fashions—Enlarged Diagram Sheet for Cutting out a Flannel Waistcoat—Cable—Sleeve—Child's Collar—Embroidered Border and Tie—Embroidery for skirt and shirt Front—Embroidered Initials—Evening Dress Bodice—Fancy Costume—Theatre Toilette—Ball Toilette—Children's Dresses—Sylvia's Letter—Our Workroom, &c.

London: WARD, LOCK, and TYLER, Paternoster-row, E.C.

NICE, CANNES, MENTONE, &c.

PENCIL SKETCHES IN SUNNY WINTER HOMES. Drawn and Auto-lithographed by R. CADOGAN-ROTHWELL, and dedicated, by permission, to her Grace the Duchess of Roxburgh. Twenty-four Views, in Album form, price 21s. Order, with postage, of Booksellers in above towns, or Messrs. MACQUEEN and McDONALD, Lithographers to her Majesty the Queen, 97, Queen Victoria-street, London, E.C.

By Dr. BAKER MEADOWS. Third Edition, post-free 13 stamps.

ERRORS OF HOMOEOPATHY.

"An excellent exposé of the absurdities of homoeopathy. Its arguments are unanswerable."—Bath Journal.
London: G. HILL, 161, Westminster Bridge-road.

1p. 180, bound, 1s.; 13 stamps by post.

DOG DISEASES TREATED BY HOMOEOPATHY.

By JAMES MOORE, M.R.C.V.S. Deceit less and precise, for all general diseases.
JAMES MOORE and Co., 49, Threadneedle-st.; and 170, Piccadilly.

NEW WEEKLY PAPER. EVERY SATURDAY. PRICE 3d.

THE TATLER.

With No. 2, published this day, March 3, will be given a facsimile of the original "Tatler," 170, Fleet-street, London; and all News-vendors and Bookstalls.

NEW MUSIC.

THE MUSICAL TIMES. Published Monthly. Increased to Fifty-six Pages. Price 3d.; post-free, 4d.—London: NOVELLO and Co.

"A readable book, whose value is considerable."—Morning Post.

"Of a nature to make the reader ask for more from the same rich source of delightful recreation in the society of the masters of a divine art."—Daily News.

"If the account of its contents which we have given does not induce readers to get the book for themselves, nothing that we could say would be likely to do so."—Musical Times.

BEETHOVEN'S SONATAS, complete.

Price 5s. New and complete Edition. Edited and Fingered by AGNES ZIMMERMAN. Handsomely bound, gilt edges, folio, 10s. One Guinea. The same, octavo size, handsomely bound, gilt edges, 7s. 6d.; or in paper covers, 5s. Each Sonata may also be had separately.

MOZART'S SONATAS. New and complete

Edition. Edited and Fingered by AGNES ZIMMERMAN. Handsomely bound, gilt edges, folio, 10s. Each Sonata may also be had separately.

LIEDER OHNE WORTE. Eight Books,

4s., complete.

MEYER'S LIEDER OHNE

WORTE (songs without words). The best and ONLY COMPLETE EDITION, containing the Seventh and Eighth Books. Folio, handsomely bound, gilt edges, 12s. The same, octavo size, handsomely bound, 6s.; or in paper covers, 4s. Order Novello's Edition.

FRANZ ABT'S TEN VOCAL DUETS.

with an English Version by the Rev. J. TROUTBECK, M.A. Folio, price 1s. 6d. each.

FRANZ ABT'S SIX TRIOS, for Female

Voice, with an English Version by H. W. DUCKEN, Ph.D. Complete, 8vo, price 1s.; or, singly, 2d. each.

CARL REINECKE'S TEN TRIOS, for

Female Voices, with an English Version by H. W. DUCKEN, Ph.D. Complete, 8vo, price 1s. 6d.; or, singly, 2d. and 3d. each.

RUBINSTEIN'S EIGHTEEN TWO-PART

SONGS, with an English Version by NATALIA MACFARREN. 8vo. Price 4s.

ROBERT FRANZ'S FOURTEEN SONGS,

set to Poems of Robert Burns. Edited and Adapted by NATALIA MACFARREN. 8vo. Price 2s. 6d.

London: NOVELLO, EWER, and Co., 1, Berners-street, W.; and 50 and 51, Queen-street, E.C.

MUSICAL-BOX DEPOTS, 22, Ludgate-

hill, &c. Cheaply, &c. London.—Novello's celebrated Musical Boxes, playing best regular and sacred music. Price 2s. to 12s. 6d. Sold from 18s. to 100s. Largest Stock in London. Catalogue gratis and post-free. Apply to WALKER & MULLICH, as above.

ELEGANT JEWELLERY.

LONDON and RYDER invite inspection of

their New Stock, offered as characterized by "Good Taste" and sterling excellence. Bridesmaids' Lockets, Wedding Presents, Court Diamonds, Diamond Ornaments in great variety, charged at prices consistent with reliable value. Necklaces, Head Ornaments, Earrings, Crosses, Pendants, Lockets, Solitaires, Bracelets, &c. Recipients of the only Medal awarded for "General Good Taste" at the International Exhibition—17, New Bond-street (corner of Clifford street). A Collection of Ceylon "Cat's Eyes," worn in India as a talisman to avert evil or misfortune.

WALKER'S CRYSTAL CASE WATCHES

are superseding all others. Prize Medals—London, 1852; Paris, 1857. Silver Watches from 34s. to 100s. and 150s. Lists sent free.—28, Cornhill; 20, Regent-street; and 78, Strand.

ORFÈRE GOLD SNAKE RINGS, perfect

in finish, not to be distinguished from the best, 4s. 6d. unaffected by time and wear, 5s. 6d. each, post-free, ditto, with A. H. H. Diamond and Ruby Eyes, 7s. 6d. Illustrated Catalogue, post-free.

C. C. ROWE, 88, Brompton-road, South Kensington, London.

FOR ARMS and CREST send Name and

County to T. MORING, Inns of Court Heraldic Offices, 44, High Holborn, W.C. Plain sketch, 3s. 6d.; Coloured, 7s. 6d. Seals, Dies, and Diplomas. Illustrated Price-List post-free.

WEDDING DRESSING CASES and

TRAVELLING BAGS, Bridesmaids' Lockets, and Gem Jewellery, of the choicest and most artistic description. JENNER and ANSTWORTH (to the Queen), 33, St. James's-street, and 68, Jermyn-street, S.W.

FISHER'S GLADSTONE BAG.

188, Strand.
The perfect Dressing-Bag. The perfect Travelling-Bag. Catalogues post-free.

WHITE WOOD ARTICLES, for Painting,

Fern Painting, and Ivesaloon art; Screens, Book-Covers, Glove, Knitting, and Handkerchief Boxes; Paper-Knives, Fans, &c. Priced List post-free.
W. M. BARNARD, 119, Edgware-road, London.

THROUGHOUT THE WORLD.

CLERICAL, MEDICAL, AND GENERAL

LIFE ASSURANCE SOCIETY. 13, St. James's-square, London, S.W.

CITY BRANCH. Mansion House buildings, E.C.

Chairman: Right Hon. JOHN ROBERT MONROE, M.P., D.C.L.

TENTH BONUS MEETING, 1877.

The Report presented at a meeting held on Jan. 4 last, showed:—

1. AS TO THE PROGRESS OF THE SOCIETY.

That the growth and prosperity of the Society during the period of which it gave numerous details, had been everywhere manifest.

2. AS TO THE FINANCIAL POSITION OF THE SOCIETY

That the Assurance Fund at the date of Valuation was £2,118,457 19 2

and the calculated liability at the same date was £1,700,516 13 10

thus leaving a Surplus of £417,941 6s. 4d.

and that, after setting aside the Permanent Reserve Fund of £200,000, the fractional amount of £219,108 41, 10s. remained for division in the sum of £200,000, which was 1s. 6d. per £1000 on the previous occasion.

3. AS TO THE RESULTS OF THE DIVISION.

That the sum which fell to the Assured would produce a very considerable addition to the Assurance, amounting in the aggregate to £2,254,141, varying in individual cases from 10 to 100 per cent., and averaging over 20 per cent on the Premiums received in the Quinquennium.

and that the Cash Bonus, which, being the present money value of the Reversionary Bonus, was the true measure of the allotment—averaged 30 per cent on the like payments, a compound with 20 per cent in 1874, the highest previous percentage.

4. AS TO THE BASIS OF VALUATION.

That the Institute of Actuaries' new H. or Healthy Males Table, based on the experience of twenty of the largest English and Scotch offices, and in net premiums and 3 per cent in interest, had been used in the investigation.

and that the severity of the new test, as well as the strength and elasticity of the Society, were alike shown by the fact that the Reserve had been

NEW MUSIC.

LONDON: Printed and Published at the Office, 19, Strand, in the Parish of St. Clement Danes, in the County of Middlesex, by GEORGE C. LEIGHTON, 19, Strand, aforesaid.—SATURDAY MARCH 3. 1877.

THE AMERICAN PRESIDENTIAL ELECTION: THE HON. S. J. TILDEN, DEMOCRATIC CANDIDATE.

The disputed election of a President of the United States was to be settled by the decision of Congress upon the counting of the votes given in the different States of the Union, with the investigation of particular disputed votes by the "Electoral College Commission" created for that special purpose. It has already been explained that the Electoral College of the Union, formally authorised to elect a President, consists of above three hundred "electors." These are contributed by each State in proportion to the number of its ordinary representatives in the two Houses of the Federal Congress; the State of New York having 31, Pennsylvania 24, Massachusetts, Illinois, and other populous States, each about a dozen; while some of the less important States have each only three or four. To these delegates are joined the members of the Federal Senate, two Senators from each State. The State elections of delegates to the Electoral College, which took place last November, should have determined which of the two rival candidates, Mr. Hayes or Mr. Tilden, was to be elected President on March 4 of this year. But in several of the Southern States, where the party strife of the "Republican" and "Democratic" factions has been extremely violent, there were great irregularities, and the Executive Governors of those States, appointed by the Republican party, were accused of having interfered with the popular vote in an illegal and arbitrary manner. To arrive at a peaceful settlement, Congress passed an Act referring the decision of each doubtful election in a State to the Special Commission above named; and their examination in the cases of Louisiana, Alabama, Florida, Oregon, and South Carolina have been reported this week. We give the Portraits of both candidates, as the result should now be proclaimed.

The Hon. Rutherford Hayes was born at Delaware, in the State of Ohio, Oct. 4, 1822. He graduated at Kenyon College, at Gambier, in Ohio, and obtained his professional education at the Cambridge Law School. The practice of his profession began in Cincinnati in his thirty-fourth year, when he received his first official position as city solicitor, which he held till the war broke out in 1861. Very near its opening he enlisted in the 23rd Ohio Volunteers, and served with the regiment till he received the command of a brigade in 1864. His first appointment was as Major, his first promotion came within less than a year, and in September of 1862 he held a commission as Lieutenant-Colonel, and was in command of his regiment, which he led into the battle of South Mountain. During the action Colonel Hayes received a severe wound in the arm, but remained with his regiment to the last, and was the first officer whose command established a position at South Mountain. Two years later he had become Brigadier-General Hayes, when he received the Republican nomination for Congress in the Second Ohio District, a part of Hamilton County, and received, home and army vote together, 3098 majority over Joseph C. Butler, the Democratic candidate. He served in the Thirty-ninth Congress on the Committee on Private Land Claims and on the Library Committee, and passed through the important reconstruction legislation of the Session with no greater distinction than a vote given uniformly and on all occasions for his party. In the fall of 1866 Mr. Hayes was a second time nominated for Congress, and, running against Theodore Cook, was elected by a somewhat smaller majority than two years before. The Fortieth Congress had, however, held but one Session when Mr. Hayes was nominated as Governor by the

Republican party, and, accepting the candidature, was elected over Allen G. Thurman by a majority of 2983 in a total vote of 483,000. Mr. Hayes was a candidate for re-election at the close of his term of office, and it was not till 1869 that he was a second time placed at the head of the Republican ticket in Ohio. General Rosecrans was nominated by the Democratic Convention which met in July of that year, and at which Mr. Pendleton's name was peremptorily withdrawn. The expected candidate refused the nomination, however, and at a late date Mr. Pendleton was induced to take the Democratic nomination. Success was scarcely possible under the circumstances, and General Hayes carried the State by a majority of 7518, or about one third that of the year before on the State ticket. The next appearance of Mr. Hayes as a candidate was last fall, when he was nominated on the public schools platform, after a sharp contest with Judge Taft. In the bitter and hard-fought canvass which followed, Mr. Hayes was successful, receiving a majority of 5544 over Mr. Allen.

The Hon. Samuel J. Tilden, the late Democratic candidate for President of the United States, was born in New Lebanon, Columbia County, New York, in 1814. From his father, a farmer and merchant, and a man of influence in local politics, he inherited a fondness for political affairs, and at the age of eighteen he published a pamphlet on the party issues of the day. He entered Yale College in 1832, but soon left in consequence of ill-health. Two years later he entered the University of New York, and there completed his collegiate education. He then studied law in the office of the late John W. Edmunds, where he remained until he went into business for himself. Mr. Tilden took an active part in politics, and employed his pen frequently in defence of the

Democratic party in opposition to the Whigs. In 1841, in conjunction with a partner, he started the *Daily News*, a campaign paper, in the interest of Mr. Polk's election. The following year he was elected to the Assembly; and, while serving as a member of that body, he was elected to the Constitutional Convention which formed the present Constitution of the State of New York. For several years after the defeat of Silas Wright for the Governorship of New York Mr. Tilden retired from politics, and devoted himself assiduously to the practice of his profession. He was engaged in many important cases, and won a high reputation for legal acumen. From 1858 to 1872 he was known chiefly as a "rail-road lawyer," and in this practice acquired a large fortune. When the war broke out Mr. Tilden, who had been a strenuous advocate of compromise and conciliation, kept in the background, and maintained a sort of neutral attitude during the progress of hostilities. He has since taken an active share in the management of the Democratic party in his State. He was a member of the Constitutional Convention of 1867, chosen to remodel the Constitution framed in 1845; and in 1874 he was elected Governor of New York.

The two Portraits are from photographs by Mr. M. B. Brady, of Washington.

THE BOSPHORUS.

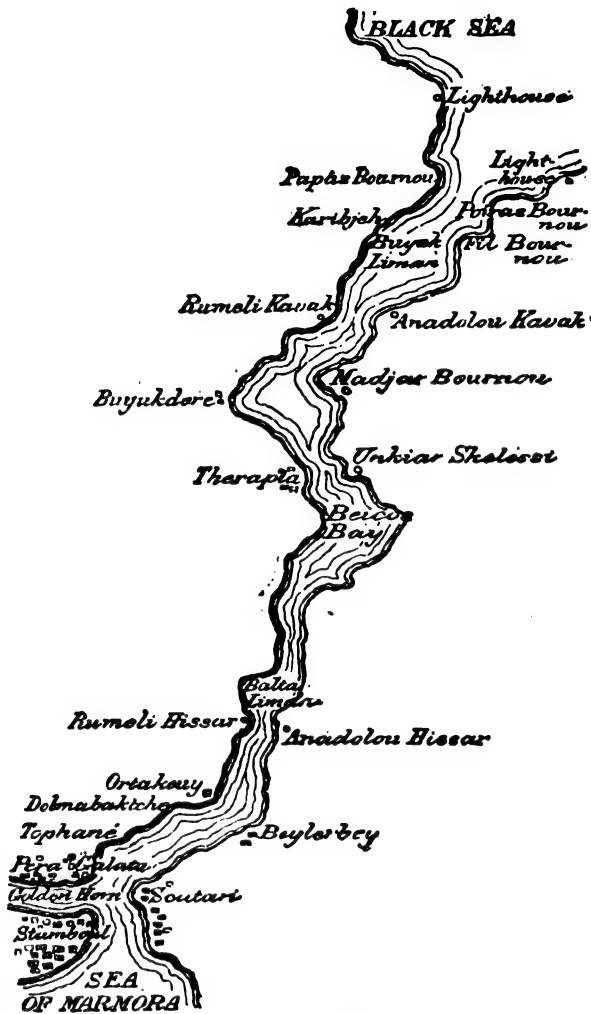

Our Special Artist at Constantinople supplies us with a tolerably complete series of Sketches of the Turkish fortresses along both shores of the Bosphorus, two or three of which have been represented in the Illustrations given last week. Some description of the Bosphorus has also been given, but it may here be conveniently enlarged. The unique geographical position of Constantinople at the south-western entrance to this remarkable maritime channel, which connects the Sea of Marmora, and thereby also the Egean and the Mediterranean, with the Black Sea, has always been admired. The Bosphorus, as well as the Hellespont or Dardanelles—a strait bearing some points of resemblance to the Bosphorus at the western extremity of the Sea of Marmora—divides the Continent of Europe from that of Asia. It must ever continue to be, as it has been in all past ages, a locality of great commercial and political importance. The Imperial Government of ancient Rome had chosen the Greek Byzantium, under the new name of Constantinople, for the metropolis of its Eastern dominion. A separate Empire of the East—Greek by nationality and social civilisation, Christian in religious profession, but still Roman in the titles and forms of sovereignty, flourished here during nearly a thousand years. It was shaken, indeed, by the repeated attacks of the Saracens, Tartars, and Seljukian and Ottoman Turks, successively overrunning Western Asia under the impulse of Mohammedan fanaticism. Scarcely less fatal to the Byzantine Empire, as it is sometimes called, were the violent and rapacious Crusaders from Western Europe, who came for the ostensible purpose of repelling the Moslem invaders of Palestine; and the mercantile advantages of the Levant were appropriated by the Genoese and Venetians, who established their naval and military power along these shores. At length, in the fifteenth century, when the mediæval republics and feudal principalities of Europe had declined from their old spirit of warlike enterprise, or had been superseded by monarchies with a different policy, the Turks under Sultan Mahomet II. were permitted to conquer the whole of Roumelia, with the city of Constantinople, and all the adjacent provinces to the Danube and the Adriatic, which they have kept in a miserable state of wretchedness to the present day. The possession of the Bosphorus is the key to the Turkish Empire of South-Eastern Europe and Western Asia. These historical considerations enhance the interest of our Artist's local sketches; but we append some further topographical notes, aided by a small outline Map or Plan of the Bosphorus, which requires a little explanation.

The space included in this map, from the Sea of Marmora to the Black Sea, is about fifteen miles in a straight line; but the voyage by steamer, through the winding channel of the Strait, is several miles longer. Stamboul, the Turkish city of Constantinople, occupies the promontory at the south-western extremity of the Bosphorus, overlooking the Sea of Marmora on one side, and divided, by the inlet called the Golden Horn on the other, from Pers and Galata, the quarters of the town allotted to Christian inhabitants or foreigners. Opposite this, on the Asiatic shore, is the town of Scutari, which was founded in very ancient times by the Persian conquerors of Asia Minor. They gave it a name signifying "the Post Town," as it was either the starting-point or the first stage of a line of couriers between remote parts of the Persian Empire; but the Greeks called it Chrysopolis, from the gold brought here in payment of tribute. Scutari is a flourishing township, with an hourly steam-boat communication across the strait, one mile wide, to the capital city. It contains eight mosques, and the vast suburban cemetery, in which half a million of deceased Turks lie buried, every tombstone of a male adult being distinguished by the ornament of a turban carved at its summit; but there is also a pillared monument of Sultan Mahmoud's favourite horse. The reader of Hope's "Anastasis" may remember an eloquent passage of description and reflection upon this subject. But in our own days, long since the time when that entertaining romance was written, Scutari has acquired some other associations of mournful interest. Here was the British military hospital, now converted into a Turkish barracks, where Miss Nightingale and other kind English ladies nursed our sick or wounded soldiers and sailors during the Crimean War. Here, too, is the burial-ground of some eight thousand of our brave countrymen, marked by an obelisk, with four statues of supporting angels, the sculpture of Baron Marochetti. The neighbourhood of Scutari, with the hill of Boulgourlou, commanding a magnificent sea view, looking over the whole of Constantinople, besides the shores and islands of the Propontis, is the frequent resort of parties from the opposite city.

Having now started from the southern mouth of the Bosphorus, to ascend its channel, which bends alternately from east and west, Constantinople is left behind us. Adjacent to the suburb of Galata is that of Top-hané, with its artillery barracks, cannon-foundry, and boat-building yards. Next comes the Sultan's palace of Dolma-bakché, a name signifying "the Bean-garden," where his Majesty receives Ministers of State and foreign Ambassadors. It is an imposing edifice of Corinthian architecture, surrounded by groves and fruit-gardens, amidst which is also the summer palace of Beahiktaah, besides a smaller mansion, inhabited by the late unfortunate Murad V. before he became Sultan. On the next projecting point of the European shore is the large village of Ortaköy, with a mostly Christian population; here are the villas of some rich Armenian merchants and bankers; and here is a small chapel for the worship of the Church of England. The Turkish village of Beylerbey, opposite this on the Asiatic shore, was a place of some importance under the Byzantine Empire.

As we get clear of the familiar scenes within sight of Constantinople, the romantic charm of the Bosphorus is felt to take a stronger hold upon imagination. Its very name is redolent of antique mythology, and of those weird traditions,

embalmed in the poetry of Homer and Æschylus, which seem rather alien to the bright Hellenic fancy. The "Bosphorus" means the "Passage of the Cow;" for it was here, as the old fable ran, that poor Io, when Zeus or Jupiter changed her into a cow, was driven by the tormenting gadfly to swim across the strait; which is a very pretty story, like that other of Europa riding on the bull over the Egean Sea. These shores, and those of the Euxine beyond them, are haunted, too, by mystic reminiscences of the voyage of Jason and the Argonauts in quest of the Golden Fleece, and the tragic passion of Medea, as well as of the labours of Hercules and other heroes and demigods. It is probable that the superstitious fears of seamen in those early ages of the world had been excited to such wondering fancies by the singular conformation of the strait and the perplexing variation of its currents. There are on each side of the channel seven prominent headlands, with seven recesses or bays, these forming together, between the opposite shores, what appear to resemble

THE BOSPHORUS.

seven distinct lakes, seeming as if inclosed by the surrounding land. The general drift of the waters is from the Euxine southward to join the Mediterranean; but there are many cross-currents, eddies, and backwaters, from the intercepting barriers, and a southerly wind often drives the whole surface water up the strait. These strange peculiarities, with the fantastic shapes of the mountainous shores, were ascribed by the startled mariners of antiquity to enchantment; and the Bosphorus was to the Greeks a region of "uncanny" supernatural powers, like that of Scylla and Charybdis between the Sicilian and Italian coasts.

The Castle of Europe and the Castle of Asia, Rumeli Hissar and Anadolou Hissar, confront each other at a narrow part of the Bosphorus, to some extent inclosing the basin which is called Balta Liman, or the "Battleaxe Harbour." Rumeli Hissar, with its massive towers rising amidst the cypress groves of an old Turkish cemetery, on the summit of a bold rocky headland, is a monument of the conquest of Constantinople in 1453. It was constructed by Mahomet II., two years before that event, his predecessor, Mahomet I., having already built Anadolou Hissar on the opposite bank. A chair of stone was there cut out, for the haughty warrior to sit and watch the progress of his work, for which a thousand masons, a thousand lime-burners, and a thousand other labourers were collected from the Anatolian districts. The building was laid out so as to form the shapes of the Arabic letters composing the Prophet's sacred name. Its walls, 30 ft. thick and very high, frowned sternly on the gateway of Eastern Christendom; the marble pillars and altars of Greek churches were contemptuously used for the building, which was finished in three months. The towers were mounted with huge guns throwing stone balls of 6 cwt., by which the Turkish commander was able to exact toll of every passing ship. Such was the Ottoman power, displayed at the very same place where the Persian King Darius, long before the Christian era, saw his army cross over into Thrace.

The shores of Balta Liman have witnessed some important political transactions. Here was the residence of an eminent Turkish Minister, Reschid Pasha; and here, too, were signed the commercial treaty of 1838, the treaty of the Five Powers in 1841, and the convention of 1849 concerning the Danubian Principalities. Northward of this, on the European side, is the harbour of Stenia, famous in Byzantine history; and we arrive next at Therapia, a place of which many English visitors have the most agreeable recollections, as it contains the summer residence of the British Ambassador. The name of this place, like that of the Euxine, and like that of the Eumenides or avenging goddesses, is a curious example of the Greek habit of flattering euphemism to objects of their dread. Medea, the Colchian princess and sorceress, was said to have poisoned the herbs growing on this spot, which was thence called Pharmakia; but the Greeks of a later day resolved to call it Therapia, the healing place, in order to propitiate the supernatural powers, and so dispel the mischievous influence. No situation is now to be found more pleasant and salubrious than that of Therapia, which has excellent English hotels and boarding-houses, and is the abode of many wealthy foreigners doing business at Constantinople. It is renowned in naval history for a great battle in 1352 between the Genoese and Venetian fleets.

Beicos Bay, on the Asiatic side, where the British fleet lay some weeks in the winter of 1853, at the opening of the Russian war, is not less worthy of note. According to the Greek poetical story-tellers, its shore was the kingdom of the Beryces, ruled by Amycus, the lord of many oxen, who behaved rudely to the Argonauts, and was afterwards slain by Pollux. A laurel grew above the tomb of this discourteous prince, which had the peculiar property of inspiring madness—a fit of frantic insolence—in every person that plucked a leaf; the man would incontinently assail his neighbours with all manner of abusive language, and provoke them to deadly quarrel. It is to be feared that some grafts of "the raving laurel" have been transplanted from the shores of the Bosphorus to the soil of western countries; but neither General Ignatieff nor Lord Salisbury brought any of its leaves to the late diplomatic Conference. At Beicos is the site of the "Convent of the Sleepless," which was so called from its rule obliging the monks to continue singing and praying incessantly, by day and night, instead of at stated hours of Divine service. To the north of the bay rises a chalk hill, 590 ft. high, called the Giant's Mountain, which is very conspicuous. At its foot lies Unkiar Skelessi, "the Landing-place of the Manslayer," where Mahomet II. landed on his return from the conquest of what is now European Turkey. The sumptuous palace which formerly stood here has been converted into a paper-mill; but Unkiar Skelessi is celebrated among European statesmen for a treaty here concluded between Turkey and Russia, which has often been discussed, as it related to the closing of the Dardanelles against foreign ships of war. On the summit of the Giant's Mountain is an excavation, only 20 ft. long and 5 ft. wide, inclosed by a stone wall, and partly overgrown with bushes. This has been variously called sometimes the Giant's Cave, the Bed of Hercules, and the Grave of Joshua; but it is regarded with veneration, and people hang clothes on the bushes to make them efficacious for the cure of diseases. Below this mountain, a mile or two farther on, the promontory of Mahdjir Bournou, the ancient Argiroconium, projects into the water. There is a castle here, built, in 1794, by the French engineer, Monnier, who also constructed Deli Tabia, on the opposite shore; but the fortress of Mahdjir has been remodelled and extended. It is the most important portion of the defences of the Bosphorus against an enemy coming down from the Black Sea. We give a special illustration of the interior of this fortress.

The bay and port of Buyukdere, opposite Mahdjir Bournou, demand our passing attention. Here is the summer palace of the Russian Embassy, with its beautiful gardens. The wooded hills behind the village present some delightful walks or rides, through the forest of Belgrade; and the reservoirs and aqueducts, constructed by Sultan Mahmoud, in 1732, to supply the northern suburbs of Constantinople with water, are works of remarkable magnitude. North of Buyukdere and the Giant's Mountain the prospect is shut off by lofty mountain ranges, the terminating heights of the Hæmus and Olympus groups, respectively, in Europe and in Asia. They approach near to each other at the two opposite points of land, which the Greeks of the Empire called Hieron and Serapion. The mythical hero of the Golden Fleece expedition here set up altars in honour of the twelve Olympic deities on his return from Colchis. Temples of Zeus and Poseidon, otherwise named Jupiter and Neptune, were in due time erected by the Greeks on the promontory of Hieron; while those of Serapis and Cybele, rising over the way, attested the piety of Asiatic worshippers. This part of the strait was the scene of many sharp conflicts between the Byzantine forces and those of the barbarian nations, Goths, Huns, Heruli, Varangians or Franks, Russians and Tartars, invading the Eastern Empire. In the fourteenth century the adventurous Genoese, who had already taken possession of a suburb of Constantinople, and had established their colonies on the Black Sea coasts, held the custody of this passage. They beat off the Venetians and other commercial rivals, built a castle on each shore, and stretched an iron chain across the strait, forbidding any vessel to pass without paying toll and asking their permission. But the Genoese possessions, here as elsewhere, passed a hundred years later to the Turkish Sultan. Hence the Turkish forts of Rumeli Kavak and Anadolou Kavak have taken the place of those which bore the sculptured arms of Genoese and Byzantine masters. One of these forts is included in our page of small engravings; the other shall be given next week. The basin or harbour of Buyuk Liman, which was anciently styled that of the Ephesians, is a commodious refuge for ships escaping the storms of the Euxine, if they can weather the points of Fil Bournou and Poiras Bournou, and get in safely. The European shore, above the fort of Karibey, is a stony desert of forbidding aspect, known as Tashlanjik among the Turks, but which the Greeks used to call Gypopolis, or the City of Vultures. This place, in fact, naturally abounded with that voracious species of bird, which gave occasion to the fable of the Harpies. It was here that King Phineas entertained the Argonauts with a feast, which was stolen from their diables, as they sat at table, by those nasty, greedy, winged monsters hovering in the air overhead. Leaving this dismal coast, with Papas Bournou on the left hand and the Asiatic Fanar, or lighthouse, on the right hand, the voyager passes out into the Black Sea. It must have been a fearful experience for the timorous and unskilful mariners of antiquity; even the contemporaries of Ulysses and Æneas, whose exploits of navigation we read in our Homer and Virgil, would think of a trip to the Black Sea as we may think of one to the North Pole. Just outside the Bosphorus is a cluster of rocks, called the Cyanean, from their bluish black or slaty colour, but also the Symplegades, or "Clashers," from their appearing to rush together, and to strike each other, when viewed under certain atmospheric conditions, with reflected light from the dancing waves around them. Ships were often wrecked among the Symplegades; and so it was fabled that the Argo, Jason's ship had her tail, or rudder, cut off by the rocks suddenly closing in behind, in her swift passage between them. The more distant coasts of this obscure sea were the Cimmerian lands of perpetual darkness, or the enchanted realm, in which a golden treasure was guarded by fiery dragons; and there were savage inhabitants, in some parts, who would slaughter the helpless stranger cast upon their shores. The sea had therefore a bad name to begin with; but the Greeks, for the reason we have explained, chose to change this for a good name, and to call it the Euxine or "Hospitable," knowing that it was quite the contrary, but hoping that it might thus be persuaded to become hospitable. We shall not attempt to describe its present character, except by quoting one stanza of Byron's "Don Juan," which has been verified by many an English traveller in the East:—

The wind swept down the Euxine, and the wave
Broke foaming o'er the blue Symplegades:
'Tis a grand sight, from off the Giant's Cave,
To watch the progress of those rolling seas
Between the Bosphorus, as they lash and lave
Europe and Asia, you being quite at ease;
There's not a sea the passenger e'er pukes in,
Turns up more dangerous breakers than the Euxine.

ROYAL INSTITUTION LECTURES.

THEORY OF MUSIC—DISCOVERIES OF PYTHAGORAS.

Dr. William Pole, F.R.S., began his second lecture, on Thursday week, by explaining the production of musical sounds by stretched strings, very important in regard to theory. The influence of the three elements of weight, tension, and length, in determining the pitch of the note, was shown by the monochord, and it was demonstrated that the number of vibrations corresponding to any given note can be calculated by mechanical laws. Proceeding to the investigation of musical scales, he found, by the practice of all nations, that in forming melodies the sounds must not be taken at random from the infinite number of possible sounds, but must be selected from a definite number called a scale, proceeding in steps or degrees. The necessity of this Helmholtz explained on psychological grounds. He said, the essence of melody is motion, which requires to be appreciated in regard to its extent and variation, and the only means of doing this is by causing the motion to take place through fixed degrees measurable by the ear. The scale, in fact, constitutes a kind of divided rod by which the motion of melody can be made clear to the mind. As the question how musical scales should be formed, and on what principles the sound should be selected, involves the consideration of the magnitude of the steps between the various sounds, Dr. Pole explained the definition and measurement of musical intervals, in their popular and philosophical aspects. He showed that the scientific definition of a musical interval can be obtained by the ratio of the vibrations of the two limiting sounds, and that by taking the logarithm of this ratio a measurement can be given, very convenient for use and appreciable by the eye, by means of graphic delineation. After referring to the great variety and antiquity of musical scales among different nations, the lecturer gave a brief historical sketch of the forms now in use. The diatonic scale came through the Greeks. The early history of their music is obscure; but the scale first assumed a definite shape between 500 and 600 B.C. in the hands of Pythagoras, who discovered that sounds can be accurately defined by the proportionate lengths of stretched strings, and thus, for the first time, brought music within the range of philosophical treatment. By the aid of the proportions of strings, and in conformity also with the guidance of the ear, this great philosopher fixed the intervals of the octave (diapason) and the fifth (diapente), the most important, and then added the fourth (diatessaron), which he found to be the complement of the fifth, the two, added together, making an octave. The difference between the fourth and fifth gave a smaller interval, which he called a tone, by the aid of which he filled in the smaller divisions. Thus arose the "diatonic scale," which, with some minor alterations, has been transmitted to the present day.

MATTER AND ETHER.

Mr. John Fletcher Moulton opened his discourse, at the Friday evening meeting, Feb. 23, by remarking on the richness of our age both in discoveries of the laws of nature, and in attempts to discover the ultimate constitution of that of which it is built. He was about to speak of the mechanism of nature as opposed to the mere laws of nature, and especially of the minute mechanism of the matter and the ether, which are her fundamentals, and to show the special difficulties of taking the step from a law to the mechanism which produces it, and the special canons which must guide us. He defined law as a mere statement of result, and mechanism as a statement of existences. Thus the laws of electricity are wholly independent of its nature; and so with heat and gravitation, for which some very singular mechanisms of atoms have been suggested by Weber, Ampère, Foucault, Tait, and Clerk-Maxwell. But science ought to be the sternest school of belief; and scientific men are to blame in exaggerating certainty to themselves and to others, since few people face clearly the conditions under which credence ought to be given. In considering the process of ascertaining the mechanism that causes a set of phenomena, Mr. Moulton said, we must examine the phenomena, try to hit upon their laws, and then devise some mechanism which will produce such phenomena governed by such laws. This he illustrated by describing how ladies, mechanicians, and electricians would ingeniously attempt to devise a machine to do certain things, all depending upon the state of their knowledge. He next alluded to Helmholtz's discovery of vortex-motion, to Professor Osborne Reynolds's recent application of it to the motion of fluids, and to the consequent formation of a vortex-theory of atoms. But, as mechanism is a question of actual existence, not of description of observed results, are we to give credence to what is only a reflex of our own ignorance, or are we to defer such investigations till we attain the wholly ideal state of perfect knowledge or even sufficient knowledge? In reply, Mr. Moulton explained and illustrated the benefits of hypothesis or scientific fiction, which should be loyally worked and modified until supplanted. We should hesitate to receive any hypothesis so long as the evidence for it is derived solely from the phenomena which give rise to it. Thus, seeing a man floating in the air is not sufficient evidence; we must feel him in order to form a correct hypothesis. We have no ground for believing in things with only one special set of relationships. The atomic theory, so valuable in chemistry, was verified by the discovery of the diffusion of gases; while in the evidence of the undulatory theory of light it is impossible to estimate the cumulative value of such evidence, although it shows we are on the right track. In actual life we may take as a canon the inherent probability or improbability of the suggested mechanism, as in the case of a railway accident; but we have no experience of what mechanisms are usual in nature's minute structures. We cannot learn too soon in science that where we have no experience there we are absolutely ignorant. It is totally different with physiology, for instance. If we knew the mechanism which produces a ray of light, many would probably consider it unnecessarily cumbersome. Now, the existence of ether seems very improbable, yet it is valuable as bringing in undulation just where it receives confirmation from other things—i.e., the existence of the medium. The dynamic properties of ether, coupled with its finite velocity (computed to be at the rate of a cubic mile of sunlight half-way between the earth and the sun), are equal to two tons moving at the rate of sixty miles an hour. The undulatory theory may be supplanted, but it is almost impossible to believe that the idea of a continuous medium will ever be displaced. In conclusion, Mr. Moulton commented on the great value of hypotheses, however ingenious, daring, and inventive, when held in their right place, and referred to Professor Clerk-Maxwell as an eminent example of so doing.

EUROPE BEFORE THE FRENCH REVOLUTION.

Professor Henry Morley, on Saturday last, gave the first of a course of five lectures on Effects of the French Revolution on English Literature. He began by saying that his object would be to show that there is a central line working in a definite direction within all the best intellectual work of our time, and that its direction was, in part at least, determined and its power much increased by the impulse given at the French Revolution, though it takes the reverse course to which that revolution pointed, upward instead of downward. He said

that the eighteenth century was not, as Carlyle defined it, an age of sham and sentimentality, but rather an age of reaction against sham, and conducted to the present, an age of progress. The energy of the Elizabethan time produced Shakespeare for literature and Bacon for science; while Hooker, in his "Ecclesiastical Polity," propounded the principle that society depends upon compact among men to defend them from each other, and hence arose government. Henceforward the problem occupied the chief intellect of England. The absolute authority of the Sovereign was stoutly maintained by the philosopher Hobbes in his "Leviathan" (1650), and by Sir Robert Filmer, in his "Patriarcha" (1653), and as warmly controverted by Selden, by Milton, and especially by John Locke, in his works on "Civil Government" (1689), in which he maintains the principles of the second revolution, a limited government for the protection of life, liberty, and property, in which he was well followed by De Foe and Steele. The corruptions of the time, partially due to French influence, and prominent in the Court, the Church, and general society, led to serious doubts as to the justice of God in the government of the world, put forth especially by Bayle, and replied to earnestly by Leibnitz, by Pope, in his "Essay on Man," and by Bishop Butler, in his "Analogy." Mandeville, in his "Fable of the Bees," attributed these corruptions to civilisation, and described how society might be renovated by reverting to simple, honest living, and discarding all unnecessary arts and professions. This was echoed by Rousseau, and thus arose the fiction of the "noble savage." The just criticisms of Boileau had led to the supplanting the frivolous literature of his time, and eventually to the too great predominance of the Latin classics in what has been since termed the Augustan Age in Europe. Against this the reaction was led by Voltaire in France and by Bodmer in Germany. Rousseau maintained that the only way to save society was to recur to a state of nature, a common notion in his day, and re-echoed by the encyclopedists. All this was undermining an edifice with sapped foundations. In France the nobles were squandering at Court revenues wrung from impoverished peasants; there was no political liberty, and any persons could be readily consigned to the Bastille, the horrors of which were warmly denounced by Cowper, in 1785, as "the abode of broken hearts; The dungeons and the cages of despair." National bankruptcy hastened the crisis; and on July 14 and 15, 1789, an infuriated populace destroyed the hateful fortress, an event hailed by lovers of liberty throughout the world, and celebrated by Wordsworth in hopeful strains, with which Professor Morley concluded his lecture.

THE MUSCULAR SYSTEM.

Professor Garrod, M.A., F.R.S., devoted his sixth lecture on the Human Form and its Structure in Relation to its Contour, given on Tuesday last, to the further consideration of the shape, position, and functions of those of our muscles which are visible superficially; his remarks being fully illustrated by fine large coloured diagrams, by a statue of the "Fighting Gladiator," and by explanations of the action of the muscles engaged in certain movements made by himself. His descriptions included the great muscles of the back, the pectoral or chest muscles, and the well-known biceps and triceps of the arm, so much developed by athletic exercises, whereby graceful rounded curves are produced. The latter part of the lecture related to the wrist and hand, a wonderful system of bones, muscles, and nerves, combining strength and sensitiveness with the means of producing great variety, extent, and rapidity of motion, in which are exhibited, in a most striking manner, our power of controlling muscles at will, and the effects of education and practice. The mechanism of the hand was well illustrated by a working model.

Mr. Frederick J. Bramwell, F.R.S., will, on Friday next, give a discourse on the Future of Steel.

Mr. G. F. Teniswood, F.S.A., gave a very instructive lecture upon English Landscape Art in the Past and Present Centuries, before the Society for the Encouragement of the Fine Arts, on Thursday evening last week. Beginning by showing the debased condition of art in this country at the first part of the last century, and how foreign influences affected the taste of the day, the lecturer detailed the rise and progress of English landscape, tracing its course to the time of Wilson and Gainsborough, and their immediate followers, and instanced the rise of water-colour painting as largely instrumental in its further development. Commenting upon the genius of Turner, and discriminating the merits of his contemporaries, he concluded by pointing to the more varied aims and extended field of modern study. Mr. B. L. Moseley, LL.B., occupied the chair, and took part in an animated discussion which ensued.

Lieutenant-Colonel C. B. Brackenbury, R.A., Assistant Adjutant-General, superintending officer of garrison instruction, gave a lecture, on Friday, at the Royal United Service Institution to a distinguished gathering of officers, on "the Value of Systematic Instruction in Tactics for all ranks of the Army." Lieutenant-General Sir Thomas Steele, commanding the Aldershot district, was in the chair.

The Rev. G. W. Olver, Principal of Southlands College, yesterday week, addressed the students of the Southlands and Westminster Wesleyan Training Colleges, at the Wesleyan Chapel, Horseferry-road. The Rev. A. Macaulay, President of the Wesleyan Conference, occupied the chair, and the meeting was also addressed by the Rev. Dr. Rigg (Principal of Westminster Wesleyan College), the Rev. Dr. Williams (secretary of the Conference), and Mr. A. McArthur, M.P. There are in residence in the two colleges, 236 students, 105 female and 131 male. The results of the Christmas examinations of the students were very satisfactory, no student having failed to pass. Employment was found at Christmas for almost all the students, and for the greater portion in Wesleyan schools.

The free science lecture, last Saturday evening, at the South Kensington Museum was given by Mr. Alfred Tribe on the Combustible Elements of Water. He began with an historical account of its discovery, and the lecture derived interest from the fact that not only were the successive additions to knowledge on the subject given in sequence, but the experiments by which that knowledge was gained were most of them shown.

Dean Stanley distributed prizes at the Quebec Institute, on Monday night, and addressed the members. The Dean prefaced his remarks by saying that it was thirty years since he had been in that room, when he heard Mr. Carlyle give his lecture upon "Hero-Worship." He then proceeded to point out how they should study great poets like John Milton. In the first place, they should read his works chronologically, although they were never published in that form. They should begin with the smaller poems, then go to the prose writings and sonnets, next read "Paradise Lost and Regained," and finish with "Samson Agonistes"—"the last ebb of a mighty tide." In studying Milton they ought to learn to distinguish between the parts of the man which belonged merely to passing times and fashions and those which belonged to all times. Milton was a great poet, but his controversial writings presented him in an unpleasant

light. The striking moral lesson to be learnt from him was that, licentious as were the poets of his day in language and life, he from first to last breathed the same untainted atmosphere. Mr. W. Forsyth, M.P., Mr. Anthony Trollope, and others, also addressed the meeting.

A meeting was held, on Monday, at the Royal United Service Institution—under the presidency of Admiral of the Fleet, Sir H. Codrington—when Mr. R. Griffiths, C.E., read a paper on a New Form of Vessel for War Purposes. He said that, when circular war-vessels came to be tried practically it was found that they required four times more steam-power than ordinary vessels, and he had therefore endeavoured to design a ship to combine the advantages of a circular vessel and at the same time avoid the loss of speed. He had nearly arrived at the desired effect by making the immersed surface of an elongated form and by fitting it with twin screws internally.

At Burlington House, on Monday night, Mr. Barry, R.A., treasurer of the Royal Academy, gave the opening lecture of his architectural series for 1877. The chair was taken, at eight o'clock, by Mr. Pickersgill, R.A., the keeper. There was a large gathering of professors and students. Of these not all were devoted to architecture as a pursuit; for Mr. Barry's abstract ideas of this art, as the oldest of all arts, and as one that commends itself to the careful consideration of artists generally, are well known. He began by announcing his purpose in these lectures to confine his remarks within the limits of domestic architecture, that great problem of the day. The laws governing ecclesiastical buildings are determined; but this is far from being the case with the principles on which our habitations should be designed; and it was not without a quiet touch of humorous sarcasm that the lecturer surveyed the present æsthetic uncertainties of house-building.

In the course of a discussion resulting from a lecture on the subject of the Railway Passenger Duty, given by Mr. C. D. Collet at the Society of Arts on Monday evening, a resolution recommending the adoption of the propositions of the Select Committee last year was passed.

At the meeting of the Geographical Society, on Monday evening, in the hall of the London University, Burlington-gardens, two papers were read upon African Exploration. There was a large attendance, Sir Rutherford Alcock occupying the chair. Mr. E. D. Young, R.N., read the first paper, which was a narrative of a recent sojourn at Lake Nyassa, whither he had been sent by the Livingstone Mission originated by the Free Church of Scotland. The Rev. Dr. Mullens read a paper contributed by the Rev. Robert Price, setting forth a new route and a new mode of travelling into Central Africa. Dr. Cockerell, Bishop of Edinburgh, gave some details of his son's expedition to Lake Nyassa. Sir Samuel Baker remarked that the great question in relation to Africa now was the means of transit. The Rev. Mr. Price elaborated several of the suggestions made in his paper for the establishment of intermediate stations upon the route to the lacustrine system of Africa.

Mr. W. Spottiswoode, F.R.S., gave a lecture on Light and Colour at his residence, 41, Grosvenor-place, on Wednesday, on behalf of the funds of the National Orphan Home for Girls, Ham-common, Surrey.

A course of lectures has been arranged for art students and others, at the City and Spitalfields School of Art, who may be desirous of receiving information concerning the various employments connected with art and design. The first lecture was given, last Thursday, by Mr. N. H. J. Westlake, F.S.A.; and three more will be given on subsequent Thursdays by Mr. Thomas Chatfield Clarke, F.R.I.B.A.; Mr. G. Aitchison, B.A.; and Mr. Charles L. Eastlake, F.R.I.B.A.

THE KING AND QUEEN OF GREECE.

Our well-known Special Artist, Mr. W. Simpson, has arrived at Athens, having been sent from London by the Proprietors of this Journal, for the express purpose of supplying illustrations of the recent archaeological explorations and discoveries on the sites of ancient Greek cities. His first endeavour will be to obtain further illustrations of the discoveries at Mycenæ, some of which have already been presented to our readers; but he will also visit the Troad, and the ruins of Ephesus. Mr. Simpson, as one of the honorary secretaries of the Society of Biblical Archaeology, has some recognised qualifications for the study of architectural antiquities in the Levant; and by his exhibition, several years ago, of a collection of fine water-colour drawings illustrative of the explorations at Jerusalem, as well as by his lectures on some of the antiquities of India and Abyssinia, he has fairly earned public confidence as an accurate and intelligent artistic reporter of this class of subjects. We feel assured that the results of his present mission will give satisfaction to the large number of classical scholars and historical inquirers who have taken an eager interest in the investigations lately pursued by Dr. Schliemann, Mr. J. T. Wood, and other enterprising searchers for remains of the past splendour of Grecian civilisation.

Our Artist reached the Piræus, the harbour of Athens, on the morning of Saturday week, after a very stormy passage in the Austrian Lloyd's steamer, which took forty-eight hours, instead of nine hours as usual, crossing the Ægean from Smyrna. He was just in time to witness the scene on board H.M.S. Hercules, the flagship of our Mediterranean fleet, on that day, when their Majesties the King and Queen of the Hellenes (or, as we commonly say, King and Queen of Greece) came from Athens to visit Vice-Admiral Sir James R. Drummond, K.C.B., commanding in the Mediterranean. The Hon. W. Stuart, C.B., British Envoy at the Court of Athens, accompanied their Majesties upon this occasion, and they were received with the customary honours. They were attended by M. Rodostamos, as Maréchal de la Cour, Countess Daneakjold, Mdle. Colocotroni, Maid of Honour, and M. Vasos, staff officer. Sir James Drummond was accompanied by his second in command of the fleet, Admiral Rice. The King and Queen lunched on board, and afterwards inspected the ship. We give an illustration, from the sketch taken by our Artist. It was a farewell visit of the King and Queen to Vice-Admiral Sir James Drummond. The Hercules, with Sir James on board, left Salamis Bay, the Greek station of the fleet, on Wednesday week, and proceeded to Malta, in order to meet Vice-Admiral Hornby, who now succeeds to the command of the British naval forces in the Mediterranean.

It is understood that Admiral Drummond retires from the service. He has gone through all the grades, and reached its higher spheres, from which he will now depart into private life. It may be worth recalling that Admiral Drummond commanded H.M.S. Retribution at the early part of the Crimean War, and that she rode through the terrible storm of Nov. 14, 1854, outside of the harbour of Balaklava, with the Duke of Cambridge on board, where so many ships were shattered to pieces; and even on board the Retribution but little hopes were entertained at one point of the storm of the possibility of weathering it through. It was only by keeping the engines at work that the anchors were able to hold, and the ship and valuable lives were saved.

MR. COMPTON, THE ACTOR OF SHAKESPEARE COMEDY.

THE KING AND QUEEN OF GREECE VISITING ADMIRAL SIR JAMES DRUMMOND, K.C.B., IN THE HERCULES FLAG-SHIP.

1. The New Minister of War Saluted by the Guard on coming out of the Sublime Porte.
 2. Crowd Trying to Enter the Porte to Witness the Taking of Office by Edhem Pasha.
 3. Excitement in a Vestibule of the Porte at the News of Midhat Pasha's Downfall.

SKETCHES IN CONSTANTINOPLE. BY OUR SPECIAL ARTIST.

MR. HENRY COMPTON.

It is with extreme regret we chronicle the compulsory retirement from the stage of Henry Compton, comedian. The man exists, but the witty, eccentric, genial actor is no more. Rare is the man or woman of the present generation who is not acquainted with his speciality, or who does not cherish grateful recollections of hearty laughs indulged in at his bidding. This actor was endowed with one of the richest veins of humour (and we have seen him in most of his characters) that ever fell to the share of an eccentric delineator of stage oddities. He was not a one-part actor, but exhibited a multitude of contrarieties, each one apparently surpassing the other, none falling below the standard of true excellence. He possessed the "grip" of the true artist, and in every phase of variety held his audience with a grasp of iron. "His First Champagne," "Founded on Fact," and "The Fish Out of Water" are associated with his earlier triumphs. At the Haymarket he retained his popularity for a number of years; and later on, at the Globe Theatre, under the management of Mr. H. J. Montague, he contributed to the mirthful entertainment of thousands of admiring spectators. His Oxye in "Oriana," his Muggles in "Partners for Life," and his Paul Cudlipp in "Forgiven," are still fresh in the memories of many. He has now arrived at the advanced age of seventy-two years, and is visited with a terrible physical infirmity that incapacitates him for his profession, and must be endured. Our best wishes and kindest sympathies go with him; and we doubt not that with his affliction our readers will readily sympathise.

Mr. Compton's family name is Mackenzie; he was born in Huntingdon. In his professional studies he began at the lowest round, but sought on the Bedford circuit to shine as light comedian, which he soon wisely left for that of low comedian. After eleven years of hard work at Lincoln and on the York circuit, he appeared in London, at the Lyceum; subsequently at Drury Lane, in the parts of Slender, Tony Lumpkin, Mar All, Mawworm, and the Gravedigger. His reputation as a Shakespearean performer was early established. We shall not easily forget his Launcelot Gobbo and Touchstone. As an actor of sterling merit, and one of our richest low comedians, his name will ever be remembered by all lovers of stage art.

His benefit on Thursday at Drury Lane was produced under the most favourable circumstances, and commanded the services of the élite of the profession. The performances were a scene from "Othello," the Moor being personated by Mr. Creswick, and Iago by Mr. Ryder; and scenes from Bulwer's play of "Money," with the part of Evelyn by Mr. Edward Compton, the son of the eminent comedian; also from Sheridan's "Critic," Morton's "Lend me Five Shillings," Macklin's "Man of World," and Sullivan Gilbert's "Trial by Jury," contributed to the miscellaneous department. A better entertainment could not have been provided.

Our Engraving of Mr. Compton's Portrait is from a photograph by Messrs. Elliott and Fry, of Baker-street.

MUSIC.

THE PHILHARMONIC SOCIETY.

The sixty-fifth season of this institution opened, on Thursday week, with the first of the usual series of eight evening concerts, two additional morning performances being announced this, as last, year.

The programme of the opening concert was very strong in the instrumental selection. Beethoven's noble symphony in G minor (No. 5), Mendelssohn's overture entitled "Melusine" (composed in illustration of the well-known Rhine legend), and Weber's overture to "Oberon" displayed to special advantage the high qualities of the fine orchestra, which is constituted much the same as last year, with Herr Straus as principal first violin.

The concert included two concertos, that by E. Grieg, for pianoforte, and Spohr's, for violin, avowedly written "in modo di scena cantante." Grieg's concerto—the production of a young living Norwegian composer—had already been heard at a Crystal Palace concert, where it was introduced for the first time in England, and was finely played by Mr. Dannreuther, who again gave an admirable rendering of it on Thursday week. Spohr's fine work was, until near the close, very effectively played by Mr. Henry Holmes, who is heard to special advantage in the music of that composer (of whom he was a distinguished pupil). Near the end of the concerto, at the beginning of the unaccompanied cadenza, a sudden nervous attack caused a loss of memory (Mr. Holmes played without book), and the concerto was finished by passing to the closing orchestral "tutti." This is a casualty that has happened to many of the most distinguished instrumentalists, and serves again to prove the danger of trusting to memory in the execution of a long and elaborate work. Mr. Holmes played the greater part of the concerto so well, and his merits are so generally known, that such a casualty will not affect his reputation; and the audience evidently thought so, as the applause bestowed on him at the end of the concerto was loud and general.

The vocalists were Madame Edith Wynne and Mr. Cummings, the former of whom sang, with much power, the scene "Dalla torre," from Gounod's "Saffo;" and the latter, with good expression, Handel's air from "Semele," "Where'er you walk"—the two singers having been associated in Mr. Cusins's smoothly-written duet, "Da te lontan."

This is the eleventh season of Mr. Cusins's tenure of office as conductor of the Philharmonic Society's concerts, and his reappearance was warmly welcomed.

At the next concert, on March 8, Madame Schumann is to play her husband's pianoforte concerto in A minor.

Madame Schumann appeared for the first time this season at the Popular Concert of Saturday afternoon. The great pianist received an enthusiastic greeting from the large audience that completely filled St. James's Hall. Her solo piece was the set of seventeen "Variations Sérieuses," by Mendelssohn, on an original theme, which she gave with that grandeur of style and fine rhythmical phrasing which are among the special characteristics of the player. Madame Schumann's exceptional merits were also manifested in Beethoven's great trio in B flat (op. 97), in association with Herr Straus and Signor Piatti. These gentlemen, Mr. L. Ries, and Mr. Zerbini gave a fine rendering of Mozart's quartet in D (No. 7), and Signor Piatti's incomparable tone and finished execution were effectively displayed in his new "Elegia" for violoncello, with pianoforte accompaniment. Mr. Barton McGuckin produced a genuine impression by his excellent singing in airs by Salvalor Rosa, Buononcini, and Mendelssohn. Sir J. Benedict was the accompanist.

At the Popular Concert of Monday evening Madame Schumann again appeared, and met with a renewal of the welcome which she received on Saturday afternoon. Her solo was Beethoven's sonata, in E flat, entitled "Les Adieux, l'Absence et le Retour," which the pianist gave with great effect. The concert included Spohr's Nonetto, finely played by Herr Joachim (violin), Mr. Zerbini (viola), Mr. Svendsen (bute), Mr.

Lazarus (clarinet), Mr. Dubrucq (oboe), Mr. Wotton (bassoon), Mr. Wendtland (horn), Signor Piatti (violin), and Mr. Reynolds (contra-bass). Herr Joachim was encored after his performance of a sonata, by Handel, for violin, with pianoforte accompaniment; and a similar result followed Herr Henschel's fine singing of a song from this composer's "Almira," one of four pieces in which the vocalist fully maintained the good impression produced by his recent first appearance here. Haydn's quartet in C, No. 3 of op. 33, closed the concert. Sir J. Benedict was the accompanist.

Mr. Walter Bache's thirteenth annual concert took place, at St. James's Hall, on Tuesday evening, and quite sustained the high and special character which has distinguished past occasions. Mr. Bache's excellent qualities as a pianist, particularly in the bravura school, were displayed with great success in Chopin's second concerto (in F minor) and Liszt's concerto in A major, the great difficulties in each of which were brilliantly executed. The orchestral accompaniments of Chopin's concerto were given as skilfully re-scored by Herr Klindworth. The orchestral pieces were:—Liszt's "Mazzeppa," No. 6 of his "Symphonic Poems," and "Les Préludes," No. 3 of the same series. Both these have before been commented on, the first in reference to its performance at the Crystal Palace, the other on the occasion of its having been given at a former concert of Mr. Bache's. The characteristics and strongly-marked individuality of these remarkable works were admirably brought out in Tuesday evening's performance by an orchestra of unusually large proportions. Besides the pieces specified, Liszt's setting of Heine's ballad "Lorely" was sung by Mrs. Osgood, with orchestral accompaniments. Mr. Manns conducted, with the exception of "Les Préludes," which was directed by Mr. Bache.

The concert given by the Sacred Harmonic Society yesterday (Friday) week offered great variety and contrast, although almost entirely drawn from the works of one composer, Handel. The programme comprised his overtures to the "Occasional Oratorio" and "Athaliah," and a selection of choral and solo pieces from "Joshua," "Saul," "Theodora," "Athaliah," "Redemption," and the Utrecht "Jubilate," the concert having closed with the "Coronation Anthem," "Zadok the Priest," previous to which last the music of Mozart's "Litany" in B flat, was given, to English words adapted to R. G. Loraine. In the Handel selection the most effective of the solo performances was that of Miss Julia Elton in the air, "Lord, to Thee each night and day." The other soloists, in addition to this lady, both in the early portion of the concert and in the Litany of Mozart, were Madame Sinico-Campobello, Mr. Vernon Rigby, and Mr. Lewis Thomas. The choral and orchestral music was very powerfully rendered. Sir M. Costa conducted, and Mr. Willing presided at the organ, as usual.

Last Saturday's Crystal Palace concert, although not offering any absolute novelty, was of strong and varied interest. The orchestral pieces were Sir J. Benedict's concert overture entitled "The Enchanted Forest"—a graceful piece of orchestral writing which has previously been commented on—Wagner's overture to "Tannhäuser," and Mozart's symphony in G minor. Herr Joachim gave a splendid performance of Spohr's ninth violin concerto (in D), besides which he gave a "Sarabande" and "Tambourin" by Leclair, and three of Brahms's Hungarian dances, with pianoforte accompaniment played by Mr. Oscar Beringer. Sir J. Benedict's overture and Spohr's concerto were given for the first time at these concerts. Vocal pieces were contributed by Miss Cummings and Mrs. Osgood, the former of whom made a successful début.

Mr. Henry Smart's new cantata, "The Fishermidens"—performed for the first time by the students of the Royal Academy of Music on Saturday last—proved a great success. It is written entirely for female voices, solo and choral, with pianoforte accompaniment, which was well played by Mr. F. W. W. Bampfylde. Among the several effective pieces were Elsie's ballad, "It was the little Lillian," charmingly sung by Miss Mary Davies; a choral scene for fishermidens and sea-maidens; and an "Ave Maria."

Beethoven's "Pastoral Symphony" was performed at the Royal Aquarium concert of Monday, "with scenic effects." This, however well accomplished, is a mistake in principle, as surrounding with realism a work that is specially ideal, and should be left to make its own impression on the imagination of the hearer. To many, however, the pictorial additions will probably prove attractive; and it is but just to state that these have been most effectively realised by some beautiful scenery painted by Mr. Julian Hicks, who has supplied a series of picturesque views in accordance with the varied aspects of nature indicated in the score of the symphony.

That accomplished pianist Miss Florence May gave the first of two recitals at Langham Hall, on Thursday afternoon, when her programme included Beethoven's "Waldstein" Sonata, Schumann's "Etudes Symphoniques," studies by Chopin, and various other pieces.

A series of ten classical concerts was begun at Langham Hall, on Tuesday evening. The string-quartet party consisted of MM. Pollitzer, Polonasky, Zerbini, and Boatwright. Miss Emma Barnett was the solo pianist, and Mr. C. King the vocalist.

Mr. Henry Leslie's Choir opened a new season (the twenty-second), yesterday (Friday) evening. The concerts take place, as usual, in St. James's Hall, and the programme of the first comprised the first performance in England of Bach's sublime motet for double choir, "I will sing unto the Lord." The first part of the concert consisted of sacred music; the second, of secular pieces. Of the performances we shall speak next week.

Mr. Kuhe's Brighton Musical Festival closed on Saturday, when "The Messiah" was performed. The announcement that Mr. Sims Reeves would sing attracted such numbers that many were unable to gain admittance. The soloists were Madame Edith Wynne, Madame Patey, Mr. W. Shakespeare, Signor Foli, and Mr. Sims Reeves. The latter gentleman was in excellent voice, and was enthusiastically applauded. Mr. Kuhe conducted, and Mr. Sainton led the orchestra. The Brighton Sacred Harmonic Society provided the choruses.

The New Philharmonic (afternoon) Concerts are announced to take place on April 14 and 28, May 12 and 26, and June 9. As heretofore, the office of conductor will be divided between Dr. Wyld and Mr. Ganz.

It is reported that the proposed grand performances of Richard Wagner's operas at Bayreuth will not take place this year, in consequence of Herr Wagner's impaired health.

On Thursday next, March 8, the University of Cambridge will confer the degree of Doctor of Music on Professor Joachim. The ceremony will be followed, in the evening, by the 150th concert of the Cambridge University Musical Society, in the Guildhall, Herr Joachim taking part in the performances. The programme will comprise Sterndale Bennett's overture "The Wood Nymphs," Beethoven's violin concerto, an overture composed expressly for the occasion by Herr Joachim, Brahms's "Song of Destiny" ("Schicksalsspiel"), and the same composer's new manuscript symphony, in G minor, lately produced in Germany, and to be heard for the first time in England on this occasion. The proceeds of the concert will be given to Addenbrooke's Hospital.

The concert given last spring at the Royal Albert Hall, by Messrs. Nurdin and Peacock, in aid of the Cheesemongers' Benevolent Institution, proved so successful, having placed £1100 to the credit of the fund, that the same firm have resolved upon giving another concert at the Albert Hall, on Easter Monday evening, with the same benevolent purpose. Among the artistes engaged are Madame Patey, Madame Lemmens-Sherrington, Miss Anna Williams, Signor Foli, Mr. Vernon Rigby, and Mr. Thureley Beale. The Duke and Duchess of Teck, the Duke and Duchess of Sutherland, and the Lord Mayor are among the patrons of the concert.

Mr. Lamborn Cock's sale of copyrights, which recently took place under the direction of Messrs. Puttick and Simpson, of Leicester-square, has produced a total of £8254 3s. 2d., the catalogue comprising 319 lots only. The competition was brisk throughout, and the prices ruled high. Beethoven's works, edited by Sir Sterndale Bennett, fetched £250 15s. 3d., and Sir Sterndale Bennett's pianoforte works, £536 8s. 6d.; Bennett's Fourth and Fifth Concertos, £328 9s.; six songs, ops. 23 and 35, £597 6s.; chamber trios, principally for female voices, £800; Sir M. Costa's "Naaman," £710 6s. 6d.; Sir W. S. Bennett's "May Queen," £1875.

THEATRES.

GAIETY.

The management is sedulous in its endeavours to please. A new comedy, by Mr. F. C. Burnand, was produced on Saturday, called "Artful Cards." It is founded on "La Clé," by M. Labiche and Durn, but is throughout Anglicised. The action takes place in the villa of Mr. Robert Spicer Rumford (Mr. Toole), in the Avenue-road, St. John's-wood, where we find a Miss Dora Stuart (Miss Hazleton) has brought herself into trouble and peril by an impulsive correspondence with a swindler (a so-called Polish Prince), who demands a hundred pounds from her as the price of surrendering her letters. The lady has, in fact, a new object, one Sir Harecutt Shortleigh (Mr. Bishop), and is favourably disposed to the Baronet's advances. Meanwhile room has been made for Mr. Toole's comedy as Mr. Rumford, who is kept short of cash by his moneyed wife, and is inclined to raise the wind by any farcical expedient which may provoke the audience to laughter. He is visited by his nephew, Fred Flutter (Mr. Westland), a barrister, engaged to defend a Polish Countess from a charge of swindling, and who is somewhat too much fascinated with his client, the Countess Asteriski (Miss Henderson), and has been invited by the lady to a reception at her apartments. The nephew and uncle pay the visit together. At her apartments we meet with the Polish Prince himself and other similar imposters, a pretended German Baron included. Here Rumford is seduced into card-playing, to his great loss. But Sir Harecutt is on the scene, watchful in the interests of Miss Stuart, and is in possession of a forged bill by the pretended prince, by means of which he compels the latter to surrender the lady's letters and the hundred pounds. Hereupon a cry of "Police!" and a strange transformation scene. The gambling-table changes to a grand pianoforte; musical instruments are thrust into the hands of the guests, and all takes the appearance of a concert, in which Mr. Toole is the chief comic performer; and so the mystified police are fain to retire. Some trifling intercalary incidents follow, which we must leave uncited. We gladly return to Rumfold Villa, St. John's-wood, where we meet Mrs. Rumford, perplexed in the extreme at her husband's sudden appearance in another man's ulster coat and hat—a curious phenomenon soon explained by Sir Harecutt and Fred Flutter, who follow. The former presents Miss Stuart with her epistles and money, which, with himself, she is pleased to accept; and Mrs. Rumford promising to make in future her husband a more liberal allowance brings down the curtain with satisfaction. Mr. Hollingshead has evidently scored a considerable success by the production of the new comedy.

THE STRAND.

Mr. Tom Taylor's three-act comedy, "Babes in the Wood," produced at the Haymarket Theatre in November, 1860, under the management of Mr. Buckstone, has now, with certain amendments and curtailments, and re-christened "Babes and Beetles," been revived at this theatre. The original cast included the names of Mr. W. Farren, Mr. Chippendale, Mr. Buckstone, and Miss Amy Sedgwick. The comedy contains some sparkling dialogue and effective situations. The story is somewhat complex, and deals with the pecuniary embarrassments of a pair of "turtle doves," who have broken loose from parental authority, and, without consulting the wishes of "papas" and "step-mamas," have taken upon themselves matrimonial responsibilities. The parents withdraw their allowance from their contumacious offspring, thereby reducing the newly-married couple to some humiliating straits. The first act presents them as the inmates of a lodging-house kept by Mr. and Mrs. Beetle. Here they speedily discover that "kisses" without the customary allotment of "bread and cheese," though unquestionably good things in their way, are somewhat unsubstantial fare, and altogether inadequate to the support of animal existence. The gentleman's proposition of a Civil Service appointment proving untenable, they fly to the advertisement sheet of the *Times*, where they are confronted by the following startling announcement:—"A competency of from £4 to £6 a week guaranteed by return of post on receipt of six postage stamps." The dream of this golden harvest is soon dispelled by Beetle, who explains it to mean nothing more or less than "baked taters," informing them that he has invested twelve stamps in that speculation himself. Reduced to extremity, and having previously received from Mrs. Beetle a learned disquisition on the meaning of the term "up the spout," the lady pledges, unknown to her husband, a diamond ring for the sum of fifty pounds, surreptitiously making use of the name of Mrs. Beetle in the transaction. The subsequent loss of the pawn-ticket, and its discovery by George Loosetrife, bring about some complications, and Mr. and Mrs. Beetle mutually accuse each other of feloniously pawning the ring. We shall not go into the details of the story. Suffice it that the third act effects a reconciliation between the parties. The piece has been produced as a vehicle for the display of the eccentric humour of Mr. J. S. Clarke, who appears as the henpecked husband, Jeremiah Beetle, and by his strange gestures and facial expression keeps the audience in a perpetual titter. Immensely droll is his sudden change of manner, when he discovers that the suspected thief he has so unceremoniously collared and is hurrying away into the policeman's gripe, is no less a personage than the illustrious Lord Lazenby. Equally absurd is his assumption of terror under the invectives and imperious mandates of his tyrannical better half. In every phase of the character the actor is inimitable. Miss Lottie Venne deserves high commendation for her very pleasing rendering of Lady Blanche Rushton, and Mr. W. H. Vernon as Frank Rushton makes the most of the materials at his command. Mr. H. J. Turner is exceedingly effective as Lord Lazenby. The other characters are adequately filled.

A new drama, entitled "Cora," by Mr. G. Wills and Frank Marshall, and the main incidents of which have been taken

from Adolphe Belot's "L'Article 47," was produced at the Globe on Wednesday last. The title-role is supported by Mrs. Hermann Vezin, who announces her departure for America and Australia. We shall give an account of the performance in our next issue.

At the Surrey, on Saturday, the second edition of Mr. F. Green's successful pantomime of "Jack and Jill" started under very favourable circumstances, if one may judge from the crowded state of the house and the acclamations awarded to the many new songs, dances, music, and scenes which have been introduced.

Miss Bella Pateman will shortly reappear at the Olympic Theatre in the character of Lady Amyott in Mr. Lovell's popular play of "The Wife's Secret," the occasion being for the benefit of Mr. Henry Neville, who will sustain the rôle of Sir Walter Amyott. A drama entitled "The Scuttled Ship," by Mr. Charles Reade, is also in preparation, in which Miss Pateman will enact the heroine. It is stated that Mrs. Seymour will return to the stage in this production.

A performance of Sophocles' "Antigone," with the whole of Mendelssohn's accompaniments, is announced to take place on March 10, at the Royal Academy of Music. The play will be recited by Mr. Ryder and Miss Evelyn, the musical portion being under the direction of Mr. Alfred Gilbert.

Mr. Marlande Clarke lectured at the Quebec Institute, last Thursday, on "Macbeth," and gave a dramatic interpretation of the principal scenes.

A musical and dramatic entertainment is to be given to-day at St. George's Hall, under the patronage of the Marchioness of Lorne and others, in aid of the Caledonian Asylum.

MUSICAL PUBLICATIONS.

"Lowly born" is a song written and composed by the Hon. Mrs. Norton, who has associated a melody of a very marked character with some smoothly-written lines. This is published by Messrs. Chappell and Co., who have also issued "Be strong to Hope," by George Fox, and "Time and the Stream," by Edwin Harper, two very effective songs; and a clever fantasia for the pianoforte, by Mr. Kuhe, on airs from Mr. Arthur Sullivan's "Trial by Jury." Some bright dance pieces, in different forms, have also been lately published by Messrs. Chappell and Co. These include Signor Ardit's waltzes, "Les Belles Viennoises" (so successfully given during the last season of Promenade Concerts); "Trial by Jury" waltzes, by Charles D'Albert (arranged from themes by Mr. Arthur Sullivan); "Chants de l'Aube," and "Le Message des Fleurs," waltzes, by Georges Lamothe; and "Au Revoir," valse, by E. Waldteufel.

"May he ne'er have the chance again" is a song, the words of which are by Dr. Charles Mackay, and the music by Minnie Mackay. The lines are characteristic and vigorous, and the music is in good keeping therewith, the piece altogether—with its choral refrain—affording scope for declamatory effect. It is published by Messrs. Boosey and Co.

"Madame Patey's Classical Song-Book" (E. O. Boosey and Co.) is a collection of thirteen vocal pieces, of different styles and periods, as sung by our excellent contralto, who has edited them, with directions as to expression, phrasing, and respiration. Here is an ample return for the price—one shilling.

"The Knight's Shield," ballad, and "Sunset on the River," song, both by Ciro Pinsuti, are pleasing vocal pieces, by one who knows well how to write effectively without unduly taxing the powers of the singer. These are published by Messrs. R. Cocks and Co.; as also is "Winter Moonlight," a telling song, by Lynette Foster.

Messrs. Cocks and Co. have likewise issued some useful pianoforte adaptations by Mr. G. F. West, including Mozart's overture to "La Clemenza di Tito," arranged as a duet, and "Half Hours with the Oratorios," a series of extracts from the sacred works of the great masters, adapted for one performer on the pianoforte. Mr. West has also edited a new issue of Theodor Oesten's "First Lessons for the Pianoforte," a compendious and useful code of elementary instructions for young students of that instrument. "L'Hycinthe" is a pleasing bagatelle for the pianoforte, by Frederick Lemoine, likewise published by Messrs. Cocks, as are two easy but effective transcriptions by Maurice Lee—a gavotte by Bach, and a menuet from a symphony by Haydn.

Two transcriptions for pianoforte solo, by Mr. Henry Parker—"The First Leaf" and "Silver Threads among the Clouds"—may be commended for the brilliant and effective passage writing which they contain. Messrs. Metzler and Co. are the publishers, as also of "The Doll's Minuet," a characteristic little pianoforte piece, by Cotsford Dick, and "The Fairy Basket," a children's quadrille, by H. Parker, on popular airs.

Messrs. Stanley Lucas, Weber, and Co., are issuing a series of Anton Rubinstein's vocal duets. Some of these highly characteristic pieces have more than once been spoken of in reference to their concert performance, and the opportunity now presented of obtaining them, separately, with German and English words, will be widely welcomed.

The Education Code for the present year, as modified by the Committee of Council, was issued on Tuesday.

The Official Trustees of Charitable Funds report that they hold upwards of £7,000,000 stock in the Government public funds, the property of various charities.

A breakfast, at which many members of Parliament and other advocates of religious quality were present, took place, on Tuesday, at the City Terminus Hotel, Mr. Joseph Cowen, M.P., presiding. Mr. Osborne Morgan, M.P., Mr. Richard, M.P., and Mr. Goldwin Smith were among the speakers.

The fusion scheme of the South-Eastern and the London, Chatham, and Dover Railway Companies has come to an end. The petition for leave to introduce the bill to give effect to the arrangement between the companies was thrown out, on Tuesday, by the Standing Order Committee of the House of Commons, on the ground that the standing orders had not been complied with.

A deputation from towns upon the Thames, on Monday, waited upon Mr. Cross and Mr. Selater-Booth, and urged the Government to undertake an investigation into the causes of the disastrous floods which have of late years periodically occurred in the Thames Valley, with a view to the adoption of some means for their prevention. The Home Secretary promised to give the matter his best attention, and to discuss it with his colleagues.

A meeting of the East African Slave Trade Committee was held, on Tuesday, at the House of Baroness Burdett-Coutts, the Archbishop of Canterbury presiding. After the general business of the meeting had been transacted, a discussion followed, in which Colonel Grant, Mr. Murray, and other speakers took part, on the subject of the schemes of annexation attributed to the Khedive in connection with Colonel Gordon's expedition, and a sub-committee was appointed to draw up a memorial to the Foreign Office on the subject.

CHESS.

TO CORRESPONDENTS.

All communications relating to this department of the Paper should be addressed to the Editor, and have the word "Chess" written on the envelope.

G L de B (Horseshoe).—The problem, although correct, is lacking, we regret to say, in point and variety. We should be glad to be favoured with some of your future efforts.

W T P (Rushampton).—The three-move problem sent last year shall have early publication. You shall have a report on the latest one received next week.

A CORRESPONDENT.—You will find an excellent treatise on the King's Gambit in Wormald's "Chess Openings."

T L (Sandwich).—The best reply is 2. P to Q 4th, which produces a variation favourable to the second player. Perhaps the statement here of your wish to meet with an adversary in your locality may produce a response from some of our readers.

J B (Brough).—The letters are not preserved. Should occasion offer we will bear your request in mind.

E J H (Wood-street).—Our answer to Problem No. 1719 was B to Q sq.

GOLLY.—The Pawn that moves two squares can never capture anything on passant. Any elementary treatise upon the game will inform you fully upon this peculiar privilege of the Pawn.

A J C (Regent's Park).—All the games in the match referred to were published in the Westminster Papers. Nowhere else, so far as we are aware.

A N B.—The problem is curiously old, and even hackneyed in idea. Let us hear from you with something original.

A F P (Thirsk).—No. 1 is too weak, and No. 2, though not without point, admits of a significant dual mate. We shall be glad to hear from you again.

ESQUIVIA.—Describe the pieces on the blank diagrams, as W K for White King, B Kt for Black Knight, &c.

W L.—Thanks for your prompt compliance with our request. No. 1 shall have early publication.

F E J (Hatham).—You can procure any modern work on chess through W. W. Morgan, 67, Barbican, London. There are several monthly chess publications, all to be obtained at the same place.

A E T (Lincoln).—1. Wormald's "Chess Openings." 2. No special forms are required for setting forth the solutions. Let your meaning be clear, and you need not be concerned about the form or expression.

CORRECT SOLUTIONS OF PROBLEM No. 1721 received from Jane N. H. Beutmann, Una, A. Barrow, W. P. Payne, Olive Crook, Dolly, C. E. O'Connell, G. H. V. E. H. H. V. Cercle de l'Union à St. Etienne, and Tredunnock.

CORRECT SOLUTIONS OF PROBLEM No. 1722 received from H. W. Trenchard, Harrogate, J. de Houteyn, Simplex, Dolly, B. Roushead, H. B. J. Williams, East Marden, J. Wootton, Florence, E. Worsley, W. P. Payne, H. Burgher, X. V. I. L. Long, St. Olave, Croy, L. Onore and Le. Woolwich Chess Club, E. T. King, E. N. Wyatt, S. Western, R. S. Frederic, Only Jones, Coplinton, W. Alston, O. E. Trilcon, Cant, B. B. Stone, W. Lesson, A. Wood, W. Nelson, D. apers, Colless, L. S. R. Owlet, Mechanic, E. L. G. Black Knight, D. H. American, Jane N. Tippet, W. B. J. S. W. R. H. Brooks, T. B. Y. H. M. Pridmore, W. Lee, E. H. H. V. G. H. V. Paul's Root, M. ggle Irwin, X. O. N. T. V. W. P. Myers, Zavis, H. Beutmann, W. V. G. D. E. P. Vulliamy, E. Frau, Lex, Cercle de l'Union à St. Etienne, and T. Leitchford.

* We regret that in the game between Messrs. Ranken and Skipworth, published in our issue of the 17th ult., there was a move on both sides omitted from the text. The error occurred after the seventh move, and the moves omitted are 8. P takes P, Kt takes P.

SOLUTION OF PROBLEM No. 1722.

WHITE. BLACK. WHITE. BLACK.
1. K takes P Kt to Q 5th* 3. Q mates
2. Kt to B 7th (ch) K moves
* White's play varies according to the moves of the Black Kts, but the continuation should be obvious to the student.

PROBLEM No. 1724.

By H. E. KIDSON.

BLACK.

WHITE.

White to play, and mate in three moves.

THE ST. GEORGE'S CHESS CLUB.

The following well-fought game occurred in the Tourney, at the St. George's Chess Club, between Professor WATTE and Dr. BALLARD.—(Scott's Gambit.)

WHITE (Prof. W.) BLACK (Dr. B.)
1. P to K 4th P to K 4th
2. Kt to K B 3rd Kt to Q B 3rd
3. P to Q 4th P takes P
4. Kt takes P Q to K B 3rd

Scarcely so good, in our judgment, as the ordinary move, 8. B to B 4th.

5. Kt to Kt 3rd
The force of this reply, which shuts out the Kt from the open field, is sufficient evidence of the inferiority of Black's last move.

6. Kt to B 3rd Kt to K 2nd
7. B to K 2nd P to Q 3rd
8. Castles P to Q 3rd
9. Kt to Q 5th B to K 3rd

10. P takes B B takes Kt
11. P to K B 4th Kt to K 4th
12. P to Q B 3rd Kt to Kt 3rd
13. B to B 3rd Castles
14. B to K 3rd Kt to B 4th
15. B takes Kt P takes B
16. Q to Q 3rd P to Kt 3rd
17. B to Kt 4th P to Kt 2nd
18. Kt to Q 4th P to KR 4th
19. B takes Kt (ch) P takes B
20. Q takes P (ch)

If 9. P to K B 4th, Black can play 9. B takes Kt, and 10. Q to Q 5th (ch), forcing the exchange of Queens.

21. P takes B B takes Kt
22. Kt to K 4th Kt to K 4th
23. P to Q B 3rd Kt to Kt 3rd
24. B to B 3rd Castles
25. B to K 3rd Kt to B 4th
26. B takes Kt P takes B
27. Q to Q 3rd P to Kt 3rd
28. Kt to Q 4th P to KR 4th
29. B takes Kt (ch) P takes B
30. Q takes P (ch)

Although White wins a Pawn here, the sacrifice of Queens is slightly to Black's advantage. White probably considered that if he played 20. Kt takes P, Black could obtain a smart attack on the open Kt's file; and we are disposed to agree with him.

31. Kt takes Q Q takes Q
32. Q Kt to K sq B to K 3rd
33. Q Kt to K sq K to Q 2nd

34. K to K 4th, And the game was abandoned as drawn.

CHESS BY CORRESPONDENCE.

An amusing affair played recently between Messrs. T. BOURN and H. BREWER.—(Hampes Opening.)

WHITE (Mr. B.) BLACK (Mr. H. B.)
1. P to K 4th P to K 4th
2. Kt to Q B 3rd Kt to K B 3rd
3. P to K B 4th P to Q 4th
4. P to Q 3rd P to Q 5th

This is, perhaps, the weakest continuation Black can adopt. It breaks up his centre, whether White replies as in the text or with the stronger move 5. Kt to K 2nd.

5. P takes P P takes Kt
6. P takes Kt Q takes B P
7. P takes P B to Q Kt 5th
8. R to Q Kt sq B takes P (ch)
9. B to Q 2nd B to Q 5th
10. Kt to K B 3rd B to Kt 5th
11. R to K 2nd B takes Kt
12. B takes B Kt to Q 2nd
13. Q to Q B sq Kt to K 4th

and Black resigned.

OBITUARY OF EMINENT PERSONS.

THE DOWAGER VISCOUNTESS MOUNTMORRES.

The Right Hon. Sarah, Dowager Viscountess Mountmorres, who died recently, was the daughter of William Shaw, Esq., of Temple Hill. Her Ladyship was married, July 5, 1831, to the Very Rev. Hervey, fourth Viscount Mountmorres, Dean of Achonry, and had four sons, of whom the eldest is the present Viscount Mountmorres, and two daughters. She was left a widow Jan. 23, 1872.

The deaths are also announced of—

Colonel Frederick Hammond, on the 19th ult., at Lauriston House, Dover, aged seventy-seven.

The Rev. James Ford, late Prebendary of Exeter Cathedral, on the 18th ult., in his eightieth year.

The Rev. J. M. Martine, D.D., Rector of Edbaston, Sussex, on the 21st ult., aged sixty-one.

Renric Edward Arundell, Esq., late of 60, Mount-street, Grosvenor-square, on the 21st ult., aged seventy-one.

James Rait, Esq., of Anniston House, Forfarshire, J.P. and D.L., late Captain 15th Hussars, on the 22nd ult., aged seventy-two.

Mr. John Oxenford, a well-known dramatic critic and author of popular plays, a ripe scholar and a deep thinker, on the 21st ult., in his sixty-fifth year.

Captain Henry Cowper, late 7th (King's German Legion), and subsequently H.M. Consul at Pernambuco and Carthage, on the 21st ult., in his ninetieth year.

Major Henry Newsham Pedder, late of 5, St. Alban's-road, Kensington, and formerly of The Old Bank, Preston, Lancashire, on the 4th ult., at Versailles.

Robert Whitworth, Esq., Barrister-at-Law, of the Inner Temple, late of 5, Old-square, Lincoln's Inn, and The Knowle, Upper Norwood, on the 11th ult., aged sixty-three.

Catharine Frances, Dowager Lady Cuyler, widow of Major-General Sir Charles Cuyler, Bart., and daughter of the Rev. Fitzwilliam Halifax, Rector of Richard's Castle, on the 18th ult., aged seventy-two.

Lord George Charles Gordon Lennox, brother of the Duke of Richmond and Gordon. He was born in 1829, was in the Horse Guards from 1846 to 1853, and was M.P. for Lymington from 1860 to 1874.

The Hon. Mrs. Seymour Bathurst, widow of the Hon. Thomas Seymour Bathurst (brother of the present Earl Bathurst), and daughter of John Peter Hankey, Esq., on the 21st ult., in her seventy-ninth year.

Augustus Henry Bosanquet, Esq., of Osidge, Southgate (second son of William Bosanquet, banker, of London, of the family of Bosanquet of Broxbourne, Herts), on the 19th ult., in his eighty-fifth year.

WILLS AND BEQUESTS.

The will and four codicils, dated May 4, 1872, April 2, 1873, Feb. 2 and June 18, 1874, and July 24, 1875, of the Right Hon. William Constable Maxwell, Lord Herries, late of Everingham Park, Yorkshire, who died on Nov. 12 last, at Thomas's Hotel, Berkeley-square, were proved on Jan. 29 last by the Right Hon. Marmaduke Constable Maxwell, Baron Herries, and the Hon. William Constable Maxwell, the sons, the executors, the personal estate being sworn under £70,000. The testator bequeaths to his wife, Marcia, Lady Herries, certain furniture, plate, horses, and carriages, and £2000; to each of his domestic servants who have been five years in his service one year's wages; and he directs £100 to be laid out by his executors at their discretion in masses or works of charity; out of the residue of his personalty the portions of such of his daughters as have become nuns are to be made up to £1000, and such of his sons as have become priests up to £1500, and the remainder is to be divided between his younger children. All his real estate testator gives to his eldest son, the present peer.

The will, dated Dec. 18, 1875, of Mr. Thomas Brandon, late of Brondesbury Park, Willesden-lane, and of Oxford-street, artificial flower maker, who died on Jan. 6 last, was proved on the 6th ult. by Richard Michell, Alfred Brandon, the son, and Chester Foulsham, the executors, the personal estate being sworn under £140,000. The testator bequeaths to his assistant, John Meadows, £1000; to his executors, £100 each; and a few other legacies. The rest of his property of every description he divides equally among his ten children.

The will, with one codicil, dated Dec. 1 and 2, 1876, of Mr. William Hall, late of Syndale, near Faversham, Kent, gunpowder manufacturer, who died on Dec. 13 last, at Hastings, was proved, on the 14th ult., by William Thomas Townend Hall, the son, Charles Wheler Wheler, and Colonel Stephen Percy Groves, the acting executors, the personal estate being sworn under £100,000. The testator leaves to his wife, Mrs. Elizabeth Shepherd Hall, £3000 per annum, his mansion house, Syndale, with the land convenient to be held with the same, and certain brickmaking royalties, for life; he also leaves her absolutely his plate, pictures, furniture, horses, carriages, and effects, and a wharf, with tramway, &c.; to his daughter Mrs. Elizabeth Townend Wheler, £30,000; to his said son and his daughter Miss Blanche Mary Townend Hall, £25,000 each; to Richard Watson Smith, £100; to Colonel Groves, £50; and the residue of his property, real and personal, to his son.

The will and two codicils, dated June 22, 1870, Aug. 1, 1873, and Nov. 27, 1875, of Mr. John Skynner Bailey, late of The Priory, Croydon, who died on Jan. 15 last, were proved on the 3rd ult. by John Carington Little, Alfred Carpenter, M.D., and Jephtha Pacey, the executors, the personal estate being sworn under £40,000. The testator bequeaths to the trustees of the municipal charities of the borough of Boston, Lincolnshire, £3000, the interest dividends and annual produce of which are to be applied by them annually for the benefit of six poor men of the age of sixty and six poor widows of the age of fifty, residing in Boston and not receiving parochial relief; to the Bluecoat School at Boston, £2000; and to the Public Hospital at Croydon, of which he was a subscriber, £500.

The will, dated Aug. 23, 1853, of Mr. William Sproston Caine, formerly of Liverpool, and late of Littlewick House, Maidenhead, who died on Dec. 23 last, was proved on the 2nd ult. by Miss Fanny Caine, the sister, the acting executrix, the personal estate being sworn under £25,000.

The will of the late Captain Walmesley, of Westwood Hall, Wigan, who died on Feb. 2, 1877, has been proved at the Principal Registry under the nominal sum of £25,000.

The Grocers' Company have granted £100, and the Goldsmiths' Company £50, in aid of the funds of the Society of Friends of Foreigners in Distress. The Drapers' Company have sent twenty guineas, and the Clothworkers' Company ten guineas, to the Cabdrivers' Benevolent Association, 15, Soho-square, as contributions to the building fund of the Cabmen's Home. "O. S." has given £20 to St. John's Hospital for Diseases of the Skin.

London: Printed and Published at the Office, 129, Strand, in the Parish of St. Clement Danes, in the county of Middlesex, by GEORGE C. LEIGHTON, 129, Strand, aforesaid.—BACCHUS.

THE CARNIVAL AT ATHENS: AGAMEMNON THE MORNING AFTER THE CARNIVAL.
FROM A SKETCH BY OUR SPECIAL ARTIST.

BIRTHS.

On the 28th ult., at Potterton Hall, Yorkshire, the wife of Bathurst Edward Wilkinson, Esq., of a son.

On the 23rd ult., at the Consular residence, Civita Vecchia, Italy, the wife of John T. Lowe, Esq., her Majesty's Consul at that port, of a daughter (Oda Emily Russell).

On the 4th inst., at Luptons, Brentwood, Essex, Lady William Phipps, of a daughter.

On the 7th inst., at 64, Gloucester-place, Portman square, the Hon. Mrs. Charles E. Barnett, of a son.

MARRIAGES.

On the 1st inst., at Montreal, Captain Housoun-Boswell, to Phoebe, daughter of Sir Hugh Allan.

On the 6th inst., at St. George's, Hanover-square, Sir Owen Henry Scoville, Bart., of The Most and Williamson, Pembroke-shire, to Gertrude Katherine, only daughter of the late Seymour Phillips Allen, Esq., of Caversham, in the same county, formerly of the 1st Life Guards, and niece of the Earl of Portsmouth.

DEATHS.

On the 6th inst., at South Kensington, Mary Ann, the beloved wife of Sir George Campbell Anderson.

On the 2nd inst., Jane, the beloved wife of E. W. Brydges Willmams, Esq., of Carnanton, Cornwall, and second daughter of the late Sir Trevor Wheeler, Bart., of Leamington, Hastings, Warwickshire.

On the 23rd ult., at 50, Welbeck-street, Cavendish-square, T. Talbot Perry, F.S.A., V.P.R.I.B.A., aged 65. Friends will kindly accept this intimation.

. The charge for the insertion of Births, Marriages, or Deaths is Five Shillings for each announcement.

CALENDAR FOR THE WEEK ENDING MARCH 17.

SUNDAY, MARCH 11.

Fourth Sunday in Lent. Midlent Sunday.
St. Paul's Cathedral, 10.30 a.m., Rev. Prebendary Cadman; 3.15 p.m., Rev. Canon Gregory; 7 p.m., Rev. Dr. Baker, Head Master of Merchant Taylors' School.

Geologists' Association, visit to the British Museum, 2.30 p.m. (director, Professor Owen).

THE ILLUSTRATED LONDON NEWS FOR FOREIGN PARTS.

Subscribers to the ILLUSTRATED LONDON NEWS who live abroad are particularly desired to order copies of the ordinary stout paper edition, as in those printed on thin paper for foreign postage the appearance of the Engravings is greatly injured on account of the print at the back showing through. The postage of the ILLUSTRATED LONDON NEWS printed on stout paper is double that of the thin paper edition for places abroad.

Office, 198, Strand, W.C.

Stalls and Front Row of Bal

a thorough, radical, and complete return to the principles and practices of the founders of the Republic. It was not a partisan service that they expected or desired, but a service the officers of which should be secure in their tenure as long as their personal character remained untarnished and the performance of their duties was satisfactory. This he took to be an expression of the united voice and will of the whole country, to which both political parties had virtually pledged themselves to give unreserved support. In furtherance of this reform he recommended an amendment to the Constitution, "prescribing a term of six years for the Presidential office and forbidding re-election."

Touching the Financial condition and policy of the country, he remarked that the depression in all its varied commercial and manufacturing interests, which began in September, 1873, continues; but there were indications all around them of a coming change to prosperous times. In the fluctuation of values lay one of the greatest obstacles to a return of prosperity, the only safe paper currency being one which rests upon a coin basis and is at all times promptly convertible into coin. He expressed his firm adherence to the views which he had often previously urged, "that uncertainty is inseparable from an irredeemable paper currency," and he declared himself in favour of Congressional Legislation in behalf of an early resumption of specie payments, satisfied not only that this was wise, but was demanded by the interest as well as the public sentiment of the country.

As to International relations, he intended to follow the policy inaugurated by General Grant, "of submitting to arbitration grave questions in dispute between ourselves and Foreign Powers—a new and incomparably the best instrumentality," he observed, "for the preservation of peace, and which would," he believed, "become a beneficent example of the course to be pursued in similar emergencies by other nations." The Address, as we have already intimated, was marked by great earnestness of tone, and has been well received by both the great political parties. It remains only to be seen how far the acts of the new President will correspond with the professions he has put forth. Should he be able, as we are sure he must be willing, to call to his councils men like-minded with himself, he will not only find, but will utilize, an almost unprecedented opportunity of signalling the term of his Presidency by a course of beneficent as well as brilliant administration.

THE COURT.

The Queen, accompanied by Princess Beatrice and Prince Leopold, came to London on Thursday week from Osborne. Her Majesty arrived by special train at Victoria station, whence she drove escorted by a detachment of the 1st Life Guards to Buckingham Palace. The Queen visited the Princess of Wales at Marlborough House, and the Duchess of Cambridge at St. James's Palace. Princess Beatrice visited the Dean of Westminster at the Deanery. Her Royal Highness, accompanied by the Misses Victoria and Mary Gray, went to the Vaudeville Theatre. Her Majesty's dinner party included Princess Louise of Lorne, Prince Leopold, Count and Countess Gleichen, the Marquis of Lorne, the Countess of Erroll, and Mr. Theodore Martin.

The Queen and Princess Beatrice visited the Duke of Cambridge at Gloucester House yesterday week. Her Majesty held a Court and Drawingroom, as described below. The Very Rev. the Dean of Westminster, and Mrs. and Miss Drummond, of Megginch, dined with the Queen. Princess Beatrice visited the Princess of Wales at Marlborough House, and in the evening went to the Olympic Theatre.

Her Majesty gave an audience to the Earl of Beaconsfield on Saturday last. Princess Beatrice visited the Royal Academy, Burlington House, and Doré Gallery, New Bond-street. The Queen and the Princess, with Prince Leopold, left Buckingham Palace upon their return to Windsor. Her Majesty drove, escorted by a detachment of the 1st Life Guards to Paddington station, whence she travelled by special train to Windsor, arriving at the castle at half-past five p.m.

The Queen, Princess Beatrice, and Prince Leopold attended Divine service, on Sunday, in the private chapel of the castle. The Rev. G. G. Bradley, Master of University College, Oxford, officiated. Lieutenant-General Sir T. M. and the Hon. Lady Biddulph dined with her Majesty.

The Queen granted an interview, on Monday, to the Rev. Josiah Henson, known as Uncle Tom in Mrs. Beecher Stowe's novel of "Uncle Tom's Cabin," when her Majesty presented him with her photograph, framed.

The Right Hon. Sir Bartle Frere dined with the Queen on Tuesday.

Mrs. Thorneycroft has submitted to the Queen the bust of the Duchess of Edinburgh, executed for her Majesty.

The Hon. Frances Drummond has succeeded the Hon. Caroline Cavendish, and, with the Hon. Emily Cathcart, has arrived at the castle as Maid of Honour in Waiting. Lord Elphinstone and Lord Frederic Kerr have arrived as Lord and Groom in Waiting; and Lieutenant-General Viscount Bridport and Colonel McNeill, V.C., C.B., have succeeded Major-General Lord Charles Fitzroy and Colonel L. Gardiner as Equerries in Waiting.

The Queen will hold a Levée on Monday next and a Drawingroom on Wednesday next, at Buckingham Palace.

THE QUEEN'S COURT AND DRAWINGROOM.

The Queen held a Court and a Drawingroom at Buckingham Palace yesterday week. The Prince of Wales, Princess Louise of Lorne, Princess Beatrice, Prince Christian of Schleswig-Holstein, and the Duke of Teck were present. Previously to the holding of the Court General Viscount Templeton, K.C.B., was introduced, and kissed hands on his appointment as Gold Stick, receiving at the same time from her Majesty the gold stick of office. The Gentlemen-at-Arms and the Yeomen of the Guard were on duty in the state saloons, and a guard of honour of the Scots Fusilier Guards with the band of the regiment was in attendance. The Queen, accompanied by the Prince of Wales, Princess Louise of Lorne, Princess Beatrice, and the other members of the Royal family, entered the Throne-Room shortly after three o'clock, attended by the Duchess of Wellington, the ladies of her suite in waiting, and the officers of the Royal household.

The Queen wore a black silk dress with a train, trimmed with sable and crape, and a long white tulle veil, surmounted by a coronet of diamonds. Her Majesty also wore a necklace, brooches, and earrings of diamonds, the ribbon and star of the Order of the Garter, the orders of Victoria and Albert, Louise of Prussia, St. Katherine of Russia, St. Isabel of Portugal, &c., and the Saxe-Coburg and Gotha family order.

Princess Beatrice wore a dress and train of mauve poul-de-soie, trimmed with Neapolitan violets. Head-dress, feathers and veil. Ornaments, pearls and emeralds. Orders, the ribbon and star of St. Katherine of Russia, the Victoria and Albert order, and the Coburg and Gotha family order.

The diplomatic circle, in which several presentations took place, was attended by the principal members of the corps, with the ladies of their respective families. In the general circle about 150 presentations were made to the Queen.

THE PRINCE AND PRINCESS OF WALES.

The Prince of Wales returned to Marlborough House yesterday week from visiting the Earl and Countess of Shannon at Cirencester. His Royal Highness visited Prince Leopold at Buckingham Palace, and attended the Court. Princess Louise of Lorne and Princess Beatrice visited the Princess of Wales. The Prince dined with Captain the Earl of Shrewsbury and the officers of the Hon. Corps of Gentlemen-at-Arms at St. James's Palace. Prince Leopold visited the Prince and Princess at Marlborough House on Saturday. The Prince dined with Viscount and Viscountess Holmesdale at their residence in Belgrave-square. On Monday his Royal Highness presided at a dinner in aid of the funds of the Orphan Working School and Alexandra Orphanage at Willis's Rooms. The Prince and Princess went to the Strand Theatre on Tuesday. His Royal Highness, as President, attended a meeting of the governors of Wellington College, held at the Palace of Westminster on Wednesday. The Duke of Cambridge visited the Prince and Princess and remained to luncheon. The Prince left Marlborough House for Melton Mowbray.

The Countess of Morton has succeeded Lady Emily Kingscote in waiting on the Princess; and Lieutenant-Colonel Ellis has succeeded Major-General Sir D. Probyn in waiting on the Prince.

The Prince of Wales honoured Mr. F. Sargent recently with an interview at Marlborough House, for the purpose of inspecting his painting of the interior of the House of Lords (1876), now completed; and his Royal Highness's expression of approval was accompanied by permission to place his name on the list of subscribers. A specimen copy of the first part of an Illustrated Peerage, composed from sketches for which special sittings were given to Mr. Sargent, accompanied by memoirs from the pen of Mr. John Saunders, was also submitted to the Prince, whose favourable recognition and patronage were accorded to the work.

The Duke of Connaught has rejoined his regiment in Dublin, after visiting the Marquis and Marchioness of Ormonde at Kilkenny. The Duke was entertained at a banquet given by the Lord Lieutenant at Dublin Castle, on Saturday last, and was afterwards present at the investiture of the Duke of Manchester as a Knight of St. Patrick. The ribbon which has been conferred on the new Knight was placed at the disposal of the Crown by the death of the Marquis of Conyngham, who had worn it forty-three years.

The Duchess of Sutherland and Lady Beatrice Leveson-Gower have returned to Stafford House, from Torquay.

The Duke and Duchess of Leeds have left town for Gog-Magog Hills, Cambridge.

The Marchioness d'Harcourt and Mdlles. d'Harcourt left Albert-gate House, on Saturday last, for Paris.

The Marquis and Marchioness of Bristol and Lady Mary Hervey have left St. James's-square for Ickworth Park.

The Marquis and Marchioness of Headfort and Lady Adelaide Taylour have left Grafton-street for Headfort House, Kells, Ireland.

Marquis Conyngham, with the Earl of Mountcharles, has arrived in his yacht at Malta from Gibraltar.

The Earl and Countess of Verulam have arrived in town from Gorbunbury, St. Albans.

Earl and Countess Fitzwilliam and Ladies Fitzwilliam have arrived at Cannes.

The Earl and Countess of Effingham have arrived at their residence in Eaton-place from Tusmore House, Bicester.

The Earl and Countess of Cork have left town for The Castle, Dublin, on a visit to the Lord Lieutenant of Ireland and the Duchess of Marlborough.

The Countess of Caledon and Lady Jane Alexander have arrived at Carlton House-terrace from Ireland.

FASHIONABLE MARRIAGES.

The marriage of Lady Theodora Grosvenor with Mr. Merthyr Guest was celebrated, on Thursday morning, at the parish church of Motcombe, near Shaftesbury. The bride was given away by her brother, the Duke of Westminster.

Marriages are arranged between the Hon. Arthur E. C. Cole, second son of the Earl of Enniskillen, and Miss Adelaide Blackwood, youngest daughter of Mr. James Blackwood; between Mr. W. Hargrave-Pawson, late 12th Royal Lancers, only son of Mr. Pawson, of Shawdon, Northumberland, and the Hon. Violet Jervis, youngest daughter of Viscount St. Vincent; between Mr. Walter Farquhar, second son of Sir Walter and Lady Mary Farquhar, and Miss Bateson, daughter of Sir Thomas Bateson, M.P., and the Hon. Lady Bateson; and between Major-General Clifton, late Equerry to the Duke of Cambridge, and Lady Cosmo Russell, widow of Lord Cosmo G. Russell, son of the sixth Duke of Bedford.

The picture of Scotch scenery painted by Mr. Millais, R.A., last autumn, has, we believe, passed into the hands of a well-known collector of modern high-class works, for 3000 guineas.

Lord Beaconsfield has offered a gift of £300 to the widow of Walter Thornbury, with expressions of regret that he is unable to confer a pension out of the Civil List, in accordance with the request made to him.

The Bristol Town Council decided, on Wednesday, by a majority of twenty to thirteen, to buy the Bristol Waterworks, guaranteeing the preference shareholders, and undertaking to give the ordinary shareholders 10 per cent in perpetuity.

The Grand Lodge of English Freemasons has, without discussion, confirmed the grant of £4000 to the Royal National Life-Boat Institution for the purpose of founding two life-boat stations as a memorial of the thankfulness of the craft at his Royal Highness's safe return from India.

Mr. John Pope Hennessy, Governor of Hong-Kong, was waited upon last Saturday, at the Imperial Hotel, Cork, by the Mayor and a deputation, representing the Corporation and citizens of Cork, who presented him with the freedom of the city, in accordance with a resolution passed a short time ago at a meeting of the Town Council of the City.

The Extra Supplement.

"THE MUSICIAN."

This very attractive and agreeable picture of a lady, in richly-decorated morning dress, sitting at the pianoforte, was one of three pictures by Mr. Carlo Perugini, in the last Royal Academy Exhibition. The artist, being the son of an eminent Italian teacher of singing in London fashionable society, may be supposed to have been led to the choice of this subject by some reminiscences of a not very distant day. He has certainly known how to render the air of highbred grace and mental culture which should appear in the beautiful face and figure of such an aristocratic young Englishwoman, and her attitude of calm and confident preparedness for a brilliant executive performance on the ivory and ebony keys. The harp in the background seems to make an effective frame for her lovely head, while it serves to indicate the extent of her musical accomplishments. We should conjecture that the pianoforte is here placed not in an ordinary drawing-room, but in the special music-gallery of a noble mansion, since the wall appears to be hung with a piece of old Flemish arras, the appropriate design upon which, perhaps after a drawing by Teniers, quaintly represents a very primitive form of musical instrumentalism, the bagpipe droning and squealing to enliven the steps of a dancing boor.

THE CRISIS IN TURKEY.

Our Special Artist at Constantinople sends a Sketch of the landing of some Turkish cavalry from Asia Minor to join the armies which the Sultan's Government is still assembling, in the provinces along the Balkan and the Danube, to resist a threatened Russian invasion. In another Sketch, taken at the office of the Censorship of the Press, our Artist shows the gentlemen there in authority scrutinising the telegraphic despatches to be sent by the correspondents of foreign newspapers to their respective journals in London or Paris, Vienna or Berlin, so that nothing may be communicated to the injury of the Turkish Empire and its august Sovereign, Abdul Hamid, whose state of health and mental faculties, as well as his political intentions or expectations, are made the subject of conflicting rumours among the gossips and newsmongers of Constantinople. Meantime, as we stated last week, pacific relations have been restored between the Porte and Serbia. The Grand Vizier has received a telegram from Prince Milan ratifying the conditions of peace and accepting the obligations resulting from the various Imperial firmans. The negotiations between the Porte and the Montenegrin delegates commenced on Monday, the armistice being prolonged to the 21st inst. But the tribes of the Miridites, in Albania, on the Montenegrin frontier, has rebelled against the Turkish Government. The Turkish army has been ordered to withdraw from Serbian territory. It is officially stated at Belgrade that the Serbian losses during the late war with Turkey amounted to 8000 killed and 20,000 wounded. Prince Milan has issued a proclamation announcing the conclusion of peace. He recommends his subjects to labour peacefully as the best means of acquiring strength for further progress.

The elections for the new Turkish Chamber of Deputies, under the Parliamentary constitution, have begun at Constantinople. Among the elected city representatives, five were non-Muslims, being three Armenians, one Jew, and one Greek; but the Greek offers to resign, as his co-religionists are inclined to a policy of secession and protest against Turkish rule. The Sultan has ordered the establishment of a civil school, in which all classes of his subjects will be eligible for education as functionaries of the State administration.

An official contradiction is now given to the statement of an intended demobilisation of the Russian army; but there is no positive indication of the real intentions of the Russian Government, while General Ignatieff is making the tour of all the principal European Courts.

THE FORTS OF THE BOSPHORUS.

Our series of Illustrations of the Turkish forts and old castles of the Greek Empire and Genoese settlers, along both shores of the Bosphorus, from Constantinople to the Black Sea, is completed by one presented this week. The sketch referred to is that of the fortress of Anadolu Kavak, opposite the one called Rumeli Kavak, both of which may be found in the small map of the Bosphorus that accompanied the description in our last. It occupies the site of the ancient heathen temple dedicated to Serapis and Cybele, at the narrowest part of the strait, where, in former times, a chain was stretched across to forbid the passage of vessels without paying toll. The Byzantine Emperors, and after them also the Genoese, had to fight for this important position against fierce maritime invaders of the Levantine world. But there are several other points in the defences of the Bosphorus, which must be absolutely impregnable when armed with sufficient artillery and held by a skilful and resolute military commander.

Messrs. John Waterer and Sons, of Bagshot, will hold an exhibition of rhododendrons in the gardens at Hurlingham during the month of June next.

The Glasgow News has authority to contradict the announcement made that the Education Board of Scotland is to be continued. The same paper understands that the Earl of Galloway will be her Majesty's Lord High Commissioner at the ensuing General Assembly of the Church of Scotland.

The Duke of Manchester was on Saturday last installed a Knight of St. Patrick, at the Castle, Dublin. An Illustration of the ceremony will be given in our next Issue.—On Monday the Lord Lieutenant gave a dinner; amongst those invited were the Marquis and Marchioness of Drogheda, the Earl and Countess of Listowel, and his Eminence Cardinal Cullen.—The Duchess of Marlborough on Monday opened an exhibition of ancient and modern needlework in the Exhibition Palace. The Lord Lieutenant and the Duchess of Marlborough were accompanied by the Marquis and Marchioness of Drogheda, the Marchioness of Waterford, the Countess of Cork, the Countess of Listowel, Viscountess Powerscourt, and the Marquis of Londonderry. The Duke of Leinster read an address which was presented to the Duchess of Marlborough on the occasion, in which a hope was expressed that the schools of art and art-industry of the Queen's Institute, by which the exhibition is promoted, would be adopted by the South Kensington Department of Science and Art. It was also mentioned that the Duchess of Marlborough had made some loans to the exhibition, and that others had been promised by the Queen and the Royal Princesses. The Duchess, in replying, said that the efforts which were being made to revive an almost forgotten art-study could not fail to enlist the active sympathy and co-operation of the ladies of Ireland, especially as it was an art calculated to stimulate the admirable qualities of industry and patience, and to give remunerative employment.—His Excellency held the second Levée of the season on Tuesday.

THE DEFENCES OF THE BOSPHORUS: FORTRESS OF ANADOLU KAVAK, ASIATIC SIDE.
FROM A SKETCH BY OUR SPECIAL ARTIST.

THE CENSORSHIP OF THE PRESS IN CONSTANTINOPLE: EXAMINING TELEGRAMS AND DESPATCHES.
FROM A SKETCH BY OUR SPECIAL ARTIST.

PROPOSED METHOD FOR THE REMOVAL OF CLEOPATRA'S NEEDLE FROM ALEXANDRIA.

CLEOPATRA'S NEEDLE.

This obelisk of ancient Egypt, which has been left lying so long half buried in the sand at Alexandria, is now about to be made an ornament to the city of London. Its removal has been considered a matter of such great expense that the British Government has not felt justified in undertaking it, and, had it not been for the private generosity of Dr. Erasmus Wilson, and the ingenuity of the engineer, it would most likely have remained to form the foundations of the new houses leading to the Alexandria Railway Station. The cost of placing the French obelisk in the Place de la Concorde was £80,000, and though this included many little items of polishing and patching, the great bulk of the money was expended in the removal. The estimate in the present case is scarcely one eighth of that amount. The obelisk was given by Mehemet Ali, Pasha of Egypt, grandfather of the present Khedive, to the British Government about sixty years ago.

The consulting engineer is Mr. B. Baker, well known by his connection with the Metropolitan Railway, and the work will be performed by Mr. Dixon.

The removal of this obelisk will be accomplished in the following manner:—A wrought-iron cylindrical pontoon, 92 ft. long and 15 ft. in diameter, tapered at each end to a vertical edge, as shown in the upper right corner of the Illustration, will be its only support in the water. Its draught is 9 ft., and displacement 270 tons. If completely submerged, its power of flotation is equal to 705 tons, and as the weight of the obelisk is only 150 tons, with 30 tons ballast, it is evident that there is no chance of its foundering. The pontoon is furnished with a series of bulkheads, or diaphragms, which support the obelisk at about every 10 ft., and suitable elastic packing secures it from shocks. The obelisk is 66 ft. long over all, and the base (8 ft. 6 in. square) will be placed forward, about 20 ft. from the prow of the pontoon, thus giving great buoyancy to the fore part, as the apex is close to the stern, which will be furnished with a rudder. At the top of the pontoon, and near its centre, will be placed a small deck-house, with steering-wheel in the fore part, and accommodation for three men. There is a long, narrow hurricane-deck above the steering-room, and a short mast with two small sails surmounts the whole. This pontoon-boat will be perfectly water-tight and hermetically sealed, the only means of access being a small manhole in the floor of the deck-house. This will be securely fastened previous to the voyage, and only opened in case of emergency. The boat will be towed by a steamer to London, the sails being merely used for steadying purposes. It is calculated that the roll will not be excessive.

The obelisk as it at present lies is fortunately but a short distance from the shore of the Mediterranean; and the following is the proposed method of getting it inside the pontoon. A short length of the obelisk will be completely excavated, and the corresponding part of the pontoon will be built around it *in situ*. The obelisk being securely fixed to this part, so as to rest upon it, another length will be excavated, and another part of the pontoon built. In this way the whole of the cylinder will be constructed, with the obelisk securely fixed in the centre. A roadway being then dug up to the sea-wall, and a short sloping platform made, leading into deep water (see Illustration), the pontoon, with the obelisk inside, will be quietly rolled into the sea.

The deck-house, mast, and other fittings will then be added, and the whole towed to England. The towing-rope (a quarter of a mile long) will be of wire. It will, of course, hang in a catenary curve in the water between the two boats, and any sudden shock or strain put upon one end will simply straighten the curve, and entirely ease off the effect at the other. Our Illustration shows the towing-ship in the distance. It is expected that the speed will be about seven knots an hour.

Arrived at its destination (the deck-house, mast, and sails being removed), the pontoon will be rolled up an inclined plane out of the water and to its final resting-place. The method of raising is not yet decided, but no great difficulty is anticipated.

The question of the proper site is still undecided. The Board of Works has given leave to place it on the Thames Embankment, at the bottom of Northumberland Avenue. The objections to this are several and serious. From the east the apex will be hid by Charing-cross railway bridge. From the west the whole obelisk will be dwarfed by the huge railway station behind it; while from the river, except at lowest spring tides (as shown in the Illustration), the base will be entirely hid by the new Floating Bath or Giacarium.

Another site which commends itself far more is that proposed by the consulting engineer. In the ornamental grounds adjoining Westminster Abbey there is a spot commanded both by Victoria and Parliament streets; and if the obelisk were placed there it would not be dwarfed by the surrounding buildings, and it would form a fitting ornament to the beautiful gardens there.

The actual position of the obelisk, "as it lies," is seen in the sketch at the upper left-hand corner of our page of Engravings. There two of these obelisks, of red granite, one standing erect, the other lying prostrate, and both are visible in the Illustration. The upright one is 71 ft. high; on one side the hieroglyphics are almost worn out, but on the other they are sharp and distinct. These obelisks are far more ancient than Queen Cleopatra; they bear the names of the old Pharaohs, Thothmes III., Rameses II., and Sethi II. The first of those monarchs reigned over Egypt in 1495 B.C., which takes us back nearly thirty-four centuries in the world's history, to the time of the bondage of Israel in Egypt. These obelisks stood originally in front of the Temple of Neptune at Heliopolis, and were brought, many centuries later, possibly by one of the Ptolemies or by Cleopatra, but perhaps by one of the Roman Cæsars, to adorn the palace built at Alexandria. One of the two was called Cleopatra's Needle, and the other Pompey's Pillar, but which is which has been a disputed question. The hieroglyphic characters figured at the sides of the page are not those to be found on the obelisk, but are copied from another inscription, of much later date, which bears reference to Cleopatra.

The vast size of these monoliths, varying in length from seventy to ninety feet, and weighing from 250 to 300 tons, has rendered their lasting proofs of the skill and industry of the ancient dwellers on the banks of the Nile. What excites our wonder is how, with the primitive appliances at their command, they could have achieved such stupendous results. They must have been a people not only of marvellous industry, but possessed of an amount of ingenuity and scientific knowledge only equalled in the present age. The first difficulty to overcome was that of cutting these huge blocks from the quarries, and this, it appears, was effected by means of metal wedges, which were struck at the same instant along the entire length of the stones; sometimes, however, the wedges were of highly dried wood, which, being driven into holes previously cut for them with a chisel, and then saturated with water, split the stone by their expansion. The mass, thus detached, had to be transported from the granite quarries of Syene to its destination, distant from Karnak 138, and from Heliopolis no less than 800 miles. This, according to Pliny, was managed by lashing two flat-

bottomed boats together side by side, then admitting them into a trench cut from the Nile to the place where the stone lay, laden with a quantity of ballast equal to the weight of the obelisk, which ballast, so soon as they had been introduced beneath the transverse block, was all taken out, and the boats, rising as they were lightened, bore away the obelisk in lieu of their previous burden. Assuming the obelisk to have arrived at its destination, the next thing to be done was to get it into an erect position. This is stated by Sharpe, in his work on Ancient Egypt, to have been effected by first cutting a groove or notch in the stone intended to be used as a pedestal, so that while the obelisk was raised its lower edge might turn in that groove as a hinge. The obelisk was then brought on rollers till its lower end rested on this groove, and its head was then lifted up by a mound of earth, which was raised higher and higher till the stone which leaned upon it was set upright.

FOREIGN AND COLONIAL NEWS.

FRANCE.

A speech has been delivered by the Comte de Chambord at Goritz, in reply to a deputation from the Marseilles Chamber of Commerce. The Count denied that he had left France in peril in order to enjoy an easy repose, or that he had given up all hope of saving her. When the time came he would do his duty by direct personal action. These resolutions he requested the deputation to make known on their return home.

Lord Lyons, our Ambassador, had a long interview with the Duke Décazes yesterday week. The subject of their discussion was the renewal of the Anglo-French Treaty of Commerce. The Duke declared that he was prepared to enter into negotiations with the British Government for the conclusion of a new treaty on the bases of the old, without prejudice to a discussion of the question of specific duties, which would be dealt with both in principle and in detail.

The Senate has fixed to-day (Saturday) for the election of an irremovable senator to fill the place of the late General Changarnier.

Yesterday week the Minister of Public Instruction, M. Waddington, had an interview with the Committee of the Chamber of Deputies on his Education Bill. He urged the expediency of proceeding gradually in establishing gratuitous elementary teaching, so as not to compel the communes to incur a considerable expense. He considered it sufficient, seeing the feeling of the country, to give the communes optional powers, being confident that they would be exercised, and that in three years' time education might be made gratuitous and compulsory. He protested against the adoption of the secular principle, maintaining that it would empty the schools, drive the children into Catholic schools, and weaken and ultimately undermine Republican institutions. The Committee came to no decision.

The Chamber of Deputies, yesterday week, resolved to take into consideration the proposal for abolishing military chaplaincies. General Berthaut, Minister of War, announced his intention of opposing the motion. A resolution authorising committees to meet in Paris was passed by 324 to 164 votes. On Tuesday the Chamber of Deputies resolved to take into consideration a motion regarding liberty of meeting for religious purposes. The House afterwards adjourned until Monday next.

M. Thiers has been elected president of the Chamber of Deputies' Committee on the Military Service Bill. At a meeting of the committee on the bill reducing the period of military service to three years instead of five he spoke at considerable length on the subject of army organisation. He disapproved of both systems, and advocated the old military law of France. The present age, he said, fancied it had discovered everything, though it had found nothing but the Leverrier planet. He was grieved to see his country given over to chimerical notions, and he defended the French Generals from the blame that had been cast upon them, observing that they had seven or eight who were as good as Canrobert.

The Committee of the Chamber who had to consider the demand of the Ministry for authority to prosecute M. Paul de Cassagnac for his attacks on the Republican Government in the *Days* resolved, on Monday, by 7 votes to 4, to recommend that the demand be granted. The resolution was arrived at after hearing what M. de Cassagnac had to say on his own behalf.

A batch of streets in Paris has been re-named by the Prefecture of the Seine. The changes are, in general, dictated by public convenience; but political motives have evidently led to the re-naming of the Villa Eugénie, the Avenue de l'Empereur, and the Square Napoleon.

A robbery of about £40,000 worth of Italian and Franco-Egyptian Bank shares took place, on Tuesday, during the usual settlement at the Chambre Syndicale des Agents de Change.

A fatal railway accident happened on Monday night on the Eastern line. A passenger-train, en route for Strasbourg, came into collision near Gagny, not far from Paris, with a goods train, and four persons were killed and about twenty others badly injured.

The Marquise de Montebello died in Paris last Saturday from the effects of injuries which she received by her dress taking fire two days previously.

The ex-King of Araucania, better known in France as M. Tounaina, died recently in the St. André Hospital at Bordeaux. M. Tounaina was the son of a Périgueux lawyer, and he went out to Araucania some years ago and got himself proclaimed King, but was dethroned by the natives in a very short time.

SPAIN.

King Alfonso was present at the opening of the Exhibition in Barcelona, on Sunday, and delivered an address in which he dwelt upon the benefits of peace and industry. His Majesty afterwards reviewed the troops.

The King has arrived at Rosas, and has entertained the Admiral commanding the French squadron at luncheon.

GERMANY.

The usual subscription ball in the Royal Opera House, which had been adjourned on account of the death of Princess Charles, took place on Wednesday night. Amongst those present were the Emperor and Empress, the Crown Prince and Crown Princess, Prince William of Prussia, the Duchess William of Mecklenburg, all the Ambassadors, and the Corps Diplomatique.

The Emperor William intends proceeding to Wiesbaden in April, where he will make a stay of several weeks, and it is possible that his Majesty will pay a short visit to Alsace-Lorraine from that place.

General Ignatieff has been received at Berlin with marked attention. Shortly after his arrival, on Sunday morning, he had an interview with the Emperor. After that he called upon Prince Bismarck and Count Carolyi, the Austrian Ambassador. The object of his mission—if he is intrusted with any—is said to be to induce the Powers to agree to some common measure of intervention to compel the Porte to accept the demands embodied in the Berlin Memorandum. After being received by the Emperor and Empress on Monday,

General Ignatieff paid visits to the Crown Prince and Prince Frederick Charles. Madame Ignatieff was received by the Empress in the afternoon. In the evening, after dining with M. d'Oubril, the Russian Ambassador, General Ignatieff attended a reception at the residence of Lord Odo Russell, the British Ambassador. General Ignatieff spent the greater part of Tuesday morning at the Russian Embassy, and afterwards had an interview with Prince Bismarck. General Ignatieff, on Wednesday morning, received visits from the French, Italian, and Austrian Ambassadors to Germany. He left Berlin at noon for Paris.

The Prussian Upper House, yesterday week, passed a bill relating to the transfer of the administration of the Berlin-Dresden Railway to Prussia by 62 against 25 votes. At a joint sitting of the two Houses of the Prussian Diet held last Saturday the Royal order for the closing of the Diet was read, and the proceedings of the Session were brought to a close with three cheers for the Emperor and King most heartily given by the Assembly.

Herr Schlumberger, the President of the Committee of the Province of Alsace-Lorraine, at the closing, last Saturday, of the committee's period for which it was elected, expressed a hope that their successors would keep to the paths of practical work, and not allow themselves to be led from the field of labour in the interests of the empire by entering upon questions of high general politics.

The Disciplinary Court of the German Empire at Leipsic has confirmed the sentence of the Potsdam Disciplinary Court which dismisses Count Harry Arnim from the Imperial service.

PORTUGAL.

A new Ministry has been formed, and is constituted as follows:—Marquis d'Avila, President of the Council, Minister of the Interior, and Minister for Foreign Affairs; Senhor Carlos Bento, Minister of Finance; Senhor Barros e Cunha, Minister of Public Works; Senhor Mexia Salema, Minister of Justice; General Souza Pinto, Minister of War; Senhor José Mello Couvea, Minister of Marine.

Tuesday's sitting of the Cortes was attended by the members of the new Cabinet in their Ministerial capacity. More or less conditional support was promised them by all parties; on the side of the Government it was undertaken that the public revenue and expenditure should be balanced.

AMERICA.

Mr. Rutherford Hayes has been declared the duly-elected President, and Mr. William Wheeler the Vice-President, of the United States by a majority of one; and for the next four years these gentlemen will be "Kings of the Kingless land." The declaration was made early on the morning of Friday, the 2nd inst., at a joint sitting of the Senate and the House of Representatives; Messrs. Hayes and Wheeler having received 185 votes against 134 recorded for Messrs. Tilden and Hendricks.

The House of Representatives has by a party vote passed a resolution asserting its belief that Messrs. Tilden and Hendricks received 196 votes, and were, therefore, duly elected to the Presidency and Vice-Presidency of the United States.

On Monday Mr. Hayes was escorted by a civic and military procession from the White House to the Capitol. On reaching the latter he proceeded to the hall of the Senate, where a brilliant company, including members of the diplomatic body, were congregated. The Senate having been called to order, Mr. Wheeler was sworn and assumed the Vice-Presidency of the United States. The whole assemblage then proceeded to the east front of the Capitol, where Mr. Hayes read his Address and formally took the oaths of office as President. He announced his determination to do what he could to promote the interests of the white and coloured people equally. His object was not to get a United North and a United South, but a united country. He urged the absolute necessity of Civil Service reform, not only in preventing abuses, but in the system of appointment; faithful officials ought to be secured in their tenure. To further such reform the President recommends an increase of the presidential term of office to six years, without eligibility for re-election. He said that financial depression continued, but with signs of returning prosperity; that the uncertainty of the paper currency added to the depression; that the only safe paper currency is one at all times convertible into coin; and that legislation for early resumption is imperatively demanded. He approved the policy inaugurated by General Grant of submitting international disputes to arbitration, and said that, unhappily, such questions should hereafter arise, he would adhere to this policy.

The New York *Herald*, *Tribune*, and *Times*, applaud the President's Address as wise, sincere, courageous, and unpartisan in its declarations, and consider that the fulfilment of the policy indicated cannot fail to satisfy and tranquillise the whole country; and it is reported that the Address has been well received in the South.

President Hayes gave a reception on Monday evening. The public buildings were illuminated, and there was a torchlight procession, in which 5000 persons took part.

A telegram through Reuter's agency reports that President Hayes has formed his Cabinet as follows:—

The Hon. John Sherman of Ohio	Secretary of State.
The Hon. W. M. Gregory of Iowa	Secretary of the Treasury.
The Hon. George M. Thompson of Indiana	Secretary of War.
The Hon. Richard M. Thompson of Massachusetts	Secretary of the Navy.
The Hon. Charles Devens of Massachusetts	Attorney-General.
The Hon. David McKim of Tennessee	Postmaster-General.
The Hon. Carl Schurz of Missouri	Secretary of the Interior.

The names of the members of the Cabinet sent to the Senate by President Hayes met with sharp opposition in that body on Wednesday evening. The Republican leaders objected to the immediate confirmation of the appointments, and they were consequently referred to the respective senatorial committees.

It has been decided by the Supreme Court in the Granger cases that a State has the power to regulate the freight and passenger rates of railways.

A block of buildings in New York, chiefly occupied by silversmiths and jewellers, was burned down on Tuesday, involving a loss estimated at a million dollars.

CANADA.

We learn from Ottawa that Mr. Langevin, a member of the House of Representatives, has been unseated by a decision of the Supreme Court of the Dominion, on account of undue influence having been exercised by the Catholic clergy to secure his election.

The Legislative Assembly of British Columbia has decided, by 15 against 8 votes, to sustain the action of the Provincial Government in the railway question with the Dominion Government. A mass meeting was held at Victoria on Saturday, which is said to have been attended by the most influential persons residing in the country. It was unanimously resolved to accept the policy of delay recommended by Lord Carnarvon, but a petition to the Provincial Legislature was adopted asking it to take such action as would make clear to the Dominion Government that, unless the actual construction of the Pacific Railway was begun by Aug. 1, the Province would ask permission of England to dissolve its connection with the Dominion.

THE CAPE COLONIES.

Conferences have been held by Sir Theophilus Shepstone with the Executive of the Transvaal Republic, with Mr. Paul Kruger, candidate for the Presidency, and Mr. Jorresen, the State Attorney. All that is known, however, is that the Confederation scheme was submitted and discussed.

We have South African news by telegram from Madeira to Feb. 13 from Cape Town. The latest news from Zululand was of a pacific nature. Cetewayo, the Zulu King, denied being concerned in the recent attack on natives of the Transvaal territory, which was made by a chief named Umbeline, an Amazwazi refugee residing in Zululand.

AUSTRALIA.

Intelligence from Sydney dated Jan. 12 has arrived through Reuter's agency.

The New South Wales Legislative Assembly met on the 9th after the Christmas recess. A motion in favour of railway extension to Mudgee was carried by a large majority. On Thursday, the 11th, the Legislative Assembly in Committee considered the Customs Regulation Bill, and several clauses in the same were carried, the majority without amendment. A statement of public revenue for 1876 has been published. The revenue proper during the past quarter amounted £1,588,489, an increase of £278,077, as compared with the last quarter of 1875. The total revenue for the past year is £5,037,661, an increase of £911,538 on 1875. The Customs for the year yielded £1,011,872. The land revenue was £2,772,999. The railway contributed £678,391, and the Postmaster-General's Department, £190,981. On Dec. 31, 1876, the aggregate balances to the credit of the public accounts amounted to £3,509,065, of which the Bank of New South Wales holds £1,738,000. The Colonial Secretary and Minister for Public Works returned from their tour in the western districts on Jan. 7. Their decision as to the route for railway extension between Orange and Dubbo has not been publicly notified. The steam-ship Australia, with the mails from England via San Francisco, arrived in port on Jan. 4; and, in consequence of a death from smallpox having occurred on the voyage, she was placed in quarantine. The steam-ship Brisbane, of the Torres Straits Mail Line, is also in quarantine for smallpox, a death from that disease having occurred shortly after her arrival at Sydney, on Dec. 11. Both vessels, it is anticipated, will soon be released. Smallpox has appeared in the neighbourhood of the wharf, where the Brisbane was moored, and one death has resulted. This part of the city has been placed in quarantine, and most stringent measures have been adopted for the prevention of the spread of the disease in the city.

Intelligence from Brisbane, dated Jan. 12, is as follows:—"The revenue of Queensland for the past quarter has amounted to £287,000, a decrease on the preceding quarter of £2400. The Mecca, steam-ship, from Hong-Kong, with Chinese, has arrived, with smallpox on board; and the Government has issued several proclamations respecting the quarantine regulations."

Sir William Jervois, the Governor of the Straits Settlements, has been instructed to proceed to Australia, at the request of the Governments of New South Wales, Victoria, South Australia, and Queensland, to advise upon the defences of those colonies.

NEW ZEALAND.

News has been received of the death, at the age of fifty-six, of Sir Donald McLean, K.C.M.G., native Minister of the colony almost continuously since the formation of the Fox-Vogel Ministry, in 1869. He had previously held the office of "Protector of the Aborigines," and the confidence which the Maoris placed in him was an element of great importance in the pacification of New Zealand. Sir Donald McLean, in recognition of his services, was recommended to the rank of Knight Commander of the Order of St. Michael and St. George by Lord Carnarvon, in 1874.

The English cricketers (according to a Reuter's telegram) played and won a match at Canterbury, New Zealand, on the 2nd inst., against the local team. Through the same channel we learn that, on the 7th inst., a drawn match was played at Otago between the English cricketers and the local team.

INDIA.

By a telegram from Calcutta we have news of the death, on Feb. 25, of Sir Jung Bahadur, the Prime Minister of Nepal. During the Mutiny he sent troops to act with the British forces, and for this service he received the Grand Cross of the Order of the Bath. He was afterwards appointed a Knight Grand Cross of the Star of India. The Prince of Wales, on visiting Nepal, was entertained by Sir Jung Bahadur.

JAPAN.

A telegram received from Japan confirms previous news of the capture of four steamers from the Satsuma insurgents, near Rumamoto, and adds that the other provinces are quiet. The rebels had probably seized these steamers in the harbour of Kagosima, whence they set out to besiege Rumamoto, an important fortified town, with a garrison of 3000 men, near which they were defeated by the Mikado's troops.

The Marquis de Compiègne, a member of the French Geographical Society, has been killed in a duel at Cairo.

Señor Iglesias, according to intelligence published in New York, has resolved to return to Mexico, and has abandoned all idea of contesting the Mexican Presidency.

The appointments of Sir Bartle Frere to be Governor of the Cape, and of Lieutenant-General Sir A. A. T. Cunynghame to be Lieutenant-Governor of the colony, were gazetted on Tuesday night.

Under the arrangement in regard to Daira debt come to by Messrs. Saunders and Jozou, who have left Cairo for Paris and London, the Khedive cedes to the creditors £550,000 annually, of which £100,000 will be paid from his civil list.

Mr. St. John, recently Vice-Consul at Jassy, and now Acting Consul-General at Belgrade during the absence of Mr. White, has been promoted to the office of Consul at Ragusa; and Mr. Charles F. Watkins has been appointed her Majesty's Consul for the Island of Cyprus, to reside at Larnaca.

The number of persons who sailed from the Mersey during last month was 1864, in fifty-five ships. A comparison with January and last month shows an increase in the latter of 113 persons; but when the returns of February are compared with the corresponding period of last year there is a decrease of 721.

The iron clipper-ship Star of Greece, 1227 tons register, Captain William J. Shaw, owned by Messrs. J. P. Corry and Co., Belfast and London, has completed her voyage from the Downs to Calcutta and back in the unprecedentedly short period of five months, twenty-four days, twenty-one hours.

Reports have reached Madeira, by the Loanda, that the King of Dahomey has offered fifty casks of oil as an instalment of the indemnity, and has promised to pay the remainder of the fine on condition that the ports are opened for trading. The offer has been refused. A great fire occurred at Lagos on Jan. 30. The greater part of the native town, including two churches, was destroyed, but the business part was untouched.

General S. Berdan, of the United States, has invented a "range-finder." It consists of telescopes, the measuring being absolutely precise up to 2000 metres. The average time required to place the instrument in position and take the distance is less than two minutes, and the time required to make the distance of a second object when the instrument is once opened less than one minute. This instrument, the General asserts, will double the effective firing of the artillery and quadruple that of the infantry.

METROPOLITAN NEWS.

Mr. John Holms, M.P., Mr. J. S. Soames, and Mr. Henry Green were, on Monday, sworn in justices of the peace for Middlesex and Westminster.

The anniversary festival of the Order of Ancient Britons was held, on Thursday week, at Willis's Rooms—Lord Dynevor in the chair. The subscriptions amounted to nearly £900.

A copy of "Blake's Jerusalem," published in 1804, was sold by Messrs. Puttick and Simpson, on Tuesday last, for £100. A copy of the same book was sold in 1854 for £4 16s.

Dr. Carpenter will preside at a popular lecture on Foods and Drinks, which will be given by Professor Corfield in the large room of the Society of Arts this (Saturday) evening, at half-past eight.

At the annual meeting of the Naval Volunteer Artillery, which took place, last Saturday, under the presidency of Viscount Ashley, the chief subject spoken of was the chance of the Admiralty granting to the brigade a larger ship.

Seventeen hours of sunshine were registered last week at the Royal Observatory, Greenwich. The sun was above the horizon 75.5 hours. On Wednesday there were 6.7 hours of sunshine, and on Monday and Saturday there was none.

Last Tuesday evening the anniversary festival of the Reedham Asylum for Fatherless Children was celebrated at the Cannon-street Hotel—the Lord Mayor, who was supported by the Sheriffs of London and Middlesex, presiding. Subscriptions to the amount of £1300 were announced.

Mr. John T. Carrington has been appointed resident naturalist to the Royal Aquarium Society, Westminster, in place of Mr. W. Saville Kent. Mr. Carrington has for the last year been studying aquarium management with Mr. W. Alford Lloyd at the Crystal Palace Aquarium.

Lord Shaftesbury, on Tuesday, introduced to the Earl of Beaconsfield a deputation from the manufacturing districts of Great Britain and Ireland, which presented to the Premier an address congratulating him upon his elevation to the Peerage, and thanking him for the services he had rendered to them whilst he was a member of the House of Commons.

The annual general meeting of the governors of the Cancer Hospital was held last Saturday—Mr. David Mocatta presiding. The financial position of the charity is satisfactory. During the year 863 new patients had been received. Thanks were accorded to Baroness Burdett-Coutts, to Lady Abercromby, the lady visitors, and to the officers of the institution.

The Lord Mayor has opened a Mansion House fund for the relief of the 267 persons who have been left entirely destitute by the recent disasters to fishing-vessels in the North Sea. These smacks contained 215 men and boys, all of whom had been drowned, leaving 88 widows, 164 children, and 15 aged parents who were dependent upon them for support.

"Two Foster Brothers" is the title of a new piece from the pen of Mr. Gilbert A. Beckett, which is announced to be produced on Monday next at Mr. and Mrs. German Reed's entertainment, St. George's Hall, in the place of Mr. F. C. Burnand's "Matched and Mated." Mr. Alfred Cellier, whose name stands high as a popular composer, contributes the music.

One of a series of exhibitions of choice flowers and fruits, in connection with the meetings of the Fruit and Floral Committees of the Royal Horticultural Society, was held in the conservatory at South Kensington on Wednesday, when, notwithstanding the stormy, wet, and sometimes snowy, weather, there was a good attendance of visitors.

The second meeting of the Royal Archaeological Institute, was held, yesterday week, when Sir Sibald Scott, Bart., Vice-President and F.S.A., occupied the chair. The chief business of the day was the reading of a memoir on the "Venus di Medici," accompanied by a life-sized drawing of the same, by Mr. Albert Hartshorne, who entered fully into the merits of this fine remain of classic antiquity.

The council of the Royal Horticultural Society, in conformity with the alterations made in the by-laws at the annual general meeting of the society, held on Feb. 13, have suspended the entrance fee of all new members joining the society. They have also instituted guinea memberships, giving admission on all occasions, and to all shows, promenades, and meetings of the society, except the annual meetings both at Chiswick and South Kensington.

Sir Mordaunt Wells brought forward, at a meeting of the Royal Geographical Society, on Monday afternoon, his resolution for an inquiry into the circumstances of the issue of tickets on the occasion of the reception of Captain Nares; but an amendment that a committee of ten be appointed simply to ascertain how the inconveniences complained of may be avoided, moved by Lord Aberdare, was, after an animated debate, adopted.

The Goldsmiths' Company have granted £500 towards the fund for rebuilding the Metropolitan Free Hospital; and have presented the Royal Academy of Music with £100, this being the second donation the Academy has received from the Goldsmiths' Company. The Fishmongers' Company have contributed 50 guineas towards the erection of a mission-hall in St. Mark's parish, Walworth, upon the petition of the Vicar, the Rev. R. R. Resker.

The weekly return of metropolitan pauperism shows that the total number of paupers last week (the fourth week of February) was 85,603, of whom 39,174 were in workhouses, and 46,429 received outdoor relief. Compared with the corresponding weeks in the years 1876, 1875, and 1874, these figures show a decrease of 2820, 12,723, and 23,235 respectively. The number of vagrants relieved on the last day of the week was 719, of whom 489 were men, 183 women, and 47 children.

The Prince of Wales presided, at Willis's Rooms, last Monday evening, at the 119th anniversary dinner of the Orphan Working School. The festival was held specially in commemoration of the amalgamation of the school with the Alexandra Orphanage. The company numbered about 350, including several members of the two Houses of Parliament. The Prince of Wales said that he had received a telegram from her Majesty stating that it was with great pleasure that she had learned that he was to take the chair that evening, and sending a subscription of 100 guineas. The subscriptions announced during the evening amounted to £6647, including £100 from the Prince.

Earl Fortescue presided at a council meeting of the Central Chamber of Agriculture, on Tuesday, at which resolutions were passed viewing with satisfaction the prompt reintroduction of the Prisons Bill into the House of Commons, and approving generally of the Valuation Bill.

The auction-rooms of Messrs. Christie, Manson, and Woods were crowded on Thursday week by connoisseurs and dealers at the sale of the Duke de Forli's choice collection of old Dresden porcelain. The bidding was spirited throughout, and the sale realised £4295.

Sir Daniel Gooch, M.P., in presiding over the half-yearly meeting of the Great Western Railway Company, last Tuesday, remarked that the policy of the board was to get rid of the broad gauge as soon as they could. But that was a costly operation. For the last two years they had expended out of revenue £464,000 on locomotive stock to fit it for the narrow gauge, and they had also spent a considerable sum on capital account. But an operation of this kind must be carried on slowly, or they would not get any dividend at all.

The sixth annual meeting of the Post-Office Orphan Home was held in the Foreign Gallery, General Post Office, on Thursday week, under the presidency of Mr. Blackwood, financial secretary to the Post Office. The auditor's report was read, and gave great satisfaction. The receipts for the year amounted to £3058, being equal to that of 1875. During the year ten children have been taken charge of by the institution, making a total of forty-seven. This institution is supported by voluntary contributions and members' subscriptions of a penny per week.

A letter from the Prince of Wales was read, on Wednesday at the weekly meeting of the School Board for London—presided over by Sir Charles Reed—asking if the board would appoint a committee to co-operate with the Royal Commission for the Paris Exhibition, 1878, of which his Royal Highness is president. The communication was referred to the school management committee. The debate on spelling reform was resumed. After expressions of opinion by the Rev. G. M. Murphy, Mr. Firth, Mr. M. Wilks, and the Rev. E. Daniel, the debate was, on the motion of Sir J. Bennett, adjourned.

Sir J. M. Hogg, M.P., presided at yesterday week's meeting of the Metropolitan Board of Works, at which the finance committee reported that since 1856 the money raised by the local management board amounted to £18,671,383. The debt repaid amounted to £6,247,253; the net debt outstanding on Dec. 31, 1876, was £9,141,824, which was a reduction of £74,875 upon the same date in 1875. The Board had unexhausted borrowing powers to the amount of £2,166,958. The rateable annual value of the metropolis had increased from £11,283,663 in 1856 to £23,136,819 in the present year.

The largest cabmen's shelter yet constructed has been placed in Palace-yard, Westminster. This shelter has been erected at the expense of a few members of both Houses of Parliament. The committee of the Cabmen's Shelter Fund announce, in their second annual report, that the shelters are now self-supporting, the only expense being occasional repairs and repainting. There are thirteen of these in different parts of the metropolis, chiefly west and north-west, and the committee hope that sufficient funds will be forthcoming to erect shelters for the accommodation of cabmen at the east end of London. Not a single complaint has been received from the police since the commencement of the movement, and they trust that this will convince the public of the good these small buildings have done, and induce further support.

At the sitting of the Central Criminal Court, on Monday, Charles de Chastelaine and Matthew Wetherall were charged with having conspired with the late Sir Edward Cunynghame to defraud Mr. William Le Hunt Doyle. The fraud was carried out during a drinking-match, of which there had been several, and at one of these the four persons referred to consumed eight bottles of champagne, eight large glasses of brandy, thirty-one small glasses, eight large cigars, fifteen bottles of lemonade, and three glasses of beer. The solids consisted of hot-pickle sandwiches. The jury found both defendants guilty, recommending Wetherall to mercy on account of his previous good character. De Chastelaine was sentenced to twelve months' imprisonment, with hard labour, and Wetherall to three months' imprisonment, with hard labour.

Mr. Edward B. Nicholson asks to be allowed to inform students that they can easily obtain admission to the reference library of the London Institution, Finsbury-circus, which has some 60,000 volumes. It is open from ten a.m. to nine p.m. (Saturdays, three p.m.), and is close to the stations of the Metropolitan, North London, and East London Railways. Each of the proprietary members has an unlimited number of reading tickets to give away, and a list of these members (about 900) can always be seen at the institution. Those who know no member on the list have only to furnish the writer with a recommendation from some professional man, merchant, employer of labour, or other responsible person, and tickets shall be procured them. Readers of fiction only need not come, it is added; in most other branches the library is well off, and in some decidedly rich.

There were 2498 births and 1529 deaths registered in London last week. Allowing for increase of population, the births were 14 and the deaths 132 below the average numbers in the corresponding week of the last ten years. The deaths included 84 from smallpox, 23 from measles, 23 from scarlet fever, 4 from diphtheria, 40 from whooping-cough, 16 from different forms of fever, and 22 from diarrhoea; thus to the seven principal diseases of the zymotic class 212 deaths were referred, against 187 and 208 in the two preceding weeks. These deaths were 21 below the corrected average number from the same diseases in the corresponding week of the last ten years. There was a decline in the mortality from smallpox in the metropolis last week. The deaths from this disease, which had been 72 and 104 in the two preceding weeks, were 84 last week: 37 were certified as unvaccinated, 23 as vaccinated, and 24 were "not stated" as to vaccination. The deaths of 15 unvaccinated children under five years of age were referred to smallpox. The disease continues to show the greatest proportional fatality in East London. The Metropolitan Asylum Smallpox Hospitals contained 907 patients on Saturday last, including 108 convalescent cases at Limehouse, against 901 and 916 at the end of the two preceding weeks. The new cases admitted during the week were 230, against 238 and 205 in the two previous weeks. The fatal cases of measles, scarlet fever, diphtheria, whooping-cough, and fever, were considerably below the corrected average numbers. The deaths both from measles and scarlet fever, however, exceeded those returned in recent weeks. The deaths referred to fever were 17 below the corrected average. In Greater London 3060 births and 1792 deaths were registered, equal to annual rates of 36.6 and 21.4 per 1000 of the population. Six deaths from smallpox were registered in the Outer Ring, including 3 in Stratford, and one each in Croydon, Brentford, and Edmonton sub-districts. Three fatal cases of fever occurred in Croydon, and 2 in West Ham. The mean temperature of the week was 39.1, which was 0.9 below the average.

TURKISH WAR PREPARATIONS: LONDON
FROM A SKETCH BY

THE CAVALRY AT CONSTANTINOPLE.
BY SPECIAL ARTIST.

PARLIAMENT.

LORDS.

Small by degrees and beautifully less became the sittings of the Peers last week—reaction, mayhap, from the excitement of the Eastern Debate—the extreme of attenuation being attained on Friday, the Drawing-room Day, when the House sat for a quarter of an hour, which was occupied by the Lord Chancellor in formally introducing, without exposition, the Bankruptcy and Legal Reform Bills of the Government.

Were it not that the Earl of Camperdown implied that Colonel Sir J. Hogg, in his paternal position as Chairman of the Metropolitan Board of Works, kept his eye on everything great and small in town, from the gas and water supplies to the supervision of baby-farming, it might have been excusable to imagine that noble Lords would have found the Metropolitan Board of Works Bill rather dry on Monday last. As a matter of fact, they discussed it for over two hours. The purport of the bill, as explained by the Earl of Camperdown, was to transfer the power of electing members of the Board from the vestries to the ratepayers. Earl Beauchamp moved the rejection of the bill, urging that the noble Lord had not made out a case for the change; and, in the course of the conversation that ensued, Viscount Enfield, Earl Delawarr, Lord Kimberley, and Lord Fortescue spoke mildly on the measure, which was in the end withdrawn.

It is well known there is nothing like the promise of a spice of personality to draw a good House. A fresh exemplification of this truth was afforded on Tuesday. The concourse of heterogeneous atoms to which the homogeneous name of Society is given, has been sorely disturbed of late by a judicial decision on the part of Lord Coleridge having some bearing on the game laws. The noble Lord (who in Parliament has been distinguished for a style of oratory which has not inaptly been called mellifluous) lately roundly refused the costs of prosecuting three men for night poaching in Durham adding, moreover, that "the law ought undoubtedly to be enforced, but as the law protected the amusements of rich people they must pay for its enforcement." Well, apparently in expectation that Lord Coleridge would be brought to book for this Radical statement, a number of peers flocked to the House on Tuesday. The Prince of Wales was in his seat. Round the throne there was quite a gathering of the clans from the Lower House. One important personage was absent: Lord Coleridge himself. Something else militated against the success of Viscount Midleton (who had given notice of a question on the subject): the wind had been taken out of his Lordship's sails by the House of Commons the previous evening. Thus, Viscount Midleton, in lieu of putting the question, had to content himself with the explanation given in the other House. The Lord Chancellor briefly said he was glad the question had not been put, because if it had he should have had to state that, although he had great pleasure in becoming the medium of any communication between the Lord Chief Justice and their Lordships' House, yet, on the other hand, he had no jurisdiction over, and must disclaim any responsibility in respect to the Lord Chief Justice. After a protest from Lord Malmesbury against Lord Coleridge's inference "that the game laws were made for the amusement of the rich only," the matter dropped without supplying, it is to be feared, quite so much amusement as was looked for.

Their Lordships, with their usual expedition, disposed of their business on Thursday within half an hour. Responding to a question put by Earl Fortescue, the Duke of Richmond intimated that the Orders in Council respecting the cattle plague in this country would be shortly published for the information of the public generally; that a new case had occurred within the last forty-eight hours at Hull; that the animal was immediately slaughtered; and that he had little doubt that the active measures taken by the authorities to stamp out the disease would prove completely successful.

COMMONS.

Another week has flown without the introduction of any of those "burning" questions which were wont to inflame the House. The national life might almost be an idyll, and her Majesty's subjects a race of lotus-eaters, so smoothly does the Parliamentary stream of small talk glide along, only rippled now and then by an ebullition of heartiness or of laughter at the incoming of a Liberal member who is welcomed, and of a member of the Government who to the last found an impediment to his taking the seat he has long been in search of.

The Prisons Bill is dragging its slow length along through Committee. On Thursday week, Mr. R. Hill's amendment to clause 10, stipulating for the retention by municipal authorities of the right of appointing visiting justices, was rejected by 253 to 51; and Mr. Freshfield's amendment to clause 13, to extend the period for repayment of loans by prison authorities from thirty-five to sixty years, was negatived by 86 to 74 votes. Progress was reported during the discussion of Mr. Sheridan's amendment to clause 20; and the Metropolitan Open Spaces Bill was passed through Committee before the adjournment.

Yesterday week the question of the open spaces of the London suburbs was brought forward in a practical shape. A bill of the London and Brighton Railway proposes to slice off about eight acres of Mitcham-common; and even the fact that the grant of this piece of land would facilitate the business of the railway did not prevent Mr. Shaw Lefevre, Sir H. Peek, and Mr. Fawcett from stoutly opposing it. Mr. Laing and Sir C. Adderley defended the bill, which was read the second time by 143 to 100. According to a notice for the 23rd inst., it is the opinion of Mr. Courtney that the corruption and cruelty of the Ottoman rule ought to cause this country to withdraw from all obligations contracted for the protection of Turkey. Mr. Mundella elicited from Sir Stafford Northcote that Tosoon Bey and his congeners implicated in the Bulgarian atrocities had been acquitted at Philippopolis, whereupon Mr. Baring, the British representative in court, had declined to attend any further sittings of the Commission. Mr. Bourke added, replying to Mr. Henry Samuelson, that the Government had frequently urged the Porte to punish these men. Then followed the debate of the evening. It was opened by Mr. Percy Wyndham, who moved a resolution affirming that there should be no delay in our withdrawal from the Declaration of Paris respecting belligerent rights at sea, as Great Britain would be placed by it at a disadvantage in the event of hostilities with those Powers (the United States was repeatedly referred to "in this connection") which had not agreed to the new rules. A second was found in Mr. Baillie Cochrane. Mr. Grant Duff was of opinion that the course suggested by the resolution should only be adopted after full notice had been given, and when no interested motive could be adduced for the proceeding. He added, it would be against our honour and interests alike to withdraw from the Declaration at this juncture. Mr. Jacob Bright spoke in the same strain, arguing that it was for the interest of every nation that in time of war private property at sea should be as safe as it was in time of peace. For or against the resolution spoke Mr. Bentinck, Mr. Ashley, Lord Eslington, and Lord E. Fitzmaurice. Mr. Bourke, in opposing the resolution on behalf of the Government, said it was true we had, by signing the Declaration of Paris, surrendered the right

of seizing enemy's goods in neutral ships during a war; but then, on the other hand, we had secured the advantage of having abolished privateering. Moreover, we still retained the right of search for contraband of war. The Declaration of Paris had, in fact, secured this country important advantages; and the present moment was certainly not the time to irritate every Power in Europe by the passing of such a resolution as that proposed by Mr. Wyndham. The sentiments of the Under Secretary for Foreign Affairs found a cordial supporter in Sir William Harcourt. Mr. Butler-Johnstone, moved the adjournment of the debate. A trio who seldom think or speak in harmony—Mr. Biggar (etched to the life in the current Number of *Mayfair*), Sir Stafford Northcote, and the Marquis of Hartington—opposed the motion for adjournment, which was defeated by 182 to 51; and Mr. Wyndham's resolution was negatived by a large majority—170 to 56.

On Monday, when Mr. Hibbert, quite at home in the House of which he was a respected member for many years, had been cheered by the Liberals, and welcomed by his quondam colleagues to a seat on the front Opposition bench, there was a monotonous string of questions and answers, relieved by a knotty query. Sir Charles Legard wished to know whether the attention of the Government had been called to Lord Coleridge's refusal of the costs of prosecution on the conviction of three men for poaching, likewise to what the Chief Justice had been reported by the *Times* to have said,

That it was the first occasion any such application had been made to him, and he hoped it would be the last, for he certainly never should order the costs in any such case. He wished it to be distinctly understood that he was only following the dicta of eminent Judges. The law ought undoubtedly to be enforced, but as the law protected the amusements of rich people they must pay for its enforcement.

Replying to Sir Charles Legard's further questioning as to whether this doctrine was in conformity with the law of the land, Mr. Cross said he had no jurisdiction in the matter, and all that he could do would be to read the letter he had received from Lord Coleridge, to the following effect:—

As far as I know there are no dicta on the question, nor is it likely, from the nature of the case, that there would be. I spoke of the practice of the Judges, those whom I had principally in my mind being Justices Maule, Erskine, Pattison, and my own father. I believe, as a matter of fact, the list might be extended; but I do not wish to shield myself behind any authorities, however venerable. I acted according to law—I hope with a proper sense of responsibility—on my own authority. I must say I am not accountable for my acts to any member of the House of Commons. A letter to the Secretary of State is not a satisfactory mode of explaining legal decisions; but I may say the costs cannot in any case, without the authority of the Judge, be indicted on the ratepayers. The offence for which the prisoners were tried in this case is one which the justices of the peace cannot themselves try. The experience of other Judges may be different, but this is the first occasion on which any attempt has been made before me to inflict any costs on the ratepayers in connection with such a prosecution. I refused them, and shall probably continue to do so, on grounds which seem to me conclusive, and with a statement of which I do not think it necessary to trouble the House of Commons.

Thereupon Sir Charles Legard gave notice that, on the earliest opportunity, he would call attention to the subject. The moving of the Army Estimates was preceded by the discussion of two military questions. Mr. Hardy excupiated the War Office with respect to the death of Gunner Charlton, who, Sir Edward Watkin implied, met with his death owing to the hardships he had endured in Millbank Prison and to culpable neglect when discharged; and the Secretary for War, answering Mr. Grant Duff, explained that Captain Burnaby was recalled from Khiva because there were at the time circumstances which rendered it inexpedient for a British officer to be in Asiatic Russia. To judge from the few members present, scant interest was taken in Mr. Hardy's speech moving the Army Estimates—which, might, indeed, be termed of the pipeclay or red-tape order of official exposition. The motion was that the total number of men for 1877-8 should be 133,720—an increase of 836. He took credit for the large number of recruits (29,370) last year, raising the Army 1857 above the establishment by the end of January; but said there would be no manœuvres this year. As for the militia, officers qualifying themselves for that reserved force will have the privilege of competing for commissions as men having a year's training at Sandhurst; adjutants are to receive their actual travelling expenses, and, in addition, 2s. 6d. head money for each recruit; and the men are to receive ten shillings on enrolment and £1 for each year of their training. To the volunteers also there would be an increase of payment. Army stores and clothing, the supply of the Martini-Henry rifle, the eighty-one ton gun, the rebuilding of Knightsbridge Barracks, and other cognate matters figured in the dry military catalogue expounded by Mr. Hardy, to whom the vote of men was granted after a few formal criticisms, mostly from hon. and gallant members who had been in the Army. Despite Sir G. Balfour's plaintive appeal for further information, the House agreed to the vote of £1,565,860 for pay and allowances for the land forces at home and abroad, exclusive of India. A supplementary estimate of £50,000 for the Army Purchase Commission was also granted; and the Consolidated Fund (£350,000) Bill was read the second time.

In conformity with the custom which extends equally to actors and politicians of mark—that of giving them a round of applause when they appear first upon the scene—the Ministerial side of the House loudly cheered the coming of Sir Hardinge Giffard, the Solicitor-General, who had in vain courted many constituencies, but who had at length been accepted by Launceston, which had virtually been resigned to his arms by a faithful adherent. But the troubles of the Solicitor-General were not yet at an end. Pursued, seemingly, by some cruel fate which placed an obstruction in his way at the very last moment, Sir Hardinge Giffard, greatly to the mirth of hon. members, searched pocket after pocket, but could not find his return, until Sir W. Dyke came to his rescue and produced the missing paper, which had been left by Sir Hardinge in a seat beneath the gallery. Smilingly he had entered the House; in confusion he quitted it directly he had taken the oaths. Mr. Forsyth having given notice of an amendment not differing very materially from Mr. Courtney's resolution on the Eastern Question, Mr. Seely moved that, in order to remedy certain defects in the administration of the Admiralty, the Government should take into consideration the propriety of administering that department by means of a Secretary of State. Mr. E. J. Reed seconded the motion, and pointed out many further blots in the present administration of the Navy. Somnolent though the First Lord of the Admiralty has been during more than one sitting this Session, owing to the tameness of business generally, it was scarcely to be expected he should not be awake to what was in a manner a personal attack on him as the holder of an office it was proposed to abolish. When Captain Pim had withdrawn his motion for a Select Committee on the Admiralty, and when Mr. Bentinck, Mr. Baxter, Mr. Egerton, Mr. Samuda, Mr. Shaw Lefevre, Sir M. Lopes, Mr. Whalley, and other hon. members had delivered their opinions on the subject, Mr. Ward Hunt loomed above the table, and figuratively shivered his timbers before he would agree to the motion. As an Englishman, he liked to see anyone come up to the scratch, and there he was to meet the hon. member (Mr. Seely). He reminded the House of Sir James Graham's opinion that the

authority of the First Lord of the Admiralty was paramount. He opined that a mere change of name would be useless. The casualties to the Vanguard, Iron Duke, Monarch, and Thunderer could not have been inquired into more searchingly than they were by the Admiralty. In the end, the motion was rejected by 183 to 58 votes. After the withdrawal by Mr. Macartney of his motion for a Committee of Inquiry into the Irish Unions, the Consolidated Fund Bill passed through Committee. The next day it was read the third time.

Ministers, if not the Government, have suffered a second Wednesday defeat. Last week it was the Colonial Marriages Bill that was read the second time, in spite of the fact that it was most stoutly opposed on the Ministerial side of the House, the Attorney-General joining in the cry against it. This week it is Sir John Lubbock's Ancient Monuments Bill that has placed Ministers in a minority. The bill merely proposes to place certain prehistoric relics and monuments in the charge of seven commissioners; but Lord F. Hervey, Mr. Beresford Hope, the Attorney-General, Mr. C. Bentinck, the Chancellor of the Exchequer, and Mr. Lowther seemed either to think the bill would be dangerous or innocuous. However, the preponderance of feeling was in favour of the bill, which was read a second time by 211 votes to 163, and then referred to a Select Committee, with Sir John Lubbock's consent.

On Thursday the time and patience of Mr. Bourke, the Under-Secretary for Foreign Affairs, were severely taxed by the numerous questions which were put to him by several members. Interrogated first by that indefatigable representative, Sir C. Dilke, Mr. Bourke said no reply had as yet been sent to Prince Gortschakoff's circular. It had been intended to send a reply last week, but it was delayed in consequence of a verbal communication made by the Russian Ambassador to Lord Derby, requesting that the answer should be deferred until a further communication from him. The latter had not yet reached the Foreign Office, so no reply had been sent. In answer to Mr. Ashley, Mr. Potter, and Mr. O. Clery, Mr. Bourke said there was only one envoy from Abyssinia in Egypt, and that the Khedive had offered him a special train to Cairo, where he went, and had not since been heard of. With regard to the arrest of Major Barlow and Mr. Haughton, Major Barlow gave out that he was going to Abyssinia as generalissimo of the army, and Mr. Haughton said he was going to the same place as Premier. They were told by the Egyptian authorities that they could not be allowed to go to Abyssinia, and they were warned by our consul that they would go at their own risk. They did go, and were arrested. He could not say whether Major Barlow had been released, but it was probable that he had, as Mr. Haughton had been released. Mr. Bourke then informed Mr. Hanbury that her Majesty's Government had full confidence in Mr. Jocelyn, our Charge d'Affaires at Constantinople, but the Government were fully alive to the inconvenience that might be caused to British interests from the fact of an Ambassador not being at Constantinople, and it was not their intention that that state of things should continue for any length of time. In answer to a question put by Mr. K. Yorke, the Chancellor of the Exchequer said it was true that the Porte intended to reter the case of the 1851 Turkish Loan to the Turkish Parliament, and that they were unwilling to make arrangements with respect to it without the assent of their creditors, or under some judicial decision. The provision for the loan of 1845 was not such as was described in the question. It was simply promised by the Porte to make payments for that loan to the Bank of England. The consideration of the Exchequer Bills Bill was inaugurated by a financial statement of the Chancellor of the Exchequer in moving the second reading of the measure. The right hon. gentleman was good enough to inform the House that it was not his intention to apply for further powers, or to make any addition to the debt. He was, however, obliged to pay high interest, from 3 to 3½ per cent, as the bills were issued for long periods—a circumstance which deprived him of the advantage of the present low interest, which was otherwise to be obtained. He proposed to make such a change in future issues as would enable him to secure the advantages offered by the actual state of the market. After some discussion the bill was read the second time. The Valuation of Property Bill was the next lively subject brought under the notice of the House by Mr. Selater Booth, who moved its second reading; the object of it was to establish one general and uniform system of rating. In framing his measure he evinced a wish to disturb existing interests as little as possible, and he believed that the machinery provided by it would be found to be perfectly familiar to all local authorities, whilst, at the same time, it would effect a great saving in time, trouble, and expense. Mr. Hubbard insisted that no valuation could be satisfactory that did not provide in the valuation list a common authority and a common measure for the purposes of assessment, thus charging local rates and the Imperial taxes equally upon the net or rateable valuable of real property. A long and dreary discussion followed, the soporific effect of which on some of the really independent members of the House was at times sensibly illustrated.

The *Sheffield Telegraph* states that Mrs. Nellie Smith, an inmate of the almshouses, Ashby Parva, Leicestershire, died there recently, aged 103½ years, retaining her faculties to the last.

The reduction of 6½ per cent in colliers' wages in the South Yorkshire and North Derbyshire districts has been agreed to without a struggle. In other districts, where the employers demand a greater reduction, the dispute is pending.

At the March leather fair, concluded on Wednesday, at Bristol, there was a conference of tanners from all parts of the United Kingdom, and it was resolved to form a national society for the protection of the interests of the trade.

The council of the Royal Agricultural Society has adopted a resolution to the effect that nothing short of the prohibition of the importation of live stock from European ports will prevent contagious diseases among animals in Great Britain.

It is announced from Athens that the British squadron has been ordered to leave the Piræus to refit, preparatory to a summer cruise, political reasons no longer rendering the presence of the ships necessary in Eastern waters.

An exhibition of works of art of a miscellaneous character, but chiefly consisting of ancient and modern pictures of a high class, will be opened to the public at Manley Palace and Park, Manchester, on Saturday, March 17, being St. Patrick's Day. The collection comprises, also, a choice assortment of arms and armour, pottery, porcelain, &c.

The polling at Oldham, on Thursday week, resulted in the success of Mr. Hibbert, the Liberal candidate, for whom 9542 votes were recorded, against 8879 given to Colonel Lees, the Conservative candidate.—Sir H. Giffard, the Solicitor-General, was elected last Saturday for Launceston, in the place of Mr. Deakin, resigned. The learned gentleman was opposed, in the Liberal interest, by a son of Sir R. Collier, over whom he was returned by a majority of 118; the numbers being—Giffard, 392; Collier, 274.

THE CHURCH.

PREFERRMENTS AND APPOINTMENTS.

PENNY, P. D., Vicar of Newmarket, Flintshire, to be Vicar of Great Ness.
 POWELL, William; Vicar of Llangarfe, Breconshire.
 SELWYN, C. P., Curate of Ramsey; Rector of St. Thomas-at-Cliffe.
 EDWARDS, Daniel; Rector of Celn, near St. Asaph.
 EVANS, Daniel; Rector of Llanuwchlithel.
 EVANS, Thomas, Curate of Llanwddan; Rector of Catheline, Breconshire.
 GRIFFITH, Samuel Young Naylor; Vicar of Cumnor, Berks.
 HAMILTON, G. B.; Chaplain to the West Essex Militia.
 HENDRICK, C., Vicar of Huddersfield; Vicar of Wetherby, Yorkshire.
 JEFFREY, Tom; Rector of Partridgehoe.
 JONES, E. H., Curate of Lydiard; Rector of Fitz.
 KIRBY, C. O., Vicar of Great Ness; Vicar of Moreton.
 LEYD, Joseph; Perpetual Curate of Llanillwdd, Carmarthenshire.
 MACLUGH, George Edward; Rector of Casco, Radnorshire.
 MASON, A. W., Vicar of St. John's, Moulsham; Vicar of Dedham.
 PARSON, Arthur Cyril; Rector of Drayton Parlow, Bucks.
 PENWANE-WELLINGS, E.; Rural Dean Deanery of White Horse.
 ROBINSON, Arthur E.; Rector of Stockton, Warwickshire.
 THOMAS, David Richard; Vicar of Mafod.
 WILLIAMS, Basil; Perpetual Curate of Risca, Monmouthshire.
 WOOD, W. S. B.; Perpetual Curate of Bicknoller.—*Guardian*.

Lord Northbrook and Sir W. Muir have accepted the office of vice-presidents of the Church Missionary Society.

A rumour that a gentleman in Bristol had undertaken to give or get £25,000 for the proposed new bishopric of that city is contradicted on authority by the *Bristol Post*.

The Society for Promoting Christian Knowledge has granted a further sum of £1500 towards the endowment of the see of Nassau, and £180 to the St. Andrew's Waterside Mission at Gravesend.

The Rev. Dr. Doudney, Vicar of St. Luke's, Westminster, Bristol, has been presented with a testimonial of the value of £500, to which 1000 persons have subscribed, at the Young Men's Christian Institution, Aldersgate-street.

The Queen has subscribed to a fund for the restoration of the ancient parish church of Horton, Bucks, in the chancel of which lie the remains of one of the wives of John Milton. Her Majesty has also pecuniarily aided the rebuilding fund of Slough parish church.

Lord Galway, M.P., laid the foundation-stone of a village church near Retford, on Thursday week, and referred to the activity now being displayed by the Church of England, drawing the conclusion therefrom that both clergy and laity were fully alive to the demands of the present time.

Archdeacon Trollope writes to explain that the list of subscriptions to the proposed new Midland bishopric commenced with a sum of £500, presented by himself, which has since increased to £5500; so that he is now receiving subscriptions towards the second £5000, instead of £500, which he fully hopes will also be given promptly.

THE UNIVERSITIES AND PUBLIC SCHOOLS.

At Oxford, the Senior Mathematical Scholarship has been awarded to John Maximilian Dyer, B.A., Worcester. Proxime accessit—Thomas Bowman, B.A., late Scholar of Wadham. The Junior Mathematical Scholarship to Llewellyn Wansborough Jones, Postmaster of Merton. Proxime accessit—James Christopher Bowman, Scholar of Corpus, a brother of the above. The following distinguished themselves in the examination:—Senior Scholarship, J. R. White, B.A., Worcester; Junior Scholarship, A. W. Cave, Demy of Magdalen. The Radcliffe Travelling Fellowship has been awarded to George Coates, B.A., late Scholar of Balliol. Mr. Coates obtained a first class in Mathematical Moderations, Trinity Term, 1872, and a first class in Physical Science, Michaelmas Term, 1874. The Rev. W. W. Capes, Reader in Ancient History and formerly Fellow and Tutor of Queen's, has been appointed Fellow and Lecturer of Hertford.

Alfred Newton, M.A., F.R.S., Professor of Zoology and Comparative Anatomy, has been elected to a Fellowship at Magdalen, Cambridge; and F. M. Pore, B.A. (Second Class Natural Sciences Tripos, 1876), to a Scholarship. The members' prize for the Latin essay has been awarded to H. W. Simykinson, B.A., Scholar of St. John's. The Sedgwick Prize has been awarded to A. J. Jukes-Browne, of St. John's.

Mr. Theodore Thomas Gurney, B.A., Fellow of St. John's, Cambridge, has been elected Professor of Mathematics and Natural Philosophy at Sydney University, New South Wales.

THE MAGAZINES.

The event of the month in the magazine world is, of course, the appearance of the *Nineteenth Century*, an event to be hailed by all who discern the importance of maintaining a perfectly neutral ground for the free expression of contemporary thought. Under the circumstances, it is a sufficient compliment to Mr. Knowles's management to remark that, without its wrapper, the *Nineteenth Century* might very well be taken for an average number of the *Contemporary Review*. The distinction, if any, consists in the unusual muster of distinguished contributors, whose names, however, are not unfrequently the most effective parts of their contributions. Mr. Tennyson's sonnet is neither better nor worse than other sonnets written to order; Mr. Gladstone's vindication of the principle of authority in certain matters begs the question by assuming a consensus of opinion which does not in fact exist; Mr. Matthew Arnold cuts the ground from under his own feet by including Cromwell and Bunyan among the "Philistines," whom he strives to confound by the example of the amiable but inefficient Falkland. Cardinal Manning's paper on the Vatican Council (the first of an intended series) is of considerable importance as an official manifesto; so far, however, he has merely proved that the Pope took care to consult nobody of whose assent he did not feel certain. Sir John Lubbock's favourable and thoroughly just estimate of the general principles and tendencies of English policy is gratifying reading for an Englishman; and the charming Turkish stories translated by Mr. Ralston must delight even Russians. One of the most useful features of the periodical is the digest of recent science, revised by Professor Huxley, which contains, among other interesting matter, a report of experiments, strongly confirmatory of the theory of development, on the possibility of converting gill-breathing reptiles into lung-breathers.

Principal Tulloch's article in the *Contemporary Review*, on the progress of religious thought in Scotland, chiefly relates to the late abortive prosecution of Professor Robertson Smith, and evinces not a little excusable complacency at the inability of the Free Church to exorcise the spirit of rationalism with which she has so long reproached the Establishment. Mr. A. B. Lee's memoir of Spinoza is more likely to attract attention from the interest of the subject than from the talent of the writer. Mr. Buchanan's poem, "Balder the Beautiful," has fine and striking lines and great pictorial power, yet is at most upon the border between genuine poetry and clever art-manufacture. The redeeming trait is the element of Celtic mysticism—a curious but acceptable contrast to

Mr. Buchanan's dangerous facility of literary craftsmanship. Lady Verney's account of Sobieski's campaigns against the Turks is seasonable; and something may be learned from Mr. Bishop's theory of "the social methods" by which, according to him, Roman Catholic charities accomplish an amount of good disproportioned to their material resources.

The *Fortnightly Review* opens with another of Sir John Lubbock's charming entomological studies, the subject this time being the habits of ants. From a number of most interesting experiments Sir John has deduced numerous valuable inferences respecting the sagacity, industry, and social organisation of ants, which, if in some respects exaggerated by former observers, still appear sufficiently marvellous. Dr. Pattison's essay on "The Age of Reason" is an impartial presentment of the strong and weak points of the eighteenth century, called forth by Mr. Leslie Stephen's recent volume. Mr. Grant Duff enriches English literature with a selection from the acute and condensed aphorisms of Balhasar Gracian, a body of practical wisdom well meriting the admiration it received from Schopenhauer. The narrowness of Mr. Slagg's otherwise valuable paper on the French treaty, and its indifference to all aspects of foreign policy save the commercial, serve to explain, though they do not justify, that indifference on the part of statesmen to commercial men and interests of which Mr. Slagg complains. Mr. Lowe calls attention to the re-establishment of imprisonment for debt under a new form. The well-known views of Sir Fitzjames Stephen on codification, and of Captain Hayter on the question of officers' retirement, find expression in able articles; but undoubtedly the finest contribution to an unusually interesting number is Mr. Morley's nervous and masculine address to the Staffordshire miners, already reported by the press.

The miscellaneous contents of the *Cornhill* are particularly good this month, better than the serial stories, though Mr. Blackmore's fairly maintains its level. Very touching and also very picturesque is the Scandinavian tale of Nils Jensen, founded on the popular superstition that the person who rescues a man from drowning will afterwards be injured by him. "Chaucer's Love Poetry" draws attention to the enormous preponderance of poetry of this nature in Chaucer's writings, and the utterly unreal and fantastic character of the chivalric ideal expressed therein, so entirely dissimilar to the sane and sturdy naturalism of the "Canterbury Tales." "The Gospel of History" is a most amusing collection of anecdotes illustrative of the less dignified aspects of the character of distinguished personages; and "Turkish Ways and Turkish Women" is a sketch replete with traits of Ottoman customs and superstitions.

The most remarkable paper in a not very interesting number of *Macmillan* is one on "French Novels and French Life," by H. de Lagardie, explaining why French novelists are both unable and unwilling to paint society truthfully. Professor Goldwin Smith, in an essay on the late Presidential election, prophesies that the abuses and annoyances incidental to this operation will lead to the abolition of the office. Mr. W. G. F. Valgrave's description of Dominica is a fine, graphic piece of writing; and a sketch of Constantinople during the Conference is bright and lively. A notice of Kingsley is disappointingly slight; and Mr. Freeman's advocacy of the claim of Owens College to confer degrees, though making several effective points against Mr. Lowe, offers little to disarm the suspicion with which one regards any approximation to a lowering of the educational standard.

Blackwood contains but one contribution worth attention beyond the clever sequel of "Pauline," the current instalment of "A Woman-Hater," and the scholarly and chatty "Devious Rambles with a Definite Object." The exception is an essay on Balzac, from the same pen as that on George Sand in a recent number, and characterised by the same spirit of impartiality and large-minded fairness.

Fraser has a number of interesting papers, mostly of a grave cast. To this category belong Mr. F. W. Newman's defence of his old theory of the Lydian origin of the Etruscans, and Mr. Proctor's criticism of Professor Piazzi Smyth's theory of the Great Pyramid, mainly on the ground that the coincidences with natural facts which the Professor deems himself to have discovered are too extraordinary to be anything but the work of chance. A Chinese gentleman contributes a very fair and temperate review of the relations between his countrymen and Europeans; and Mr. W. Simpson discourses very pleasantly upon the peculiar position of Delhi as at once the symbol and the seat of Imperial sway in India. "Discipline in the Navy" is a valuable essay; and Dr. Carpenter's second lecture on mesmerism and allied phenomena contains many instructive narratives of the failures and exposure of somnambulists.

The Roman Catholic organ, the *Month*, has an interesting paper, by the Rev. J. Rickaby, on "Evolution and Involution," treating of the counter tendencies in nature to diversity through the multiplication of organs, and to unity through their simplification. "A Saint in Algeria," by Lady Herbert, shows how completely an English writer may acquire the mawkish style of modern French hagiology.

The most remarkable among the contents of the *Atlantic Monthly* are poetical contributions—a series of sonnets by Longfellow, and a poem on the Presidential election by Oliver Wendell Holmes.

"Miss Misanthrope" continues to delight the readers of the *Gentleman's Magazine*, and "Proud Maisie" does as much for the public of *London Society*. The latter story is acquiring a deeper and more pathetic interest, without detriment to its spirit and sparkle. The only other important contribution to these periodicals is Mr. Swinburne's "Sailing of the Swallow," in the former. This poem, a portion of the author's long-expected "Tristram and Iseult," is one of the most remarkable examples he has yet given of his prodigious opulence of diction and his ill-judged profusion in exhibiting it. Satisfaction soon becomes satiety, and satiety distaste.

Neither *Belgravia*, which betrays a marked falling off from the promise of the commencement of the new series, nor *Tinsley* contains any contributions of special mark. *Good Words* and the *Argonaut* supply, as usual, agreeable and instructive reading. We must further acknowledge All the Year Round, Chambers's Journal, the Charing Cross Magazine, Cassell's Magazine, the Churchman's Shilling Magazine, the Foreign Church Review, Golden Hours, Evening Hours, the New Monthly, the Cosmopolitan Critic, the Covent-Garden Magazine, Musical Times, Science Gossip, Englishwoman, Young Englishwoman, Milliner and Dressmaker, Men of Mark, Argosy, the Garden, Gardener's Magazine, and Leisure Hour.

The Act of 1875, fixing a permanent annual charge of 28 millions for the National Debt, has begun to show its effect. Although the amount allowed for 1876 was to be £300,000 less, the National Debt Commissioners report that in that year they purchased £514,488 stock with £488,221 cash received from the Exchequer. From and after March, 1877, the full annual sum of 28 millions becomes payable.

NATIONAL SPORTS.

In spite of the heavy state of the ground, which the dreadful weather of the past three months rendered it impossible to prevent, the first day of the Croydon Meeting was a brilliant success, about 15,000 people being present, including an unusual number of the aristocratic supporters of the turf. The interest excited by the Grand International Hurdle-Race was really extraordinary, and there was, probably, as much betting upon it as there will be upon the Lincolnshire Handicap. Broadside (10 st. 13 lb.) maintained his position of first favourite with unshaken firmness to the fall of the flag, and the feature of the betting at the finish was the advance of Scamp (11 st. 11 lb.) and Miss Lizzie (11 st.). The nineteen competitors were got off to a capital start at the first attempt; and, up to the last hurdle but one, Broadside, who had held a forward berth throughout, looked very formidable. Here he was in difficulties, and Sir Hugh (11 st. 11 lb.), who was running very well at the time, was knocked over. This accident left Woodcock (12 st. 4 lb.) with the lead; but, at the last jump, he began to tire, and Scamp, coming away full of running, won as he liked by eight lengths from Lottery (10 st. 13 lb.), who beat Woodcock for second place on sufferance. The victory of Sir John Astley was a wonderfully popular one, as Scamp has proved a very disappointing horse to him on the flat, and we believe that the Baronet backed him heavily on the strength of a highly favourable trial with Bridget. The remainder of the performances of the first two days were very weak, so we need only mention that Rufina secured a couple of events, and thus performed the feat of winning four races in five days. The weather on Wednesday was wretched, and the attendance naturally showed a great falling off.

The frost of last week threatened at one time to put a stop to the coursing at Ashdown; but, fortunately, the sun had sufficient power to soften the ground, and a heavy card was run through in the four days. In the Craven Cup two of the Waterloo candidates, Master Banrigh and Rondeletia, put in an appearance. The latter was defeated in the first round; but Master Banrigh went through the stake in grand style, and repeated his success of last year. Wreath, by Wellington—Druiders, who ran up to him, has plenty of speed and cleverness; but Master Banrigh was able to lead her, and evidently ran into the last eight for the Waterloo Cup by sheer merit. The Uttington Stakes, for dog puppies, was divided between B. F., by Sir Charles—Saddle, and Bayonet, by Brigade Major—Blush; and the Ashdown Stakes, for puppies of the opposite sex, fell to Eastern Question, by Blairgowrie—Fowl Killer, who beat British Queen, by Cressus—Merry Sherwood, in the final spin. Hares ran very well, and afforded some splendid trials; while Mr. Wentworth and Nailard pleased everyone by their judging and slipping respectively.

The great American billiard tournament, promoted by Messrs. Burroughes and Watts, which was played at the Gaiety Restaurant, Strand, resulted, last Tuesday, in the victory of F. Shorter, to whose brilliant play we drew marked attention last week. Each player had to take part in seven games, and Shorter won six, Joseph Bennett being a good second with five. Then came Taylor, Stanley, and F. Bennett, who scored four each; while Cook and Timbrell only won twice, Kilkenny bringing up the rear with a solitary victory. Oddly enough, Shorter made six breaks of upwards of one hundred, and Taylor, Stanley, and F. Bennett each exceeded the same number four times. Shorter's half-dozen comprised 121, 295, 165, 130, 152, and 118, and, as no less than four of these were unfinished, it is impossible to say what he might have made had he been playing 1000 up. Neither the champion nor Kilkenny has been well lately, and both were thoroughly out of form; but, with these exceptions, the play was wonderfully good all round—so good, in fact, that we fancy the table was an easy one. F. Bennett won his last four games off the reel in dashing style, and, but for being short of practice at the commencement, might have done even better. Timbrell's usual London luck stuck to him, for though he put together such breaks as 149, 141, 150, and 132, Cook and Taylor were the only ones to succumb to him. Among such brilliant players these short heats are far too much a matter of luck; and we are glad to hear that Cook contemplates getting up a handicap with heats of 1000 up, which, though it would take a fortnight to play, would be far more trustworthy.

The Cambridge crew arrived on Monday at their old quarters at Putney.

At Cambridge, on Saturday, Mr. J. Gibb, of the London Athletic Club, ran three miles in 14 min. 46 sec., in competition on the University athletic field.

The Oxford University cue has been won by T. B. Howard (Magdalen), who beat C. E. L. Lucas (Christ Church) in the final heat of 500 up, by 92 points. These two gentlemen will, therefore, play for Oxford, against D. D. Pontifex and M. J. Surkies, in the inter-University matches, which are to take place at Oxford this year.

An equestrian portrait of the Hon. Francis Scott, the retiring master of the Surrey Union Foxhounds, by Sir Francis Grant, was presented to him, on Wednesday afternoon, in the Public Hall, Guildford. The presentation was made by Colonel Marshall, in the presence of a distinguished company.

An article in the *Times* calls attention to a difficulty which married women often feel in endorsing cheques. When a draught is payable to "Mrs. John Smith," the proper form is "Jane Smith, wife of John Smith." But the Christian name of the endorsee should appear on the face of the document.

The fifth annual collection of the workpeople in the various manufactories and workshops of Birmingham in behalf of the medical charities took place last Saturday afternoon. Nearly £2100 was paid into the joint fund, but this sum will be considerably increased during the present week, as a great many workshops had not sent in their contributions.

A gentleman presented himself at Windsor Castle, on Wednesday, and informed the officials in attendance that he had come to marry Princess Beatrice. The police, who are accustomed to such visitors, volunteered to show him the estate, and then drove him to the workhouse at Old Windsor, where they left him in charge of the authorities.

Captain Burnaby arrived at Erzerum on the 7th ult., after a long and very hard march through deep snow and over very high mountains, his route being by Ismid, Angora, Yuzgat, Tokat, and Sivas, from which latter place he made a detour by Arabkir and Egin to Erzingan, and thence to Erzerum. He writes that he has visited Circassian, Tartar, Kurd, Turkoman, Armenian, and Greek villages, besides the Turkish; and he has had a fair opportunity of learning the actual state of affairs in that cut-of-the-way part of the world. He says that things at Erzerum look very warlike, and everyone believes war imminent. He purposed to leave Erzerum on the following week, and proceed to Van, a twelve days' march over the mountains. From Van he intended to make his way through Bayazid, Kars, and Ardahan to Batoum.

WILD BULL SHOOTING IN THE GALAPAGOS ISLANDS.

SPORT IN THE GALAPAGOS.

We are indebted to Captain W. R. Kennedy, R.N., who commanded H.M.S. Reindeer on the Pacific station, for a sketch of the Galapagos Islands and of wild-bull shooting there. The Galapagos are a group of islands lying directly on the Equator, in the Pacific Ocean, 10 deg. west of South America. They belong to the Republic of Ecuador. These islands are mountainous and barren, except on the higher parts, where there is plenty of vegetation. They are of volcanic origin, and extinct craters may be seen on some of them. On Albemarle Island, the largest of the group, there is a volcano, said to be in active operation. Quantities of terrapin, or land tortoise, and of iguanas, are to be found on most of the islands; and the waters abound with fish, turtle, and seals. At the time of our correspondent's visit, with H.M.S. Reindeer, in 1872, there were a few people living on Charles Island, employed in collecting orchilla weed, and looking after the interests of Señor Val de San, who rents the islands from the Government of Ecuador. There are about 2000 head of wild cattle on this island. These animals were originally introduced by the Spaniards, at the time of the Conquest of Peru, since which time they have increased wonderfully. The bulls are very savage, and if wounded will immediately charge. The accompanying sketch represents a bull in the act of charging, after having received a ball behind the shoulder. Fortunately, a well-directed shot between the eyes gave him the coup de grace at ten yards' distance. A second fine bull already lay dead close by. A brace of bulls before breakfast is by no means "a bad bag."

THE LATE MR. JOHN OXFORD.

THE LATE MR. JOHN OXFORD.

We have recorded the death of this accomplished literary man, who had been well known in London, during more than thirty years, as theatrical critic for the leading daily journal, and as the author of several dramatic compositions, as well as of many translations, essays, and reviews, upon subjects of literary or philological scholarship. He was born in London, in the year 1812, and was brought up for a lawyer; but his decided taste and talent for the pursuits of literature led to an early change of occupation; and it is only just to bear testimony, in which all his contemporaries will agree, to the high intelligence, the courtesy, the good taste and liberality, with which his responsible duty of reporting and commenting upon theatrical performances was invariably discharged. His adaptations of French and German plays to the English stage were remarkably skilful and suitable to the national habits of mind, as well as to the capabilities of London actors; and he had studied the principles of dramatic art, as laid down by such writers as the Germans, Lessing, Goethe, Schiller, and Schlegel, more profoundly than is usual with the majority of our countrymen. It is to be regretted, indeed, that Mr. Oxenford wrote no substantial and original work of permanent critical discussion or exposition.

The Portrait is from a photograph by the London Stereoscopic Company.

Three steamers, which arrived at Liverpool on Monday from America, brought 4485 quarters of beef and 430 carcasses of sheep—the largest consignment that has reached this country on one day.

THE CATHEDRAL (TRINITY CHURCH), SHANGHAI.

FURNITURE.

New ILLUSTRATED CATALOGUE containing the Price of Every Article required, post-free. MAPLE and CO., 145, Tottenham-court-road, London.

BED-ROOM FURNITURE.

100 Suites of various designs in stock, from 45 to 200 guineas. MAPLE and CO., 145, Tottenham-court-road, London.

CARPETS.

British and Foreign, of every description. 500 Pieces best Brussels, old patterns, 3s. 6d. per yard. MAPLE and CO., 145, Tottenham-court-road, London.

CRETONNE CHINTZ.

Just received from Mulhouse, a Manufacturer's Stock of about 1000 Pieces, at prices varying from 10d. per yard. These goods are about half the price they were. MAPLE and CO., 145, Tottenham-court-road, London.

SILK DAMASKS.

The largest and most varied assortment at old prices. Satins, Silks, and all the latest fashions in stock. MAPLE and CO., 145, Tottenham-court-road, London.

LEWIN CRAWCOUR and CO.,

COMPLETE HOUSE FURNISHERS, 71, 73, and 75, Brompton-road, London (established 1810). Their stock is one of the largest in the kingdom, and arranged in numerous show-rooms, some of colossal extent and of grand effect. Inspection invited. Travellers sent to any part of the kingdom to submit estimates and designs and take instructions.

success of this fruit-lozenge, to accustom to take and universally prescribed by the Faculty, for constipation, headache, indigestion, &c. &c. In all cases containing drastic irritants are being foisted on the public. The genuine preparation bears the title "Tamar Indien." E. GRILLON, Coleman-street, London, E.C. 2s. 6d. per Box.

THE MEDICAL PROFESSION throughout

the world have given their unqualified approval of the wonderful and beneficial effects of

"ALLCOCK'S POROUS PLASTERS"

in BRONCHITIS, SCIATICA, LUMBAGO, RHEUMATISM, ASTHMA,

and severe coughs, and in all local pains and affections; but beware of the imitations. See the stamp of every plaster has "Thos. Allcock and Co. Porous Plaster" thereon, and do not buy any without it. Sold by all Patent Medicine Vendors.

"FOR THE BLOOD IS THE LIFE."

CLARKE'S WORLD-FAMED BLOOD

MIXTURE is warranted to cleanse the Blood from all impurities, from whatever cause arising. For Scrofula, Eczema, Skin and Blood Diseases, its effects are marvellous. In Boils, 2s. 6d. each, and in Cases containing six times the quantity, 11s. each, of all Chemists. Sent to any address for 30 or 150 stamps, by the Proprietor, F. J. CLARKE, Chemist, Lincoln.

COUGHS.—Cough is an effort of nature to get rid of a superfluity.

THE LONDON COUGH CURE.—A

preparation strictly in accordance with the British Pharmacopoeia, effectually arrests the direful consequences of Coughs and Colds by softening and healing the coatings of those delicate parts of the throat and chest, stimulating and assisting in a gentle manner the displacement of the aggravating cause of every Cough—congested phlegm or corrosive mucus.—BUTLER and CRISP, Cheapside; Hooper, King William-street; Sanger and Sons, 120, Oxford-street, W. Small Bottles, 1s. 1d.

LAMPLOUGH'S PYRETIC SALINE.

Have it in your houses and use no other. This alone is the true Antidote in Fevers, Eruptive Affections, Sea or Bilious sickness, having peculiar and exclusive merits. For the proper use of the medicine, and the effects of the medicine, have applied for and again obtained a perpetual injunction, with costs, against the defendant. Observe the genuine has my Name and Trade Mark on a Buff-Coloured Wrapper.—118, Holborn-hill, London.

HOLLOWAY'S PILLS and OINTMENT.

The Pills purify the blood, correct all disorders of the Liver, stomach, kidneys, and bowels. The Ointment is unrivalled in the cure of bad legs, old wounds, gout, and rheumatism.

COUGHS, ASTHMA, BRONCHITIS

Medical Testimony states that no other medicine is so effectual in the cure of these dangerous maladies as KEATING'S COUGH LOZENGES. One Lozenge given three or four times a day ensures rest. Sold by all Chemists, in Boxes, at 1s. 1d. and 2s. 6d. They contain no opium or preparation thereof.

Regent-street and Moorg

STATUE OF PROFESSOR FARADAY.

On June 21, 1869, a public meeting was held at the Royal Institution of Great Britain, Albemarle-street, at which many eminent persons were present, and the Prince of Wales was in the chair. The object of that meeting was to do honour to the memory of one then lately deceased, whose name was most distinguished among the English scientific men of our age; we allude to the late Professor Faraday. Appropriate speeches were made by General Sabine, M. Dumas, Sir Henry Holland, Sir Roderick Murchison, Professor Owen, Dr. Lyon Playfair, Dr. Bence Jones, and Professor Tyndall; and it was resolved that measures should be taken to provide a public monument of Faraday, and that subscriptions of not more than five guineas from one person should be received for the purpose. The required funds being speedily subscribed, the committee resolved that the memorial should be a statue, and that Mr. J. H. Foley, R.A., should be the sculptor. The late Mr. Foley zealously devoted himself to the work, preparing first a very careful sketch model, afterwards executing an admirable bust, as his study for the head of the statue. But in consequence of Mr. Foley's failing health and his many other important engagements, the full-sized model was not far advanced at the time of his lamented death, on Aug. 27, 1874. In accordance with his wishes, the work has been completed and executed in marble by his principal assistant, Mr. Brock. The statue is now in the hall of the Royal Institution, which is perhaps the most suitable place for it, since it was in the Royal Institution laboratory that Michael Faraday pursued his fruitful researches and made his important discoveries. The Institution was also his hospitable home for upwards of fifty years; and it is still a meeting-place for the foremost workers in science of every nation, as it was in his lifetime. The statue represents Faraday in the gown of a Doctor of Civil Law of Oxford, holding in his hand the coil from which the first magneto-electric spark was elicited. It is universally admired as a work of art, and as a faithful likeness of the great philosopher.

NEW GUN-BOATS FOR THE CHINESE GOVERNMENT.

Our illustration represents one of four gun-boats recently constructed in this country for the Chinese Government, under the orders of Mr. Hart, the Inspector-General of Customs, through his representative, Mr. J. D. Campbell. These vessels have been designed by Mr. George Rendel, of Sir W. G. Armstrong and Co.'s firm, and are a development of the well-known Staunch

STATUE OF PROFESSOR FARADAY IN THE HALL OF THE ROYAL INSTITUTION.

type of gun-boat, designed by Mr. Rendel for the British Admiralty. They are prototypes of an important class of war-vessels, the value of which may be as yet but faintly appreciated. They are named after the first four letters of the Greek alphabet, the Alpha, Beta, Gamma, and Delta.

Two of the four Chinese gun-boats carry each a 26½-ton Armstrong gun, and are now in China, having made their long voyage, with armaments complete on board, ready for action, and with perfect comfort and safety; the two others, one of which our Engraving represents, carry each a 12-in. 38-ton Armstrong gun, firing projectiles of 800 lb., with charges of 130 lb. of powder. These two guns are the most powerful guns yet afloat, and can penetrate 19½ in. of armour. Besides the great guns, the gun-boats carry two Armstrong 12-pounders and a Gatling gun; yet they are only 115 ft. long and 30 ft. broad, and their draught is but 8 ft., and the freeboard 3 ft. Their displacement is 400 tons. Their engines have 270 horse power, and drive them, by means of twin screws, over nine knots per hour. They are schooner-rigged and tripod-masted, and carry coals sufficient to steam at their full speed for seven days of twenty-four hours.

The enormous guns are mounted and worked wholly by hydraulic machinery, and the captain of the vessel, standing in a splinter-proof cabin just behind the gun, can aim it and work and fire it, at the same time, steering the vessel and regulating its speed. The full complement consists of thirty men. The vessels have been tested and inspected under trial off the Tyne, and also off Portsmouth, by the chief technical authorities connected with the defences of the country by sea and land. The Chinese Ambassador and suite have also visited them, and the Envoy worked and fired the great gun at sea with his own hand.

There is no question as to the importance of these small but powerful sea hornets, and we ought to be grateful to the Chinese Government for the opportunity given to us of learning their value. With this view the Admiralty has given leave to officers on the active list to take charge of the vessels to China. Commander Lang, R.N., has charge of one gun-boat, and Commander Ching takes the other. Lieutenants Hopkins, Yonge, and Powell, also from the active list of the Navy, are associated with the commanders.

The order for the gun-boats was placed by Mr. Hart unreservedly in the hands of Sir W. G. Armstrong and Co. The Elswick firm intrusted the building of the hulls to Messrs. Mitchell and Co., of the Tyne, and of the engines to Messrs. Thompson, of Newcastle. The armament and the hydraulic engines and machinery they themselves supplied.

THE THIRTY-EIGHT TON GUN-BOAT DELTA, FOR THE CHINESE GOVERNMENT.

NEW BOOKS.

Curiosity, rather than any higher feeling, is likely to be excited by the title of *Shakspeare from an American Point of View*, by George Wilkes (Sampson Low and Co.), in case there should have at last appeared an author of sufficient originality to dispute the truth contained in Lord Verisopht's famous expression of opinion—"Shakspeare! Ah! he was a clayver man." Until somebody is found to maintain the contrary of that proposition it will not be astonishing if the general impression should be that enough, and even more than enough, has already been written, if not read, about Shakspeare and all that is known and unknown about him. However, it has seemed good to an American author to write yet another large volume upon what, it would appear, must be considered an inexhaustible subject, and nevertheless to move in the old groove, so far as admission of the divine poet's "clayverness" is concerned. Mr. Wilkes combines with an "American view" of Shakspeare "an inquiry as to his religious faith and his knowledge of law," as well as a consideration of the "Baconian theory"—the theory, that is, which attributes the authorship of the Shakspearean plays to Francis Bacon, Lord Verulam. As regards the "Baconian theory," it will probably be sufficient for most persons of common sense to reflect that, whatever we may or may not know about Shakspeare, we know that he wrote plays, and that we are about as certain as we can be, on trustworthy testimony, about anything that, at the very time when jealousy would have heard and caught up the faintest whisper respecting the doubtfulness of his authorship, he was never suspected in the slightest degree of sailing under false colours; that of the plays he was known to have written some, at any rate, are undoubtedly identical with what have come down to us under his name; and that, if Bacon could have done all he did and written all he wrote as well as all that Shakspeare is currently supposed to have written, then the days must have been more than twenty-four hours long in the time of Queen Elizabeth. Our author, however, goes into a most elaborate refutation of the theory, a refutation which it is now open to anybody who pleases to investigate, though it would be tedious and would require too much space to enter upon any of the details here. Suffice it to say that the author has evidently spared neither time nor pains, and has displayed considerable patience as well as ingenuity. Closely connected—in the author's opinion, at least—with the question, whether Shakspeare or Bacon was the author of the plays generally attributed to the former, is another question, whether Shakspeare was a Romanist or a Protestant. This matter, again, is argued out with much circumstance and some acuteness, though to the majority of readers it may appear to be of little or no importance. The author considers that the writer of Shakspeare's plays was almost certainly a Romanist, and could not, therefore, have been Bacon. Nor does the author think that Bacon could possibly have committed and exhibited the legal errors and deficiencies which the writer of Shakspeare's plays is represented to have committed and exhibited. On the whole, then, the author seems to have established to his perfect satisfaction that Shakspeare wrote the plays which bear that name, was a Romanist in religion, was not a lawyer, and was as different from Bacon as chalk from cheese. The author, like Lord Verisopht, considers Shakspeare to have been a "clayver" man—a mighty genius, indeed; but, unfortunately, a falsifier of history, a contemner of the poor, a hater of republican or even liberal sentiments, and a servile worshipper of rank. The book will appear less dreary, no doubt, to some persons than to others; but to all, probably, the best parts of it will seem to be the many long quotations from Shakspeare's plays.

A gentleman who has "traversed several parts of Iceland concerning which nothing has hitherto been known" needs not to speak of "venturing" to publish his experiences, in these days, when all the world is agog to hear of some new place; one is only too glad to welcome such books as *Across the Vatna Jökull*, by William Lord Watts (Longmans), if, indeed, it contains, as it professes to contain, "a description of hitherto unknown regions." There is no intention here of calling in question the profession; the only intention here is to describe the contents of the book, in order that competent persons, personally acquainted with Iceland, may be able to decide how far the author is to be regarded in the light of an original discoverer, or, rather, of a first investigator. Starting, of course, from Reykjavik, the adventurous traveller made for and in due time arrived at Eyraðakki, "one of the principal trading stations in the south of Iceland." With occasional stoppages at places with outlandish names, which it would be mere waste of space and a trial of temper and type to print, he journeyed "past the ice-cliffs of Eyjafjalla Jökull," "over the arid waste of Myrdals Sandr," along by "the beautiful waterfall of Seljalandsfoss," and ultimately reached Núpstad, whence, after various more or less necessary delays and expeditions, preparations for the journey across the Vatna "commenced in earnest." And, in the end, the feat was fully accomplished, the author and his Icelandic comrades and henchmen having "travelled from Núpstad, in the south of the island, to Grimstadir, in the north, a distance of about 270 miles, in sixteen days, twelve of which had been passed amongst the regions of perpetual snow." No wonder the author's Icelandic companions were "in high spirits at having fairly reached the Nordurland by a route which had never before been trodden by the foot of man since their island first rose above the waters of the North Atlantic—a feat that would immortalise their names in local Icelandic history." This achievement has been carried out by the time the reader is well landed in the middle of the seventy-second page; but there are about one hundred and twenty additional pages, inclusive of an appendix, crammed with matters which cannot fail to engross the earnest attention of those persons, those very many persons, who find a charm in travels, or accounts of travels, performed under all sorts of difficulties in out-of-the-way regions, in blazing heat, and especially in piercing cold, amid ice and snow, in the teeth of winds that cut to the bone and in spite of dust that blinds the eyes, by adventurous, indomitable explorers wearing "an abdominal bandage of tarred cloth," and suffering excruciating agonies from a frost-bitten great toe. Such tales of such prowess never lack, and, it is to be hoped, never will lack, sympathetic readers among us; and they are the better appreciated when, as in the present instance, the narrative is helped out and embellished with maps, illustrations, and index.

Not the least remarkable among the many remarkable facts set forth in the interesting volume entitled *The Discoveries of Prince Henry the Navigator, and their Results*: by Richard Henry Major, F.S.A. (Sampson Low and Co.), is the following, which will be found at p. 208:—"In Rome Lopes recounted, by command of the Pope, to Felipa Pigafetta, his Holiness's chamberlain, all that he had learned from his countrymen during the nine years he had been in Africa (1578-87), and this narrative, under the title of 'Description of the Kingdom of Congo,' was published by Pigafetta, at Rome, in 1591, 4to. In this rare work is a map, of which a reduction is annexed, showing that the two great equatorial lakes, Victoria Nyanza and Albert Nyanza, with their possible southern feeder, Lake Tanganyika, the positive existence of which has only been made

known to us in recent years by our noble explorers, Burton, Speke and Grant, Sir Samuel Baker, &c., were actually laid down and described from information gathered in Africa by a Portuguese three hundred years ago." But somebody may ask, "Who was Prince Henry the Navigator? To answer that he 'was the very initiator of continuous Atlantic exploration' would not, perhaps, let in much light upon the darkness of the inquirer. Well, then, Prince Henry, more correctly styled Dom Henrique, was the fifth child and fourth son of King João I., of Portugal, and was born in Oporto March 4, 1394. But he had good English blood in his veins, the blood of the nation to whom it has been given to rule the waves and to become most famous among those who go down to the sea in ships, for his mother was Queen Philippa, daughter of John of Gaunt, "time-honoured Lancaster," so that he was nephew of our Henry IV., and great-grandson of our Edward III. He was called the Navigator at a time when the invention of railways had not yet led to the depreciation of the term, and he derived his appellation from the persistency with which, through good report and evil report, with small success and with many failures—failures which would have broken the heart of men cast in a different mould—he sent out and watched over, from his self-chosen "abode on the inhospitable promontory of Sagres, at the extreme south-western angle of Europe," expedition after expedition to search for undiscovered worlds whereof the existence had been revealed to his prophetic soul and established by study and reflection to the satisfaction of his far-seeing intelligence. The feeling which predominated in the man is best indicated by the motto he adopted, "Talent de bien faire." It is not often that a Prince can be described as he has been. "He was large of frame and brawny, and stout and strong of limb. His naturally fair complexion had by constant toil and exposure become dark. . . . Stout of heart and keen in intellect, he was extraordinarily ambitious of achieving great deeds. Neither luxury nor avarice ever found a home with him. In the former respect he was so temperate that after his early youth he abstained from wine altogether, while the whole of his life was reputed to have been passed in inviolate chastity. . . . He never entertained hatred or ill-will towards any. . . . His heart never knew what fear was, except the fear of committing sin." Of him it cannot be said that the evil which he did—for mere man must do some—lives after him, and that the good has been interred with his bones. It is true that he merely sowed and watered, or very little more, and that the full fruits of his pains did not appear until after his death; but the record of what he did has at last been faithfully and sympathetically computed, with, it may be, something of amplification and hyperbole, so far as the pages devoted to the results traced to his initiative are concerned. The volume has an appendix, an index, portraits, and other illustrations, including maps. The author had already, in 1868, published a "Life of Prince Henry," but of that, which was a work of a somewhat controversial kind, only "a very small number of copies were printed." The present volume is "free from all controversial matter," and "the reader who seeks for evidence" is referred to "the earlier publication," the author having purposely confined himself in his later and more popular work to "the narrative simply of the adventures which gave glory to the life of Prince Henry, and opened up the two hemispheres to the knowledge of mankind at large."

That it is possible for a work to be full of stirring incident and yet devoid of any strong interest is a statement which should not be condemned as paradoxical until acquaintance has been made with the freely illustrated and handsome volume entitled *Michael Strogoff, the Courier of the Czar*, by Jules Verne (Sampson Low and Co.), translated, most appropriately, from the French by Mr. W. H. G. Kingston, the purveyor of wholesome, though exciting, literature to the honourable body of British youth, never to be satiated with tales of adventure. Maps, showing the route taken by Michael Strogoff, the courier, give an air of verisimilitude to the narrative, and intermingle geographical instruction with bare entertainment. The reason why there was any tale at all to tell about the courier is to be traced to an insurrection in Siberia, and to the consequent interruption of telegraphic communication between the Czar, at Moscow, and his brother, the Grand Duke, at Irkutsk. A courier, therefore, is required to carry a despatch between the Imperial brothers; and Michael Strogoff, a man of ten thousand, is chosen to perform the perilous feat. Perilous and trying it was indeed: he had to pass through a rebellious country, swarming with Tartars, whose interest it was to intercept his despatch; he had to visit his native town, where it was his duty to deny the mother whom he loved and who recognised him; he had to measure wits with the traitor who had concocted the rebellion; he had to experience, as will be actually seen in the graphic illustrations, no less than read in the vigorous text, more hairbreadth 'scapes than were the lot of the veteran Othello. But, more happy than the veteran Othello, he had his Desdemona to share with him most of his risks, and the demon of jealousy seems never to have crept into his heart. The story is, for the most part, tragic; but we know that "comedy lurks in the chinks of tragedy," and the comic parts of the drama are performed by two "special correspondents," one English and the other French, in whose persons the enterprise of modern journalism is good-humouredly satirised. To the narrative of Michael Strogoff's adventures is added a short piece entitled "The Mutineers," which is "a romance of Mexico," wherein one Martinez, a mutineer, a traitor, and a murderer, meets as horrible a death as the most relentless of British boys could possibly desire or expect. The plentiful illustrations are sure to be highly appreciated, representing, as some of them do, situations of the most thrilling description and many a ghastly scene of violence.

The congratulatory is the proper spirit in which to approach the sixth volume, concluding *The Dramatic Works of Molière*, rendered into English by Henri Van Laun (Edinburgh: William Paterson), for a long and laborious task has been accomplished, and, from certain points of view, very satisfactorily accomplished. It would not be easy, for instance, to speak too highly of the services which the translator has rendered as a pioneer, an investigator, an illuminator, a commentator, a collator; and of the illustrative etchings, supplied by M. de Lalauze, it were unpardonable not to speak in terms of commendation and admiration. As regards the translation, too, considered merely as a translation, an opinion already expressed may be emphatically repeated: it is likely to be found of immense value and of great assistance as a work to be kept constantly at the elbow of anybody who may enter upon a serious study, or even a flighty perusal of the original. That the translator, however, has succeeded in turning out such an English version as could be used either for actual representation upon the stage or for comfortable reading in the closet cannot be very confidently asserted; there is a noticeable stiffness, if not baldness, in the dialogue. The translator is by no means happy in his rendering of the titles; indeed, he seems to have considered the matter hopeless, and to have contented himself with a literal version, at the risk of introducing, sometimes, a formality of which there is no trace in the original, and which is anything but a good preparative for comedy. For

example, to render "Les Femmes Savantes" by "The Learned Ladies" is to adopt the language of the severe governess and the demure boarding-school miss and to damp a reader's spirits at the very outset. For this reason the French titles will be preserved in enumerating the plays contained in this sixth and last volume:—they are "Les Fourberies de Scapin," "La Comtesse d'Escarbagnas," "Les Femmes Savantes," "Le Malade Imaginaire," "La Jalouse du Barbouillé," and "Le Médecin Volant," and in every case there are either some useful introductory notice or supplementary appendix, or both. The appendix is especially acceptable, for in it the translator collects specimens of the forced loans which English playwrights have extorted from Molière. It is a little curious that the translator should have been obliged to betake himself to a foot-note in order to explain, in "Les Femmes Savantes," that "je avons" is the gross blunder committed by one of the characters and totally missed in the English version, though such expressions as "I hasn't got none" are, and always have been, common enough among our ignorant and careless talkers, and were ready to hand as quite a fair equivalent.

Excellent service has undoubtedly been done by the publication of *Astronomical Myths*, by John F. Blake (Macmillan and Co.), a book which is based upon M. Flammarion's popular work called the "History of the Heavens." What with alterations and additions, due in no small degree to the researches of Mr. Halburton, the English volume here under consideration is justly described as "not exactly a translation, but rather a book founded on the French author's work." And it will be generally allowed that sound judgment has been displayed in abandoning the tiresome style of the original, which was "written in the form of conversations between the members of an imaginary party at the seaside." Of this style most English readers must have very depressing reminiscences, recollecting how often their attention has been drawn off the main purpose of what should have been a most interesting book, by vague desires of remonstrating with "mamma" upon the obtuseness of her moral reflections and of taking some precocious young prig, such as "little Harry," into some convenient place and administering a sound thrashing. Of the ornamental and instructive illustrations it must suffice to say generally that they are of all kinds, remarkably numerous, and wonderfully effective. How interesting and how extensive in scope the volume is, a brief summary will make perfectly evident. Astronomy is traced back to its first beginnings; and then several pages are devoted to the "astronomy of the Celts." The "origin of the constellations" is afterwards made the subject of discourse. A chapter is subsequently consecrated to "the zodiac," and another to "the Pleiades," followed by a dissertation upon "the nature and structure of the heavens according to the ancients." The fascinating theme of "celestial harmony," wherein "Jupiter and Saturn sing bass, Mars takes the tenor, the Earth and Venus are contralto, and Mercury is soprano," next engages the reader's attention. And the other subjects, handled in order, are "astronomical systems," "the terrestrial world of the ancients—cosmography and geography," "cosmography and geography of the Church," "legendary worlds of the Middle Ages," "eclipses and comets," the "greatness and the fall of astrology," "time and the calendar," and "the end of the world." As regards the last, it may be worth while to mention that the destruction of our globe has been periodically expected and predicted from at any rate the time of Bernard of Thuringia, who fixed it for A.D. 1000, to that of Dr. Cumming, who, unless the whispers of memory be delusive, has been more than once equally at fault. For the comfort and reassurance of those many persons who always suspect comets of having sinister designs against the earth, it may be advisable to quote from page 355 the following remark:—"There is reason to believe that on June 29, 1861, the earth remained several hours in the tail of a comet without having experienced the slightest inconvenience." To conclude, it is bare justice to state that a more desirable book, from very many points of view, seldom appeals to the public for such favour as should be accorded to the higher forms of popular literature.

We lately announced a very pleasing instance both of the personal kindness and intelligent discrimination of our gracious Queen, and of the beneficent power of a skilful literary presentment to recommend a really meritorious subject. *The Life of a Scotch Naturalist*, by Dr. S. Smiles (published by Mr. Murray), had come into the hands of that illustrious lady; and her Majesty had been so much interested in the heroic struggle of Thomas Edward, the poor shoemaker of Banff, in his solitary pursuit of knowledge, that she granted him a pension to supply the actual wants of his old age. We have read Dr. Smiles's book with equal gratification, and so will everybody who can appreciate genuine moral worth and strength of character, queer touches of native humour, plenty of surprising and amusing adventures, picturesque bits of seacoast or rustic landscape, odd figures of the neighbour-folk, with their blunt sayings and homely ways of living, and much curious local history in the north-eastern parts of Scotland. Dr. Smiles is certainly the best of all popular biographers for dealing with a subject of this kind; and we like this last narrative he has given us almost better than the more important "Life of George Stephenson," or those of the other great engineers. Its personal interest is not so mixed up with the progress of large public concerns and undertakings, but is sustained entirely by the single-minded devotion of one earnest man to go on with the work that Nature had appointed him to do in her loving service, despite the severest hardships, checks, privations, and disappointments, which would have broken the heart of a mere enthusiast; but he was a hero, and a sort of martyr. The stories of his childhood and early youth, of the trouble he gave his father and mother and school-teachers, by running off as a truant, and filling his pockets with strange "beasties" collected from the fields, the ditches, or the sea-beach, are told with excellent humour. Thomas Edward's apprenticeship at Aberdeen, his work at the Grandholm spinning-mills, and then his laborious explorations of the north coast of Aberdeenshire and Banffshire, and of the Moray Firth, for specimens of the marine fauna, the extensive zoological collections he made, his attempt to get up a paying exhibition of them, and the poverty which he endured many years with such a manly spirit, still working for the support of his wife and family, are well related in this biography. It should be an example of patient courage to all who have life-long difficulties to contend with, though we should be sorry to provoke every precocious boy-naturalist to indulge in such vagaries, to the huge disturbance of household comfort, if not to the neglect of more needful business. The volume is adorned with about fifty illustrations, one of which, the portrait of Thomas Edward, is a very fine etching by Rajon; the others, designed by Mr. George Reid, and executed on wood by Messrs. J. W. Whymper and J. D. Cooper, are mostly views of local scenery, and some of them beautiful. The scientific student of zoology will find much deserving of his notice in the precise account of the mammals, birds, fishes, and crustacea of Banffshire appended to this interesting personal memoir.

MUSIC.

MR. HENRY LESLIE'S CHOIR.

We last week referred briefly to the opening of the twenty-second season of these concerts, which took place on the Friday evening. The first portion of the programme consisted entirely of sacred music, the remainder of the selection having comprised madrigals, part-songs, and other secular pieces. In the former division of the concert, the chief specialty was the grand motet by Bach, for double choir, "Sing ye to the Lord," which was given for the first time here. This noble composition is one of many such pieces, composed, without accompaniment, for performance by the pupils of the Thomas-Schule, at Leipzig, of which institution Bach was Cantor. The motet referred to is one of the most masterly in construction, and grand in effect, of any such works, even by the same composer. It is throughout characterised by sublimity of style; while the final movement offers an admirable specimen of that skill in fugal writing which Bach possessed in a transcendent degree. It is one of the most difficult pieces of its class, and the performance served to show the rare efficiency to which Mr. Leslie has brought his choristers by long and laborious training. The motet will no doubt prove a permanent feature in Mr. Leslie's programmes. Other fine performances at the concert referred to were those of Palestrina's motet "Exaltabo Te," Mozart's "Ave verum," old madrigals by Benet, Fesca, and Morley, and modern part-songs by Pearsall, Leslie, Mendelssohn, &c.

Miss De Fonblanque made her first appearance in London, and displayed a mezzo-soprano voice of very agreeable quality and extensive compass in her two solos "Fac ut portem" (from Rossini's "Stabat Mater") and "O mio Fernando" (from Donizetti's "La Favorita"). Miss Robertson (who recently sang with much success at the Crystal Palace) made her first appearance at these concerts, and was greatly applauded in her execution of an ultra-florid aria (Sciogli l'inno Dei Profeti), from Graun's "Der Tod Jesu," and still more after her execution of the bravura valse aria from Gounod's "Mireille," which had to be repeated. Miss Robertson has a brilliant soprano voice, of ample compass, and she has much executive facility, which, however, requires some further training to render her secure in such elaborate difficulties as some of those offered by Graun's aria.

Mr. Lloyd was the other solo vocalist, and gave, with great effect, the tenor aria "Cujus animam," from Rossini's "Stabat Mater;" a new song, "Always," by Mr. Leslie; and Gounod's "Maid of Athens."

Throughout the evening the refined singing of the choir, the precision, good intonation, and admirably-contrasted gradations of power were as conspicuous as heretofore.

Mr. Leslie conducted, as usual, and Mr. J. G. Callcott and Mr. J. C. Ward again presided, respectively, at the pianoforte and the harmonium.

The next concert takes place on March 20.

Madame Schumann was again the pianist at the Popular Concert of Saturday afternoon, when she played the principal part in her husband's fine pianoforte quintet in E flat, and, as her solo performance, Bach's "Pastorale" in F and prelude and fugue in E minor, originally composed for the organ. The latter piece was encored, and replaced by one of Robert Schumann's pedal studies. Brahms's string quartet was repeated—the executants having been, as at its recent first performance, MM. Joachim, L. Ries, Straus, and Piatti. Mlle. Friedlander was the vocalist, and Sir J. Benedict the accompanist.—At the concert of Monday evening that sterling classical pianist, Mr. Franklin Taylor, appeared, and played, with excellent mechanism and style, Beethoven's solo sonata in E flat, op. 7, besides having sustained the principal part in Mendelssohn's third pianoforte quartet (in B minor), in association with MM. Joachim, Straus, and Piatti; these three artists, with Mr. L. Ries, having given a fine performance of Beethoven's first "Rasumowsky" quartet (in F), which opened the concert. The other item of the programme was the set of "Liebeslieder Walzer," by Brahms, which were heard for the third time here. The principal portion, for pianoforte duet, was played by Mlle. Marie Krebs and Miss Agnes Zimmermann; the ad libitum voice parts having been assigned to Mlle. Sophie Löwe, Miss Helene Armin, Mr. Shakespeare, and Mr. Pyatt.

The London Ballad Concert of last week brought forward two new songs, "Thomas and Roses," by Adams, and "A little mountain lad," by Roeckel—the former sung by Mr. Maybrick, the latter by Madame Lemmens-Sherrington. Besides these artists, Mesdames Antoinette Sterling and Enriquez, Mr. Sims Reeves, Mr. E. Lloyd, Mr. Beckett, and Mr. Thornton contributed performances of more or less familiar vocal pieces. Mr. Reeves was encored in both his songs, "My pretty Jane" and "Good-by, sweetheart." Madame Arabella Goddard played some pianoforte solos with brilliant effect.—The programme of this week's concert offered a selection of similar interest and variety. But two more performances remain to complete the eleventh series.

Seventeen of the twenty-first series of Crystal Palace Saturday Concerts have now been given. The programme of last Saturday included a fine concerto for stringed instruments by Bach, Beethoven's eighth symphony (in F), Mendelssohn's "Serenade and Allegro Gioioso," for pianoforte with orchestra, the solo portion finely played by Miss Josephine Lawrence; and the late Mr. Alfred Holmes's overture to "Inez de Castro." The orchestral performances were as excellent as usual. Vocal pieces were contributed by Miss Robertson and Mr. E. Lloyd.

Mr. Charles Deffel's opera, "The Corsair," was brought out at the Royal Aquarium Theatre, on Saturday afternoon, for the first time there. The work, however, had been previously given at the Crystal Palace, so that brief notice may now suffice. The principal character—that of Gulnare—was admirably sustained by Madame Blanche Cole, who drew forth much applause in several instances, particularly in the "Slumber Song." Miss Cora Stuart was the representative of Medora, whose music she gave with nice feeling, particularly the solo, "Deep in my soul." Mr. Dudley Thomas, as Conrad, appeared to far greater advantage as a singer than as an actor. His scene in the prison scene was very successfully delivered, and the duet with Gulnare, at the beginning of the third act, was another of the effective pieces of the evening, as were the banquet scene, with its concerted music and interspersed ballet action, and the chorus of sailors on board the pirate ship. The opera has been well placed on the stage, and the orchestra and chorus, conducted by M. Dubois, are efficient.

The last of the three quartet concerts given by Mr. Carrodus and Mr. E. Howell, at Langham Hall, took place on Tuesday evening, when the selection included Rheinberger's pianoforte quartet in E flat, with Mr. Dannreuther as pianist; Beethoven's string quartet in F (No. 1 of op. 59); a pianoforte solo of Chopin's, executed by Mr. Dannreuther; Mendelssohn's "Romance," for violoncello, by Mr. E. Howell; and other pieces. Madame Rose Hersée was the vocalist.

A recital was given, on Wednesday afternoon, at St. George's Hall, by the eminent harpist, Mr. F. Chatterton.

On Thursday the honorary degree of Doctor of Music was conferred on Herr Joachim by the University of Cambridge, and the day's proceedings were supplemented by an evening concert, at which a new overture, composed by the great violinist for the occasion, was to be produced; in addition to which, the programme promised the first performance in England of Herr Brahms's new symphony. Of these, and the other proceedings of the day, we must speak next week.

The second concert of the new season of the Philharmonic Society took place on Thursday evening. The programme included Beethoven's eighth symphony (in F), Mendelssohn's overture to "Ruy Blas," Mr. J. F. Barnett's orchestral piece illustrative of "The Lay of the Last Minstrel," and Robert Schumann's pianoforte concerto played by Madame Schumann.

"Elijah" was performed on Thursday evening at the Royal Albert Hall, conducted by Mr. William Carter, and with the co-operation of the choir formed and directed by that gentleman. The solo vocalists announced were Mesdames Lemmens-Sherrington and Patey, Misses Julian and Warwick, Mr. E. Lloyd, Messrs. Bennett and Winter, and Signor Foli.

A performance of Mendelssohn's music to "Antigone" is to be given this (Saturday) evening, in the new concert-room of the Royal Academy of Music, for the benefit of the St. John's Hospital for Skin Diseases.

On Thursday next Bach's "Passion Music" (St. Matthew) is to be given by the Royal Albert Hall Choral Society, conducted by Mr. Barnby. Miss Anna Williams, Madame Antoinette Sterling, Mr. Cummings, Mr. Kempton, and Mr. Thurley Beale are announced as the solo vocalists.

Previous to Madame Arabella Goddard's approaching departure for Paris she will give a pianoforte recital at St. James's Hall, on March 23.

Bach's Mass in B minor—produced for the first time in England last year—is to be repeated at St. James's Hall on April 11; and on the 25th of the month the same composer's sacred cantata, "Ein feste Burg ist unser Gott," will be given. Mr. Otto Goldschmidt will conduct both performances.

Miss Madelena Cronin announces two pianoforte recitals at the New Concert-Room, Royal Academy of Music, Tenterden-street, Hanover-square, next Tuesday evening, March 13, and Thursday evening, April 26.

THEATRES.

GLOBE.

The new drama, "Cora," to which we alluded last week, is an adaptation of Adolphe Belot's "L'Article 47," produced at the Ambigu Comique nearly six years ago. The original play is in five acts; and its title refers to an article in the French penal code which assigns a limited number of specified towns for the residence of returned convicts, an infringement of which law is punishable with re-transportation. In the English version the play is compressed into three acts and a prologue, the trial in the first act being entirely omitted. Further alterations or amendments have been made to meet the requirements of an English audience; and Messrs. W. G. Wills and Frank Marshall are entitled to much praise for the skillful manner in which they have performed their task. The scene is laid chiefly in Paris, and the action is supposed to take place during the Second Empire in France and before the abolition of slavery in the United States. Cora de Lille, the child of slave parents, though herself a free woman, arrived at Havre from New Orleans, in company with George du Hamel, a French gentleman of good family, he having previously promised, immediately on their arrival in France, to conduct her to his mother's house, and there present her as his destined wife. Untoward events interfere with the fulfilment of this promise, and, in a moment of ungovernable passion and mad jealousy, the hero presents a loaded pistol and fires at his betrothed. So ends the prologue. Eight years have elapsed when the curtain again rises. Cora is disfigured for life, and George, upon the lady's testimony, who has declined to suppress her evidence, has been sentenced to five years' penal servitude, which term of degradation has expired, and he living under an assumed name with his mother in Paris. Notwithstanding this terrible vengeance wreaked upon him, Cora still cherishes for her former lover a passionate attachment. In her nature love and hate are so near akin, it is difficult to discover the line of demarcation. But George has a new love. He has become enamoured of Marcelle, the daughter of the Comte de Rives, who reciprocates his passion, and to whom he is soon to be united. Failing at her means of subsistence, Cora has become mistress of a gambling-house, where she has been placed by one Victor Mazillier, the lady's ardent admirer, who has several times made her a tender of his hand, and been rejected. Hither, on discovering his attachment to Marcelle, Cora, now known as Madame de Champs, forces the reluctant George, threatening, should he refuse to obey her, to reveal his true position to the lady's father. This gentleman is ignorant that his intended son-in-law is a returned convict. Finding she cannot recover his lost love, our heroine is beset with conflicting emotions, and finally goes raving mad, having previously written a letter to the police, which places George under the regulation of "L'Article 47" of the penal code. The last act shows the repentance and death of Cora, and the reunion of the lovers. Such is the story as presented in the English version. It is open to some objections; but, upon the whole, presents us with a powerful and effective drama. The success of the play owes much to the acting of Mrs. Hermann Vezin, who appears in the title rôle of Cora, and exhibits a display of emotional power and passionate declamation that tells with electrical effect upon the audience. The different phases of feeling through which the heroine passes; the love more terrible than hate; the revenge, the jealousy, the varying phases of mental anguish, that lead to the final overthrow of reason; the better resolutions—all these are finely depicted, and secure for the actress at the termination a complete triumph. Mr. Fernandez, as George du Hamel, though somewhat demonstrative, is, upon the whole, effective. Mr. E. Leathes gives a very artistic rendering of Victor Mazillier, and Mr. Burridge, as a philanthropic mad doctor, is deserving of encomium. Mr. W. H. Stephens is a judicious Comte de Rives, and Miss Telbin, as Marcelle, acts with naïveté and feeling. The audience, upon the first night, were more than usually demonstrative.

At the Adelphi, the withdrawal of the "Shaughraun" has been immediately followed by a revival of the "Colleen Bawn." The popularity of this drama is never on the wane, and its reproduction at stated periods is sure to meet with a hearty recognition from the public. The part of Miles-na-Coppaleen finds an able exponent in Mr. Charles Sullivan, who has achieved a complete mastery of the Irish brogue, and whose style is peculiarly adapted to the display of rich Hibernian humour. Eily O'Connor is charmingly represented by Miss

Hudspeth, and Mr. Shiel Barry gives a graphic impersonation of Danny Mann. The other characters are efficiently rendered.

Mr. and Mrs. Kendal have inaugurated, at the Gaiety, a series of three matinées with Bulwer Lytton's play of "The Lady of Lyons." The lady infused considerable pathos into the character of the haughty Pauline, in every varying phrase of emotion exhibiting marked contrasts, and always retaining her hold upon the sympathies of the audience. The Claude Melnotte of Mr. Kendal is also an impersonation of great merit. The house was well attended, and the performance more than usually successful.

On the occasion of the annual benefit of Mr. G. W. Moore, the popular comedian of the Moore-Burgess troupe at St. James's Hall, on Tuesday, many eminent artists co-operated in the carrying out of an exceedingly attractive programme. There were two performances.

MUSICAL PUBLICATIONS.

"Night," by Franz Abt, is a very effective setting of some expressive lines by the late Mr. John Oxenford. Herr Abt has long held a position as one of the most successful song-composers of the day, and the production now referred to is worthy of his reputation. The melody, while simple, is well marked, and lies within moderate compass. It is published by Messrs. Boosey and Co., who have also just issued the very characteristic "Dance of Almas," from Mr. F. H. Cowen's dramatic cantata, "The Corsair." Of the success of this work—composed for and produced at last year's Birmingham Festival—we spoke at the time. The extract just specified is arranged as a pianoforte solo.

Among the several cheap musical serials published by Messrs. Boosey and Co. is their *Sacred Musical Cabinet*, issued in shilling numbers. The twenty-fourth part contains Mr. Henry Smart's fifty preludes and interludes for the organ, a collection of movements of special value to the organist, professional or amateur, and particularly calculated for use in the Church service. No. 25 of the work just mentioned comprises Bach's hundred chorales for organ or harmonium—a rich store of grand old Lutheran Church tunes, as arranged by one of the greatest masters of harmony.

"The Lion Flag of England" (C. Boosey and Co.) is an effective setting, by H. Mackenzie, of some vigorous lines by the well-known Devonshire postman-poet, Edward Capern. There is a bold, national tone about the piece which is well suited to a singer possessing declamatory power.

THE CARNIVAL AT ATHENS.

The carnival in the Greek Church lasts two weeks and includes three Sundays. Balls and gaiety prevail as the rule during this time, but on Sundays an outdoor manifestation takes place in the form of a masquerade, and the last Sunday is considered as the bouquet at the end. The throwing of sweetmeats does not seem to be a part of the ceremony in Greece, as it is in Italy. Those who can afford it drive about in carriages, the less wealthy hire a cart, while greater numbers of all classes walk through the streets, in whatever style of costume they may have selected. It pleases the children to consider themselves as maskers, and many of them may be seen going about in every kind of bright colours attended by their parents or nurses. A tendency to appear in the costumes of foreign countries is strongly manifested, among which the negro is common; but the Turk, and, at times, his wife, seems to be a favourite character. Perhaps the present interest in the Eastern Question may have something to do with this affectation. A very large turban seems to be the usual idea of perfection as to the headdress of a Turk, though in European Turkey it is seldom worn. A very gigantic turban, however, was to be seen, on Sunday week, in the streets of Athens. It figures in the scene which has been sketched by our Special Artist, Mr. W. Simpson. Some assumed the aspect of animals, and one man walked on stilts, with a bird's beak for his nose, while the feathers made a shape not unlike the crest of a helmet over his head. Among this motley throng were many Greeks wearing what is now considered to be their national costume, and which is to be seen every day in the streets at Athens; but on Sunday this seemed to be a part of the masquerading attire. The men wore embroidered waistcoats, full shirt-sleeves, hanging down like the lawn sleeves of a bishop, kilts or short petticoats of stiff linen, tight leggings, and skull-caps. Our experiences of fancy-dress balls at home, where such dresses are not uncommon, may have helped to preserve the idea that these also were maskers, in fancy garments like the others. The windows and balconies were crowded with people looking out at what was going on. The mass of people in the streets was very good natured and well behaved, and everything went off in the best of temper. At sunset the crowd disappeared from the streets, but the evening was spent in parties, generally with dancing indoors. There seemed to be no ladies with masks on in the streets. The next day, Monday, was a holiday, which is understood to be a day of purification for Lent, that sacred season being thus begun. Shops were shut, and the inhabitants went out in parties to the country, and to picnic in groups upon the hills. Lent is very strictly kept by the Greek Church; even butter is among the articles of food forbidden to be used. We regret to say, however, that one person, at least, among the Carnival Sunday masqueraders was seen next day in no befitting condition of mind and body. This was a rollicking, popular humorist of the town, who had put on the classic helmet of the princely Agamemnon, King of Mycenæ, making a little fun of Dr. Schliemann's recent discoveries there. What would Therites have said to have seen Agamemnon reeling drunk? Yet we cannot suppose that everyone among these ancient heroes stopped the pouring into cups when they had "taken away the desire of drinking and eating." In the quarrel between Achilles and Agamemnon, the former of those leaders of the Greeks calls the latter a "wine-bibber." Wine could not have been a scarce article amongst those who were besieging Troy; for Homer states, at the end of the seventh book, that the son of Jason brought from Lemnos a thousand measures of wine as a gift to Agamemnon and Menelaus. It was disposed of for brass and "shining iron," which has been quoted as the first instance of barter on record; and on this occasion the Greeks, according to Homer, made a carouse, which lasted through the whole night. The next book begins by describing the "saffron-mantled morn" diffusing itself, but not a word about the heads of the feasting Greeks. Achilles's accusation of "wine-bibber," spoken in anger, does not count for much; but Dr. Schliemann's great find of what are supposed to be Agamemnon's relics contains, amongst other articles, golden goblets and gold-handled mugs, which are very suggestive of having been raised to the lips and being drained of their contents. The carnival of the present day is supposed by some to be only a continuation of the saturnalia, or, perhaps, of the Dionysia—this being more properly the Greek festival; and it is thought that the masks and acting of various kinds in the carnival have come down in modified forms from the older customs.

THE CARNIVAL AT ATHENS.
FROM A SKETCH BY OUR SPECIAL ARTIST.

THE RUSSIAN FRONTIER IN THE CAUCASUS.

MESTYE, IN INDEPENDENT SWANNETY.

VALLEY OF THE INGOUR, IN THE COMMUNE OF KALA.

THE RUSSIAN FRONTIER IN THE CAUCASUS.

The wildest and most untameable among the mountaineers of the Caucasus are the so-called "Independent Swanny," who occupy the upper valley of the river Ingour, a district often named Swannety or Suanetia, in what is probably the most inaccessible part of the highlands between the Black Sea and the Caspian. It is open to communication only during three months of the year, the passes being at other times completely obstructed by snow. In the spring of 1875 the Swanny were secretly excited by the native nobles to resist the territorial survey of their country, which had been ordered by the Russian Government. This was opposed under the pretext that land was to be wrested from them and given to Russians, by whom in course of time their district would be peopled. The people consequently flew to arms, guarded the passes, and provoked to hostilities, though unsuccessfully, the garrison of one hundred men quartered at a place called Betcho. But a strong force under General Tzytovytch, although it did not subdue the Swanny, compelled them to lay aside their arms. Through the personal exertions of the military chief of the district, Colonel Hrinewsky, seventeen of the ringleaders were apprehended with very little trouble, recourse being had to arms for the capture of one man only, who had fortified himself in his tower, and defied the Russian force. In the following summer, that of last year, Hrinewsky proceeded into Swannety to arrest two other ringleaders of the previous year who had evaded seizure. Having entered the village, Kalde, in the commune of Kala, in which they were concealed, and where they were assured of protection by their brethren, he demanded that they should be given up to him. The natives bared their daggers, and threatened to cut him and his attendants to pieces on the spot should he persist in claiming them. With the hundred men from Betcho, whose assistance he had summoned, he made a demonstration against the village, after having ridden fearlessly into it by himself to summon, for the last time, the offenders to surrender. The appearance of the troops unhappily had the effect of exasperating the lawless Swanny, who, ensconced in their unassailable defences, continued to dare the chief and the officers of the detachment. A conflict ensued, in which the major in command and several of his men lost their lives, and many others were wounded, the mountaineers still declaring their determination to kill every Russian officer, as well as the chief of the district. In the absence of artillery, the troops were powerless to punish the revolters, and the troops prepared to leave Kalde, not being in any way molested by the Swanny, who merely sought the lives of the leading officers. Yielding to the repeated entreaties of three or four of the villagers, who had sworn to protect him and to conduct him that night in safety beyond their limits, Hrinewsky suffered himself, with the surgeon and his servant, to be taken to a hut, which, soon after dark, was attacked by a band of resolute men. The assailants, failing to obtain admittance, stripped off a part of the roof and fired their rifles into it, killing the chief and his companions. These sad events were succeeded, a few days later, by the appearance before Kalde of 900 men, under General Tzytovytch, who destroyed the village by razing it to the ground, after having removed the women and children and made a number of prisoners. The trial of the latter, by military tribunal, took place at Koitais, the chief town of Imeritia, two or three months ago, when four of the murderers were sentenced to the gallows, and others to various terms of imprisonment, with hard labour, in Siberia. It is doubtful, however, whether the executions will be carried out, an appeal for clemency having been made to the Emperor, whose aversion to capital punishment is well known.

The best account of Swannety and the Swanny people will be found in a book recently published by Messrs. H. S. King and Co., "The Crimea and Transcaucasia," by Commander J. Buchan Telfer, R.N., who has obliged us with the two sketches. The author was kindly invited by Colonel Hrinewsky, when at Koutais, to accompany him and his staff and family in a tour of official inspection through the districts of Letchgoumm and Swannety. He describes the ride over the Latspy range of mountain, which separates the valley of the Tshenys-tzkalye, a tributary of the Rion or Phasis, from that of the Ingour. The narrow path wound up the flanks of the mountain, at first through a wilderness of magnificent shrubs and wild flowers; then by short and steep zigzags along the west side, overlooking abysses several thousand feet deep, their bottom hidden beneath airy vapours. As the ascent continued the vegetation grew scantier, but still there were tall tiger-lilies growing in profusion; they halted in the midst of rocks and downs covered with creeping rhododendron; at last they reached the summit of Latspy, marked by a small cairn in the middle of a grassy plateau, the adjoining nooks and hollows exposed to the north being spread with snow.

"We pushed on, and soon began the descent in a northerly direction. The eye here overlooked awful depths, unrelieved by tree or shrub; brow follows upon brow, and brink succeeds to brink, as the path, in some parts barely practicable, winds along the head of numerous glens, the offshoots of a mighty valley; and when we got to the end of an arête, we obtained our first sight of the upper valley of the Ingour. To the right, far away, lay the commune of Oushkoul, and to our left that of Kala, where we arrived in the evening, after a steep descent through the most lovely shrubberies and a flora richer and more varied than we had yet seen. We had to cross the Moushour torrent and the Ingour, before getting to Kala; and, on a plot between the two streams, the Priestav of Swannety, attended by his interpreter and escort, was waiting to conduct the Chief to the small village of Lalhory, above the left bank of the Kalpety, a watercourse between the villages of Moucouadar and Davberr. The little hut occupied by the Chief and myself was about 15 ft. square, with a real muddy floor; but we soon got comfortably settled; and after a good fire had been kindled a circle was formed around it, and when pipes were lit and the Cossacks began to sing, we looked a well-satisfied party."

Commander Telfer proceeds to describe the business of next day, the election of communal elders, magistrates, and assistants, for Kala and Oushkoul, followed by a rude and barbarous war-dance at the bidding of their Prince, whose name is Tenghyz Dadyshkylyany, ruling the native population of Swannety on the Ingour. He is a giant of a man, standing 6 ft. 7 in. high, and large and robust in proportion; he wore the uniform of a lieutenant in the Russian army. The author then relates his further journey, by way of Ypary and Moulachy, into the so-called "Independent" districts of Swannety; one of the villages inhabited by the Swanny is shown in the sketch engraved. He observes, "The most striking feature in the upper valley of the Ingour is the number of square towers, seen to the greatest advantage in the village of Ypary, where many are grouped in a comparatively small space. These towers, fully 60 ft. in height, are solidly constructed of stone, and divided into five floors of one chamber each, every chamber except the topmost being somewhat higher from floor to ceiling than the one below it. They are from eleven to thirteen feet square, the walls being 3 ft. 6 in. in thickness, and

only dimly lighted by means of small loopholes. The wooden floors are reached through corner hatches by means of notched logs; and the sloping roof, also of timber, projects slightly beyond the wall, leaving space for pointing rifles almost at an angle, and for throwing projectiles and employing other defensive measures. The sole access to a tower is through an entrance 15 ft. more or less above the ground, having in front a small wooden platform that communicates with the adjoining cottage, in which the family live, by means of a plank extending to an opening in its roof; in some instances a rope ladder reaches from the floor to the ground. A habitation in Swannety usually consists of one large windowless apartment, in which the family lives, with its cows, dogs, and poultry; meat is cooked and bread baked over heated slabs, the smoke of the fire escaping through an opening in the roof, by which the only light is admitted. We observed that many such habitations in the country were tenantless and deserted. When a family is under the ban of vengeance from a superior force the cottage is abandoned, and refuge is sought in the tower with chattels and provisions; the plank and platform are removed, and the refugees become liable to siege till they are willing to treat; or a single member may have cause to flee from his enemies, in which case also communication is cut off, and the fugitive has to depend on his friends for supplies. The towers in this part of Swannety resemble each other in every respect. They stand isolated, which is not the case in Letchgoumm and Mingrelia. They are the receptacles for the huntsman's trophies, the walls on every floor being decorated with the horns and jawbones of the deer and the wild goat, strung up by scores, many now blackened and rotting from decay, but the treasured heirlooms of several generations."

We are reminded by this description of the Scottish Border "peels," familiar to the readers of "The Monastery" and other Waverley novels; a perfect specimen of which may be seen in Smallholm Tower, near Kelso, and another in Newark Tower, Bowhill Park, on the Ettrick, above Selkirk. As an example of the habits of a wild and lawless country, in a state not much unlike that of Tweedside or Teviotdale three or four centuries ago, there is some historical interest in these village fortifications of the Caucasian mountaineers.

ROYAL INSTITUTION LECTURES.

THEORY OF MUSIC—SCALES AND MODES.

Dr. W. Pole, F.R.S., in his third lecture on the Theory of Music, on Thursday week, resumed his examination of the musical scales by stating that, though Pythagoras discovered the diatonic scale mechanically by dividing a stretched string, it was not independently of natural principles, since the main division of the scale into octaves must have been apparent to untaught ears. Thus, when a woman or a boy imitated a melody sung by a man, the tune would be an octave higher, and would so blend with it as to be almost undistinguishable. There is also some evidence for the fifth being a natural suggestion; the other divisions were more artificial. The ancient modes were next explained. In the best times of Greece vocal music was accompanied by an eight-stringed lyre, and there were seven different series of seven notes each, termed modes, having different names, such as Lydian, Phrygian, and Dorian, in which melodies were written. One of these, a well-authenticated hymn to the muse Calliope, Dr. Pole sang and played. Ambrose, in adopting the Greek music in the early Church, used only four of the Greek modes; other four, on a somewhat different principle, were afterwards added by Gregory; and about his time it became the practice to attach more importance to one particular note of the scale of each mode. As harmony was introduced, the modern form of tonality was ultimately developed. This reacted upon the modes; and, as some of these were found more suitable for harmonic treatment, the intractable ones died out, and eventually only two remained—the modern major and minor, both which had been rejected by the Church. Our present major mode was the original Lydian, adopted by the troubadours and minstrels; and our minor was another ancient Greek secular mode. Harmony also reacted upon the theory of the diatonic scale. The use of several sounds used simultaneously rendered it necessary that their harmonic relations should be more carefully considered, and that every note of the scale should bear a definite harmonic relation to other notes, and to the tonic in particular; and this has led to the modification of the third from the Pythagorean interval. The theory of the chromatic scale was next discussed. The well-known incorrectness of the pianoforte arrangement in having one black key to express two chromatic notes (such as G sharp and A flat) was adverted to, as well as the disagreement of musicians in regard to the exact position the chromatic notes should occupy—a most difficult problem to settle, which was submitted to scientific consideration. Dr. Pole explained how the large number of notes in the octave required for true intonation can be readily obtained by the voice and by the violin tribe of instruments; while on keyed instruments the great difficulty has been met by the compromise of dividing the octave into twelve equal semitones—the arrangement now in use—termed temperament. Among the illustrations were specimens of Mozart's melodies, with and without their chromatic embellishments.

THE HISTORY OF BIRDS.

Professor Huxley, LL.D., F.R.S., who gave the discourse at the Friday evening meeting on the 2nd inst., began by asserting the identity of the methods of antiquarian and geological investigation, the arguments respecting the discovery of Roman pavements in London being of precisely the same character as those for the existence of that very ancient bird, the archæopteryx. He then noticed the apparent uniformity of mineral nature during the time occupied by the deposition of the stratified rocks of the earth's crust, such as gravel, clay, and chalk; and the evidence respecting the early physical geography, showing it to have been of the same nature as now, but differently distributed; for instance, the discovery of turtles, palms, &c., at the mouth of the Thames demonstrates the existence at one time of a West Indian climate. The divergence of the forms of living nature for the same duration is apparently great; yet of all the remarkable relics of animals discovered in ancient strata anatomy has proved that there is none which does not fall into one of the great divisions now established. The variation from living forms on examination turns out to be consistent with fundamental unity of organisation. In regard to the question as to the nature of the variation within the limits of a group, which can only be determined by investigating facts, Professor Huxley proceeded to give some results of the study of the class of birds, which he defined as "warm-blooded feathered flying bipeds," having special characteristics, found in no other vertebrate animal—viz., feathers (analogous but widely different to hair), wings or fore limbs, with structure unlike anything else in the living world; a very much modified pelvic arch, and very peculiar hind limbs. In the great variety of habits and external appearance in living birds, such as the ostrich, the vulture, the pigeon, the penguin, and the humming-bird, this uniformity of organisation exists; there is no departure from the typical structure. The examination of the

quaternary and tertiary strata as far as the oolitic has not led to the discovery of any sensible deviation from the essential characters of birds. In 1861, however, there were found in the slate of Solenhafen, first, a fossil feather, and afterwards other remains of the archæopteryx, a bird whose structure somewhat approximated to that of a reptile, as may be seen in the British Museum; and more recently, in mesozoic strata, the odontopteryx was discovered, with processes not teeth, but resembling them. But the greatest modification of bird-structure has been the recent discovery, in the neighbourhood of the Rocky Mountains, in North America, of an immense amount of animal remains, amongst which, in cretaceous strata, Professor Marsh found two kinds of birds, the hesperornis regalis and the ichthyornis—the former somewhat resembling the grebe, about 6 ft. high, with great hind limbs, and teeth set in grooves; the latter a small pigeon-like bird, with teeth in sockets. The marked distinction between birds and other vertebrate is thus lost, and palæontologists are therefore led again to investigate the striking resemblances in the structure of the archæopteryx and reptiles, and to study the problem whether reptiles passed into birds or birds merged into reptiles. The recent evidence merely shows that, in regard to structure, the two classes overlap each other. In conclusion, Professor Huxley referred to his lecture in 1868, when he showed that, in past times, birds existed more like reptiles, and at the same time reptiles more like birds, than any now living.

ENGLAND AFTER THE FRENCH REVOLUTION.

Professor Henry Morley, in his second lecture, on Saturday last, after some remarks upon the influence of English freedom in leading to the French Revolution, noticed Montesquieu's "Esprit des Loix," published after visiting England, and Rousseau's reply to it as a futile attempt to reform old things; whereas his method was to destroy them and to make all new. This "Rejuvenescence" was the principle of the French National Assembly in 1789. It desired to constitute society afresh, upon a new ideal liberty—defined "as everyone doing the best he could for himself, without injuring his neighbour." This led to a great conflict of opinion in England. The spirits of the younger men, such as Wordsworth, Coleridge, and Montgomery, disturbed at the evils existing in society, were stirred with hope, while the older men were alarmed at the new doctrines, and regarded them with aversion or detestation. Burke's severe "Reflections on the Revolution in France," published in 1790, had many replies; the chief being Mackintosh's "Vindicia Gallica" in 1791, his first great work. Burke, as Professor Morley showed by reading extracts, though greatly sympathising with political and religious freedom, which he specially manifested in his proposal for settling the dispute with the American colonies, was yet essentially conservative in dealing with abuses, ever looking to expediency. He said, "I must see the things; I must see the men. Without concurrence and adaptation of these to the design, the very best speculative projects might become not only useless, but mischievous." This, the experience of age, was sound truth; but so also was the opinion of the youthful Mackintosh in defence of the ideal, when he said, "Who will be hardy enough to assert that a better constitution is not attainable than any which has hitherto appeared?" The error in France was the endeavour to attain the ideal by ideal means. After a brief sketch of the life of Thomas Paine (1737—1802), the Professor showed that in his "Rights of Man," Paine merely reasserted the best principles of the National Assembly, claiming no more freedom than he actually possessed. In the latter part of the lecture Professor Morley commented on the emotional and sentimental side of the French Revolution, so frequently arising in the midst of revolting cruelty; and he also alluded to the deleterious effects of some of the German literature of the period (such as Goethe's "Sorrows of Werter" and Schiller's "Robbers," and the plays of Kotzebue and Iffland), more especially in relation to the marriage contract.

THE MUSCULAR SYSTEM.

Professor A. H. Garrod, M.A., F.R.S., began his eighth lecture on the Human Form and its Structure in relation to its Contour, on Tuesday last, by additional remarks on the mechanism of the upper limbs, pointing out how through indolence in using the trapezius muscle, the habit of stooping is contracted, and how this defect may be remedied as shown by drilling soldiers. He next alluded to the injuries consequent upon the excessive use of certain muscles, such as the inflammation excited in the synovial membranes by too much pianoforte practice. After further commenting upon the interesting mechanism of the hand, the Professor proceeded to describe in detail the important muscles of the trunk and the lower limbs, referring to a great statue of the "Fighting Gladiator," large diagrams, and models. He specially commented on the well-known massive tendo Achillis, formed by the union of two powerful muscles, the gastrocnemius and the soleus. When stretched, as in dancing, this tendon is sometimes broken, but the injury is thoroughly repaired in a little time by the formation of a new tendon. After comparing our feet with those of anthropoid apes, who have neither our apparatus for walking, nor our motives for it, the Professor explained the advantages of having our heels somewhat raised, as we thereby relieve the muscles of the feet and ankles in walking, by bringing other muscles into play; but the use of high heels is too frequently carried to excess.

Dr. James Bryce will, at the next Friday evening meeting, on the 16th inst., give a discourse on Armenia and Ararat.

A paper on "Maritime Warfare" was read at the United Service Institution, yesterday week, by Mr. Donald Currie. He advocated the necessity for an extended and more complete system of telegraphic communication with our various colonies and the Indian Empire, and the establishment of graving-docks and coaling-stations wherever our men-of-war were in the custom of calling. Sir Garnet Wolseley, who presided, said it would be very easy in time of war to stop communication with India by means of the Red Sea, and that, therefore, a telegraphic connection should be established with the East by means of our various colonies on the West Coast of Africa.

At the forty-ninth anniversary meeting of the Royal United Service Institution, which was held last Saturday, the gold medal was presented to Captain J. Ross, of the Coldstream Guards, the winner of the prize essay on the Causes which have led to the Pre-eminence of Nations in War, given by the institution as their prize for the past year. A satisfactory report of the society's doings during the past year was presented. Mr. Gathorne Hardy, M.P., who presided, dwelt on the value of the institution—its lectures, essays, and library; and discoursed pleasantly and suggestively on the necessity of scientific knowledge in working out the details of modern warfare.

Last Saturday evening's free lecture in connection with the collection of scientific apparatus at South Kensington was given by Professor T. E. Thorpe, of the Yorkshire College of Science, on the Scientific Work of Robert Boyle.

At a meeting of the Social Science Association, on Monday evening—Mr. P. M'Lagan, M.P., in the chair—a paper drawing attention to the necessity of an official inquiry into the cause of fires was read by Mr. C. Walford.

The Victoria (Philosophical) Institute held a full meeting the same evening—Dr. C. Brooke, F.R.S., in the chair—when a paper was read by Professor Birks, of Cambridge, on the Bible and Modern Astronomy, in which he held that modern science ought not to be held up as contradicting the Bible; that there was evidence that the Book of Science and the Book of Revelation, when fully understood, would be found to harmonise. In the mean time all investigations constantly warned us that hasty conclusions of every kind were to be avoided by all parties. It was noted that the strength of this society has nearly quadrupled during the past five or six years.

Professor Bentley, on Monday afternoon, at the London Institution, gave the first of two botanical lectures, the subject chosen being Palms; that of the second, to be given next Monday, is to be Ferns.

The first of a series of four Cantor lectures on the Chemistry of Gas Manufacture was given, on Monday evening, at the Society of Arts, by Professor A. Vernon Harcourt, F.R.S. The use of coke as a heating material for household purposes was warmly commended by the lecturer, its superiority for that purpose, as well as its economy as compared with coal, being strongly urged. In order to facilitate its use, such reforms as had recently been advocated must be resorted to in our fire-grates in order to do away with the wasteful draught through the bottom of the stove, which only served to waste fuel. The true principle of heating lay in the production of as large a glowing surface as possible, a bright flame being in no way necessary or even desirable.

At a special meeting held, on Tuesday evening, in the hall of the Society of Arts, a paper was read by Mr. H. Trueman Wood, assistant secretary of the society, on the Patents for Inventions Bill, 1877. Major Beaumont, M.P., presided, and among those present were Dr. Playfair, M.P., and Mr. Mundella, M.P. The lecturer contended that the reforms required in the existing system were administrative, not legislative, and that the changes most required were changes in the direction of simplification of procedure. A discussion followed.

OBITUARY OF EMINENT PERSONS.

THE MARQUIS OF NORTHAMPTON.

The Most Hon. Charles Douglas-Compton, Marquis and Earl of Northampton; Earl Compton of Compton, in the county of Warwick; and Baron Wilmington of Wilmington, in the county of Sussex; died at his seat, Castle Ashby, near Northampton, on the 3rd inst. His Lordship was born May 26, 1816, the eldest son of Spencer, second Marquis of Northampton, by Margaret, his wife, eldest daughter of the late Major-General Douglas Maclean Clephane, of Torloisk, N.B., and received his education at Trinity College, Cambridge, where he graduated M.A. in 1837. He assumed, in 1831, the additional prefix surname and arms of Douglas, and in 1851 succeeded his father as third Marquis. His Lordship married, July 5, 1859, Theodosia Harriet Elizabeth (who died in 1864), daughter of Captain and Lady Mary Vyner, and granddaughter of Thomas Philip, late Earl De Grey, but had no issue. The family honours devolve consequently on his brother, Lord William Compton, Vice-Admiral R.N., who was born in 1818, married, in 1844, Eliza, third daughter of the late Admiral the Hon. Sir George Elliot, K.C.B., and has issue.

MR. LOWE OF LOCKO.

William Drury-Lowe, Esq., of Locko Park, in the county of Derby, J.P. and D.L., High Sheriff in 1854, one of the principal landowners in Derbyshire, died on the 26th ult., at his seat near Derby, aged seventy-four. He was lord of the manors of Denby, Spondon, &c., and patron of two livings. The eldest son of Robert Holden, Esq., of Darley Abbey, in the county of Derby, and Nuttall Temple, Notts, by Marianne, his wife, only child and heiress of William Drury-Lowe, Esq., of Locko Park, he succeeded, in 1828, to the estates of his maternal grandfather, and in the following year assumed the surname of Lowe in lieu of his patronymic. He married, Feb. 13, 1827, the Hon. Caroline Esther Curzon, youngest daughter of Nathaniel, second Lord Scarsdale, and leaves issue.

The deaths are also announced of—

Lieutenant-General Eardley Wilmot, aged seventy-seven.
Lieutenant-General Sir John Fordyce, K.O.B., Colonel Commandant Royal (late Bengal) Artillery.
Major-General Evelyn Waddington, late of her Majesty's 23rd Bombay Light Infantry.

Archdeacon Waring, a canon residentiary of Hereford Cathedral, after a brief illness, at the age of seventy-seven.

Mr. Fitzroy Kelly, barrister-at-law, of Lincoln's Inn, on the 12th inst., at Alexandria, Egypt.

T. Talbot Bury, F.S.A., V.P.R.I.B.A., on the 23rd ult., at 50, Welbeck-street.

Thomas Stone, F.R.C.S., for many years Resident Surgeon of Christ's Hospital, on the 2nd inst., in his seventy-first year.

William Harrison, Esq., J.P. for Staffordshire, on the 23rd inst., at Eastland House, Leamington, in his eightieth year.

Arthur Loveday, Esq., of Waddington, Oxon, formerly of Doctor's-commons, on the 28th ult., aged eighty-five.

Thomas Porch Porch, Esq., of Edgarley, in the county of Somerset, M.A., J.P., on the 27th ult., aged sixty-nine.

The Hon. Patrick Oliphant Murray, late of the 5th Madras Infantry, fifth son of Alexander, eighth Lord Elibank, in his fifty-eighth year.

Hugh Davies Griffith, Esq., of Caerhun (a considerable landed proprietor in North Wales), on the 25th ult., in his seventy-ninth year.

Mr. Thomas Starkie Shuttleworth, Clerk to the Crown for the County of Lancaster and Keeper of the Seal of the Duchy of Lancaster, aged seventy-seven.

Admiral Henry Gossett, on the 1st inst., aged eighty-two. He was second son of Matthew Gossett, Esq., of Bagot, Jersey, Viscount of that island, by Grace, his wife, daughter of Admiral Sir Thomas Frankland, Bart.

The Hon. Richard Hely-Hutchinson, at Ringwood, Torquay, aged seventy-four. He was the last surviving child of the Hon. Francis Hely-Hutchinson, M.P. for the University of Dublin, and grandson of the well-known lawyer and statesman, the Right Hon. John Hely-Hutchinson, by Christiana, his wife, first Baroness Donoughmore.

CHESS.

H REED.—The first move in the solution of No. 1719 is B to Q sq. In reply to 1. R to K sq (ch), Black can interpose the B, and cannot then be mated on the next move.
CORPINO.—You will find your question answered in the correspondence of last week.
CANTHARIKOPHO.—In Problem No. 1721 Black's best reply to 1. Q to R 8th is 1. P to Q 8th, a resource you appear to have overlooked.
A B (West Brompton).—Both problems require amendment. No. 1 has a dual solution in the variation 1. P takes R, when White can play either 2. Kt takes P (double ch), or 2. Kt to Q 7th (dis ch). No. 2 can be solved by 1. Q to K sq (ch), 2. Q to Kt 4th (ch), and 3. Kt to Kt 4th, mate. We shall be glad to hear from you again.
J G C (Tottenham).—A capital little stratagem, and it shall have early publication if you will favour us with your full name and address.
H (Nottingham).—Many thanks for the game and problem. Both shall have our best attention.
H B (Berlin).—Your solutions are always highly satisfactory, and those referred to in your letter were acknowledged last week.
S W C (Temple).—Please to examine the leading variation in Problem No. 1. After the moves 1. B to Kt 5th, B takes Kt, 2. Q to Kt 3rd, there is no mate if Black plays 2. R to Q Kt 8th.
CORRECT SOLUTIONS OF PROBLEM No. 1722 received from J Sheppard, J Woods, B Lewy, Salop, J Byng, Dolly, P S Shenale, E W Fry, J K H Stebbing, Tredunnock, Semaj, Amerham, Edipus, J G Finch, Cantharikopho, and E Clarkson.
CORRECT SOLUTIONS OF PROBLEM No. 1723 received from H B, J Woods, Triton, Only Jones, Simplex, B Roughton, J Williams, B R Stone, W Alston, R T King, E Worsley, Lifford, Beant, S A Silem, W Leeson, Cantharikopho, Hereward, Mechanic, J B W, H Burgher, Black Knight, J Wontone, L S R Tippet, Paul's Root, Harrovin, W Nelson, R H Brooks, J de Honteyn, J M Turton, P S Shenale, I E Imbrey, E W Fry, East Marden, J K W S B, H Reed, H N Smith, Copladino, A Wood, Semaj, H W Trenchard, W P Payne, E H V, Woolwich Chess Club, Cant, Amerham, T R, American, Long stop, Leonora and Leon, B Western, J Shepherd, C Wood, H C R Drapers College, T Guest, Dolly, H M Pridmore, E L G, H Welham, Fritz, Société Littéraire de Gand, H Beummann, E Frau, F Myers, J Byng, Owllet, E P Vuillamy, J G Finch, W G D, H Stebbing, D Vawdry, W E N, E Clarkson, F T M, S Johnstone, and Una.

NOTE.—This problem cannot be solved by 1. Kt to Kt 3rd or by Kt to K 6th. In reply to either of these moves, Black can move his K to Kt 5th, after which White cannot mate in two more moves.

SOLUTION OF PROBLEM No. 1723.

WHITE.	BLACK.	WHITE.	BLACK.
1. Kt to Kt 7th	Kt moves	3. Kt to B 5th.	Mate.
2. Kt to Q 6th	Any move		

PROBLEM No. 1725.
By W. T. PIERCE.
BLACK.

WHITE.
White to play, and mate in three moves.

CHESS IN LONDON.

The following interesting and well-contested game was played, last week, at Simpson's Divan, between Messrs. MACDONNELL and ROBERT.

(Ruy Lopez Opening.)

WHITE (Mr. R.)	BLACK (Mr. M.)	WHITE (Mr. R.)	BLACK (Mr. M.)
1. P to K 4th	P to K 4th	35. Kt to Kt 8th	R to R 3rd
2. Kt to K B 3rd	Kt to Q B 3rd	36. Kt to Kt 8th	R to R 4th
3. B to Kt 6th	P to Q B 3rd	37. Kt to K 7th	B to B 5th
4. B to R 4th	Kt to B 3rd	38. R to Q B 2nd	R takes Q B P
5. P to Q 4th		39. Kt to Kt 8th	P to Q Kt 4th
This line of attack is out of fashion at present, and 5. Castles, is more frequently adopted by the best players.			
6. P to K 5th	P takes P	40. Kt takes P	R to R 4th
7. Castles	Kt to K 5th	41. P to K Kt 3rd	R to B 3rd
	Kt to B 4th	42. K to B 2nd	
The move in the text is safe enough, but it is decidedly inferior to 7. B to K 2nd.			
8. B takes Kt	Q P takes B	43. Kt takes P	R to R 4th
9. Kt takes P	Kt to K 3rd	44. P to K Kt 3rd	R to B 3rd
10. P to Q B 3rd		45. K to B 2nd	
It would be better to exchange the Kt, and play 11. Q to K 2nd.			
11. Kt to B 5th	P to Q B 4th	46. Kt to B 3rd	R takes P (ch)
12. R takes Q	B to Q 2nd	47. Kt to K 4th	B to Q 4th
13. Kt to Q 2nd	Kt to B 5th	48. Kt to Q 4th (ch)	K to Kt 8th
14. Kt to K Kt 3rd	Kt to Q 6th	49. Kt takes P (ch)	R to K 8th
15. Kt to B 4th	Kt takes B	50. R takes B	B takes Kt (ch)
16. Q R takes Kt	Castles (Q R)	51. K to B 2nd	R to R 7th (ch)
17. P to B 4th	P to K 4th	52. K to Kt 3rd	R takes P
18. Kt to K 4th	B to K 2nd	53. P to Kt 5th	P to Kt 5th
19. Kt to K 3rd	B to Q B 3rd	54. P to B 6th	P to Kt 6th
20. Kt to B 5th	B takes Kt	55. B takes B P	R to R 4th
21. Kt takes B (ch)	K to Kt sq	56. K to Kt 4th	P to Kt 7th
22. R to K sq	B to Q 6th	Black must have seen clearly enough that R to Kt 4th would have given him an easy victory. The move made, although inferior, should also have won.	
23. P to Q B 4th	R to Q 5th	57. R to B 5th (ch)	K to Q 5th
24. K R to Q sq	R takes Q B P	58. R takes B	P to Kt 8th
25. R takes R	R takes R	(Queens)	
26. P to Q Kt 3rd	B to K 7th	59. R takes P	
27. R to Q 2nd	B to Kt 5th	The position at this point is very curious and interesting. Mr. Macdonnell had a winning game; but, playing hastily, he permitted his adversary to place his R at K B 8th, and so escape with a remise. The straight road to victory is as follows:—	
28. P to K R 3rd	R to K 3rd	60. K to R 4th (best)	Q to K 8th (ch)
29. P to B 5th	R to K sq	61. K to Kt 4th	Q to K 7th (ch)
30. P to B 6th	P takes P	62. K moves	Q takes R, and wins.
31. P takes P	P to B 3rd	63. K moves	Q to Kt 8th (ch)
32. R to Q B 2nd	P to B 5th	64. K to R 5th,	
33. P takes P	R to B sq	and the game was drawn.	
34. P to B 5th			
White plays this part of the game with much care and judgment.			
35. R to K 2nd			
Intending, doubtless, should occasion offer, to sacrifice the R for B, and advance the Pawn to the Royal rank.			

A brilliant little Skirmish between two London amateurs, Mr. G. R. DICK and the Rev. A. C. PEARSON.—(Cunningham Gambit.)

WHITE (Mr. D.)	BLACK (Mr. P.)	WHITE (Mr. D.)	BLACK (Mr. P.)
1. P to K 4th	P to K 4th	12. Kt to Q B 3rd	P takes B
2. P to K B 4th	P takes P	13. P to Q 5th	Q to K 2nd
3. Kt to K B 3rd	B to K 2nd	14. P takes B	Q takes P
4. B to B 4th	B to R 5th (ch)	15. R takes B	
5. P to K Kt 3rd	P takes P	All this is played in capital style.	
6. Castles	P takes P (ch)	16. Kt to Q 5th	Q to B 7th
7. K to R sq	B to B 3rd	17. R to Q sq	
P to Q 4th is much better. Black never recovers from the consequences of this and the following move.			
8. P to Q 4th	Kt to K R 3rd	18. Kt takes K B P	Q takes K
9. B takes Kt	P takes B	19. Q to K 5th (ch)	K to Q 2nd
10. Kt to K 5th	P to Q 4th	20. Kt to Kt 4th (dis. ch),	
11. Q to R 5th	B to K 3rd	and White mates in two moves.	

CHESS INTELLIGENCE.

We have received the award problem tourney of the late City of London Chess Magazine, but too late for a brief summary of its purpose. The prizes are awarded as follows, and in the order named:—Two-move problems, Messrs. Stonehouse and Callender; three-move problems, Messrs. Andrews, Collings, and Thomas; four-move problems, Messrs. Lord, Rosenbaum, and Pearson. The judges' report declares that Mr. Mensies' problem has taken first honours in the four-move competition.

WILLS AND BEQUESTS.

The will, dated Nov. 12, 1875, with a codicil, dated June 9, 1876, of the Right Hon. Henry Hall Viscount Gage, late of Frie Place, in the parish of West Frie, Sussex, who died on Jan. 20 last, was proved on the 1st inst. by the Hon. Edward Thomas Gage, C.B., the son, and the Right Hon. Standish Prendergast Viscount Gort, the son-in-law of the deceased, the executors, the personal estate being sworn under £100,000. The testator gives legacies to his surviving son, daughters, grandchildren, land steward, and butler. All his real estate he devises to the use of his grandson, Henry Charles Gage (the eldest son of his deceased son Henry Edward Hall Gage), for life, with remainder to his first and other sons successively, according to seniority in tail male; and the residue of his personality is to go in like manner.

The will and codicil, dated Dec. 7 and 18, 1876, of Mr. Daniel Warren, late of No. 68, Porchester-terrace, Paddington, and of No. 75, Old Broad-street, City, merchant, who died on Jan. 26 last, was proved on the 13th ult. by Miss Happy Ingate Warren, the sister, Stephen James Allen, Thomas Francis Blackwell, John Wreford Budd, and Charles Pettaford, the executors, the personal estate being sworn under £100,000. The testator bequeaths to his sister his residence, with the furniture and effects, and certain stocks amounting to £10,000; to his brother, Edwin Warren, and his wife, Harriet Warren, and the survivor of them, an annuity of £500 (this annuity is to be increased to £750 on the death of testator's sister); to Mr. Allen, £1000, and a further sum of £3500 on the death of Miss Warren; and there are other legacies and annuities. The income of the residue is to be paid to Miss Warren for her life; and on her death a great many other bequests take effect, including £10,000 to testator's nephew and godson, Herbert George Thomas Ingate Warren, and £100 each to the Cancer Hospital, Fulham-road, Brompton, and the Seamen's Orphan Charity, Leadenhall-street. The ultimate residue is to be divided into sixty-four parts, forty of which are to go to the said H. G. T. I. Warren, and ten to Mr. Allen.

The will with one codicil, dated Nov. 23 and Dec. 24, 1876, of Mr. Thomas Lewin, late of No. 6, Queen's-gate-place, South Kensington, and of Lincoln's-inn, barrister-at-law, one of the conveying counsel to the Court of Chancery, who died on Jan. 5 last, has been proved by Mrs. Mary Emily Lewin, the widow, Spencer Robert Lewin and Frederick Albert Lewin, the nephews, and Arthur Thomas Schreiber, the executors, the personal estate being sworn under £60,000. The testator devises all his real estate in the parish of Ifield, Sussex, to his wife for life, or until her marriage again, and then to his eldest nephew, Spencer, for life, with remainder to his first and other sons successively, in tail male; the late Emperor Napoleon's presentation copy of "The Life of Caesar," with autograph, is to go as an heirloom with the Ifield estate; and he bequeaths £500 to be equally divided between five London hospitals, to be named by his wife, and some other legacies and annuities; the residue he bequeaths to his wife for life, subject to reduction in the event of her marrying again, and then to be divided between his nephews and nieces (except Spencer), Frederick to have a double share.

The will, dated April 24, 1870, of Mr. Thomas James Rooke, late of No. 3, Highbury-hill, who died on Jan. 28, at St. Leonards-on-Sea, was proved on the 14th ult. by the Rev. Thomas George Rooke, Henry Rooke, Alfred Bradley Rooke, and Arthur William Rooke, the sons, the executors, the personal estate being sworn under £40,000. With the exception of legacies to his sister and sister-in-law, the bequests of the will are confined to testator's children and grandchildren.

The will and three codicils, dated respectively Sept. 6, 1860, Aug. 2, 1873, Nov. 4, 1875, and Jan. 8, 1876, of Lieutenant-Colonel the Hon. George Augustus Spencer, formerly of Oriental-place, Brighton, and late of No. 47, Dover-street, Piccadilly, who died on Jan. 18 last, were proved on the 22nd ult. by William Forbes Skene, the acting executor, the personal estate being sworn under £10,000.

The will, dated Jan. 26, 1877, of Mr. John Frederick Verrall, late of The Mulberries, Denmark-hill, who died on the 6th ult., was proved on the 21st ult. by Mrs. Georgina Verrall, the widow, and Rolleston Cathcart, the executors, the personal estate being sworn under £10,000.

From the Navy Estimates, which were issued on Monday, it appears that the net sum required for the naval service during the next twelve months is £10,762,829, as compared with £11,064,843 last year. The number of men for whom wages are required is 44,700, the same as last year.

A letter has been addressed by Sir John Lubbock to Mrs. Gerstenberg informing her that, in accordance with her desire, the sum of 500 guineas, appropriated by the council of foreign bondholders to the purpose of instituting a memorial of her late husband's name and public services, will be devoted to the foundation of an annual prize for political economy in the London University. In their last report the council have expressed deep regret at the death of one who had occupied their chair from 1873 to 1875, when he was compelled by ill health to abstain from active part in the proceedings of a corporation the establishment of which mainly originated with him.

At a meeting of the Royal Irish Academy, on Monday night, a resolution was adopted unanimously accepting the conditions laid down by the Government for the transfer of the Academy's museum of antiquities to the proposed new Science and Art Museum for Ireland. These conditions are substantially the same as those given to the Scottish Society of Antiquaries on the transfer of their museum to the Scottish National Museum. The Academy will continue in undisturbed possession of its library, and will be accommodated with rooms for its meetings in the new buildings to be erected for the National Museum. The Academy is also to have the custody and control of its collection of antiquities, subject to such rules and special directions as the Lords of the Council on Education may make. In the resolution adopting the scheme recognition was made of the considerate manner in which the Government had met the views of the Academy.

The *Sussex Daily News* says:—A piece of good fortune has fallen to the lot of Dr. Halifax of Brighton. An aged miser, who died a few days since at Woolwich, has left him a legacy of £6000. The old gentleman, John Clark by name, was a rather singular character. He was eighty-six years of age, and, although he was reputed to be the possessor of a large fortune, he lived to the last in a squalid hovel in the poorest part of Woolwich, where, being a man of education, he devoted himself to the accumulation and study of books, of which he leaves a large store. It is said that the front shutters of his house have not been opened for thirty years, and that he never took a regular meal. He did not know the taste of wine or spirits. The value of his estate has not yet been computed; but, from the fact that besides the legacy to Dr. Halifax, he bequeaths £5000 to his housekeeper, and various legacies of smaller amount to the local charities and to a number of the poor neighbours by whom he was surrounded, it is estimated at between £30,000 and £40,000.

THE GATES OF CONSTANTINOPLE.

take such steps as may appear to be indispensable to secure just government for the Christian subjects of the Sultan. For the present, the idea of coercion is abandoned. Should the Powers agree upon some final form of giving public sanction to such Resolutions of the Conference as have been already acquiesced in by Turkey, Russia will demobilise her forces, the Powers will resume diplomatic correspondence with the Porte, and Turkey will have another—perhaps a last—chance of redeeming herself from anarchy and ruin.

No one, however, can shut his eyes to the fact that the proposal of Russia, if assented to by the Powers, will effect rather an evasion than a settlement of the Eastern Question. When her Troops have been disbanded, and when Russia has reduced her military establishments to their peace footing, the settlement of Turkish affairs will mainly depend upon herself. Can she do what is expected of her? or, if she can, will she do it? Under the watchful eye of the Signatory Powers she may perhaps exert herself to some temporary good effect. It is to be doubted, however, whether she will seize the proffered opportunity of so arranging her affairs as to conciliate the goodwill of Europe. She has done nothing towards the attainment of that end as yet. In no particular have her Agents in the Provinces foregone their customary habits of extortion and tyranny. Bulgaria is much as Bulgaria was a twelvemonth since. Bosnia and Herzegovina are reported to be worse off than they were. The government which should be a protection for the innocent and the weak is their main terror. Criminality finds its chief support where it should meet with condign punishment. Not Christians alone, but Mohammedans, suffer under the present system, which is little better than one of legal brigandage. It can hardly be expected that the oligarchy of Pashas by the members of which the subjects of the Sultan are preyed upon should voluntarily consent to give up, or even to limit, the ascendancy they have attained. The Eastern Question, so far as it depends upon them, threatens to become a perennial question. If it is not now taken in hand by the Powers, as it was the confident expectation of Europe that it would be, it is not on account of any special tenderness for Turkish interests. There are other dangers demanding consideration—dangers which lie beyond the redistribution of political authority in the Turkish Provinces. It is of these that European statesmen are most afraid, for no one can foresee how far war in the East might not be speedily eclipsed by a war in the West. Europe is not at ease. Local irritation just now might readily be followed by general inflammation. England, we hope, may accede to Russian proposals. A few months' rest may do much to restore a healthier condition of public affairs; and, should this be the case, it is not by any means impossible that a calmer mind may be brought to the consideration of the Eastern Question, and a better opportunity be presented for its final settlement.

THE COURT.

The Queen entertained at dinner, on Wednesday week, at Windsor Castle, Prince and Princess Christian of Schleswig-Holstein, the Earl and Countess of Clarendon, the Hon. Frederick and Lady Constance Stanley, Lord and Lady Kilmarnock, the Right Hon. Gathorne Hardy and Mrs. Hardy, and Lieutenant-General Sir Alfred Horsford. The Hon. Lady Biddulph dined with her Majesty the next day. Yesterday week the Lord Chancellor and Lady Cairns, the Earl and Countess of Shrewsbury and Talbot, the Earl and Countess of Bradford, the Earl and Countess of Kimberley, General Lord Strathnairn, Admiral Sir Hastings Yelverton, and Lieutenant-General Sir T. M. Biddulph were included in the Royal dinner party; and on Saturday last Prince and Princess Christian and Major-General H. and the Hon. Mrs. Ponsonby dined with the Queen.

On Sunday her Majesty and Princess Beatrice attended Divine service in the private chapel of the castle, performed by the Rev. W. D. MacLagan, M.A., Vicar of Kensington.

The Queen, accompanied by Princess Beatrice, left the castle on Monday for town. Her Majesty travelled by a special train on the Great Western Railway to Paddington, and drove thence, escorted by a detachment of the Royal Horse Guards, to Buckingham Palace. Prince and Princess Christian also arrived at the palace. Prince Leopold was unable to accompany the Queen to London on account of a strain to his knee. Her Majesty held a Levée, as hereinafter described. Viscountess Clifden dined with the Queen.

On Tuesday her Majesty, accompanied by Princess Beatrice, visited the Royal School of Art-Needlework at South Kensington, where she was received by Princess Christian, president; Miss L. Wade, lady superintendent; and Miss Hawarth, secretary of the school. The Queen, after having inspected the various works on exhibition, was presented by the president with a bouquet on behalf of the staff and lady-workers of the school. Her Majesty afterwards visited Mr. J. E. Boehm's studio to inspect the colossal equestrian statue of the Prince of Wales, which Sir Albert Sassoon intends to present to the city of Bombay. Later in the day the Queen drove to Kensington Palace, and paid a visit to the Duchess of Teck, and also to the Hon. Harriet Phipps, at her apartments there. The Earl of Beaconsfield had an audience of her Majesty. Prince and Princess Christian and Princess Beatrice were present at an afternoon performance, for the benefit of Mr. and Mrs. A. Wigan, at the Gaiety Theatre. Princess Christian dined with the Queen. Princess Beatrice went to the Lyceum Theatre.

On Wednesday her Majesty and Princess Beatrice visited the Zoological Society's Gardens; they were conducted round the gardens by Mr. A. Bartlett (superintendent), and inspected the animals brought from India by the Prince of Wales. The Queen held a Drawingroom, as described below. The Princess of Wales visited her Majesty at the Palace.

The Court has returned to Windsor Castle. Prince Leopold remains at the castle.

The Duchess Dowager of Athole has succeeded the Countess of Errol as Lady in Waiting, and Lord de Ros and Captain C.

E. Phipps have succeeded Lord Elphinstone and Vice-Admiral Lord Frederick Kerr as Lord and Groom in Waiting.

THE QUEEN'S LEVÉE.

The Queen held a Levée, on Monday, at Buckingham Palace. Princess Beatrice was present. The Prince of Wales, Prince Christian, Prince Edward of Saxe-Weimar, and the Duke of Teck were present at the Court.

Her Majesty, accompanied by Princess Beatrice, the Prince of Wales, and the other members of the Royal family, entered the Throne-Room shortly after three o'clock. In attendance upon her Majesty were the Duchess of Wellington, the Countess of Erroll, and the great officers of state of the Royal household.

The Queen wore a black silk dress with a train trimmed with plush, chenille, and crape, and a long white tulle veil, surmounted by a crown of diamonds and pearls. Her Majesty also wore two rows of large pearls, a brooch and earrings of pearls and diamonds, the ribbon and star of the Order of the Garter, the orders of Victoria and Albert, Louise of Prussia, and the Saxe-Coburg and Gotha family order.

Princess Beatrice wore a dress of red figured silk, trimmed with Brussels lace. Head-dress, feathers and veil; ornaments, pearls and diamonds; orders, the ribbon and star of St. Katherine of Russia, the Victoria and Albert Order, and the Coburg and Gotha family order.

The principal members of the Diplomatic Corps were present. The Levée was very numerously attended, and about 200 presentations were made to her Majesty.

THE QUEEN'S DRAWINGROOM.

The Queen held a Drawingroom, on Wednesday, at Buckingham Palace. The Prince of Wales, attended by his suite and escorted by a detachment of the Royal Horse Guards, arrived at the palace from Marlborough House. Princess Louise of Lorne, Princess Beatrice, Prince Christian, and the Duke of Teck were present at the Court. The usual state ceremonial was observed. Her Majesty entered the Throne-Room, accompanied by the Prince of Wales, Princess Louise of Lorne, Princess Beatrice, and the other Royal personages.

The Queen wore a dress with a train of black satin embroidered in silk, and a long white tulle veil surmounted by a diadem of diamonds. Her Majesty also wore a necklace of large uncut Oriental rubies set in diamonds, the Koh-i-noor as a brooch, and diamond earrings; the ribbon and star of the Order of the Garter, the orders of Victoria and Albert, Louise of Prussia, St. Katherine of Russia, St. Isabelle of Portugal, &c., and the Saxe-Coburg and Gotha family order. Her Majesty's dress was embroidered at the Royal School of Art-Needlework.

Princess Beatrice wore a dress of white silk trimmed with floss embroidery, and white striped velvet train. Head-dress, feathers and veil; ornaments, turquoises and diamonds. Her Royal Highness also wore the star of St. Katherine of Russia, the order of St. Isabelle of Portugal, the Victoria and Albert Order, and the Coburg and Gotha family order.

In the diplomatic circle, which was attended also by various ladies of the families of the several members of the corps, some presentations took place; and in the general circle about 120 presentations were made to the Queen.

THE PRINCE AND PRINCESS OF WALES.

The Prince of Wales returned to Marlborough House from Melton Mowbray, on Saturday last; his Royal Highness hunted with the Cottesmore hounds during his visit. This was the fourteenth anniversary of the marriage of the Prince and Princess. Their Royal Highnesses, with Princes Albert Victor and George of Wales, went to the Opéra Comique Theatre in the evening. On Sunday the Prince and Princess, with their sons, attended Divine service in the Chapel Royal, St. James's. The Rev. the Sub-Dean, the Rev. J. Troutbeck, and the Bishop of Ely, for the Bishop of Worcester, officiated. On Monday the Prince presided, at Marlborough House, at a committee of her Majesty's Commissioners for the Fine-Arts Section of the Paris Universal Exhibition, and attended the Queen's Levée. The Prince and Princess gave a ball in the evening at Marlborough House. Princess Louise of Lorne and the Marquis of Lorne, Princess Beatrice, Prince Christian, the Duke of Teck and Count and Countess Gleichen were present. Princess Christian, the Duke of Cambridge, and the Duchess of Teck were unavoidably prevented from being present. Invitations to the number of about 500 were issued. The string band of the Royal Horse Guards was in attendance, under the direction of Mr. Charles Godfrey. On Tuesday the Prince and Princess were present at a matinee dramatique given at the Gaiety Theatre by Mr. and Mrs. A. Wigan. In the evening the Prince presided at a dinner, at Willis's Rooms, given in aid of the funds of the Deaf and Dumb School, in Fitzroy-square. Previous to the dinner the director of the school, Mr. Van Praagh, accompanied by some of the pupils, attended at Marlborough House and explained the method of oral instruction for the deaf and dumb to his Royal Highness and Princes Albert Victor and Prince George of Wales. On Wednesday the Prince attended the Queen's Drawingroom, and the Princess visited her Majesty at Buckingham Palace.

The Duke and Duchess of Edinburgh arrived at Palermo on Monday.

Princess Christian presided, yesterday week, at the meeting of the ladies' committee of the Adult Orphan Institution, in Regent's Park.

Princess Louise of Lorne and the Marquis of Lorne dined with Earl and Countess Delawarr on Tuesday.

The Duke of Connaught hunted with the Ward Union Hounds, near Dublin, last week, and dined with the Lord Lieutenant of Ireland and the Duchess of Marlborough at Dublin Castle. The Duke was present at the State Ball given by their Excellencies, on Monday, at the castle.

The Duke of Cambridge, although much better after his illness, is still troubled with a cough.

The Duchess of Teck is confined to her residence at Kensington Palace from a bronchial attack.

Entertainments have been given by the Austrian Ambassador, the Duke and Duchess of Bedford, the Earl and Countess of Kimberley, Earl Granville, Lady Harriet Lindsay, Lord and Lady Abercromby, and Lady Northcote. The Right Hon. the Speaker gave his fourth Parliamentary full-dress dinner on Wednesday, after which he held a Levée.

Mr. Merthyr and Lady Theodora Guest returned to Motcombe House, on Monday, from Canford Manor. Among the numerous gifts Lady Theodora received on her marriage were, from the King of Hanover, a basket of beautiful roses from Paris; from the Queen of the Netherlands, a jewelled china casket; and from the Duchess of Cambridge, a Dresden china déjeuner service.

The marriage of Lord Arthur W. Hill, second son of the fourth Marquis of Downshire, and Miss Fortescue Harrison, daughter of Mr. Fortescue Harrison, M.P. for Kilmarnock, was solemnised, on Wednesday, at St. Stephen's, South Kensington. The bridemaids were the Misses Fortescue Harrison,

her three sisters; and Lady Olivia Tylour, niece of the bridegroom. Viscount Newry was best man. The bride's dress was of white satin, trimmed with old Genoese point, and she wore a wreath of orange-flowers; her ornaments were pearls and diamonds. The bridemaids were dressed in pale blue silk costumes, with lace caps and fichus. The ceremony was performed by the Rev. Osborne Gordon, B.A., Rector of East Hampstead, Berks, assisted by the Rev. Joseph P. Waldo, M.A., Vicar of St. Stephen's.

GATES OF CONSTANTINOPLE.

The imperial city of Constantine, which still bears his name in the language of all Christendom, is called by the Turks, who have possessed it 423 years, Stamboul or Istambul. This is a corruption of the three Greek words, some think, which mean "To the City," and which were of course frequently heard, referring to the capital of the Empire, among the provincial and rural subjects of the Byzantine reign. Ancient Byzantium was founded by a Megarian Greek colony, in the seventh century before Christ. It was the object of many strenuous conflicts between the Greeks and Persians; and, later, between the Spartans, Athenians, and Macedonians; but fell under the conquering power of Rome, before the commencement of our era. In the year A.D. 330 the first Christian Emperor of Rome founded the august city, which remained above one thousand years the Christian metropolis of the East, and which has now been four centuries the seat of the Ottoman rule. During half the thirteenth century it was held by the Western Crusaders, under princes of a Flemish house supported by the naval power of Venice; but it was recovered by the Greeks, who defended it two hundred years longer against their Mohammedan foes. It might, even in the fifteenth century, have been preserved to Christian Europe, but for the civil wars in France and England, which prevented the kings of these nations from joining in an effort to repel the Turkish invasion. The singularly convenient and beautiful position of this famous city, at the southern mouth of the Bosphorus, on a promontory overlooking the landlocked Sea of Marmora, has often been remarked. Our readers will also remember that it is separated by the inlet of "the Golden Horn" from Pera and Galata, the two Christian suburbs, the former of which is the abode of European residents or visitors, and the latter of Greek subjects of the Sultan. On the opposite, or Asiatic, shore of the Bosphorus is the purely Turkish town of Scutari. The illustrations we present in this Number, from Sketches by our Special Artist, are those of the Gates of Stamboul. This city is entirely surrounded by walls of brick and stone, laid in alternate courses, with a circuit of nearly thirteen miles, constructed by the ancient Roman Emperors of the East. Two thirds of the wall runs close along the water's edge, on the shores of the Sea of Marmora, from the Seven Towers to Seraglio Point, the Bosphorus, and the Golden Horn. The remaining portion, which forms a triple rampart behind, across the promontory occupied by Stamboul, was fortified with many towers, affording a variety of examples of mediæval castellated architecture, but now exhibiting a series of picturesque ruins. There used to be seven gates on the land side of the city, twelve gates on the side of the Golden Horn and harbour, and seven looking towards the Sea of Marmora, but some have been walled up. The Turkish word for "Gate" is "Kapou" or "Kapouai," which occurs in the names of most of these represented in our illustrations. We will enumerate those which appear on our front page. The first of them, Yedi Kouleh, or the Gate of the Seven Towers, is situated at the south-west corner of the city, near the angle formed by the shore of the Sea of Marmora with the landward fortifications on the western side; it opens to the Armenian and Greek cemeteries, with the hospitals belonging to those religious and national communities. We have given an illustration of the Seven Towers, or the Marble Tower, which is their only remnant, in a former Number of this Journal. The next gate in our list is Egri Kapou, the Crooked Gate, also called the Charsian, from its Greek architect Charsias, or the Bulgarian gate, which is likewise on the west side of the city. It was by this gate that the Emperor Justinian made his triumphal entry into Constantinople. A little to the north of it is Edrene Kapouai, the Gate of Adrianople, upon the road leading to that important city, which is the second of European Turkey in political rank, and which was the seat of Ottoman dominion many years before the capture of Constantinople in 1453. Mevlaneh Yeni Kapouai, or the New Gate of the Melandi, is not very remarkable. All these gates are on the land side of the city, and so is the Selymbrian Gate, Siliwri Kapouai, of which we give a separate illustration. The small town of Siliwri, anciently called Selymbria, is on the shore of the Sea of Marmora, forty miles west of Constantinople. Just outside this gate are the tombs of Ali Pasha, of Janina, the ferocious Albanian tyrant, and of his sons, beheaded in 1822. The other two gates shown in our Engravings are the Samatia Kapouai, or Sandbank Gate, formerly St. Emilion, on the sea side, and the Top Kapouai, or Cannon Gate, which is celebrated in history as the Gate of St. Romanus. It holds the central place in the triple line of city fortifications on the western side of Constantinople, which was defended with the most heroic valour and perseverance, in the siege of 1453, by the last Greek Emperor of the house of Paleologus; and here, after a desperate fight against the Turkish Janissaries, he fell dead upon a heap of the slain. The Turks, who had very powerful artillery long before it was much used by any European army, had canonaded this gate so tremendously, that its present name is derived from that circumstance. There is another Top Kapouai, at Seraglio Point, where the Golden Horn meets the Bosphorus, nearly opposite the arsenal or cannon-foundry, which is called Top-Haneh. The gates not included among our present illustrations are Bagtche-Kapouai, the Garden Gate; Chifoot Kapouai, the Jews' Gate; that of Baluk-Bazar, or the Fishmarket; Zindoon, or the Dungeon; Odoon, the Timber-yard; Jubali, the Glaziers; Balat, the Palace; Haivan Serai, the Menagerie; Chutladi, the Butchers; Akhur, the Stables; Narli, the Pomegranates; Fanar, the Lighthouse; Koum Kapouai, the Sand Gate; the Gate of Daoud Pasha, and two or three more, all opening to the waterside. We do not speak, upon this occasion, of the famous and magnificent buildings within the city; the noble Cathedral Church of St. Sophia, erected by Justinian, in the sixth century, now converted into a Turkish Mosque; the Ahmedyeh and Suleimanyeh Mosques, and that of Sultan Mohammed II.; the Hippodrome, or Atmeidan; the Porte, or Ministry of State; the Seraglio, or Old Palace; and the Tombs of the Sultans.

In addition to our Views of the Bosphorus and its fortresses already published, we give one of the lighthouse on the European coast at the mouth of the strait opening into the Black Sea. It overlooks the Symplegades, or Clashing Rocks, which have been described as presenting, in some conditions of the sea and atmosphere, an illusive appearance of movement, seeming to rush together as their low tops are seen alternately to emerge and to vanish amidst the heaving waves. Jason, in his wonderful ship the Argo, had a narrow escape of being snapped up and swallowed down here, in the jaws of the perilous Euxine, as he sailed to win the Golden Fleece.

THE GATES OF CONSTANTINOPLE: SILIVRI KAPOUSI.

LIGHTHOUSE ON THE EUROPEAN SIDE OF THE BOSPHORUS: ENTRANCE TO THE BLACK SEA.

INSTALLATION OF THE DUKE OF MANCHESTER AS A KNIGHT OF ST. PATRICK.

THE KNIGHTS OF ST. PATRICK.

Seldom has the Court of Dublin, traditionally celebrated for its gaiety and animation, been enlivened by such a succession of entertainment, balls, and receptions as during the present season row about to close. The Duke and Duchess of Marlborough have brilliantly inaugurated the present Vice-royalty, but the culminating point of attraction was the investiture of the Order of St. Patrick, held with exceptional splendour, in St. Patrick's Hall, on the evening of Saturday, the 3rd inst. The occasion was the conferring of the blue ribbon so long worn by the late Marquis Conyngham on the Duke of Manchester. Previously to the ceremonial of investiture, a banquet, graced by the presence of the Duke of Connaught, K.P., was given to the Knights of St. Patrick, in the Long Picture Gallery of the Castle. The Knights who formed the Chapter were, in addition to his Royal Highness, the Marquises of Waterford, Drogheda, and Londonderry; the Earls of Cork, Granard, Carysfort, Charlemont, Gosford, and Listowel, and Lords Powerscourt and Carew. The Lord Primate Beresford officiated as prelate. Our illustration is taken at the moment of investiture. His Grace the Grand Master (the Lord Lieutenant), assisted by the Duke of Connaught and the Earl of Granard, who are standing close by, is placing the ribbon and badge over the shoulder of the new Knight. The Duchess of Marlborough is seated in the chair of state on the right of that of the Grand Master, and by her side are placed Lady Rosamond Churchill and Lady Randolph Churchill. The wives of the Knights of St. Patrick and the other Peereesses present have reserved seats on each side. In every respect the ceremonial was a great success, and, thanks to the public spirit of the Duke of Marlborough, the prestige of Ireland's National Order has been restored.

FOREIGN AND COLONIAL NEWS.

FRANCE.

In the Senate on Saturday a life senator was elected in the place of the late General Changarnier: 283 votes were recorded, and the absolute majority was thus 142. M. Dupuy de Lôme, a Bonapartist, having obtained that number of votes, was elected. M. André, the Republican candidate, obtained 140, and M. Grandperret 1. After the close of the ballot M. Victor Hugo presented himself to deposit his vote for M. André, but the President informed him that it could not be accepted. If M. Hugo had arrived a minute earlier a second ballot would have been necessary.

The report on the authorisation to prosecute M. Paul de Cassagnac was presented in the Chamber of Deputies, on Monday, and the discussion was fixed for Friday. M. Léon Say submitted a bill abolishing the excise on soap.

M. Mercier, a Savoyard, has been appointed First President of the Court of Cassation. He was a member of the Court of Cassation of Turin, became by annexation, in 1862, a French citizen, and was made by the Emperor President of a Court in Paris. He is reported to be a sincere Republican.

General Ignatieff arrived in Paris on Thursday week. He called on Prince Orloff, where he met Count Schouvaloff. Afterwards he went to the French Foreign Office, where he had an interview with the Duc Decazes, Minister for Foreign Affairs, who subsequently returned the visit. He had an interview, yesterday week, with Marshal MacMahon. General Tcherniaeff has been in Paris to confer with General Ignatieff. The latter has held repeated conferences with Prince Orloff and Count Schouvaloff, the Russian Ambassador at our Court, and all three have been to see the Duc Decazes. The Count has since returned to London. A general outline of the protocol entrusted by General Ignatieff to Count Schouvaloff for conveyance to the English Government has been given. According to this the tone of the document is fairly moderate, and nothing is stated therein which in spirit is opposed to the policy of the European Powers as developed in all their recent negotiations with the Porte. According to the *Times*, the mission of the General is to obtain the signature of a protocol embodying all the reforms demanded by the Plenipotentiaries at the Conference, but containing no threats against Turkey and implying in no way the abrogation of the Treaty of 1856. On Wednesday General Ignatieff had a long conversation with the Duc Decazes.

A meeting of Turkish bondholders was held in Paris, on Tuesday, at which it was resolved that the secretary of the Syndicate should proceed to Constantinople to plead with the Porte. The Syndicate represents 40,143 bondholders, who hold Turkish securities to the amount of three milliards of francs.

There is a crisis in the silk trade at Lyons, causing much distress among the operatives. The cause, according to the Chamber of Commerce, is that an abnormally large production has coincided with a diminished demand. Nearly half the looms in the city are stopped.

The Sugar Convention between France, England, Belgium, and Holland was signed on Thursday week.

The Government has granted pardons and commutations of sentences to 224 Communists who had been condemned for taking part in the rising of 1871.

Bieff, the merchant who imported secretly from Switzerland the dynamite which nearly destroyed Fort Sarmont, has been sentenced by the Tribunal of Pontarlier to three years' imprisonment and 30,000 francs fine.

A suicide has taken place on the Circular Railway. A well-dressed young lady asked at the St. Lazare station for a ticket for Passy, but then, correcting herself, said, "I think Batignolles will be far enough." As soon as the train was in motion she descended on the opposite side from the platform, threw herself under the wheels, and was crushed.

PORTUGAL.

The Cortes has authorised the consolidation of the floating debt by the emission of bonds of the External Debt of equivalent value. The new Ministers command a majority in both Houses. A Ministerial bill for a credit of 300,000*l.*, to defray the expenses connected with the representation of Portugal at the Paris Exhibition of 1878, has been introduced.

ITALY.

On Monday the Pope held a Consistory, at which he appointed the eleven Cardinals who it was announced in February were to be raised to that dignity. His Holiness enumerated the laws which the Italian Government had passed against the Church, and declared that he had been deprived of his freedom. He called upon the foreign Bishops to urge the faithful to take steps in order to induce their Governments to consider his position.

GERMANY.

There was an animated debate in the German Parliament, last Saturday, on the first reading of the Budget, as the Government require nearly three millions and a half sterling more than the vote of last year. The debate was opened by one of the Ministers, Herr Hofmann, pointedly appealing to the Reichstag to invent a new tax; but Dr. Lasker, on behalf of the National Liberals, declined to do so, and hinted that the chief aim of the Imperial Government should be to save money. Prince Bismarck summed up the debate, and again expressed his preference for indirect taxation, energetically sup-

ported the proposal for an increased taxation, and commended the Budget in the form in which it was introduced. He complained greatly of the action of Particularist States, as crippling the action of Imperial officers. M. Besançon, the late Maire of Metz, complained, on Monday, of the decline in the wealth of Metz since the separation from France; he asked for self-government for Alsace-Lorraine. Prince Bismarck made another speech, on Tuesday, respecting the appointment of Imperial Ministers not fitting in with Imperial institutions. The organisation of the young Empire, he added, must proceed slowly, but the country was moving in the right direction and was making practical progress. The Parliament is proceeding with the discussion of the estimates, and, on Wednesday, had to consider two applications for an increase of the allowances to the Ambassadors in London and St. Petersburg. A demand for £1500 more for Count Münster was rejected by 157 votes to 147, but Prince Bismarck intimated that the appeal would be renewed. An increase for the Ambassador in Russia was voted by 163 to 148. The item in the War Estimates for the creation of 105 new captaincies in the German Army was adopted by the Budget Committee.

General von Stosch, the chief of the German Admiralty, has tendered his resignation, which, however, has not yet been accepted by the Emperor.

Baron von Loe, formerly Secretary of Legation to the German Embassy in Paris, was, on Monday, condemned by the Municipal Court of Berlin to one year's imprisonment, on account of three articles written by him in the *Reichsblat*. The editor of the paper, Dr. Gehlsen, and Count Hermann Arnim, formerly Councillor of the Legation, who was implicated in the matter, were likewise sentenced—the former to five years' and the latter to three months' imprisonment.

AUSTRO-HUNGARY.

In Wednesday's sitting of the Lower House of the Hungarian Diet a question was put respecting the Turcophile demonstrations which have been made in Hungary, and the attitude of the Government with regard to the Eastern Question. The President of the Council said that demonstrations made by students could not compromise the foreign policy followed by the Government, which was to aim at the preservation of peace and the amelioration of the position of the Christian subjects of the Porte.

There has been a heavy fall of snow at Pesth.

TURKEY.

According to the original announcements, the Parliament was to have been opened on Tuesday. It is now officially announced, however, that the ceremony has been postponed until Monday next, to give the deputies from the distant provinces time to reach the capital.

The Minister for Foreign Affairs has telegraphed to the Ottoman Ambassador in London a despatch advising him of the reorganisation which is being carried out, and enumerating the reforms which will be submitted to the Turkish Parliament, as well as those which are immediately applicable.

The appointment of Khalil Cherif Pasha as Ottoman Ambassador to France is officially announced.

General Ahmet Hamdi Pasha, Military Governor of Silistria, has been appointed Minister of Police in the place of Omer Peizy Pasha, who has been dismissed.

The negotiations for peace between Turkey and Montenegro do not advance. There was a fresh meeting of the Council of Ministers, on Monday, to consider the reply to be given to the Montenegrin demands, against two points of which—the cession of the district of Niksic and of the territory claimed towards the Albanian frontier, on the right bank of the Moratcha—the Porte raises strong objection.

According to the *Times* correspondent at Belgrade, the insurrection in Bosnia appears to be gaining strength. The leader is Colonel Despotovich, of whom we are told that he is a Serb by birth, who went to Russia twenty-five years ago, and entered the Imperial Guard. At the breaking out of the Servo-Turkish war he held the rank of Colonel, and appeared in Belgrade as a Colonel in the Servian army.

ROUMANIA.

The general Budget for 1877, estimating the public revenue at 81,000,000*l.* and the expenditure at 87,500,000*l.*, has been voted by the Chamber of Deputies and approved by Prince Charles. A decree, signed by Prince Charles, ordering the formation of two new Roumanian artillery regiments, was officially published at Bucharest on Wednesday.

GREECE.

In consequence of an adverse resolution adopted in the Chamber of Deputies, the Ministers resigned, and the King summoned M. Deligeorgis to form a new Cabinet. His Ministry is composed as follows:—M. Deligeorgis, President of the Council and Minister for Home and Foreign Affairs; M. Levidi, Minister of Finance; M. Mavromichalis, Minister of War; M. Antonopoulou, Minister of Public Instruction; M. Zochio, Minister of Marine; M. Roufo, Minister of Public Worship.

M. Deligeorgis made a speech in the Chamber, last Tuesday, on the national finances and other matters. He said he was not opposed to military preparations, but, in view of the expenditure which they would occasion, he considered it first necessary to balance the Budget, which presented a deficit of 2,000,000 drachmas. The sum in the Treasury at the present time was only 20,000 drachmas. He proposed certain modifications of the law on Ministerial responsibility. He desired that responsibility should attach to the heads of Ministerial departments; and a bill to this effect was presented and read a first time, as was also a bill relating to the issue of Rentes. The Chamber has passed a vote of confidence in the new Government by a small majority, the numbers being 75 to 72.

EGYPT.

The Khedive has formally presented to the British nation the obelisk known as Cleopatra's Needle.

M. Ferdinand de Lesseps announces from Cairo that the Canal Ismailieh, uniting the Nile with Lake Timsah, will be officially inaugurated on April 9. M. de Lesseps' proposals, made in the name of the Suez Canal Company, to complete and work the navigable canal between Cairo and Ismailia, provided that the company should be authorised to levy certain dues upon all vessels passing through the canal, have been accepted by the Egyptian Finance Committee, consisting of the Minister of Finance and the English and French Comptrollers-General. Upon this work large sums of money had been expended, and it was almost completed when funds failed, and the works had to be abandoned. By the execution of the plan proposed large tracts of desert land will be reclaimed to cultivation.

It is telegraphed from Cairo that the necessary funds for the payment of the April coupon of the secured loan of 1864 are in the Treasury of the Public Debt. All arrears of salary were on Monday afternoon paid to the employes of the Egyptian Government at the Ministry of Finance.

An Egyptian war-vessel, cruising off Suez for the purpose of capturing slavers, has been burnt at sea. There were 420 persons on board, of whom several were Englishmen; but 400, including all the Europeans, were saved by the Agra.

DENMARK.

The Finance Committee of the Upper House has ratified the resolution of the Lower House that Denmark shall not take part in the Paris Exhibition of 1878.

AMERICA.

All the Cabinet appointments made by President Hayes have been confirmed by the Senate, the voting being nearly unanimous. The President has caused it to be announced that persons holding minor offices in the public service will not be disturbed if they have discharged their duties properly. Replying to a deputation of coloured Congressmen and other citizens of South Carolina, President Hayes expressed his desire to remove the antagonism of races, and especially political differences based on the question of colour. In regard to the employment of military force, he said that, though it was repugnant to American institutions, it would be necessary to employ it until the Southern Democrats respect the rights of their political opponents. The Democratic Legislature of Louisiana has resolved to accept and co-operate with the Southern policy indicated in President Hayes's inaugural address.

President Hayes's Cabinet has begun well. Mr. Evarts, Secretary of State, and Mr. Carl Schurz, Secretary of the Interior, have draughted regulations for a reform of the Civil Service in their departments. This is really one of the most pressing needs of the United States.

At the New Hampshire election, on Tuesday, Mr. Benjamin F. Prescott, Republican, was elected Governor by 3500 majority. The Republicans will elect two, probably three, members of Congress. The Democrats will have a majority of but three in the next House of Congress now that the Republicans have carried New Hampshire. The Democrats in the Senate, owing to vacancies caused by illness, are as strong as the Republicans.

The opposition to the probate of Commodore Vanderbilt's will has been withdrawn by the heirs, the contest being compromised. Mr. William H. Vanderbilt, the chief legatee, agrees to pay to the other heirs about seven millions besides legacies. The will has been admitted to probate.

A panic occurred in a Roman Catholic church in New York on Thursday week, and six persons were trampled to death in the rush that followed.

AUSTRALIA.

A bill was read the second time in the New South Wales Legislative Assembly on Jan. 12, its object being chiefly to give the Sydney University power to confer, without examination, a degree upon any person who shall have obtained an equivalent degree in any other recognised university elsewhere.

It was expected, according to the latest news received from Melbourne, that, immediately after the assembling of the Victorian Parliament in the course of the present month, a desperate struggle would be entered upon between the partisans of free trade and protection, the issue of which was considered doubtful.

INDIA.

Sir John Strachey, the Finance Minister, submitted the Indian Budget to the Legislative Council on Thursday.

The finally closed accounts for 1875-6 show the actual revenue to have been £2,515,789, and the expenditure £3,117,535, including £395,779 for famine relief and £4,270,829 for public works extraordinary, thus leaving a deficit of £2,001,777. Excluding the charge for extraordinary public works, but not the famine expenditure, there would have been a surplus of £1,068,882. The regular estimates for 1876-7 place the revenue at £31,247,700, and the expenditure at £37,285,000, including £3,800,000 on account of public works extraordinary, thus showing a deficit of £6,037,300. Excluding from the latter the estimated cost of famine relief, £2,278,300, but including the loss of revenue, estimated at £3,100,000, there would be a surplus on the ordinary account of £624,800, excluding famine charges. The Budget estimates for 1877-8 place the revenue at £32,192,700, and the expenditure at £36,424,000, including public works extraordinary, £3,628,000. The deficit of £3,231,300 is reduced to £821,700 by excluding the cost for public works and the cost of famine relief, estimated at £2,100,000. With these deductions there would thus be a surplus of £5,250,000 on the two years' ordinary account, excluding the famine expenditure of £928,300.

The net amount borrowed in 1876-7 was £3,724,000. The loans to be raised in 1877-8 amount to £6,500,000, including £250,000 from Sindh for the Gwalior Railway. Of the remaining £6,250,000, the Indian Government proposes to raise £2,500,000 in India. The Government is not authorised to pledge the Secretary of State for India regarding loans issued in England, but recommends him to ask Parliament for power to borrow £3,750,000 in England. No fresh Imperial taxation is proposed. The Bengal and North-West Provinces will be required to provide by local taxation for the interest on the capital borrowed for the local railways and canals under their management.

The provincial system, started by the late Earl Mayo, is to be largely extended in Bengal, the North-West Provinces, and other provinces hereafter. Special measures are being considered to meet the famine charges incurred.

The Indian Government has under consideration the abolition of inland customs lines, and of the sugar duties and the equalisation and reduction of the salt duties. The Indian Government is likewise pledged to abolish the import duties on cotton goods with the least possible delay. Sir John Strachey proceeds, however, to point out that all measures of fiscal relief must be postponed for this year in consequence of the famine. He considers the present financial position of India to be satisfactory, and regards the future as promising.

The estimated cash balances in India to the credit of the Government amounted at the end of 1876-7 to £11,539,700, and will amount at the end of 1877-8 to £12,500,000.

Sir Bartle Frere, the newly-appointed Governor of Cape Colony, left England, yesterday week, in the mail-steamer Balmoral Castle, for the Cape.

A fire, by which five lives were lost and damage done to the estimated amount of 200,000 *dols.*, has occurred at St. John's, New Brunswick.

Sir Louis Mallet, C.B., Under-Secretary of State for India, Mr. Mulholland, M.P., and Mr. Kennedy, of the Foreign Office, have been named to act as commissioners in the approaching discussions at Paris for the negotiation of a new commercial treaty between England and France.

Early in January her Majesty's ship *Avon* went up the Congo and severely punished the natives who had plundered the stranded American barque *Thomas Nicholson* and carried away thirty tons of coffee into the interior. The *Avon* destroyed seven villages and killed three men.

A telegram from Madeira reports that the Transvaal Republic has made peace with Secoceni, who has agreed to give 2000 cattle as an indemnity, and to acknowledge himself as a subject of the Government. The news from Zululand is also peaceful. It is stated that the Transvaal farmers show great opposition to Sir Theophilus Shepstone's mission.

The appointment of Lieutenant Herbert Belasyse Moffatt to be her Majesty's Vice-Consul at Sebastopol is gazetted; also the appointment of Thomas Fellowes Reade, Esq., now her Majesty's Consul at Cadiz, to be Consul of Smyrna; of Mr. Charles Louis St. John, her Majesty's Vice-Consul at Jassy, to be Consul at Ragusa; and of Gustavus Nathan, Esq., to be Consul at Vienna.

Mr. John Dangerfield will contribute to the forthcoming number of the *New Quarterly* a tale entitled "The Mystic; or, a Journey to Edinburgh."

Mr. Wallis Mackay intends to publish a pictorial novelty on boat-race day, entitled "Mackay's Race Result Chart." The utility of the Chart is that the positions of the boats will be given at the points of interest along the course. It will be published near the river, immediately after the race.

THE CHURCH.

PREFEMENTS AND APPOINTMENTS.

Pigg, Thomas F., to be Vicar of Handley with Curacy Saint Andrew. Trerley, Edwin; Vicar of Whitworth, near Rochdale. Caisson, J.; Curate of Winwick, Lancashire. Champenowne, Walter; Rector of St. Marytavy. Davis, John; Incumbent of Gabalfa. George, P. E.; Vicar of Bathwick. Highton, Edward; Vicar of Buddehaven, Cornwall. Holmes, T. S.; Chaplain of Wells Theological College. Jackson, J.; Vicar of St. John's, Sheffield. Noel, Henry Anthony; Vicar of St. Stephen's, by Saltash. Oldham, R. S.; Incumbent of St. Mary's, Glasgow; Dean of Glasgow. Pigot, J. C.; Vicar of St. Thomas's, St. Helen's. Savage, William Richard; Vicar of Awre, Gloucestershire. Wilkie, C. H.; Rector of Edburton, Sussex. Wilson, B. W.; Diocesan Inspector of Schools; Vicar of Lazenby. —*Guardian*.

St. Mary's Church, Newton Moor, which has been closed for additions and alterations, was reopened on Sunday.

Two stained-glass windows by Clayton and Bell have been placed in Pentridge Church, Dorset, to the memory of the late Rector, the Rev. Duncan Campbell.

A new church was opened, last week, by Bishop Tozer, at Hucknall Torkard, the Notts village in which Lord Byron lies interred. It will accommodate between 250 and 300 persons.

The west window in Campden church, Gloucestershire, has been filled with stained glass by the family and friends of the late Rev. C. E. Kennaway, forty years Vicar, at a cost of about £280. The subject illustrated is Jacob's dream (Gen. xxviii. 12). The work has been executed by Messrs. Powell.

The parish church of Sibstone, Leicestershire, was reopened, after restoration, on Sunday, March 4, when sermons were preached in the morning by the Bishop of Peterborough, and in the evening by the Rev. T. D. C. Morse, M.A., Rector of Fenny Drayton. The restoration, which has transformed an unsightly edifice into a handsome village church, has cost about £1100, of which the principle portion was contributed by the Rector, the Rev. T. Douglas Page.

Miss Hunter laid the foundation-stone of a new church in Talbot-street, Whalley Range, on Saturday last. It has been designed by Messrs. Pennington and Bridgen, architects, of Manchester, and it will consist of nave, north and south aisles, transepts, and an apsidal chancel. At the crossing there is to be a tower and spire 150 ft. high. The only entrance to the building is by a porch or narthex at the west end. The church is intended to accommodate 800 persons. At present, however, only the nave will be erected, and it is estimated to cost £6000. The Bishop of Manchester gave an address on the occasion.

THE UNIVERSITIES AND PUBLIC SCHOOLS.

OXFORD.

The "Ireland" Scholarship has been awarded to Edward Thomas Griffiths, Exhibitioner of Balliol. Proximo accesserunt—Alfred Denis Gcdley, Scholar of Balliol; Robert Lawrence Ottley, Scholar of Pembroke. Mr. Griffiths, who was recently elected to the Hertford Scholarship, has thus won both the great classical scholarships in one year, a feat only achieved three times since the foundation of the Hertford Scholarship in 1834—viz., in 1836, by Mr. Linwood, Student of Christ Church; in 1843, by Professor Edwin Palmer, then Scholar of Balliol; and in 1844, by the late Professor Conington, then Demy of Magdalen.

The Arnold prize for a historical essay, open to graduates of less than eight terms' standing from matriculation, has been adjudged to Alexander Robertson McEwen, B.A., of Balliol.

Mr. Joseph Armitage, B.A., New College, has obtained the Burdett-Coutts Scholarship. It was founded by Baroness Burdett-Coutts "for the promotion of the study of geology and of natural science as bearing on geology."

Mr. Archibald A. Pranker, Commoner, of Worcester College, has been elected Vinerian Scholar for the ensuing year; and Mr. A. W. G. Ranger, also of Worcester, has been placed proximo accessit.

CAMBRIDGE.

At a Congregation, on Thursday week, Herr Joachim was admitted to the honorary degree of Doctor of Music. This honour had also been offered to Herr Brahms, but he was unable to be present. Sir John Goss and Mr. Arthur Sullivan received the degree last year. The Public Orator, Mr. J. E. Sandys, presented Herr Joachim in a Latin speech. Herr Joachim was then lead forward and admitted by the Vice-Chancellor in the usual form, amid the enthusiastic applause of the undergraduates. Many visitors, especially musical people, had come to Cambridge to witness the ceremony; and in the evening the Cambridge Musical Society gave a concert, which is noticed in the Music column.

The Vice-Chancellor has appointed Sir C. Wyville Thomson, LL.D., Professor of Natural History in the University of Edinburgh, to the office of Sir Robert Rede's Lecturer for the ensuing year. Sir C. Wyville Thomson will give a lecture in the Easter Term.

At a special congregation at Cambridge, on Thursday, a grace was passed sanctioning the expenditure of £11,977 for the erection of a divinity and literary school.

The class and general lists both for boys and girls for the local examinations held under the auspices of the University of Cambridge in December last have just been issued. They show, with regard to boys, that there passed among the juniors 232 in Class I., 231 in Class II., and 380 in Class III.; 963 satisfied the examiners, 607 failed, making a total (with 254 for absentees and rejections) of 2568 candidates. The absentees were 139. Of the seniors, 31 passed in Class I., 58 in Class II., and 49 in Class III.; 134 satisfied the examiners, and 130 failed. There were absent 30, and two candidates were rejected for misconduct, making a total of 431. The total number of candidates was thus 3002. On the girls' side, of the juniors, 10 passed in Class I., 39 in Class II., 157 in Class III., and 460 satisfied the examiners; 258 failed, and 42 were absent. Of the seniors, 10 passed in Class I., 32 in Class II., and 92 in Class III.; 338 satisfied the examiners, 221 failed, and 20 were absent, making the total number of candidates, 1631.

Mr. Grote, the late President of University College, London, bequeathed, at the death of his widow, a sum of £6000 for the endowment of the Professorship of Philosophy of Mind and Logic. Mrs. Grote, however, has handed over to the council of the college a cheque for the money.

At the monthly meeting of the council of the University College of Wales, one of the governors expressed his intention of giving £200 a year for three years, to be applied in such form as the council may deem best in connection with the college, for the encouragement of scientific agriculture.

A window has been placed in the north transept of the chapel of Rugby School, as a memorial to Mrs. Arnold, the widow of Dr. Arnold, who survived her husband for more than thirty years, retaining to the last a warm interest in the school and the affectionate regard of all connected with it. The window is placed immediately above Dr. Arnold's monument. The subject, suggested by the writer of his life, the Dean of Westminster, is from the life of the three Patriarchs—Abraham, Isaac, and Jacob.

METROPOLITAN NEWS.

A new list of the members of the Institution of Civil Engineers has been received, from which it appears that there are now on the books 897 members, 1665 associates, fifteen honorary members, and 440 students: 3017 of all grades.

Sir William Harcourt, M.P., has been elected a member of the Reform Club by the committee, under the rule which empowers them to choose each year a certain number of members distinguished in politics, literature, or science.

Mr. Alderman Cotton, M.P., and Mrs. Cotton were entertained at dinner, yesterday week, at Willis's Rooms, by the members of the dramatic profession. Mr. Benjamin Webster presided, and the company included nearly all the chief actors and actresses, managers, and dramatic authors in London.

The Astronomer Royal reports that there were 17.4 hours of sunshine in London last week, out of 78.7 hours during which the sun was above the horizon. On Thursday the sun shone 5.4 hours and on Saturday 5.2 hours. On Sunday and Tuesday it did not shine at all.

The *Morning Post* is informed that the office of Black Rod, vacant by the death of Sir A. Clifford, has been accepted by General Sir W. Knollys; and that the salary has been fixed at £2000 per annum, with a residence within the precincts of the Palace of Westminster.

The commemoration festival of the Orphan Working School, held last week, at Willis's Rooms—the Prince of Wales in the chair—resulted in an addition to the funds of £7757. The sum of £21 has been voted by the Leathersellers' Company towards building an infirmary at the senior school at Haverstock-hill, and a new school-room and laundry at the junior school, Hornsey-rise.

Application has been made to the Court of Chancery, in a motion which is now heard annually, to permit the distribution among certain charities of the sum of £3500. The money has accumulated in the hands of the treasurer of a society for the relief of small debtors in prison, and, since imprisonment for debt has been abolished, the governors have no other course than to make such a motion as this. It was granted.

At the annual general meeting of the members of the Royal Literary Fund, held on Wednesday, under the presidency of Mr. Anthony Trollope, it is announced that Lord Darby, president of the fund, will preside at the anniversary dinner, which will take place on May 9. The whole receipts for last year amounted to £3080, and the disbursements to £2971. There had been forty-six grants to distressed authors, their widows and orphans, during the year, amounting to £2315.

The prizes won during the past year by the members of the 7th Surrey Rifles were, on Saturday last, presented by Colonel Beresford, M.P., who commanded the regiment for several years and is now honorary Colonel. There was a large attendance of visitors. The chair was taken by Major Porter. The prizes won by the shooting members of the Honourable Artillery Company were presented, on Thursday week, by Mrs. Lloyd-Lindsay, whose husband, Colonel Lindsay, the commanding officer, commented on the work of the past year.

The weekly return of metropolitan pauperism shows that the total number of paupers last week (the first week of March) was 86,005, of whom 39,184 were in workhouses and 46,821 received outdoor relief. Compared with the corresponding period in the years in 1876, 1875, and 1874, these figures show a decrease of 1639, 12,472, and 22,229 respectively. The number of vagrants relieved on the last day of the week was 621, of whom 455 were men, 128 women, and 38 children under sixteen.

Sir Stafford Northcote, on Tuesday, received a large and influential deputation, representing London and Liverpool, who waited on him to complain of the pressure of the inhabited house duty on houses occupied for the purposes of trade, and which would be exempt from payment of the duty, except for a care-taker residing, or a professional man, solicitor, or civil engineer occupying offices, therein. The Chancellor of the Exchequer, while pointing out objections to the exceptions, said that he was not indisposed to consider the question.

The report of the council of the Corporation for Middle-Class Education in the City of London and its suburbs shows that the attendance at the school during the past year averaged 1250 scholars, and that the annual deficit has at last disappeared. It has not been found possible to reduce the debt (£3600) which existed at the beginning of the year, but the council entertain the hope that the liberality of charitable trustees and the public will remove it, and establish an endowment fund to provide for necessary repairs and the improvement of the educational appliances of the school.

Dr. Frankland reports, as the result of his analysis of the waters supplied to the metropolis and its suburbs during February, that the Thames and Lea water showed a considerable improvement upon that delivered in January, and all the waters were efficiently filtered except that supplied by the Southwark Company, which was slightly turbid and contained moving organisms. The water furnished by the Kent Company, by the Colne Valley Company, and by the Tottenham Local Board, from deep artesian wells in the chalk, was of the usual quality and nearly free from organic impurity.

A second concert in aid of the new Hospital for Women, Marylebone-road, was given last week, by permission of the Duke of Westminster, at Grosvenor House. The special feature of the hospital is that its working medical staff consists entirely of women, regularly qualified as medical practitioners. The hospital contains twenty-seven beds, and it has besides a large dispensary department, to which upwards of 7000 visits are paid annually by poor women and children. The list of executants at the concert referred to included the names of Madame Schumann, Miss Zimmermann, Herr Joachim, and Signor Piatti, besides those of many other well-known artists; and the rooms were filled. We understand the charity will receive over £500 from the two concerts.

Sir Charles Reed presided over the meeting of the London School Board, on Wednesday, when a recommendation of the Industrial Schools Committee was adopted to the effect that the consent of the Home Secretary should be asked to the establishment of a central industrial school ship for 500 boys, and to the borrowing of the necessary funds for the purpose. A letter was received from the secretary of the council of University College, London, offering two scholarships each of the value of £40 a year for four years, on certain conditions. The scholarships were accepted, and the matter was referred to the school management committee to carry out. The debate on Professor Gladstone's motion relating to spelling reform was resumed, and, after several amendments had been negatived, the following motion was adopted unanimously:—"That the answers already received from the Society of Arts and from various country school boards, and those to be received hereafter (with reference to the resolutions of the board on spelling), be referred to a Select Committee, with instructions to draw up a memorial and to advise the board as to the manner of its presentation."

The Duke of Westminster makes an appeal to the public on behalf of the Westminster Hospital. Important structural improvements and extensive repairs have been decided upon, and the estimated cost is £12,000. Contributions may be sent to the secretary, Mr. J. Wilson, Broad Sanctuary, S.W.; or to bankers, Messrs. Hoare, Fleet-street, and Messrs. Ransom and Bouverie, 1, Pall-mall East.

The School of Art-Needlework was founded, in 1872, for the twofold object of supplying suitable employment for poor gentlewomen and restoring ornamental needlework to the high place it once held among decorative arts. The staff of lady workers has been carefully trained, and is now able to undertake decorative needlework of all kinds except lace, and to restore ancient needlework—a branch to which particular attention is given. A catalogue of needlework from designs by Princesses Christian and Louise, and others, specially executed for the Centennial Exhibition, Philadelphia, having been received back from America, is now arranged for public inspection and sale, and will be visible until Saturday next, the 24th inst., at the show-rooms of the school, Exhibition-road, South Kensington.

The committee of management of King's College Hospital have long wished to put their institution on the vantage ground already secured for several other hospitals, in having a Convalescent Home connected with it. The death of their late treasurer, Mr. Robert Cheere, one of the founders and most liberal supporters of the hospital, led to the establishment of a memorial fund, which, through the liberality of his personal friends, amounts to nearly £3000. It is sought to give a larger scope to this effort, by raising a fund for the purpose of establishing a convalescent home in some convenient situation near London. Dr. Guy, of 12, Gordon-street, W.C., treasurer of the Cheere Memorial Fund; and Mr. Foster, secretary to King's College Hospital, will afford any explanation that may be required respecting the fund and its destination.

The thirtieth anniversary festival of the Asylum for Idiots was celebrated, yesterday week, at the Albion Tavern, Aldersgate-street, under the presidency of Mr. Francis Peek. The report, printed by the inmates at the asylum, records the gratitude of the committee at the continued prosperity of the institution, and the improved condition, bodily and mentally, of many of the inmates, who now number nearly 500. The charity was aided during the past year by many liberal contributions and legacies, but additional funds are required for the purpose of erecting a detached infirmary. In proposing the toast of the evening, "Prosperity to the Asylum for Idiots," the chairman claimed that no institution was more deserving of sympathy and pecuniary aid. The institution owed its existence to the philanthropic efforts of the late Dr. Andrew Reed, whose son, Sir Charles Reed, was present. The institution was admirably conducted, and in many instances children who had been burdens on their families at home had been elevated in mind and cared for in body, and, as far as possible, had been brought up to the level of a rational being. The secretary (Mr. W. Nicholas) announced subscriptions amounting to £3613; the donors including Mr. Watson, £105; Mr. Thomas Green, £100; the Worshipful Company of Drapers, £105; Mr. F. Peek, £105; Mr. James Peek, £100; Mr. W. R. Winch, £105; and the Governor and Company of the Bank of England, £50.

Last week 2543 births and 1782 deaths were registered in London. Allowing for increase of population, the births were 6 below, whereas the deaths exceeded by 136, the average numbers in the corresponding week of the last ten years. The deaths included 96 from smallpox, 33 from measles, 17 from scarlet fever, 4 from diphtheria, 28 from whooping-cough, 25 from different forms of fever, and 10 from diarrhoea; thus to the seven principal diseases of the zymotic class 213 deaths were referred, against 187, 208, and 212 in the three preceding weeks. These deaths were 19 below the corrected average number from the same diseases in the corresponding week of the last ten years. The mortality from smallpox again increased last week, having been 84 in the previous week. The fatal cases of scarlet fever, diphtheria, whooping-cough, and fever were considerably below the corrected average weekly numbers. The deaths from measles, however, exceeded both the numbers in recent weeks and the corrected average. The deaths referred to fever, although 11 below the corrected average, considerably exceeded the numbers in recent weeks: 2 were certified as typhus, 20 as enteric or typhoid, and 3 as simple continued fever. Five deaths were caused by horses or vehicles in the streets. In Greater London 3069 births and 2070 deaths were registered. Fifteen deaths from smallpox were registered in the Outer Ring, against but 6 in the previous week. The mean temperature was 36.9 deg., and 3.6 deg. below the average.

AMERICAN PRAIRIE TRAVELLING.

It is notorious that a railroad now crosses the entire vast breadth of the North American continent; and one special excursion party, with which our own Artist travelled, has rushed all the way from New York to San Francisco within four days. Yet there still remain, in the immense rolling plains between the Mississippi and the Rocky Mountains, some routes of several hundred miles which must be traversed by the four-horse waggon, shown in a Sketch we have engraved, or by some other conveyance with equine aid, where the steam locomotive has not yet passed on its path of world-conquest. The aspect of these American prairies, in many parts, is rather like that of the Roman Campagna; with a general level, the ground only rising to low ridges, brows, or billows; seldom utterly flat; with a beautiful profusion and variety of flowers in the early spring; but in summer and autumn, when the long grass has turned from a dusty faded green to pale yellow, dried by the sun and want of rain into mere straw or hay as it grows, it has a very desolate appearance. There are large patches of bare, sandy ground, and a spacious tract of land is often burnt and blackened, during the season, by the occasional prairie fires. No real dangers, however, beset the well-appointed traveller in this region, except in times when there is some hostility on the part of the wandering Indian tribes. We have lately heard or read much unpleasant news of the conflict waged by the United States frontier troops, which were not always victorious, against those savage warriors of the Far West. Mr. John White, Fellow of Queen's College, Oxford, in his recent book of "Sketches from America," relates a little anecdote which comes in pat. Having alighted, with other passengers, from the railway train at North Platte Junction, he asked an officer of the military force stationed there if there was really any danger from the Indians. The answer, in broad Western speech, though a little brusque, was quite to the point: "Wal, if you think there aint danger, you jist go a couple of miles or so beyond them thar bluffs, and if you git back with your hair on, why, you come and tell me." He clearly meant that a walk in the direction he showed would lead to the loss of one's scalp. The men we see in the waggon, alert with keen eyes for the distant foe, and very well armed with repeating-rifles, will scarcely fall on any prey to the Sioux Indians, but they seem to expect a fight in about ten minutes.

AMERICAN SKETCHES.—PRAIRIE TRAVELLING: INDIANS IN SIGHT.

"THE MANTILLA." BY C. BECKER.
BY PERMISSION OF THE BERLIN PHOTOGRAPHIC COMPANY.

PARLIAMENT.

LORDS.

Resuming the record of the Upper House, we find little worth dwelling upon save the Burials Bill, the introduction of which will presently be noticed. The sitting yesterday week was of twenty minutes' duration, and the only business of any importance transacted the passing of the Consolidated Funds (£350,000) Bill, on the motion of the Earl of Beaconsfield. Royal Assent was given by Commission to this bill on Monday, when the House sat close upon two hours, the time being occupied mainly by a conversation as to the merits and demerits of the government of London by vestries and the Metropolitan Board of Works; to which succeeded a question as to why that intrepid traveller, Captain Burnaby, had been recalled from Khiva. Earl Delawarr reopened the subject of metropolitan misgovernment in moving for returns of local expenditure during the past three years; and Earl Beauchamp, though promising to produce the returns asked for, thought the noble Earl's remarks were rather hypercritical; but the Duke of Somerset and Earl Fortescue seemed disposed to coincide with Earl Delawarr's views. The recall of Captain Burnaby was decided upon, the Earl of Derby explained to Lord Dorchester, "for reasons of a political nature."

Lord Derby, replying, on Tuesday, to Lord Granville, hoped "before long" to be able to give the House some information respecting the negotiations going on with regard to the Eastern Question. The Duke of Richmond then brought in the Burials Acts Consolidation and Amendment Bill. His Grace prefaced his exposition of the Government measure with a review of past legislation on the matter, dwelling rather upon the sanitary than the religious aspects of the vexed question, and said the present bill proposed to consolidate the Burials Acts, to transfer the Home Secretary's authority over graveyards to the Local Government Board, so that in every parish there might be a Burial Authority composed either of the Vestry or the Sanitary Board, but that ratepayers might have the privilege of appealing to the Secretary of State if the local board should refuse to grant any fresh consecrated or unconsecrated ground that might be deemed necessary by the inhabitants. Moreover, there was a clause by which any deceased person might be buried in a churchyard without the performance of any religious service over his grave if the relatives should give four-and-twenty hours' notice that such was their desire. Earl Granville, in announcing he would probably be able to controvert the noble Duke's statistics on the bill coming on for second reading, remarked that a grave defect of the measure was that, although it would give Dissenters the right to be admitted to the churchyards, it would consign their remains to the grave without the slightest religious observance. Replying to this criticism, the Archbishop of Canterbury said Convocation was now engaged in reconsidering the rubric of the Prayer-Book, and it was the wish of the clergy to introduce some service which might be read over their Dissenting brethren without violating their scruples. The bill, as a whole, was approved by the Primate, and was read the first time.

Verily their Lordships are improving the occasion by the way they manage to economise their time in the dispatch of public business. On Thursday they met at the usual hour, five o'clock, and separated twenty minutes afterwards, giving a clear five minutes to the general interests of the British empire, its colonies and dependencies—the orders of the day never being taken until a quarter after five o'clock. Previous to the second reading of the Treasury and Exchequer Bills Bill, the Earl of Beaconsfield explained that it would in no degree add to the borrowing powers of the Government, but would provide a more convenient form of raising money. It would have an advantageous effect in facilitating and economising advances from the Public Works Loan Commissioners.

COMMONS.

From a business point of view, Mr. Selater-Booth was the member of the Government who monopolised attention most at the last two sittings of the past week. On Thursday week he succeeded in getting his Valuation of Property Bill read the second time, despite an abortive attempt on the part of Mr. Biggar and Mr. Parnell to adjourn the debate.

Yesterday week Mr. Selater-Booth had to perform the military evolution of right-about-face at very short notice. The issue of a Government whip in the morning indicated that the Ministry intended to oppose Mr. C. Read's motion:—

That no readjustment of local administration will be satisfactory or complete which does not refer county business, other than that relating to the administration of justice and the maintenance of order, to a representative county board.

Hon. members came down in goodly numbers in consequence of the whip, but quickly vanished when Mr. Read, having brought forward his motion in a speech which was loudly cheered, and Sir Harcourt Johnstone having been his seconder, Mr. Selater-Booth rose, and at the end of a rambling discourse on unions, lunatics, and county police, declared, amid ironical cheers, that the Government would accept his hon. friend's motion. Here the subject might well have been dropped. But speeches had been prepared, and must be delivered. So it was that Mr. Whitbread, Mr. J. R. Yorke, Mr. Whitwell, and Mr. Paget spoke to a dwindling House until Mr. Biggar, seizing his opportunity, called the Speaker's attention to the numbers present. Whereupon, members streamed in only to file out again when the Speaker had intimated that over forty were in the House. Captain Nolan then threw some animation into the theme, which was taken up by Mr. C. Garnier, Sir W. Barttelot, Mr. Rathbone, Mr. Pell, Mr. Ward Hunt, Sir G. Bowyer, Mr. Dodson, the Chancellor of the Exchequer (who said the Government seriously intended to introduce some measure on the subject), the Marquis of Hartington (who was glad that the principle upon which local administration must be readjusted would be decided by the unanimous vote of the House), Mr. Newdegate, Mr. Butt, Mr. Fawcett, and Mr. Gathorne Hardy. Mr. Whalley moved the adjournment of the House in order to urge yet another plea on behalf of the "Claimant," but the Speaker pointed out that the hon. member was not in order, and had at length to call Mr. Whalley to order. When the Metropolitan Open Spaces Bill and the Irish Beer Licenses Bill had been read the third time and passed, Mr. Whalley returned to the charge again, but was summarily disposed of by Mr. W. H. Smith.

The Easter holidays are thus early being longed for by some hon. members, if a question put to the Chancellor of the Exchequer on Monday may be taken to indicate the general feeling of curiosity as to the intentions of the Government. Sir Stafford Northcote said, answering Mr. Beresford Hope, he hoped the House would be able to adjourn from Tuesday, March 27, until the following Thursday week. Something like a general naval engagement may be said to have been engaged in by Mr. Ward Hunt on Monday. Moving into action with characteristic stateliness, the First Lord of the Admiralty unflinchingly received broadside after broadside from Dr. Cameron (who opened fire with a question as to the sinking of H.M.S. Vanguard), from Mr. Gorst (who thought the order respecting the pay and pensions of warrant officers should be read), from Mr. P. A. Taylor (whose motion that more information should be furnished with regard to crime in the

Navy was opposed by Mr. Hunt, and negatived by 121 to 65 votes), and from Sir J. D. Hay, whose criticism on the ironclad navy brought Mr. Goschen to the rescue of Mr. Ward Hunt. He hoped some change would one day be made in the rules to enable a Minister to introduce the Estimates without preliminary discussion. After replying to the various questions and criticisms, the First Lord of the Admiralty was at length enabled to introduce the Navy Estimates. He felicitated himself, in the first place, on being able to announce a reduction in the sums he should have to ask the House to grant for the maintenance of the Navy. The Estimates would be £10,979,829—£309,043 less than last year's. During the three years he has been in office fifty-four ships had been laid down, thirty launched, and six more will be launched in 1877-8. A new Agamemnon and a novel torpedo-ram, the invention of Sir George Sartorius, are to be the leading features of the programme for the year. Fifteen torpedo-vessels for coast defence will be built in private yards. The engineering service of the Navy would be greatly improved. The Naval Reserve had been joined by the Prince of Wales, who had accepted an honorary captaincy; and his Royal Highness had also shown his partiality for the service by his resolve to send his two sons to be educated on board the Britannia training-ship. Mr. Hunt concluded his speech with a good-natured reference to the Arctic Expedition, which could not have reached the Pole, in his opinion, even if scurvy had not unfortunately broken out. There was a fruitless motion by Mr. E. J. Reed for the Chairman to report progress, followed by some slight carping at the hurry evinced to obtain the votes; but in the end the vote of 60,000 men and boys, including 14,000 marines, was agreed to, as was a vote of £75,511 2s. 3d. for excess of expenditure last year. Mr. W. H. Smith having also obtained a vote of £700,000 to meet the Exchequer bills due March 28, various bills passed through certain stages, the most important being the Oxford and Cambridge Universities' Bill, which was recommitted after the introduction of some amendments.

On Tuesday there was a very large assemblage of members, the attraction being Mr. Chamberlain's Gothenburg resolution. Hon. members, however, had to hear a good number of questions put and answered before they could settle down to listen to the fluent advocate of the Swedish method for regulating the sale of intoxicating drinks. Mr. Whalley had again to be rebuked by the Speaker for persisting in speaking on the Tichborne case after he had been called to order. "Really, I don't know how to make myself intelligible," pleaded the hon. member for Peterborough, the House thoroughly indorsing the confession. Replying to the Marquis of Hartington, who put a similar question to that which Lord Granville addressed to the Government in the House of Lords, the Chancellor of the Exchequer stated, "All I can say at the present moment is that a communication has been addressed to her Majesty's Government by the Government of Russia, and it is at this time under the serious consideration of her Majesty's Government. I cannot say more." Sir C. Legard, whose explanation met with repeated interruptions from the Opposition, withdrew his notice of motion respecting Lord Coleridge's refusal of costs at the late prosecution of poachers at Durham Assizes. Cheers greeted Mr. Chamberlain when he rose to move—

That it is desirable to empower the town councils of boroughs, under the Municipal Corporations Act, to acquire compulsorily, on payment of fair compensation, the existing interests in the retail sale of intoxicating liquors in their respective districts; and thereafter, if they see fit, to carry on the trade for the convenience of the inhabitants, but so that no individual shall have any interest in nor derive any profit from the sale.

The hon. member pointed out that intemperance was "the bane of our national life," and suggested we should follow the example set by Sweden, which was until recently the most drunken country in Europe. The Gothenburg system had been adopted in Sweden by every town with a population above 5000, save one; and Stockholm had now decided to adopt the plan, which had been briefly described in the motion. Police statistics showed that drunkenness diminished 50 per cent in Gothenburg a few years after the adoption of the scheme, and that for the past twelve years it was 50 per cent less than it was in the twelve preceding years; whilst in the towns which had not adopted the same plan drunkenness had greatly increased. Anticipating objections which might be advanced, he said no purer body of men than the Town Council could be chosen to manage the licensed victualling trade. The system might be confined to England and Wales, London being excepted; and if he should succeed in persuading the House to agree to his suggestion they would, at least, have excluded from "their political life the baneful influence of a gigantic vested interest." Mr. Chamberlain, whose speech was a decided success, resumed his seat amid general cheering. His motion was seconded by Sir J. Kenney, in the hope that the question might be lifted out of the "arena of party politics," but was opposed with a formidable array of unfavourable statistics by Sir H. Selwin-Ibbetson. The latter saw great difficulties in the way of adopting the Gothenburg system in this country. All parties in that House desired the reduction of crime and drunkenness. But what were the facts of the case at the model town cited by the hon. member? In Gothenburg convictions for drunkenness were certainly reduced from 2161 in 1865 to 1320 in 1868; but from 1869 to 1872 these convictions had increased to 1531, and in 1874 to 2234—a number larger than before the introduction of the system. Were this system to be tried in England, the great expense of compensating existing publicans would soon extinguish any enthusiasm the public might display for the Gothenburg plan, his objections to which had been strengthened by a letter he had received from Consul Duff, at Gothenburg. Mr. Duff wrote:—

The Gothenburg Licensing Company had a good object in view when established, but the system it appears has proved a failure owing to the way in which it has been carried out, and is at present only a money-making concern, realising a large amount annually, which forms a considerable income to the town. The drunkenness in Gothenburg is great even among the better classes, and the lower order consider the company's retail shops as their privileged resort. These shops are situated in the most frequented thoroughfares, right in the face of labourers and seamen, and I consider are a great temptation to drinking.

Finally, Sir H. Selwin-Ibbetson said the consumption of spirits in Gothenburg had risen in ten years from 66,169 gallons to 329,982 gallons. These figures did not favour the belief that the Gothenburg system would diminish drinking in this country; and he thought much might be done by the better enforcement of our present licensing laws. Sir Wilfrid Lawson said, "By the Gothenburg system it was shortly proposed that instead of the present race of licensed victuallers under whom we lived, we should have a class of patriot publicans and philosophic pot-boys." Sharply as the hon. member for the United Kingdom Alliance criticised the "fantastic scheme," he yet said he would vote for it. Mr. Grant Duff, Mr. Ferguson, Sir Harcourt Johnstone, and Mr. E. S. Howard, spoke in support of Mr. Chamberlain's motion, which was rejected, however, by 103 to 51.

Wednesday was devoted to the rejection of Sir R. Anstruther's Intoxicating Liquors Bill for Scotland by 253 to 90 votes, to the second reading of Mr. Serjeant Simon's Criminal Law Practice Amendment Bill, and to the second reading of Mr. Marten's Parliamentary and Municipal Registration Bill.

On Thursday, Mr. Rylands, who had placed a notice on the paper which he had already postponed more than once, took advantage of the intention of the Chancellor of the Exchequer to have a morning sitting on the 27th inst., the day proposed for the adjournment of the House over the Easter holidays. The hon. member once more deferred his motion to call attention to the course pursued by Sir Henry Elliot during the last twelve months until the motion for that adjournment was made, thereby reckoning upon appropriating the whole of that day to his field operations against our recent representative at Constantinople. Mr. James intimated his intention to interrogate the Government with respect to alleged fresh outrages in Bulgaria by a body of Bashi-Bazouks from Salonica, and as to the progress of the reform promised by the Turkish Government. Out of about twenty-five questions and answers, embracing a vast variety of subjects affecting our home as well as foreign interests, we select but those which we believe will be regarded by our readers with attention. Lord G. Hamilton, replying to Mr. Robertson, stated that in 1854 a treaty was entered into with the Khan of Khelat which granted him a subsidy and gave to the Indian Government the right to occupy certain passes and positions on the frontier; but in 1873 that subsidy was withheld because the Khan had not fulfilled his obligations in keeping peace in the locality. Towards the close of 1875 the treaty was, however, revised and renewed. Mr. Bourke, in his usual *sotto voce* manner—which some adverse critics would describe as official affectation, as he has obviously ample physical capacity to make himself heard as well as felt—replying to an inquiry from Mr. Potter, stated that Mr. Houghton and Captain Barlow had taken a dhow in the Red Sea with the view of proceeding to Abyssinia. They put into Massowah, where they were asked for their passports. They said that they had none, and gave their names as Knox and Baird. This created suspicion, and, after some days' detention, they were sent back to Suez. On being asked to give up their intention of proceeding to Abyssinia, Mr. Houghton was liberated on giving his parole of honour; but Captain Barlow declined to act in the same way. He complained of violence having been used towards him. This was being investigated by the Consul; and, although he was still under surveillance, he was allowed to go about in the vicinity of Suez. Mr. Sullivan enlisted the sympathetic attention of the House whilst making an inquiry respecting the behaviour of certain magistrates in Monaghan. He told a piteous case of cruelty to animals, in the conduct of a magistrate named Anketel, who, in a fit of passion, had, as alleged, deliberately cut the throat from ear to ear of a fine dog, the property of another person. Sir M. H. Beach stated that from inquiry he had made in the matter, the case against Mr. Anketel was dismissed by the magistrates on the ground that it was one for a civil tribunal for damages. The Judge at assize had reduced the damages awarded from £10 to £5. The attention of the Lord Chancellor had been called to the matter. In response to a question from Mr. Isaac, Lord J. Manners said that the postal arrangements with the United States were under consideration, and he declined to enter into the merits of the White Star or any particular line of steamers. Mr. Isaac evinced his dissatisfaction with the reply of the noble Lord by immediately giving notice of his intention, on the motion for going into supply on the Civil Service Estimates, to submit a detailed statement on the subject to the consideration of the House. Mr. Bourke was again compelled to try the strength of his lungs by a question put to him by Mr. Anderson. The right hon. gentleman stated that he had already informed the House that exceptional exemptions from special taxation had been granted to certain German subjects residing in Cuba. Her Majesty's and other Governments had protested against this, and he last year stated that the Spanish Government had promised to consider the matter. But, further complaints having been made, her Majesty's Government had addressed very strong representations to the Spanish Government on the subject. Mr. G. Hardy informed Mr. Read that steps had been taken to keep the British graveyards in the Crimea in repair, and a custodian had been appointed to look after them. Very much to the satisfaction of the Government, every motion on the paper as an amendment to that for Committee of Supply fell stillborn to the ground, and her Majesty's Ministers had the remainder of the evening from half-past five o'clock to pass the votes for the necessary funds to meet their Army Estimates.

The *Globe* states that the Surveyorship of Scotland, which recently became vacant by the death of Mr. Matheson, has been filled by the appointment of Mr. Robertson, assistant-surveyor in London.

A thunderstorm broke over the extreme north of Scotland on Sunday and Monday. The storm of Monday began about eight o'clock at night and lasted three hours, spreading over the whole of Caithness-shire. Several heavy showers of hail fell in the inland parishes.

The Royal Italian steam-yacht *Messaggiere* arrived at Malta on Monday from Catania and Syracuse, conveying Prince Charles of Prussia, brother of the German Emperor, incognito, and Princess Elizabeth, accompanied by a suite of ten ladies and a retinue of sixteen persons. Twenty rooms were taken for the party at the Imperial and Dunsford's Hotels for a three days' stay.

The petition of right by which Mr. Lynam Thomas sought to recover £15,000 from the Crown for adopting certain ideas and inventions of his in the manufacture of heavy guns ended last Saturday, after fifteen days' trial, in a verdict for the suppliant for a net sum of £6500. The jury awarded him £8790. From this, however, £2290 was deducted as a counter claim on behalf of the Crown. But a motion is to be made, on behalf of the Crown, for a new trial.

Yesterday week the annual meeting of the Association of Municipal Corporations was held at the Westminster Palace Hotel—the Mayor of Manchester in the chair. Sir Sydney Waterlow, M.P., was re-elected president. On the motion of Mr. Chamberlain, M.P., seconded by Mr. T. R. Hill, M.P., a resolution was passed declaring that the avowed object of the Prisons Bill might have been attained without interference with the principle of local self-government, whilst the expenses to be hereafter paid out of Imperial taxes in connection with gaols would, in consequence of the change proposed, be very largely increased.

Captain Allen Young has presented to the museum of the Royal College of Surgeons a valuable collection of the skulls of Esquimaux, obtained by him and the surgeon of his vessel, Mr. Horner, during the last cruise of the *Pandora*. Most of them are from Upernivik; but one of the specimens belongs to a tribe located in the neighbourhood of Whale Sound, at the north of Baffin's Bay, and therefore further north than any point from which remains of human beings have been hitherto brought to Europe. Professor Flower, F.R.S., the conservator of the museum, began his course of lectures on the Comparative Anatomy of Man, last Saturday.

"THE MANTILLA."

The article of feminine attire worn by this young Spanish beauty, which gives its name to this engaging picture, has often been described by learned travellers; but the late Mr. Richard Ford, in his very entertaining contribution to Murray's geographical "Handbooks," devotes two or three pages to this feature of national costume. "The Mantilla," he tells us, "is the Aborigine female head-gear. Iberia, in the early coins, and in the pictures of antiquity, was represented as a veiled woman." The "manto" is a short cloak, cape, or mantle, of fine woollen cloth; but the "mantilla" is a veil, made of lace or silk, or muslin, to cover the back of the head, and to fall over the shoulders. It is usually black, except on grand occasions, birthdays, bull-fights, and Easter Mondays, when fine blonde may be worn by those whose complexions will bear it. There is a fashion, not uncommonly adopted by the "maja" or smart young lady of Seville, which is thought peculiarly becoming to her dark, lustrous eyes, the "ojos Arabes," and her copious tresses of black hair, simply adorned with a single flower. The mantilla in such a case is made of black satin with a velvet border, and without lace; it is sustained by a high comb on the top of the head, but its nether ends are crossed over the bosom, and there covered by a modest kerchief, so that the neck is wholly concealed, and only the face is left open. This is an approved style of dress for the outdoor promenade or visiting; but the drawing-room attire of a Spanish lady is seen in the picture we have engraved. It is remarked by Mr. Ford that the ladies often use their fans to keep the long pendants of the mantilla in their proper position.

MR. JOHN PARRY.

The farewell benefit performance at the Gaiety Theatre, about a month ago, left us with pleasant recollections of the many hours of refined amusement, in the "buffo" style of musical comedy, which we have owed to this clever veteran performer. Mr. Parry, whose father was also a musician of good repute, is about sixty-six years old, and is a native of London. His first appearance as a singer at public concerts was in 1833; but it was not till a few years later that he set the example of a peculiar kind of mixed entertainment, combining the mimicry of personal characters, tones, gestures, and manners, in the spirit of broad farce, with the legitimate musical effects of the voice in singing, and with droll tricks of instrumental execution in the pianoforte accompaniment, the whole so blended together and harmonised as to compose a very agreeable mixture. The first of his comic songs that we can remember to have been very successful was the "Wanted, a Governess," the words written by Mr. G. Dabourg:

Wanted, a governess, fitted to fill
The post of tuition with competent skill.

There was also "Wanted, a Wife," and, on the other hand, "Lords of Creation," and "No Submissive Wife I'd be; No, not I, no, not I!" The line taken in these compositions was that of gentle ironical satire, bearing on domestic or social foibles, or the extravagancies of fashion. "Country Commissions" presented a bewildering list of the demands made on the good-nature or courtesy of Londoners by their provincial friends. "Berlin Wool" was a laughable lament over the ladylike pastime of worsted work; and it was supposed that a matron might as well employ herself with the needle and coloured threads in making a carpet for her drawing-room floor. The old romantic legends of Bluebeard and Fair Rosamond, though too sad and grim for such light treatment, were next converted into the subject-matter of John Parry's melodious merriment. He continued till 1849 taking his share of miscellaneous concerts; but Albert Smith then wrote for him a special libretto, a compound of lecturing, story-telling, singing, acting, playing on the piano, and general funning, which has since been imitated, with different measures of success, by many other performers. It was probably Theodore Hook, in the reign of King George, who was the original inventor of this sort of thing; but John Parry seems to have revived it in the Victorian era. His health unfortunately obliged him to retire from public appearances during a period of seven years, from the season of 1853 to that of 1860; but he came back to us in the genial company of Mr. and Mrs. German Reed, at the old Gallery of Illustration in Regent-street, where many a bright smile has been evoked by their joint exhibitions of genuine humour. These were always in perfect good taste, and tempered with such purity of feeling, as well as grace of style, that one might have supposed the coarsely wanton orgies of the Parisian comic opera would never be endured on a London stage. But "the old order changeth, giving place to new," and not always for the better in these things. We are happy to say that Mr. and Mrs. German Reed continue to entertain their audience at St. George's Hall. Mr. John Parry, who retired a second time in 1869, has now finally withdrawn from the platform, and we trust he will enjoy his repose.

The Portrait is from a photograph by Messrs. Samuel Fry and Co., of Surbiton.

ROMAN REMAINS IN THE CITY.

The London and Middlesex Archaeological Society held its last ordinary meeting, in St. Martin's-place, Westminster; Mr. Alfred White, F.S.A., in the chair. A paper was read by Mr. John E. Price, F.S.A., the honorary secretary, "On a Bastion of London Wall," or the recent excavations in Camomile-street, Bishopsgate-street. The object of the paper was to give an account of the explorations lately undertaken by the Society on the site referred to, which have resulted in the acquisition of a large number of massive relics of antiquity. These, from their connection with Roman London, are of considerable interest and importance. The removal of certain old houses in Camomile-street, for the erection of new buildings, has exposed to view a large portion of the old City wall, together with the foundations of one of the towers, or bastions, by which it was protected on the northern side. The length of this wall already examined measures nearly sixty-six feet; and, from its still appearing beneath the walls of the adjoining property, the City wall probably yet exists along the line which it is known to have taken, in a south-eastern course to Aldgate. The portion now removed closely adjoined that which was described by Dr. Woodward, F.R.S., so long ago as the year 1707. He mentions no tower or bastion; but, in other respects, his general description agrees, to a great extent, with the observations recently made. Nor does he mention the presence of a plinth of ironstone, which has now been distinctly traced as running along the face of the wall. It was composed of blocks, measuring from one to three feet in length. The bastion, from the presence of this plinth behind it, appears to have been erected subsequent to the wall; in diameter it was about twenty feet. With the exception of the facing and external masonry, it seems to have been composed almost entirely of blocks of stone, many of considerable size, which had previously formed

a part of a building or buildings of great antiquity. Had the constructors of the bastion been anxious to preserve from destruction these relics, which they only used as so much building material, they could hardly have devised better means for so doing. Among these objects, as seen in our Illustration, are portions of statuary, fluted pilasters, shafts of half columns, ornamental mouldings, portions of canopies, cornices, door jambs, and other relics of architectural interest. Both in their character and in the conditions under which they have been discovered, there is a resemblance to the discoveries recorded by Mr. Roach Smith, F.S.A., many years ago, as having been made in removing one of the buttresses which had been built against that portion of the City wall which existed on Tower-hill. The material of which the stones are composed are oolite and lower green sandstone. The former may have come either from Bath or Portland, or, indeed, from many other places; and the latter was probably brought from Kent. Nothing like Roman mortar was observed as forming part of the structure of the bastion. Several masses of it were discovered; also fragments of stucco and ridge and roof tiles. But these had been brought from the debris of Roman buildings for use as wedges, or for the purpose of filling up, and, like the stones themselves, were simply employed as so much building material. The foundation of the bastion rested on a levelling of chalk, varying from two to five inches in thickness. Beneath the lowest bed of stones a fragment of green glazed pottery was discovered, which brings the date of the erection of the bastion to a period either in Norman or early English times. Its date may even be so late as the reign of one of the Edwards or Henrys, when it is known that, under the direction of the City Companies, extensive alterations and rebuildings frequently took place along this portion of the City wall.

Of the sculpture found here the chief interest centres in the statue of a Roman soldier. It is of life size, and is of a man apparently in the prime of life, clad in the costume of his order. He wears the well-known tunic, over which is thrown a kind of cloak having short sleeves and a loosely-fitting collar. This opens down the centre, and is fastened by buttons, which are distinctly seen. So beautifully has all the detail been rendered by the sculptor that the form even of the chest is visible through the fabric of the garment. Around the waist there was evidently a strap or girdle, and a portion of this appears between the thumb and finger of the left hand. In this hand there is also a box or coffer, or it may be a bag, to which handles for suspension are attached. The presence of this bag proves the rank enjoyed by the deceased in the Roman army. At his right side hangs the well-known legionary sword, in an ornamental scabbard. It is an example of the broad short weapon used by the Roman soldier in fighting at close quarters. The carved handle, with the label beneath the hilt, is suggestive of similar objects often found in metal, or represented on coins and other monuments. The figure is that of a Roman signifer, or standard-bearer to the cohort of a legion. The right arm, which has unfortunately gone, probably grasped the standard. This is indicated by a portion of the cloak being thrown across the shoulder, in order to free the arm. At this side of the statue the fluted pilaster with a Corinthian capital, which appears on the left hand, was probably repeated; and this indicates that the statue was placed within an arched recess or niche, similar to sepulchral monuments of like character which have been found at York, Colchester, and other places.

The figure of the lion is also of a sepulchral character. It was probably attached to one of the tombs, of which there were doubtless many in the debris of the cemetery which is known to have adjoined this part of London Wall. It is about 2 ft. long by 1½ in. wide, and represents a lion overpowering by its spring either another lion or an animal of inferior strength. The object is a fine example of its kind, and, though an unfamiliar one among London discoveries, belongs to a class that is well known in the North of England. Several illustrations are to be found in that very valuable work, by the Rev. J. Collingwood Bruce, LL.D., the *Lapidarium Septentrionale*. The symbol intended is probably one indicating "Conquest." Its figure in many respects resembles that of the sphinx found some years ago at Colchester; it also belonged to a sepulchral monument, and illustrates, as the object now discovered, the conquest and destruction of a victim. In a learned paper, by the late Dr. W. Bell, on the Colchester sphinx, he reviews the symbols intended as being those of stability and power. There is also in the collection a large head of a negro cast of countenance, which has belonged to a statue of large proportions. A carving, also in sandstone, of an interesting character, belongs to a spandril arch moulding; and part of the cornice to the head of a niche doorway or arched recess; there was probably a keystone in the centre. The tri-leafed ornament is good, and is one that has been observed before, both here and abroad, as a decoration to sepulchral monuments. On one important fragment has been carved a nude figure of a man, holding in his right hand what was at first thought to be a trident, but closer inspection shows it to have some other meaning yet to be explained. There is likewise the base of a column, resembling in detail similar Roman work that has been found at Bath, and illustrations of ornamentation derived from the honeysuckle pattern so familiar on Assyrian sculptures; mouldings also appeared in the collection suggestive of those frequently observed on the well-known Samian pottery. The whole of the objects shown in the Illustration, with several others, are now at Guildhall, and will shortly be open to public inspection. They have been extricated from the site, under the direction of the Council of the Society, associated with the Library Committee, by the kind permission of W. C. Banks, Esq., architect of the new buildings in Camomile-street, who has generously presented the entire collection to the Museum of the Corporation.

The Hospital Saturday collections in Birmingham amount to £3114 5s. 8d.

The Queen has forwarded her annual subscription of £50 to the Royal National Life-Boat Institution. The Grocers' Company have also sent it a further donation of £100. At a special meeting of the committee of the institution, on Thursday, £150 was voted to the widow and children of the poor man who lost his life from the Bude life-boat, while attempting, during a heavy gale of wind, to save a shipwrecked crew.—The Lord Mayor has received from the Grocers' Company £100 towards the fund being raised at the Mansion House for the relief of the widows and orphans, 267 in number, of the crews of the fishing-smacks lost in the North Sea during the recent gales.—The Company of Clothworkers, which for the last two years had contributed £10 10s. a year to the Artisans' Institute, this year has voted a hundred guineas to that institution.—The Leathersellers' Company have granted ten guineas to the funds of the London and Dover Female Convalescent Home.—The committee of the Metropolitan Free Hospital have received £100 4s. 9d., being the proceeds of an amateur performance at St. George's Theatre, on Jan. 18, in aid of the building fund.

CAPE COMORIN.

The vast continental peninsula of India has its southern extremity in the eighth degree of latitude north of the Equatorial Line. Cape Comorin, a view of which is given in our Engraving, belongs to the native State of Travancore, under the superintendence of the Madras British Government. It overlooks the Gulf of Manaar, and the strait between the mainland and Ceylon, with the Paumbaum navigable passage, and the famous pearl fisheries. The point itself is a low, sandy rock of a rounded form, which is scarcely visible at three or four leagues' distance; another rock, which is an islet, stands three cables' lengths from the mainland cape. On the shore, eastward of this islet, is a grove of trees, with an old fort, an old Dutch church, one or two native Indian temples, half in ruins, and a cluster of fishermen's huts. The shore in other directions is sandy and barren. A little way inland rise the majestic Western Ghats, presenting a range of sharp peaks and conical summits of high elevation. There was a rampart of military defence, constructed by a former Rajah of Travancore, extending from Cape Comorin to northward, covering the approach to the Tinnevely district. This was forced by the invading army of Tippoo Sultan, or "Tippoo Saib," in 1789, which occasioned the British war with Mysore, and the capture of Seringapatam.

THE MUSK OX.

The Musk Ox inhabits, at present, the polar regions of the Western Hemisphere, ranging from Behring Strait to the east coast of Greenland, where it was discovered, in considerable numbers, by the German Arctic Expedition, in 1870. Southwards, it occurs throughout the barren grounds, to about the sixtieth parallel, extending to the islands in the north, traces of it having been found by the last Arctic Expedition, as far north as the eighty-third parallel. In former ages, its range was much more extensive, as is proved by the remains discovered in Siberia, in Germany and France, and in various parts of England, as in Kent, and near Salisbury, and in Gloucestershire.

The bull is larger than the cow, and about equal in size to small Scotch cattle. Animals killed by McClintock on Melville Island weighed 700 lb., of which 400 lb. was meat; they stood ten hands and a half high at the withers, their legs being comparatively short. The head is large and broad, armed with a pair of formidable horns, which, in their size and curvature, resemble those of the African buffalo, and, in old bulls, unite in the median line, covering the whole crown of the head, and forming a protection impenetrable to a rifle-ball. The ears are small, the eyes are remarkably so. Long black hair (nearly a yard long) hangs down from the throat, chest, sides of the body, and hips, covering the legs down to the middle. Besides this, in winter the animals are covered with a thick, soft, brownish wool, which is cast in summer. This is found in large quantities in their resting-places, and is stated by Richardson to be a valuable material, if it could be obtained in sufficient quantity. The legs are white; and a large saddle-shaped patch behind the shoulder is generally of a whitish colour. The tail is very short—only three inches long; and this, in addition to the hairiness of the nostrils, the absence of a muffle and dewlap, and the conformation of the skull, afforded sufficient evidence to Blainville and Mr. Boyd Dawkins to assign the musk ox rather to the sheep than to the ox or buffalo tribe.

Musk oxen are found in herds of from ten to thirty; but in Western America, where the greater scarcity of food compels them to escape the rigour of the winter by regular seasonal migrations to more southern latitudes, they unite to form herds of more than a hundred. During the summer they prefer mountainous districts, climbing rocks and precipices with as great ease and rapidity as a wild goat. Probably, they find their food on mountain-sides, exposed to the sun and freed from snow, more readily than in the valleys. The whole of the scanty vegetation of the Arctic region contributes to their fare, which, in winter is reduced to lichens and branches of the dwarfed willows and shrubs. They get very lean, and in this condition smell more strongly of musk than at other times. The female has one calf towards the beginning of June.

The formidable appearance of the musk ox belies its disposition. It is a perfectly harmless animal, which has never been known to attack man; the bull, probably, uses his horns only in defending himself or his herd against wolves and bears and in duels with his rivals. Once only, during the Arctic Expedition to East Greenland, one of the officers, whilst engaged with his surveying instruments, was surprised by a sham attack of four musk oxen; these, however, lost heart when within a few yards, and galloped off faster than they had come. In localities where men are still a new and strange sight to them, they are easy of approach, and form one of the most welcome and valuable additions to the fare of the Arctic traveller. The last Arctic Expedition is reported to have killed a considerable number; and the specimen of which we give a figure was preserved by Captain Feilden, one of the naturalists with that expedition. It was killed on the shores of Grinnell Land, in lat. 82 deg. 27 min., within a mile of the winter quarters of H.M.S. Alert, on July 6, last year. It is a young bull three or four years old; it has been very well mounted, and is now exhibited in the Mammalian Gallery of the British Museum.

No specimen has ever been brought alive to Europe, although it happens not rarely that calves fall into the hands of hunters who have killed the cows. It seems almost a pity that so useful and remarkable an animal, which will subsist where neither sheep nor goat can live, should have ceased in Europe to be the companion of the reindeer, with which it had been associated in former ages. It might possibly be again introduced into Northern Europe.

The *Daily Telegraph* states that it has received despatches from Mr. Stanley, dated Ujiji, Aug. 7 to 13, which state that he has made a complete survey of Lake Tanganyika, and settled the question of the Lukuga, which Commander Cameron supposed to be its outlet. The revelations upon this head are, the *Telegraph* says, of the most curious and complete nature. Mr. Stanley has apparently determined the problems of outlet and level, and made remarkable discoveries besides at the northern end of the lake, where he has found a spacious gulf, henceforth to be known by the name of Captain Burton, the original discoverer of the Tanganyika. Cameron, as the letters will indicate, was both right and wrong in his announcements. In another letter Mr. Stanley describes at length the general purport of his discoveries at and about the Nyauzas, especially touching that main source of the Nile to which, and its feeding lake, he gives the name of Alexandra, in honour of the Princess of Wales. His last letter, dated Ujiji, Aug. 13, reports a deplorable outbreak of smallpox and fever in that station, which obliged him to prepare for an early departure. He proposed to cross the country to Nyangwe, and there to determine his final course. Mr. Stanley and his English attendant, Frank Pocock, had both suffered from illness, but were much better.

MR. JOHN PARRY, VOCALIST AND COMEDIAN.

ROMAN REMAINS LATELY FOUND IN CAMOMILE-STREET, CITY.

CAPE COMORIN, THE SOUTHERN EXTREMITY OF INDIA.

MUSK OX, IN THE NATURAL HISTORY COLLECTION OF THE BRITISH MUSEUM.

NEW BOOKS AND PUBLICATIONS.

CELEBRITIES I HAVE KNOWN.
New ready, in 2 vols, demy 8vo, 30s.
SECOND SERIES. By Lord WILLIAM LENNOX.
HURST and BLACKETT, Publishers, 13, Great Marlborough-street.

NEW and POPULAR NOVELS.
At all the Libraries, in 3 vols.
DIANA, LADY LYLE. By W. HEPPWORTH DIXON. Second Edition.
MIGNON. By Mrs. FORRESTER.
MRS. CHARLTON. Author of "Anne Dysart."
ONE GOLDEN SUMMER. By Mrs. M. DANIEL.
ALL FOR HERSELF. By SHIRLEY SMITH.
HURST and BLACKETT, Publishers, 13, Great Marlborough-street.

MISS BRADDON'S NEW WORK.
The New Work, by the Author of "Lady Audley's Secret," &c.
In 3 vols., at all Libraries.

WEAVERS AND WEAVERS.
Second Edition, 3 vols., post 8vo, 32s.

HARRIET MARTINEAU'S AUTOBIOGRAPHY. With Memorials by MARIA WESTON CHAPMAN.
With Portrait and Illustrations.
London: SMITH, ELDER, and CO., 15, Waterloo-place.

Will be issued shortly, Part I. of
A MODERN MINISTER.
To be completed in Twelve Monthly Parts.
Price One Shilling.
Each containing 80 pp., with Two Illustrations.

A BEAUTIFUL EASTER PRESENT.
New and Cheaper Edition.
THE ROYAL ACADEMY ALBUM: a Series of Photo-Prints from Works of Art in the Exhibition of the Royal Academy of Arts, 1876. Royal 4to with Forty-Eight Permanent Photo-Prints, cloth, gilt edges, 63s. A few copies of the Original large edition may still be had, price 95s.; cloth, gilt edges, 7s. 6d. half morocco. Either Edition sent, carriage paid, on receipt of remittance.
"More perfect and more pictorial in their effect than we ever thought would be possible."—Times.
L. HAYES and Co., 5, Henrietta-street, Covent-garden.

ANENT THE INSANITY OF DANIEL EAST, READ PRUSSIA AND THE POOR: Elberfeld Visited.—Second Edition now ready, price 1s. "We cordially thank Mr. Hibbs."—Lloyd's Weekly. "The work will do good."—York Herald. "We hope ere long the book will be found in the houses of every man, &c."—Oxford Express. "The work deserves an extensive sale."—Christian Age.

THE MOTHER'S HELP to the RELIGIOUS INSTRUCTION of her CHILDREN.
Cth. 5s.
"Earnest and instructive."—Guardian.
Glasgow: JAMES McGRATH, Union-street.
London: HOUGHTON and SONS, Paternoster-square.

8vo, pp. 220, bound, 2s. 6d.; by post for 33 stamps.
HORSES ILL and WELL; Homoeopathic Treatment of Diseases and Injuries, and Hints on Feeding, Grooming, and Dressing, &c. By JAMES MOORE, M.R.V.C.S. A Chest of Medicines, book included, 5s. 6d.
DOG DISEASES TREATED BY HOMOEOPATHY. Pp. 180, bound, 1s.; by post for 13 stamps. A Medicine Chest, 2s. 6d. James Eves and Co., 48, Threadneedle-st.; and 170, Piccadilly.

By Dr. BARR MEADOWS. Third Edition, post-free 13 stamps.
ERRORS OF HOMOEOPATHY.
"An excellent exposure of the absurdities of homoeopathy. Its arguments are unanswerable."—Bath Journal.
London: G. HILL, 164, Westminster Bridge-road.

PRACTICE OF POTTERY-PAINTING.
A Handbook by JOHN C. L. SPARKES, Director of the Lambeth School of Art, &c. Price 1s.; post-free, 1s. 1d.
London: LACROIX, BARNES, and CO., 80, Regent-street, W.

VITREMANIE.—An Easy Method of Decorating Windows in Churches, Public Buildings, and Private Houses equal to Real Stained Glass. Illustrated Handbook of Instructions, post-free, in 2d. Particulars free.
London: J. BARNARD and SON, 339, Oxford-street, W.

SCRAPS for SCREENS and SCRAP-BOOKS.—A Large Collection of Coloured Scraps of the best kind—Flowers, Figures, Birds, &c., 1s. per Sheet; 12 Sheets, 10s. 6d.—WM. BARNARD, 119, Edgware-road, London.

WHITE WOOD ARTICLES, for Painting.
Fern Painting, and Decalcomanie; Screens, Book-Covers, Glove, Knitting, and Handkerchief Boxes; Paper-Knives, Fans, &c. Priced List post free.
WM. BARNARD, 119, Edgware-road, London.

PHOTOGRAPHY SIMPLIFIED.
Landscapes or Portraits taken with DUBONNET'S PATENT CAMERA. Its working learnt in half an hour. Apparatus from £2. Instructions, our stamps by post.—LECHTERTER, BARRE, and CO., Artists' Colourmen, 61, Regent-street, W.

PICTURES.—BEAUTIFULLY-FRAMED PICTURES, from One Guinea each. Engravings, Chromos, and Olographs after the best Masters.—(GEORGE REES, 41, 42, 43, Russell-street, Covent-garden; and 115, Strand, W.C.)

JOSEPH GILLOTT'S STEEL PENS.
Sold by all stationers THROUGHOUT THE WORLD.

SMART'S WRITING INSTITUTION.
57, Quadrant, Regent-street (entrance in Swallow-street). Open from Ten till Nine daily. Persons of all ages received (privately), and taught at any time suiting their own convenience. Lessons one hour each. No classes. No extras. Improvement guaranteed in eight to twelve easy lessons. Separate rooms for Ladies.—Apply to Mr. Smart, as above.

RADLEY COLLEGE.—AN ELECTION to FOUR ENTRANCE SCHOLARSHIPS, two of the annual value of £20 each, and one of £30, all tenable for four years, will be held at the Easter Holidays.—Apply to the Bursar, Radley College, Abingdon.

ELEMENTARY GEOLOGICAL COLLECTIONS. at 2s. 5d., 10s. 6d., to 100 guineas each; and every requisite to assist those commencing the study of this important science, a knowledge of which affords so much pleasure to the traveller in all parts of the world.
JAMES TENNANT, 149, Strand, London, W.C.

FOR ARMS and CREST send Name and County to T. MORING, Inn of Court Heraldic Offices, 44, High Holborn, W.C. Plain Sketch, 3s. 6d.; Coloured, 7s. 6d. Seals, Dies, and Diplomas. Illustrated Price-List post-free.

THE "LITTLE GEM" POCKET ENDORSING MACHINE.—Stamps Note Paper, &c., with Crests, Monograms, or Addresses. Price (with Monogram), Brass, from 1s. 6d.; Plated, from 1s. 8d.
NICHOLS, 121, Sussex-road, Halloway.

PEARS'S TRANSPARENT SOAP.
For the Toilet, the Nursery, and for Shaving.
"Is an article of the nicest and most careful manufacture and one of the most refreshing and agreeable of balms to the skin."
JOURNAL OF CUTANEOUS MEDICINE. Edited by Mr. ERASMUS WILSON, F.R.S.
Sold by Chemists and Perfumers everywhere.

THOMPSON and CAPPER'S DENTIFRICE WATER arrests decay in the Teeth and sweetens the Breath.—5d. Bottle-street, Liverpool. Sold in 1s. 6d., 2s. 6d., 4s. 6d., and 8s. 6d. Bottles, at all Chemists.

DR. SUINDEBOUTEMARD'S AROMATIC TOOTH-PASTE (Registered) has during 25 years been proved to be the best for producing healthy and dazzling Teeth, and, when once tried, will always be used. It gives a pearly whiteness to the Teeth and a sweet odour to the Breath. Those who constantly use it never suffer from Toothache. Price 1s. 2d. and 2s. 6d., of all Chemists and Perfumers; or, free by post for 16 or 32 stamps, of F. NEWBERRY and SONS, Newgate-street, London; and J. Sanger and Sons, 150 and 152, Oxford-street, W.

NEW MUSIC.

GELIEBT UND VERLOREN (Loved and Lost) WALTZES. By MULLER. These celebrated Waltzes, the most enchanting and fascinating that have been published for many years, may be had of all Musicians. Solo or Duet, 2s. net.—DUFF and STEWART, 147, Oxford-street.

HOME SO BLEST. By FRANZ ABT. This beautiful Song, sung with the greatest success by Miss Helen D'Alton, may be had of all Musicians. Price 2s. net.—DUFF and STEWART, 147, Oxford-street.

NEW SONG FOR BARITONE.

THE MINER. By BERTHOLD TOURS. "Rugged and swart and rough is he, Yet staunch and true and brave he could be." Sent for 2s.—DUFF and STEWART, 147, Oxford-street.

THE RAVEN. Sung by Mr. Santley. The Words from the Poem by Edgar Allan Poe; the Music composed expressly for Mr. Santley by W. G. LEVEY. This immensely successful song, which has been sung in all the great theatres, may be had of all Musicians. Price 2s. net.—DUFF and STEWART, 147, Oxford-street.

MEISSLER'S AU DER HOHE WALTZER. "The Waltz of the Season." 2s. post-free: Septet, 1s. 4d.; Full Orchestra, 2s. A. HAMMOND and CO., 5, Vigo-street.

I shall show your professional skill, as I think the public ought to know where such great improvements in dentistry and mechanical skill can be obtained."
"I am, dear Doctor, yours truly, S. G. HUTCHINGS."
"By Appointment Surgeon-Dentist to the Queen."
"G. H. Jones, Esq., D.D.S."

CLERICAL, MEDICAL, AND GENERAL

LIFE ASSURANCE SOCIETY, 13, St. James's-square, London, S.W.
CITY BRANCH. Mansion House buildings, E.C.
Chairman: Right Hon. JOHN ROBERT MOWBRAY, M.P., D.C.L.
TENTH BONUS MEETING, 1877.
The Report presented at a meeting held on Jan. 4 last showed:
1. AS TO THE PROGRESS OF THE SOCIETY.
That the growth and prosperity of the Society during the period, of which it gave numerous details, had been everywhere manifest.
2. AS TO THE FINANCIAL POSITION OF THE SOCIETY.
That the Assurance Fund at the date of Valuation was £2,118,457 10 2 and the calculated Liability at the same date was 1,790,516 13 10
thus leaving a Surplus of £327,940 16 4; and that, after setting aside the Permanent Reserve Fund of £26,000, and the fractional amount of £230 10s. 4d., there remained for division the sum of £300,000, which was larger by £30,000 than on any previous occasion:
3. AS TO THE RESULTS OF THE DIVISION.
That the sum which fell to the Assured would produce reverend additions to the Assurance, amounting in the aggregate to £307,014, varying in individual cases from 35 to 91 per cent, and averaging over 60 per cent on the Premiums received in the Quinquennium;
and that the Cash Bonus—which, being the present money value of the Reversionary Bonus, was the true measure of the allotment—averaged 30 per cent on the like payments, as compared with 29 per cent in 1872, the highest previous percentage.
4. AS TO THE BASIS OF VALUATION.
That the Institute of Actuaries' new 11s. or Healthy Male Table, based on the experience of twenty of the largest English and Scotch offices, with net premiums and 3 per cent interest, had been used in the investigation;
and that the severity of the new test, as well as the strength and elasticity of the Society, were alike shown by the fact that the Reserve thus required was greater by £4,011 than that which would have been needed by the Carlisle Table.
The NEXT DIVISION OF PROFITS will take place in January, 1882, and Persons who effect NEW POLICIES before the end of June next will be entitled at that Division to One Year's Additional Share of Profits over later Entrants.

The report above mentioned, a detailed account of the proceedings of the Bonus meeting, the returns made to the Board of Trade, and every information, can be obtained at either of the Society's Offices, or from any of its Agents.
GEORGE CUTCLIFFE, Actuary and Secretary.

LORNE "THE PERFECTION OF

HIGHLAND WHISKY. UNRIVALLED FOR "TODDY." Wholesale of the Sole Proprietors: GREENLEES BROTHERS, 1, Gresham-buildings, E.C. Distillers, Argyleshire.

KINAHAN'S LL WHISKY. KINAHAN and CO., London, finding that, through the recommendation of the Medical Profession, the demand for their OLD LL WHISKY for purely medicinal purposes is very great, submit with pleasure a few analyses by Dr. Hassall:—"I have very carefully and fully analysed Samples of this well-known and popular Whisky. The samples were soft and mellow to the taste, aromatic and ethereal to the smell. The Whisky must be pronounced to be pure, well-matured, and of very excellent quality. The medical profession may feel full confidence in the purity and quality of this Whisky."

NATURAL MINERAL WATERS OF VICHY. Property of the French Government.

CELESTINS.—The water of this spring is very agreeable, sparkling and slightly acidulated. Remedy for Complaints of the Kidneys, Gravel, Gout, Diabetes, Rheumatism, &c.
HAT-LIING.—This spring contains a greater quantity of carbonic acid, and is especially recommended as a table water.
GRANDE-GRILLE.—For Complaints of the Liver and Biliary Organs, Indigestion, &c.
HOPITAL.—For Stomach Complaints, &c.
VICHY WATERS are pleasant to the taste, and may be drunk pure or mixed with wine or spirits.
CAUTION.—See that the name of the particular water required is on the capsule.
Sold by all Chemists, Wine and Mineral Water Merchants. Price One Shilling per Bottle.

WILLS' BEST BIRD'S-EYE. This Tobacco is now put up in ONE-OUNCE PACKETS in addition to the other sizes, the Label being a reduced facsimile of that used for the Two-ounce Packets.—W. D. and H. O. WILLS, Holborn Viaduct, London, E.C., and Bristol.

Possessing all the Properties of the Finest Arrowroot.
BROWN and POLSON'S CORN FLOUR

Has Twenty Years' World-wide Reputation, and is uniformly of Superior Quality.

CACAO INE (QUINTESENCE OF CACAO) possesses the essential principle of Cacao, theobromine, unobscured by the excess of nutritives, as found in the natural cocoa-nuts and in chocolates and prepared cocoas generally. It is flavoured with unrefined, very pure, and purest of mixed with wine or spirits.
JAMES EVIS and CO., HOLOGRAPHIC CHEMISTS, 48, Threadneedle-street; and 170, Piccadilly, London.
New York Depot: Smith and Vanderbeek, Park-place.

JOHNSTON'S CORN FLOUR (The Old House)

Is decidedly superior.—Lancet. IS THE BEST.

JOHNSTON'S PERFECT REMOLINA is warranted pure and free from artificial colouring matter. Sold only in Packets.

AMERICAN CENTENNIAL PRIZE MEDAL.

FRY'S CARACAS COCOA. Its pure flavour, delicate aroma, and invigorating qualities have established its position as a first-class dietetic article.

FRY'S CARACAS COCOA. "The Caracas Cocoa of such choice quality."—Food, Water, and Air. Edited by Dr. Howard. "A most delicious and valuable article."—Standard.

FRY'S EXTRACT OF COCOA, "than which, if properly prepared, there is no nicer or more wholesome preparation of Cocoa."—Food, Water, and Air. Edited by Dr. Howard.

TENTH INTERNATIONAL MEDAL awarded to J. S. FRY and SON.

THE ESSEX FLOUR and GRAIN COMPANY, Liverpool-road, London, N., supply the best goods only. Whites, for pastry, 10s. per bushel; Households for bread, 9s. 4d.; Wheat Meal, for brown bread, 8s. 8d.; Coarse Scotch Oatmeal, 3s. 2d. per 14 lb.; Fine, 3s. 4d.; American Hominy, 4s.; Barley and Buckwheat, 5s. 8d. per bushel, or 21s. per sack; Indian Corn, 5s. per bushel, or 18s. per sack; Oats, 4s.; Crushed Oats, 4s.; Biddings, 2s. 4d.; Ground Pollard, 1s. 6d.; Peas, 7s. 6d.; Tick Beans, 8s. per bushel; Split Peas, 2s. 6d. and 3s. per peck; Meat Biscuits, 20s. per cwt.; Barley Meal, 5s. 6d. per bushel, or 21s. per sack; Lentil Flour for invalids, in tins, 1 lb. 1s. 6d. and 2 lb. 3s. All other kinds of Grain and Seed. Special prices for larger quantities. Post-office Orders and cheques to be made in favour of George Young.

LIEBIG COMPANY'S EXTRACT OF MEAT.—Finest Meat-flavouring Stock for Soups, Made Dishers, and Sauces. Caution.—Genuine ONLEY with facsimile of Baron Liebig's signature across Label.

COCK'S READING SAUCE is the best and most economical Sauce ever manufactured FOR FISH, MEAT, &c. EXCELLENCE, NOT ITS GRAY TIES, &c. It only requires a trial to convince the purchaser of its excellence.

CAUTION.—The genuine is protected by Trade Mark—viz., CHARLES COCK'S Signature on a white ground across the Reading Arms.

In consequence of Spurious Imitations of **LEA and PERRINS' SAUCE,** which are calculated to deceive the Public, Lea and Perrins have adopted a NEW LABEL, bearing their signature, "LEA and PERRINS," which signature is placed on every bottle of WORCESTERSHIRE SAUCE, and without which none is genuine. Sold wholesale by the Proprietors, Worcester; Croxson and Blackwell, London; and Export Wholesalers generally. Retail, by Dealers in Sauces throughout the World.

DINNEFORD'S FLUID MAGNESIA. The best remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion. The best mild aperient for delicate constitutions, ladies and children. Of all Chemists.

GLYCERINE JELLY.—PIESSE and LUBIN.—A white and delicate band is the first attribute of beauty and civilisation. "The band," says Sir Charles Bell, in the "Bridgewater Treatise," "distinguishes man from the brute. He cannot live, if he is in polite society it is an index not only of the body, but of the mind; and too much cannot be said in favour of Glycerine Jelly for rendering the hands white, soft, and fair. Sold in Jars, 2s.—2, New Bond-street, W."

TOM-BOY!—PIESSE and LUBIN'S NEW PERFUME.—2, New Bond-street. "Tom-Boy! Girls will be boys!"—Punch. Kiss her gently, but be shy; Kiss her when there's no one by; Steal your kiss, for then 'tis meetest—Steal a kiss, are the sweetest.

Sold in Flacons, 2s. 6d., 5s.; Cut Bottles, 21s. Copyright.

TURKISH PASTILS.—PIESSE and LUBIN.—"Through all my travels few things astonished me more than seeing the beauties of the harem smoking Narghiles at noon, and smoking a sweet, aromatic, cooling, and refreshing paste, which is said to impart an odour to the breath. I have never seen these Narghiles but once in Europe, and that was at PIESSE and LUBIN'S shop in New Bond-street."—Lady W. Montague. In Boxes, 2s.; by post, 2s. 2d.

"BEWARE of the IDES of MARCH!" was the precaution of the Soothsayer to Julius Caesar; and the advice is equally applicable to Ladies, on account of the bleak winds and humid atmosphere of the month, so subversive of personal comfort and attraction; hence ensue coarseness of the skin and yellowness of the complexion, unless guarded against by that infallible conservator of the complexion, ROWLANDS' KALODER. ROWLANDS' ODONTO whitens and preserves the Teeth, prevents and arrests their decay. 2s. 9d. Sold by Chemists and Perfumers. Buy only Rowlands' articles.

BRINLEY RICHARDS. Price 2s. net.
"There is (so the story goes) not far from Llandudno, a ruined
church at the bottom of the sea, not indeed built by the sea-
fairies, but simply wrested from the land by the encroachment
of the tide. On a calm day, when the sun or moon is bright, the
ruins are visible one sitting in a boat and looking down
through the waters."

FUNERAL OF THE LATE MR. GEORGE ODGER: THE SCENE IN BROAD-STREET, ST. GILES'S.

PRESENTATION OF MEDALS TO SERGEANT INSTRUCTORS OF THE 49TH MIDDLESEX RIFLE VOLUNTEERS.

THE LATE MR. ODGER.

The death of Mr. George Odger, shoemaker, of High-street, Bloom-bury, who has been well known these twenty years past as a leading working-class politician, and was candidate for more than one Parliamentary constituency, was announced last week. His funeral took place, on Saturday afternoon, at Brompton Cemetery. The procession started from Bloomsbury about three o'clock, preceded by a band playing the Dead March in "Saul." There were seven mourning coaches, followed by a long line of private carriages and cabs, and a large number of persons on foot. Our illustration shows the funeral car in Broad-street, St. Giles's. Among those who walked in the procession, or joined it as it passed through the streets, were Sir Charles Dilke, M.P., Professor Beesly, Dr. Congreve, Dr. Bridges, Mr. Frederic Harrison, Mr. Fawcett, M.P., Mr. Macdonald, M.P., Mr. Burt, M.P., Mr. Cowen, M.P., Mr. Holyoake, and the Rev. G. M. Murphy; among those in carriages were Mr. Mundella, M.P., Sir John Bennett, and Miss Helen Taylor. Deputations from a number of trade societies and other working men's organisations attended. The procession throughout the route was protected from the traffic of the streets by the police, and, except in some parts of Piccadilly, great crowds lined the way. At the cemetery the crowd was so great that there was much confusion, and the mourners had some difficulty in making their way to the grave. The chaplain of the cemetery read over the grave the concluding portion of the burial service—the committee, and Mr. Murphy, who had been appointed to conduct a religious service at the grave, having given way to a claim made by the Chaplain to read the Church of England service. Professor Beesly then, addressing the assemblage as "Fellow citizens," spoke at some length on Mr. Odger's public career; and Mr. Fawcett in response to loud calls, delivered an address, dwelling on Mr. Odger's sincerity of character and his eminent services to the working classes. The Rev. G. M. Murphy also spoke briefly, and the assemblage dispersed.

SERGEANT INSTRUCTORS OF VOLUNTEERS.

Our illustration shows the scene at Wellington Barracks, St. James's Park, one day last week, when his Royal and Serene Highness the Duke of Teck, who is honorary Colonel of the 49th Middlesex (Post-Office) Rifle Volunteers, presented medals to two of the sergeant instructors of that corps, for long service and good conduct.

Sergeant-Instructor Flanagan, one of the recipients, entered, in 1852, the 34th Regiment. He landed in the Crimea on Dec. 9, 1854, and served in all the operations before Sebastopol, including the various sorties, the attack and capture of the quarries, and the assault on the Redan, in which affair he was one of the storming party. He was transferred to the 47th Regiment on July 31, 1855, and served throughout the remainder of the campaign with that regiment, and, as his late commanding officer, Colonel Lowry, C.B., said, "did good service in the field." Subsequently he served in British North America seven years. He was thanked in Regimental Orders on July 3, 1865, "for saving a drowning man at Toronto, Canada;" and on Oct. 21, 1868, at Halifax, Nova Scotia, "for his zeal and energy in capturing a deserter." Having been discharged from the Army in 1873, he has since been uninterruptedly employed as sergeant instructor in the 49th Middlesex Rifle Volunteers. His companion, Sergeant-Instructor Morgan, joined the 3rd Battalion Rifle Brigade in 1855. He was present at the action at Cawnpore, on Dec. 6, 1857; at the operations on the left bank of the Gumbies, during March, 1858; at the siege and capture of Lucknow; the actions of Nawabgunge, Sandeela, and Jumo; was in the storming and capture of Fort Birwah (forlorn hope), under Major Alexander, when half the force was placed hors de combat; and served in the Oude campaign, in 1858. For service in the North-West Frontiers, 1863 and 1864, and in the action at Shubkudder, he received medals and clasps. Since his discharge as colour-sergeant, after a service of upwards of twenty-one years, he has been employed as sergeant instructor to the 49th Middlesex.

Colonel du Plat Taylor presented both sergeants to his Royal Highness in a short address stating the nature of their services. The Duke of Teck, having fastened the medals on their breasts, shook hands with each of them and spoke some kind words of congratulation and praise. The corps was afterwards inspected by its honorary Colonel, and seldom has its marching past been more admired for steadiness and precision. The officers present were, besides the honorary Colonel and Colonel, Majors Thompson and Sturgeon, Captain and Adjutant Liddell, Captains Daley Viall, McGregor, and Everest, and Quartermaster Dickson. After the inspection the corps, preceded by its band, marched to Hyde Park.

ROYAL INSTITUTION LECTURES.

THEORY OF MUSIC—HARMONY.

Dr. William Pole, F.R.S., in his fourth lecture, on Thursday week, entered upon the consideration of harmony, or the sounding several musical notes simultaneously. He said that the distinction between melody and harmony had been well defined by Hauptmann, in the remark that melody consists essentially of motion, while harmony is consistent with repose, each chord conveying an independent idea. Harmony forms the most important element in modern music, and therefore requires most careful study. Though sounding several notes at once seems simple, yet the idea is comparatively modern. The result of much investigation and controversy shows that the Greeks had nothing resembling our modern harmony—at least, there is no record of such; and, in all probability, their vocal melodies were only accompanied in unisons or octaves. About the time of the Christian era, however, traces appear of one voice or instrument accompanying another in consecutive fifths or fourths; and in the tenth century we have the "diaphony" or "organising" of Hucbald, which was really harmony, though rude and inartistic. The origin of this harmony, considered to be neither Greek nor Roman, is attributed by the great musical historian, Fétis, to the northern tribes of Europe, ancestors of the Germans, who now so greatly excel in the art. After describing and illustrating on a pianoforte the progress of harmony after the time of Hucbald by the introduction of contrapuntal part music, and harmony of a more independent character, Dr. Pole gave examples of both styles, selected from the works of Handel, in whose hands each received the finest treatment. Proceeding to the theoretical principles of harmony, he began with the simplest, or "dual combination," two notes sounded together, the first germs of harmony, from which the more complex chords are derived; and he showed, by a diagram, that from the notes of the usual scales how many such dual combinations may be formed. He next considered the statement that some of these combinations, termed "consonances," are more agreeable to the ear than others, termed "dissonances," and the question whether the distinction has any foundation in nature, or is merely conventional. He first showed that the

theory ingeniously worked out by Euler, who suggested that consonance is due to the simplicity of the ratios of the vibrations of the limiting sounds, is unsatisfactory; he next alluded to Hauptmann's metaphysical explanations; and then described the more satisfactory physical explanation of Helmholtz, derived from the nature of compound sounds. He showed that when two different notes are sounded together their overtones, or harmonics, are apt to get in each other's way, and thereby produce a beating, harsh to the ear. In consonances, as was shown, this harshness is either absent or slight, while it is very large in dissonances. By this means, the degree of harshness of any combination of notes can be mathematically estimated. Helmholtz's theory was elucidated by diagrams.

STEEL AND ITS FUTURE.

Mr. Frederick J. Bramwell, F.R.S., began his discourse, at the Friday evening meeting on the 9th inst., with remarks on the little use made of iron in structure till the latter part of the last century, when it was first employed in bridges at Coalbrookdale and Sunderland (and, in 1819, at Southwark), and in canal-boats in Staffordshire, which was the beginning of our iron navy, so much developed at Birkenhead by Mr. Laird. Steel long remained a luxury, being mainly employed for cutlery, its price being 1s. a pound and upwards; the proverb "as true as steel" testifying to its trustworthiness. Mr. Bramwell commented on iron in its three forms, referring to specimens and diagrams illustrating their manufacture:—1. Cast or pig iron (ordinary, chilled, and malleable); 2, wrought iron (ordinary and case-hardened); and, 3, steel, varying from great flexibility to intense brittleness. Pig-iron is produced by putting iron ore with coke or coal and suitable fluxes into a blast-furnace, and is elementary iron with a large proportion of carbon; when chilled by pouring it in a fluid state into a metal mould, it becomes very hard. Cast-iron is made malleable by heating in a close vessel surrounded by iron ore, the oxygen of which partially decarbonises the metal. Wrought iron is produced by putting pig iron into a puddling furnace, where it is stirred about by "rabblers," worked by hand or by machinery. The oxygen contained in the iron ore, wherewith the furnace is lined, unites with the carbon of the pig iron, forming carbonic oxide, a gas which rises to the surface and ignites with lively blue flames. This goes on until the iron becomes pasty, when it is formed into balls, nearly all the carbon being expelled. After noticing some of the defects met with in wrought iron, and the consequent danger, when used in boiler-plates, railways, and other machinery, Mr. Bramwell described and illustrated the manufacture of steel, beginning with that of blistered steel (made by heating wrought iron in air-tight fire-brick boxes containing charcoal for many hours) and its variety shear steel. The product was variable, depending much upon the skill of the workman. About 1750, Huntsman invented cast steel, by a process which Mr. Bramwell described; and which Krupp so modified as to be able to show at the Great Exhibition in 1851 an ingot of 4500 lb., and at that of 1862 one of 20 tons. A French chemist, M. Chenot, by a very ingenious process, obtained excellent steel direct from iron ore; and Riepe produced "puddled steel" of uncertain quality. While efforts were being made to improve this process, Mr. Bessemer's very important invention appeared, the main principle of which consists in blowing air into molten iron, whereby the carbon and silicon are burnt out, and afterwards restoring to the iron enough carbon to convert it into steel. By these processes steel was enormously cheapened; but its character for extreme accuracy was injured, and its use retarded in engineering, where mere average goodness is insufficient. Mr. Bramwell next explained and illustrated by diagrams and specimens the process by which Dr. Siemens has attained great certainty in the quality of steel manufactured by means of his "regenerative furnace," in which any heat consistent with the endurance of the material of the furnace can be maintained; and it was shown by testing a small bar of known size that "mild steel" is capable of bearing, before a breaking, a tensile strain of fifty-six tons per square inch of original section, with an extension of about 12 per cent. Steel has thus regained its character, and, as Mr. Bramwell observed, in conclusion, is now applicable to every purpose for which wrought iron is employed. Cast iron will still be required for massive objects, but the use of puddled wrought iron will probably pass away.

THE FRENCH REVOLUTION AND ENGLISH LITERATURE.

Professor Henry Morley, in his third lecture, given on Saturday last, resumed his illustrations of the effects of the French Revolution upon English literature by referring to Robert Burns, the great poet of nature, whose lyric poems are imbued with deep sensibility of the corruptions of his time, with the hope of a coming reaction, and with an impulse to put men in a right relation to their fellows, so warmly expressed in his vigorous song, "A man's a man for a' that!" Laurence Sterne and his "Sentimental Journey" were next noticed, as being a reflection of the opinions of Rousseau, and a painful example of misused talents. The new spirit of humanity, as exhibited by a young Scotch lawyer, Henry Mackenzie, in his "Man of Feeling," was next mentioned; and Professor Morley read an amusing list of the great number of times in which "tears" and "weeping" occur in that work. He then referred to the sickly works of Merry and others of the "Della Crusca" or "Anna Matilda" school, so vigorously satirised by Gifford in his "Baviad" and "Mœviad," extracts from which were read. Gifford, a warm Conservative, became editor of the *Anti-Jacobin*, a political paper set up by Canning and others, in 1797, to ridicule the new doctrines; and in it first appeared "The Needy Knife-Grinder," "The Rovers," and "The Loves of the Triangles," laughable burlesques of Southey, Schiller, and Darwin. As an example of the novels, the Professor gave an analysis of "Caleb Williams," by William Godwin (the author of "An Inquiry concerning Political Justice"), in which is found the typical "Man of Gloom," of the day, and in which "agonies" predominate as much as "tears" in the "Man of Feeling," and which was characterised as "an indictment against society on entirely false grounds." In 1799 appeared the "Pleasures of Hope," by the true poet of the ideal, Thomas Campbell—a poem which has survived all other so-called "Pleasures" except Rogers's "Pleasures of Memory"—a work of refinement rather than of power. After reading glowing passages from Campbell's poem, Professor Morley gave a sketch of the life of Wordsworth, with extracts from his "Prelude" and "Excursion," showing how his zealous aspirations for the benefit of mankind—nearly leading him to join the French Republicans, at the risk of his life—were checked by his friends; how he, Southey, and Coleridge were prevented from going to settle in America by want of money; how, by the legacy of a friend, he was enabled to settle at Grasmere, and devote himself to the bent of his mind, poetry; and how he was eventually led to discover that the solution of the problem of correcting the evils of society is not merely changing the system of government, but the recognition of God in the world, and labouring for the improvement of the condition of those who are governed, so that they may have the opportunity of living up to the

highest ideal they are capable of attaining. This is the leading principle of the nineteenth century:—

What one is,
Why may not millions be!

THE MUSCULAR SYSTEM—EXPRESSION OF THE EMOTIONS.

Professor Alfred H. Garrod, F.R.S., in his ninth lecture on the Form of Man, given on Tuesday last, began with a description of the muscles of the head and face, and then, by the help of models and diagrams, explained their functions in causing the various movements of the mouth and lips, the eyes, eyelids, and eyebrows, the nose, and the brow, which produce smiling, laughing, weeping, sneering, frowning, and other outward expressions of our internal emotions. In relation to this subject, he referred his audience to Sir Charles Bell's "Anatomy and Philosophy of Expression as Connected with the Fine Arts" and Mr. Darwin's "Expression of the Emotions in Man and Animals." In regard to the question whether more expression is given by the eyes or the mouth, the Professor exhibited two pictures of a lady, in which the lower part of the face could be shifted; whereby it appeared that the mouth has the larger share in the production of expression. The latter part of the lecture was devoted to an account of the muscles of the neck.

On Friday next, the 23rd inst., Professor J. H. Gladstone will give a discourse on the Influence of Chemical Constitution upon Refraction of Light.

The Rev. Mark Pattison, B.D., Rector of Lincoln College, Oxford, presided over a meeting, in the great hall of the Society of Arts, on Thursday week, when Dr. John Yeats, F.R.G.S., read a paper on Middle-Class Education in Holland.

Mr. Ashbury, M.P., gave an address, before a crowded audience, in the Brighton Townhall, yesterday week, on America, China, and Japan, he having completed a tour in those countries shortly before the opening of Parliament. The lecture was illustrated by dissolving views, many of them being photographs taken for the purpose.

Mr. Sorby, F.R.S., lectured at the South Kensington Museum, last Saturday evening, on Meteorites.

A lecture on Foods and Drinks was given at the Society of Arts, last Saturday evening, by Dr. Corfield, Professor of Hygiene in University College; Dr. Carpenter, C.B., F.R.S., occupied the chair. The lecturer explained the reasons why beef is more nutritious, though somewhat less digestible, than mutton, the disadvantages attending the use of pork from its closeness of fibre and superabundance of fat, and the comparative low value of the flesh of young animals. Good meat should, he pointed out, neither be too pale, indicative of disease, nor too dark, suggesting that the animal had not been killed; it should be elastic to the touch, have a rumpled appearance, and not become moist if kept. The lecturer was much applauded when he expressed a hope that the difficulties in the way of the importation of meat from America were being so far met that a cheaper supply might be available for the consumer. Salmon was pronounced to be as nutritious as beef or mutton. Eels, mackerel, and herrings were less easily digested than most other fish, because of the fat contained in their muscles. Dr. Corfield quoted Dr. Parke's opinion that spirits do not sustain the body in resisting extremes of heat or cold, that they induce liver disease and decrease the power of working, that strong wines and beers were liable to cause gout, and that even light wines and beers should be used, if at all, in moderation, and only at meal times. In conclusion, the lecturer referred to the nerve-stimulating and non-intoxicating qualities of tea, coffee, and cocoa, and the dangers of indigestion resulting from their abuse, especially in drinking them too hot.

The second of the present series of four Cantor lectures on the Chemistry of Gas Manufacture was given, on Monday, to Society of Arts, by Professor A. Vernon Harcourt, F.R.S. He reverted to the composition and properties of ammoniacal liquor, briefly mentioned in the first lecture as a useful and important secondary product of the dry distillation of coal, describing its mode of collection in the gasworks, and its subsequent utilisation by the chemical manufacturer for the production of sulphate of ammonia. The methods of determining the strength and so estimating the value of this liquor in the laboratory were then experimentally explained, after which the lecturer passed on to treat of the purification of gas from the ammonia that still remained in it after the subsidence of the ammoniacal liquor. The purification of gas from sulphuretted hydrogen and carbonic acid was also treated of, and the uses of lime and of oxide of iron for these purposes were described and contrasted with methods employed and proposed for employment as alternatives.—The next lecture will deal more fully with the impurities of gas and their removal.

At a meeting of the Royal Geographical Society, on Monday evening—the president, Sir Rutherford Alcock, K.C.B., in the chair—the first paper read was upon the Distribution of Salt in the Ocean as Indicated by its Specific Gravity, by Mr. J. Y. Buchanan, of the Challenger Expedition. He said that water had been taken from different depths and at an immense number of places in the ocean. Of the three years and a half during which the cruise lasted three years were spent in the tropics, and the water from the bottom of the sea had to be allowed to stand to take the temperature of the air before its specific gravity was ascertained by means of a hydrometer. The water was heaviest, and consequently most salt, in portions of the Atlantic where there were two bands on each side of the equator, which were of the greatest density, while between them, on the equator, was a band which was not so salt. Throughout the whole of the Atlantic the water was not more salt than in any part of the Pacific. Mr. Buchanan gave reasons for attributing this effect to the operation of the trade winds, which caused a much larger amount of evaporation than took place in the Pacific, where the trade winds were neither so regular nor so general, and where there was much greater rainfall than in the Atlantic. The effect of freezing was like that of heat to increase the quantity of salt in the water, for the water was concentrated below the ice, and the ice was almost without salt.—Mr. Herbert J. Allen then read an account of a journey through Formosa from north to south. The Chinese stations, he said, were mostly on the north coast, the central and southern districts being inhabited by the aborigines, who are very unlike the Chinese, both in dress and physique. Since the Japanese expedition against the Formosan tribe the Chinese have endeavoured to extend their territory and increase the number of colonists; and during the last year they have largely increased the staff of officials; but colonists in advanced positions are exposed to many serious risks, notwithstanding that the Chinese have made large presents to many of the native chiefs. Mr. Allen travelled in company with missionaries, who are well received, and who have a considerable number of converts to Christianity among the natives, who are supposed to be of the Malayo-Polynesian race. Mr. Allen entered by a very narrow pass into a plain, inhabited principally by semi-civilised natives and a few Chinese, the

hills surrounding it being occupied by wild savage tribes, who live by hunting in the woods. The president said that all tropical products grow in the island, which would become a great place if it had a good Government; it is also rich in coal.—He announced that, on the 26th inst., Sir George Nares would read a paper on the Geographical Results of the Arctic Expedition.

Mr. Joseph Simpson, of Newport-Pagnell (hon. sec. of the Lecturers' Association), gave an able lecture, last Monday evening, at the Hull Church Institute, on the Wedding Day in all Ages and Countries. The Rev. S. B. Craig, M.A. (president) occupied the chair.

At the meeting of the Royal Colonial Institute, on Tuesday evening, under the presidency of the Duke of Manchester, a paper was read by Mr. G. H. Symonds, secretary of the Meteorological Society, on the Climates of the various British Colonies.

A paper on the subject of Commerce in Western Africa was read by Mr. J. Irvine, at a meeting of the Society of Arts, on Tuesday evening, when Bishop Crowther, a native of that portion of the continent, spoke of the advantage to the natives of an improved system of trading.

THEATRES.

DRURY LANE.

A disregard of the principles of dramatic construction must be fatal to the success of a drama, whatever the intrinsic merit of the production. The architect, in devising a plan for a new edifice, is careful at the outset to provide a secure foundation on which the structure shall stand, without which, with all its grandeur of design, all its beauty of ornamentation, in the moment of completion it will topple to the ground, and render nugatory all the time and labour expended on it. What this foundation is to a building, construction is to an effective stage production. Mr. Henry Spicer, a skilful poet and of some practice as a dramatist, is the author of the new drama, "Haska." Though evincing much power of poetic diction and much cleverness in the delineation of character, this otherwise competent writer has neglected the primary principle which we have just urged, and his new play, in consequence, is thereby placed in considerable jeopardy. The story, which contains much that is romantic and picturesque, is too vague to admit of a reviewer giving it in detail. Thus much we gathered from the first representation. Haska, the heroine (Miss Leighton), is a foundling, whose foster-mother is a blind woman, named Elspa (Miss Cicely Nott). The first act presents her in bridal costume, her nuptials having been recently solemnised with Yan, a serf (Mr. F. Tyars). The husband interfering to protect his wife from an outrage offered her by Count Stourdza (Mr. Creswick), the tyrant orders him to instant execution. In revenge, Haska stirs up the villagers to rebellion. The second act confronts Haska with Count Stourdza, who presents her with a vision of her slaughtered husband. Haska practices dissimulation, and entices the Count into a chair hitherto used for purposes of torture. After manacling and disabling him, she snatches a dagger from his girdle and threatens to stab him. The Count's attendants appear, and Haska effects her escape by wrenching aside the iron bars and taking an appalling leap from the casement. The third act discovers Haska to be the sister of Count Stourdza; the husband, supposed dead, reappears, and the curtain descends upon a happy tableau. The burden of the acting falls upon Miss Leighton, who, in the title-role of Haska, exhibits marked declamatory power. Mr. Creswick made the most of the very unthankful part of Count Stourdza. Yan and Elspa found able representatives in Mr. F. Tyars and Miss Cicely Nott. The other characters call for no especial mention. The author and Mr. Chatterton were summoned before the curtain at the termination of the piece.

The performance of "Antigone" came off, as announced, at the Royal Academy of Music. The choruses were all efficiently rendered; and the music, under the direction of Mr. Alfred Gilbert, was particularly happy. Mr. Ryder gave great effect to the character of Creon; and Miss Evelyn, in the difficult rôle of Antigone, evidenced much artistic power and discrimination. The performance was perfectly successful.

"We have to chronicle the 700th representation of "Our Boys," which took place at the Vaudeville, on Wednesday night. Another of Byron's comedies, "Partners for Life," has been successfully revived at the Opera Comique. The cast is a strong one. On the first night the Prince and Princess of Wales, accompanied by the Princes Albert Victor and George, honoured the theatre with their presence.

Mr. and Mrs. Alfred Wigan appeared at a matinée dramatique, at the Gaiety Theatre, on Tuesday, in Mr. Tom Taylor's comedy, "The House or the Home," and the comedietta of "The Bengal Tiger." The entertainments, which assumed something of a private character, were understood to be for the benefit of Mr. and Mrs. Wigan, who were supported by Lady Sebright, Mr. Bingham, and other amateurs. The admissions to stalls, balcony, and boxes were by vouchers only, the pit and gallery being closed. The performance was under the patronage of the Prince and Princess of Wales, Prince Leopold, Princess Christian, Princess Louise (Marchioness of Lorne), Princess Beatrice, and the Duchess of Teck, who honoured the theatre by their presence, while the stalls and boxes were filled by members of the aristocracy.

The Lord Chamberlain has refused to grant a license for the new theatre of Sadler's Wells until stone stairs have been erected for all portions of the building; and his Lordship is understood to have stated that he is determined in future to grant no license for any theatre in which wooden stairs are used, and that he will insist on all such stairs being removed and replaced with stone stairs.

A new first part was produced on Monday evening at Mr. and Mrs. German Reed's Entertainment, at St. George's Hall, entitled "Two Foster Brothers," the words being Mr. Gilbert A'Beckett's, the music Mr. Alfred Cellier's, and new scenery having been provided by Messrs. Gordon and Harford. Two or three of the songs were encored, and there was a great deal of hearty and discriminating applause. Our criticism is unavoidably deferred till next week. The two other pieces included in the evening's programme—"Spring's Delights" and "A Night Surprise" seem to have lost none of their original popularity.

Mr. W. H. Swanborough has this week given his drawing-room entertainment, "Away with Melancholy," at Westbourne Hall, assisted by Miss Margaret Douglas, Miss Marie Pascoe, and Mr. Edward Duncan.

Mr. G. D. Ham, of H.M. Customs, has brought out a "Merchantile Year Book." The first part contains a complete and codified edition of the merchant shipping laws; the second part is an epitome of the laws relating to importation, exportation, excise licenses, stamps, taxes, and commercial statistics. Being a trustworthy work, it will be found most useful in the counting-house of every merchant.

MUSIC.

HERR JOACHIM.

The specialty of last week was the musical demonstration at Cambridge (on the Thursday) on the occasion of the honorary degree of Doctor of Music being conferred on Herr Joachim by the University. The formal proceedings of the day are recorded elsewhere, and we have here to speak of the evening concert which followed (in the Guildhall), and of which we reproduce the programme:—

PART I.

Overture—The Wood Nymphs, op. 20 Sterndale Bennett.
Concerto for violin (with orchestra), op. 61 Beethoven.
A Song of Destiny, op. 54 (for chorus and orchestra) Brahms.
Violin solo (Andante Allegro Assai) in C major J. S. Bach.
Elegiac overture Joachim.

PART II.

Symphony in C minor Brahms.

Brahms's symphony was first performed in public—conducted by the composer—in November last, at Carlsruhe, and was soon after repeated in various parts of Germany. Its first public hearing in England was at Cambridge, on Thursday week, when it was finely given by a full orchestra, led by Mr. A. Burnett. The work is laid out on a grand scale, and consists of four principal divisions, opening in C minor and closing in C major. With the exception of the finale, the general tone is serious, not to say solemn, the themes being mostly interesting and impressive, and the treatment masterly, with some especially skilful orchestral writing. The bright and jubilant tone of the last movement—chiefly in C major—forms a good contrast to the preceding portions of the symphony, which is thus brought to a highly effective close. There can be no question that it is an important addition to the stores of orchestral music. It will soon be heard in London, being announced for performance at the fourth concert of the Philharmonic Society, on April 16.

The other novelty of Thursday week, Dr. Joachim's overture, is commemorative of the dramatic poet Heinrich von Kleist. It is written with practised skill in the command of orchestral effect, and contains passages of pathos and passion. This work will also soon be heard again, being included in the programme of next Saturday's Crystal Palace concert.

Of Dr. Joachim's fine rendering of the violin pieces in the programme it is unnecessary to speak, having been repetitions of well-known performances. The other items of the concert are also too familiar to need comment.

The choral portions of the "Song of Destiny" were well sung, the orchestral performances throughout the evening having been, as already implied, of a very high order. Herr Joachim conducted the two novelties, the other pieces having been directed by Mr. C. V. Stanford.

The occasion was the 150th concert of the Cambridge University Musical Society, and the profits were devoted to the aid of Addenbrook's Hospital.

The degree of Doctor of Music would also have been conferred on Herr Brahms by the Cambridge University but for the unavoidable absence of the composer, personal attendance being an indispensable condition.

Last Saturday's Crystal Palace concert included the first appearance of M. Henri Petri (a pupil of Dr. Joachim), who created a very favourable impression by his highly skilful execution of Spohr's eighth violin concerto ("In modo di scena Cantante") and the romance from his instructor's "Hungarian Concerto." The concert commenced with Mr. G. A. Osborne's bright and spirited "Festival Overture," composed for and first performed at Mr. Kuhe's Brighton Festival of 1875, and closed with Rossini's overture to "Guillaume Tell." Vocal pieces were contributed by Madame Sinico-Campobello and Signor Campobello.

The second of the Lenten performances of oratorios at the Crystal Palace took place last week, when "Elijah" was given. For Wednesday evening next Rossini's "Stabat Mater" and Mozart's Twelfth Mass are announced.

The nineteenth season of the Monday Popular Concerts is near its close, the last evening concert of the series being announced for March 26, to be followed, as usual, by the special performance for the benefit of the director, Mr. Arthur Chappell. Herr Joachim and Madame Schumann were again respectively the leading violinist and solo pianist on Saturday afternoon and Monday evening last—the gentleman, on both occasions, receiving a greeting which evidently included a recognition of his newly-acquired title of Doctor of Music, conferred on him by the University of Cambridge on Thursday week.

There remains but one more of the London Ballad Concerts to be given, in completion of the eleventh season. The programme of this week's concert consisted of a popular selection of old English and Scotch songs, varied by Madame Arabella Goddard's brilliant pianoforte playing and some part-singing by the London Vocal Union. The singers announced were Mesdames Edith Wynne, Antoinette Sterling, and Cave Ashton; Mr. Sims Reeves, Mr. E. Lloyd, Mr. Maybrick, and Mr. C. Beckett.

That accomplished pianist Miss Madelena Cronin gave the first of two recitals, in the concert-room of the Royal Academy of Music, on Tuesday evening, when her programme comprised various solo pieces in the classical and brilliant styles.

On Thursday evening Bach's "Passion Music" (St. Matthew) was performed at the Royal Albert Hall, directed by Mr. Barnby; the solo vocalists announced having been Miss Anna Williams, Madame Antoinette Sterling, Mr. W. H. Cummings, Mr. T. Kempton, and Mr. Thurley Beale.

An amateur concert was given at the Langham Hall, on Thursday evening, in aid of the Italian Protestant Orphans' Home, at Florence.

Yesterday (Friday) evening, a concert of special interest was given by Mr. F. J. Campbell, at St. James's Hall, in aid of the funds of the Royal Normal College and Academy of Music for the Blind. The programme was of a high order, comprising Beethoven's seventh symphony (in A), Der Ritt der Walküren (from Wagner's "Die Walküre"), Tchaikowsky's pianoforte concerto played by Herr Hartvigson, Beethoven's violin concerto by Herr Joachim, and a duet of Spohr by this artist and his pupil, M. Henri Petri—besides vocal music, choral and solo. The orchestra consisted of about one hundred performers, conducted by Mr. Manna.

St. Patrick's Day is to be celebrated musically, at the Royal Albert Hall and St. James's Hall, this (Saturday) evening, with concerts of national music.

On Friday next Haydn's "Seasons" will be given by the Sacred Harmonic Society.

The new season of the Musical Union, directed by Mr. John Ella, will begin on April 17, with the first of eight matinées.

A shoal of porpoises made their way up the Thames on Sunday, several having been seen at the height of the tide between Waterloo and Blackfriars Bridges.

"IMPERIAL" FESTIVITIES IN BRITISH BURMAH.

Though unable to compete in expenditure with more wealthy provinces of the British Indian empire in celebrating the assumption of the Imperial title by her Majesty the Queen, the inhabitants of British Burmah are nowise behind the most loyal of her subjects in their alacrity and personal efforts to make this event a telling success. This was most noticeable in the various large buildings, of an attractive though temporary character, erected for the exhibition (gratis) of the dramatic acting, dancing, singing, and other national performances which are peculiar to the country. The entertainments, it must be observed, were specially revised, and supplied with prayers, songs, and music specially composed for this momentous occasion, and illustrative of its particular significance. One remarkable feature in all celebrations of this description in Burmah, as compared with India generally, is that, while in Hindostan all public performers are professional, and none of the better classes of society will exhibit themselves in public, the Burmese women, who occupy a position as independent as those of our own country, are accustomed, upon state occasions like this, or in connection with religious ceremonies, to take part in public amateur performances. Upon these occasions none but respectable girls are admitted, amongst whom are to be found the daughters of the most wealthy and important of the native residents. In the single town of Moulmein not fewer than six or seven hundred of such young ladies had undergone a troublesome and laborious training for their performances on "Proclamation Day," when, it would appear, their efforts were rewarded by ample recognition.

Our Engravings illustrative of this ceremonial represent, first, one of the different pavilions built for the purposes of the festival, where several companies of performers are seen ranged outside; secondly, the Burmese band, which is always in attendance on such occasions. These illustrations are copied from photographs by Mr. P. Kleir, of Moulmein, a local artist of considerable repute.

MUSICAL PUBLICATIONS.

"The Legend of Tours" is a song by Odoardo Barri, with English and Italian text, offering some good points for declamatory singing. It is published by Messrs. Cramer and Co., Chappell and Co., and Stanley Lucas, Weber, and Co.; and the copyright has been presented by the composer to the Health Resort Fund of that excellent institution, the Central London Throat and Ear Hospital.

From Messrs. Cramer and Co. we have some effective new songs, at once simple and pleasing. Among them are "The Prodigal," a sacred song, by Lady Lindsay (of Balcarres); "Enchantment," by Julia Woolf; and "A Charm," by the same. An effective fantasia on subjects from Offenbach's opera-bouffe, "Les Bavards," by Mr. Kuhe, is also published by Messrs. Cramer and Co.

"Elementary Vocal Studies," by Edward Land (Morley), is a compendious code of instructions, by the estimable professor whose death was recently recorded. Much valuable information and a useful series of exercises are here supplied in a compact form and at a moderate cost.

"The New Graduated Method for the Pianoforte," by Joseph Goddard (Goddard and Co.), is similar in design, extent, and price, to that just referred to, with the difference that it is intended for pianists instead of singers. This method contains very copious explanations and instructions, illustrated with diagrams of the positions of the hand and practical musical examples.

Woburn Park, near Weybridge, has, it is stated, been sold to an influential section of the Roman Catholic party for monastic or scholastic purposes.

At a meeting of the West Yorkshire colliery owners and miners' delegates, at Leeds, on Monday, a reduction of six and a half per cent, on the present rate of wages, instead of ten per cent originally proposed, was agreed to. By this concession on the part of the employers a strike has probably been averted.

The first annual dinner of the Association for the Oral Instruction of the Deaf and Dumb was held, on Tuesday night, at Willis's Rooms—his Royal Highness the Prince of Wales in the chair. In the course of his speech, the Prince referred at some length to the different methods employed in teaching the deaf and dumb. Lord Granville spoke also on the same subject. Subscriptions to the amount of £2000 were announced, the Prince of Wales heading the list of donors with 100 guineas.

The Board of Trade inquiry into the stranding of the ship Ethel, of Plymouth, on the Seven Stones, on Feb. 27, has terminated in the suspension for three months of the master, Richard Dyer, and the mate, Henry Newman.—The inquiry into the stranding on Holy Island of the steamer Bertha, on the 16th ult., has been brought to a conclusion, the Court censuring the master, and suspending the certificate of the mate for two years.—The brig Leonie, of Whitstable, was run down, on Sunday evening, in Robin Hood's Bay, by the steamer Consett, from Sunderland, and six of the crew perished, the Leonie sinking almost immediately. On the same evening one life was lost by a collision which occurred off the Anglesey coast.

Alderman M'Swiney, an ex-Lord Mayor of Dublin, was a witness, yesterday week, before the Select Committee on the Irish Sunday Closing Bill. He said that he had made inquiries of his own people, and they invariably professed an anxiety to get rid of the temptation of Sunday drinking. If the public-houses were closed there would probably at first be some little inconvenience and consequent complaint, but he was satisfied that the advantages would soon be found to outweigh the inconveniences. He did not anticipate that there would be a sufficient amount of dissatisfaction to lead to any public demonstration. The minority in Dublin against Sunday closing was so small that he did not think it was necessary to make a concession to their wishes by reducing the hours of opening on Sunday, instead of closing the public-houses altogether.

The Lord Lieutenant of Ireland inspected the Metropolitan Police, at the depot, Kevin-street, Dublin, on Monday morning. Afterwards, his Grace, accompanied by the Dukes of Marlborough, visited the Model Schools of the National Education Commissioners, in Marlborough-street. Their Graces minutely inspected every department, and expressed themselves highly pleased with the arrangements and the appearance of the children. In the evening the Duke and Duchess gave the second State Ball at the Castle, at which the Duke of Connaught was present. Their Graces entered the ball-room, St. Patrick's Hall, shortly after ten o'clock, accompanied by Lady Rosemond Spencer Churchill, Lord and Lady Randolph Spencer Churchill, and the Earl of Portarlington.—It is stated that his Grace will pay a visit, on July 23 next, to Mount-stewart, near Newtownards, in the county of Down, the seat of the Marquis of Londonderry. His Grace will also visit Belfast.

THE "EMPRESS" TITLE FESTIVITIES IN BRITISH BURMAH.

PAVILION AND COMPANY OF PERFORMERS AT MOULMEIN.

BURMESE BAND AT THE MOULMEIN FESTIVITIES.

"UNCLE TOM."

Some popular interest has been felt in the recent visit to England of a negro religious minister from America, who was in early life a slave in the Southern States, and passes for the original of "Uncle Tom," the hero of Mrs. Beecher Stowe's affecting tale, published nigh twenty-five years ago. The Rev. Josiah Henson, by her Majesty's special desire, was presented to the Queen, at Windsor Castle, on Monday week, and his portrait will, doubtless, be acceptable to our readers. The true story of his life may be read in a small volume, edited by Mr. John Lobb, at the office of the *Christian Age*, which contains an autobiography, from the year 1789 to 1876, a preface by Mrs. Stowe, and some notes by Mr. G. Sturge and Mr. S. Morley, M.P. This publication has been very extensively sold, having already reached its fortieth thousand, and has, therefore, passed beyond the need of critical recommendation as a literary novelty. It will be sufficient for our purpose here to observe the chief facts and dates of the biographical narrative. Josiah Henson is now eighty-seven years of age. He was born a slave, the son of a slave father and slave mother, in Charles County, Maryland, on June 15, 1789. When he was a mere infant he lost his father, not by death, but by forcible separation. The negro husband, having the feelings of a man, beat a white overseer who had attempted an outrageous assault on the negro wife. For this act of manliness he got a

THE REV. JOSIAH HENSON ("UNCLE TOM").

hundred lashes, and had his ear nailed to a stake and chopped off, after which he was sold away to Alabama. The wife and children never saw or heard of him again. Josiah's elder brothers and sisters were taken away, some years afterwards, by the sale of their master's stock. But he, being a very small boy, remained with his mother, on the plantation of Isaac Riley, in Montgomery County, till he grew up to manhood. His mother was a good Christian woman; and the religious principles she instilled into him were developed by the preaching of one John McKenny, a baker at Georgetown. Josiah Henson was a clever, athletic, high-spirited young fellow. He rose in his master's service and confidence, protecting the drunken fool in many a tavern brawl, as well as minding his estate. A neighbouring overseer, named Bryce Litton, to revenge himself for being prevented from fighting unfairly with Riley, waylaid the negro servant and savagely maimed his right arm. Some time after this, Riley was bankrupt, and, fearing that his negroes would be sold for his debts, persuaded Josiah to lead them into Kentucky, to be kept by his brother Amos, on Big Blackford's Creek, south bank of the Ohio river. Josiah safely conducted the whole of the party of eighteen, besides his own wife and two children, a distance of nearly a thousand miles. He remained three or four years with Amos Riley, cultivated his religious faith, and became, though still untaught to read, a regular

A LOG HUT IN CALIFORNIA.

preacher of the Methodist Episcopal Church. He got permission, in 1828, to go and preach in several of the chapels in Cincinnati, and to attend a Conference of the Methodist Connection. The fees or gifts he there received put him in possession of a little money, to the amount of \$75 dollars, with a good suit of clothes, and a horse of his own. Amos Riley let him go back to Maryland, to see his old master Isaac Riley, who scornfully observed that he had grown to be "quite a black gentleman." The hope of buying his freedom now dawned on Josiah Henson. By the assistance of a friend at Washington an arrangement was made, and he paid \$450 dollars for his certificate of manumission. But his master had contrived to play him an infamous trick, and he would not be free without paying the remainder of a thousand dollars, which had, unknown to him, been set down as his real price. He discovered this on his return to Kentucky, where he was kept in slavery awhile longer. A voyage down the Mississippi to New Orleans, with his master's son, showed him still worse aspects of slavery. He was once tempted to murder his betrayers and oppressors, but was restrained by the grace of God. He resolved to escape, with his wife and four young children, and to make his way north, through the Free States, into Canada. This enterprise was accomplished, in the September and October of 1830, with severe hardships and perils; but Josiah Henson was a free man at length, having been from his youth a brave man worthy of freedom. He found employment among the Canadian farmers. His boys here first went to school, and the eldest then taught his own father, already a minister of the Gospel, to read the Bible, which he could not have dared to learn in the Slave States. The Rev. Joseph Henson, working for the support of his family, leading and superintending the village life of several hundred escaped negroes like himself, acquired some little position, influence, and property. He took an active part in the secret association, called "the Underground Railroad," between anti-slavery people in the United States and Canada, to help the escape of negroes from the southern bondage. In this noble service of liberty and humanity Josiah Henson more than once risked his life by venturing into the State of Kentucky, for the rescue of his less fortunate brethren. At the same time he was engaged in founding an industrial settlement, with missions and schools, landed estate, buildings, and saw-mills for the colonial timber trade. He travelled repeatedly, on business, through all the British American provinces and the New England States. His home was a newborn village then called Dawn, but now Camden, on the river Sydenham, in Upper Canada, where he presided over the "Manual Labour School." It is a pity that Mr. Carlyle, whose "Occasional Discourse on the Negro Question," in his "Latter-Day Pamphlets," appeared just about that time, knew nothing of the virtues and good works of such men as Josiah Henson. But the time very soon arrived for this admirable example to be known in England, as well as in America. At the London Universal Exhibition of 1851, there was a show of Canadian black walnut from the Sawmills of Dawn, in charge of the Rev. Josiah Henson. He arrived here, with letters of introduction to statesmen from the Sumners and Lawrences of Massachusetts, from Sir Allan M'Nab and other eminent men of Canada, and with credentials to the chief Nonconformist ministers in London. An attempt was made to vilify his character, and to denounce him as a mercenary impostor; but the whole case was investigated by a committee of the highest authority, and Canadian testimonies were also obtained, proving that he had been falsely slandered. He was invited to occupy the best Dissenting pulpit, was received by the Archbishop of Canterbury, and dined with the Prime Minister, Lord John Russell. Upon his return to America, he wrote and published the story of his own life, that its sale might provide for the purchase of his elder brother's freedom in Georgia. Mrs. Harriet Beecher Stowe read the autobiography, and made the acquaintance of its writer, shortly before composing her famous romance, "Uncle Tom's Cabin." We cannot perceive much resemblance between the main outlines of "Uncle Tom's" life, which is a thrilling tragedy, and the adventurous but finally prosperous career of the Rev. Josiah Henson. Nor does it appear, judging from such indications of personal character as the reading of these books will afford, that the two men are at all like each other, except in being, for aught we know, equally good men. But Mrs. Stowe was probably indebted to Mr. Henson for some anecdotes of the licentious cruelty of a bad class of slave owners, dealers, and overseers in the Southern States, and for some instances of the quaint, comical, but affecting simplicity of the negro race. We do not quite know what to think of Mr. Henson's *ex parte* statement of the disputes, in later years, about the management of the institution at Dawn and its property, or that of his personal quarrels with some of his Canadian neighbours. His temper with regard to these may be excusable in a mere worldly man, but is far from the spirit of evangelical charity which we should expect in "Uncle Tom." It may, perhaps, be inferred that a black saint is not much better or worse than a white saint; but we have no reason to doubt that Josiah Henson is a tolerably good fellow, and not more of an egotist than other persons who rise in the world, and who find themselves petted by a fashionable sentimentalism. We are glad to know that the old man is well and hearty, as he now goes home once more from his third visit to England; that he is happy in a second marriage and in his seven children now living; and that he has been so kindly received by the Queen.

The Portrait of "Uncle Tom"—as it pleases Mr. Henson to accept that name—is from a photograph by Messrs. Bradshaw and Godart, London School of Photography, Newgate-street.

A LOG HUT IN CALIFORNIA.

It may be remembered that our Special Artist, Mr. Simpson, when in San Francisco, in 1873, dashed off to the northern point of California, to see and illustrate for us the Modoc War, sketches and descriptions of which were given at the time. The Log Hut now presented to view was one of the places at which our Artist put up on his way to the Lava Beds. Such a scene would have had less interest at the time; but now, when we are recording the progress of the United States in America, the sketch may serve to illustrate the outposts of civilisation. Ever since the occupation of America there has been a frontier line of colonists, who have been in contact with the native Indians. This movement began with the first settlers, but has steadily gone westward, and it is now only in the far West that anything of the kind can be seen. The early descriptions of the American Indians represent them as being of a high and chivalric nature. They may have been so two or three centuries ago, but at present those left in the far West do not realise this idea. We may quote from a paper supplied by Mr. W. Simpson to the proceedings of the Royal Geographical Society, and published in April, 1875, in which he says:—"At the base of the hills I made my acquaintance for the first time with the European settler, who lives on the boundary where our civilisation ends and the condition of the primitive race begins. The Spanish word 'Ranch' is still retained, and

in this quarter it means many square miles of land, with thousands of cattle on it. The dwelling was a rude log hut, whose floor was not very different in cleanliness from the ground outside. My bed for the night was on this, with a blanket I had luckily brought with me. The morning ablutions, for those who cared to perform them, were done in a small stream near the door; a dirty towel hung at the entrance, near to which was nailed, by means of a string, a comb with two or three teeth still left in it, and a small empty frame, which had once contained a looking-glass. In none of the ranches in this out-of-the-way quarter did I see a European woman. The proprietors, I was told, were very wealthy, and the number of dollars they were worth was often mentioned to me. Still, if a sort of missionary society were to be formed to send out soap, brushes, needles and thread, and similar articles, which we consider as the first necessities of civilisation, with some person to give instructions as to their use, I should at once subscribe to it as one having a most charitable purpose. I think I never saw such dirty, uncombed, and ragged specimens of humanity. In one of these ranches I was thoughtless enough to go into the place where the breakfast was being cooked. I will not describe the cuisine to you; it will be enough to say that it was quite in keeping with the surroundings. It will complete this picture of the condition of these advanced settlers, to state that their morality presented a similar tendency to degradation. There was generally at these ranches a 'Wikie up,' or rude tent of mats and branches, inhabited by Modoc women."

FINE ARTS.

EXHIBITION OF THE SOCIETY OF LADY ARTISTS.

Of the two exhibitions opened this week gallantry compels us to hold in due remembrance the old French saying, *Place aux dames*.

This society was reorganised in 1865, and ever since it has had the active support of some of our best female artists, among whom may be named Mrs. E. M. Ward, Madame Bischoff, of The Hague, Miss Montalba, and Miss Elizabeth Thompson. The present exhibition numbers 715 works, including three painted china plates by Rebecca Coleman.

We are of those who regard the making of copies as rather a profitless employment of time, and we see there are a good many in the present exhibition; but, when the copy is as good as Kathleen Milligan's "Village Choir," after T. Webster; or Miss Jessie Landseer's miniature in ivory, after her brother Sir Edwin's "Beauty's Bath" (682)—a young lady holding in her arms a pet spaniel, and which was painted, if we remember rightly, for the late Sir Robert Peel, we are almost inclined to withdraw our objection.

Emma Cooper's "Plums" (706), lying attached to the branch, has more precision and force than anything she has yet exhibited, and, if she will only go on content to do bits of things well, she will soon have strength enough to grasp subjects in their entirety. Maria Harrison's "Basket of Peonies in the Gloamin'" (96), though necessarily low in key, need not necessarily have been hung so high. Her yellow "Roses in Wedgwood Vase" (177) is no better painted, though much better hung.

Madame Hegg is, as usual, a generous contributor, and in flower-painting leads the way, closely followed by Mrs. A. Lukis Guerin, Charlotte J. James, and Miss E. Walter. Then, in fruit, we have Miss E. H. Stannard and Fanny E. Davis. In the landscape branch of art Mrs. Mable is as abounding as ever and much more definite in her touch and artistic in her general massing; while Marian Croft very worthily occupies the place of honour with her "Old Cottage, Ringmer" (165), with a clever figure-subject by Mrs. Backhouse on each side.

Louise Jopling's "Izanami" (231), a Japanese girl whose interesting face reflects the warm tints of her parasol; Ellen Partridge's life-sized portrait of "Miss Pierrepont" (253), Madame O. Bischoff's "First Kiss" (61), Middle M. Kirschner's "Cattle on the Banks of a Stream" (238), and Mary Backhouse's "La Bella Lavandaja" (280) are among the strong things of the exhibition. Besides these there are many others whose works deserve attention; and among them are Laura T. A. Tadema, S. M. Louisa Taylor, Miss Hepworth Dixon, Kate Edith Nichols, Eva M. Ward, Emily Aldridge, E. S. Guinness, Louisa Starr, Elizabeth Thompson, and Mrs. E. M. Ward. We are happy to think that these ladies can well afford to have their names only mentioned. Their works add greatly to the interest of the exhibition; and we were very glad to hear that on the private-view day the sales were more than ordinarily good.

SOCIETY OF BRITISH ARTISTS.

When a man is smitten with a desire to possess pictures, whether in oil or water colour, it is in the Gallery of the Society of British Artists that he most probably ventures on his first modest purchase. When a student begins to think that he can project on the canvas something worthy of being seen, it is to the Society of British Artists that he sends his first picture; on its walls that he has the satisfaction of seeing himself "hung," or experiences the more palpitating joy still of beholding himself marked "sold." To the minds, therefore, both of buyers and sellers—of artists and of their patrons—the Society of British Artists brings pleasurable recollections; and it is satisfactory to see that an institution which caters so well for the general public in matters æsthetic is in a healthy and prosperous condition.

The Exhibition consists in round numbers of about 500 oil pictures, 350 water colours, and ten pieces of sculpture, making in all 863 works—by far too large a number for anything like detailed criticism; and we must content ourselves, therefore, with indicating here and there those pictures whose merits more immediately commend them to the visitor.

Beginning with the catalogue in the large room, there will be found a landscape by George Cole which his son, the Academy Associate, might not be ashamed to own. It is called "Evening on the Thames" (7), and represents in the foreground a wain of hay going along the sedgy river, while a church tower in the distance looms up above the haze of evening. H. W. B. Davis, A.R.A., sends also an evening effect, and treats it with some originality. In this "Sunset" (16) of his we see some cattle wending towards the spectator through a rich clover-field, which is dominated by a rounded hill in the distance. The effect of peace and stillness is well given. To the same class of subject belong A. F. Grace's "Harvest Moon" (32), which reveals a man paddling a punt with some children in it across a well-wooded river; and "Sunset at Sea" (13), by L. O. Miles, which, though hung low, is truthfully and vigorously painted. H. T. Dawson, junior's "View near Chatham" (28), is remarkable for the nice silvery way in which he has treated the morning mist, as the elder Dawson, in his picture of "A Common" (91), is distinguished by the truthful manner in which he represents the darkling clouds of evening rising on the horizon, while the zenith is still bright with a pale after-glow. Another well-conceived picture is E. F. Munn's "Brittany" (122), in which is seen a female peasant carrying a brazier, with a cottage behind her. There is much force and originality in the treatment of this picture,

and the effect of gloamin' is cleverly caught. "Oystermouth, South Wales" (166), by G. Sant, is silvery and luminous, as J. W. B. Knight, in his "Yalding, Tees, and Twyford Bridge on the Medway" (177), is warm and glowing; indeed, the glowing quality is carried rather too far, and the general finish of the picture by no means far enough. For suggestive treatment, we would point to E. Ellis, where "Setting Crab Pots off the Yorkshire Coast" (185), with a boat in the foreground and sails in the distance seen phantom-like through the mist, while to the right tower up the beetling cliffs, is one of the best impressionist pictures in the exhibition. This list of pictures, dealing with atmospheric phenomena and phases of light and shade as beheld in landscape, could scarcely be closed better than with A. J. Woolmer's large picture of "The Birth of Venus" (193). Surely sunrise, in spite of a little crudeness here and there, arising perhaps from want of finish, was never more brilliantly portrayed. Here and there, amidst the summer waves, sea nymphs disport themselves, while towards us comes the new-made goddess, binding up her hair as she walks.

The figures in this picture remind us that there are in the gallery many subject compositions deserving notice, and one of the most refined and poetical of these is the same artist's "Imogen Sleeping" (64), which hangs by the fireplace. In the same honourable position will be found P. H. Calderon's "Sibyl" (65)—wrongly spelt in the catalogue—representing a pretty dark girl in loose white dress; "The Image of his Father" (56), lying on his mother's knee, while the fisherman-dad sits laughing on the side of the table, by T. Roberts; studies of an Old Man and Old Woman (61 and 73), by James Sant, R.A.; and the study for M. Elmore's famous picture of Lenore (69). W. L. Wyllie's "At 'The Good Intent'" (77) shows an assemblage of sailors and their lassies refreshing themselves in the large parlour of some waterside public-house. It is very sketchy but, at the same time, very realistic. Another remarkably observant painter whose work is always artistic in handling and in tone is H. Caffieri. In his "Corner of a Studio" (36) sits a thoughtful-looking girl, in a pink dress, leaning back and looking at her work on the easel. A. Ludovici's "Judy must have a new rig-out" (47), showing an old Punch and Judy man, with his daughter, attending to the "theatrical" properties, is also a good subject, but a little wanting in decision.

L. Cattermole's "Thunder and Lightning" (48), represents a lot of scampering horses, very spiritedly drawn, and "A Scramble" (107), by E. A. Holmes, shows a lot of young pigs rushing towards the piece of bread held by a boy who leans over the edge of their sty. There is commendable freedom in the painting of this picture. Another animal-painter of considerable power and greater promise is J. S. Noble, who, with great truth to nature and local fact, shows us a drover on his "sheltie," accompanied by a couple of inevitable colliers "collecting the drove" (95) of picturesque Highland cattle which he means taking away down South to some well-frequented Lowland market. E. J. Cobbett throws a warm broad glow of evening into his picture of peasant girls "Returning from Market" (102); and W. H. Gadsby is wonderfully free and effective in his little girl rolling the floury paste for the "Apple-Pudding" (121). C. Cattermole is dramatic and full of nice feeling in "Disarmed" (142), in which a girl interferes to prevent a fight between two cavaliers. W. Bromley's "Come Along" (147) represents a girl waiting for her little sister as she toddles over the easy stepping stones in the river. John Bromley's "Preparing Dinner" (520)—a well-defined interior as to light and shade, showing girl peeling potatoes—is an immense advance on his last year's work. J. Haylar's "Sympathy and Sorrow" (182) has character as well as sentiment. The gardener, having dug a hole, stands by and contemplates his sorrowing young lady, who sits with a little basket on her lap containing her dead dove.

In architecture, Wyke Baylis is more than ordinarily space-suggesting and grand in his "Interior of Strasbourg Cathedral," which very properly holds the place of honour on the right-hand wall.

We have by no means exhausted the names of the more conspicuous artists in the present exhibition. There are H. E. Glindoni, G. E. Hicks, C. A. Smith, D. Passmore, R. I. Gordon, E. A. Storey, A.R.A., D. Cameron, R. Redgrave, R.A., E. M. Ward, R.A., and several others whose works have both quality and interest; but our space is already exhausted.

THE WILLIAM SMITH WATER-COLOUR COLLECTION.

The late William Smith, F.S.A., so long and honorably associated with the art of this country, has left to the nation a library of art-books, in splendid condition, and a collection of water-colour drawings, which will complete the historical collection of water colours already possessed by the South Kensington Museum. Of the 222 paintings, ranging from Cozens, Girtin, and Turner, to artists who are still among us, there are seventy-five examples of artists (fifty-seven in number) who were previously unrepresented in the museum. It will thus be seen that Mr. Smith's bequest is one of national importance.

The Prime Minister has appointed the Earl of Dudley to be a trustee of the National Gallery, in the place of the late Marquis of Northampton.

The large and very interesting collection of drawings, with a few oil paintings, by David Cox, formed during many years by the late Mr. W. Stone Ellis, of Streatham, was sold by Messrs. Christie, Manson, and Woods, on Friday and Saturday last. A large proportion of the drawings were more or less sketchy and unfinished, though all showing the great power of the master, and some fifty or more were completed works. There were also some drawings by the son of the artist, who is a member of the Water-Colour Society, by F. Taylor, and other painters. The sale of 364 lots made a total of £17,911.

The Gibson collection of Wedgwood ware, one of the most complete and beautiful ever formed, which belonged to the late Dr. Gibson, was sold, last week, by Messrs. Christie, Manson, and Woods, bringing some of the highest prices ever obtained for Wedgwood ware, the sale realising £4376.

At the meeting of the Society for the Encouragement of the Fine Arts, on the 8th inst., Mr. H. H. Statham gave a lecture upon the Principles of Architecture as Illustrated in the Greek and Gothic Styles. Mr. George Godwin, F.R.S., occupied the chair. The object of the lecturer was to show that there is a definite and ascertainable principle underlying all true styles of architecture, and that this might be shown by a comparison of the characteristics of two of the greatest and purest styles—the Greek and the Gothic.

Early on Sunday a fire occurred at Ashford, Kent, by which a man, his wife, and three children were burnt to death.

Under the title of "Lessons in Massacre," Mr. Gladstone has written another pamphlet, published by Mr. John Murray, on the subject of the Bulgarian massacres. It is declared by its title to be "An Exposition of the Conduct of the Porte in and about Bulgaria, since May, 1876, chiefly from the papers presented by command."

OBITUARY OF EMINENT PERSONS.

THE DOWAGER COUNTESS OF ST. GERMAN.

The Right Hon. Harriet, Dowager Countess of St. German, died at Pisa, on the 4th inst., aged eighty-seven. Her Ladyship was fourth daughter of the Right Hon. Reginald Pole-Carew, of Antony, in the county of Cornwall, by Jemima, his wife, only child of the Hon. John Yorke, fourth son of Lord Chancellor Hardwicke. She married, Aug. 19, 1819, John, Earl of St. German, his second wife, but had no issue. The present Earl of St. German, at one time Viceroy of Ireland, is the nephew of her Ladyship's husband.

BARONESS MEYER DE ROTHSCHILD.

Baroness Meyer de Rothschild died on board her yacht, at Nice, on the 9th inst. She sailed in her yacht *Ozarina* from Southampton in September last for the Mediterranean, in the hope of benefiting her health, which had been delicate since the death of her husband, three years ago, and had visited Malta, Athens, and other places of interest. At Nice she met her daughter Hannah and Miss Cohen, who were with the Baroness at her death. She was the eldest daughter of the late Mr. Isaac Cohen, and married, June 26, 1850, Baron Meyer de Rothschild, who died Feb. 6, 1874, by whom she had an only daughter, Hannah. The Jewish charities of the metropolis have lost a most generous patroness by her death.

THE HON. W. J. COVENTRY.

The Hon. William James Coventry, fourth and youngest son of George William, seventh Earl of Coventry, by his second wife, Peggy, second daughter and coheir of Sir Abraham Pitches, of Streatham, Surrey, died, on Sunday last, at Earl's Croome Court, Worcestershire. He was born Jan. 1, 1797, and was therefore in his eighty-first year, and married, July 26, 1821, Mary, second daughter of the late Mr. James Laing, of Jamaica, by whom he leaves a numerous family. He had been Major of the Worcestershire Yeomanry Cavalry since 1861.

SIR JOHN FORDYCE.

Lieutenant-General Sir John Fordyce, K.C.B., Colonel Commandant Royal (late Bengal) Artillery, whose death is just recorded, entered the artillery in 1822, and attained the rank of Lieutenant-General in 1872. During the intervening fifty years he saw much service in India. He was at the capture of Arracan, went through the Sutlej campaign, commanded a battery of artillery at Ferozeshah and Soobraon, was in the advance on Lahore, served the Punjab campaign, commanded a troop of horse artillery at Chillianwallah and Goojerat, and went in pursuit of the Sikhs and Afghans to the Kyber Pass. Finally, he was at the head of the artillery in forcing the Kohet Pass, under Sir Charles Napier. He had several war medals and clasps; and was created K.C.B. in 1873.

ADMIRAL SWINBURNE.

Charles Henry Swinburne, Admiral R.N., J.P., died at his residence, Holmwood, Shipplake, near Henley-on-Thames, on the 4th inst., in his eightieth year. He was second son of Sir John Edward Swinburne, sixth Baronet, of Capheaton, by Emma, his wife, daughter of R. H. A. Bennett, Esq., of Beckenham, Kent, and was educated at the Royal Naval College. He married, May 19, 1836, Lady Jane Henrietta Ashburnham, daughter of George, third Earl of Ashburnham, by whom he leaves, with junior issue, Algernon Charles Swinburne, the poet.

MR. W. P. GIFFARD.

Walter Peter Giffard, Esq., of Chillington, in the county of Stafford, D.L., one of the best estates and best descended gentlemen in that county, died at his seat, near Wolverhampton, on the 6th inst., aged eighty. He was third son of Thomas Giffard, Esq., of Chillington, by Lady Charlotte, his wife, sister of William, tenth Earl of Devon, and succeeded to the family estates at the decease of his brother, Lieutenant-Colonel Giffard, in 1861. He married, July 7, 1836, Henrietta Dorothy, second daughter of Sir John Fenton Boughiey, Bart., of Aqualate, by whom he leaves two daughters, Mrs. Inge, of Whittington Hurst, and Mrs. Vernon, of Hilton Park, and an only son, Walter Thomas Courtenay Giffard, now of Chillington, J.P. and D.L. The Giffards of Chillington derive descent from Osborne Giffarde, a Norman, who was at the Conquest of England, 1066.

MR. T. M. GOODLAKE.

Thomas Mills Goodlake, Esq., of Wadley and Shellingford, in Berks, died, on March 10, at his town residence, 5, Upper Brook-street, in his seventieth year. The family have been resident at Letcomb, near Wantage, for many generations antecedent to the institution of registers, in 1547. The original warrant of the manors was made out to Thomas Godelac, or Guthlac, in 1370. The name is presumed by antiquarians to be of Danish origin, and is identical with the Danish saint who flourished in the twelfth century in the diocese of Ely. Mr. Goodlake was a considerable landowner in Berkshire, of which county he was J.P. and D.L., and High Sheriff in 1834. He was educated at Eton, and at Christ Church, Oxford, and was a Cornet in the 5th Dragoon Guards. Mr. Goodlake was born June 7, 1807, and married, in 1828, Emilia Maria, daughter of the late Sir Edward B. Baker, Bart., and Lady Elizabeth, sister of the late Duke of Leinster, by whom he has, with other issue, Thomas Leinster, J.P. for Berks and Oxon, born May 13, 1829, and married, in 1854, Mary Frederica, only sister of the present Sir Richard Glyn, Bart.

The deaths are also announced of—

J. S. Bowerbank, Esq., LL.D., F.R.S., on the 9th inst.

Major-General Francis Montagu Ommanney, late Royal Artillery, on the 5th inst.

Mary Ann, Lady Anderson, wife of Sir George Campbell Anderson, on the 5th inst.

Captain Thomas Hooper, R.N., Inspecting Commander of the Coastguards, on the 4th inst., aged forty-three.

Marianne, Lady Alderson, wife of Sir James Alderson, Physician Extraordinary to the Queen, on the 5th inst.

Rev. Richard Underwood, M.A., Prebendary of the Cathedral and Vicar of All Saints', Hereford, on the 4th inst.

Miss Ann Maxwell Graham, of Williamwood, N.B., the co-representative of the Grahams of Tamraver and of the Maxwells of Williamwood, on the 6th inst.

Edward Berwick, Esq., A.B., President of Queen's College, Galway (brother of the late Judge Berwick, who was killed in the Abergele railway accident), on the 7th inst.

Warren William Richard Peacocke, Esq., of Efford, Lymington, Hants, J.P., eldest son of the late Admiral Richard Peacocke, on the 5th inst., aged fifty-five.

Deputy Inspector-General Alexander Eugene Mackay, M.D., an able and conscientious public servant and one of the most respected medical officers of the Navy, at his residence, Clifton-hill, St. John's-wood, on the 10th inst.

Lieutenant-Colonel Charles Williamson, fourth battalion 60th Rifles, third son of the late Sir Hedworth Williamson, Bart., by Anne Elizabeth, his wife, daughter of Thomas Henry, Lord Ravensworth, on the 4th inst., at Whitburn Hall, near Sunderland, aged forty-three.

CHESS.

TO CORRESPONDENTS.

All communications relating to this department of the Paper should be addressed to the Editor, and have the word "Chess" written on the envelope.

J. G. O. (Tottenham).—Is there not a solution to your problem by 1. Q to Kt 3rd? Black's only reply appears to be 1. B to B 6th, when there follows 2. Q takes B P (ch) and 3. Q to B 5th, mate.

W. H. L. and W. L. A.—The conception embodied in the problem is good, but the threatened promotion of the Black Pawns suggests the first move at a glance.

C. M. B. (Dundee).—We regret we are unable to comply with your request. Thanks for the problem.

T. G. (Smethwick).—The problem received from you some time ago is still under examination. For the last batch please accept our thanks.

L. D. (City-road).—Much too simple. A chess problem should be something more than a position wherein one side can win in a defined number of commonplace moves. Study the works of experienced composers, and let us hear from you again.

S. W. (Greenwich).—Both games are below our standard. We are, nevertheless, obliged for the trouble you have taken in transcribing and sending them.

L. S. R. (Sheffield).—Your question is not intelligibly phrased. If you mean to ask can a Pawn in advancing two squares capture a Pawn in passing, the answer is, No.

J. de Houtzart (Brussels).—Your very full and accurate analysis of Mr. Kidson's clever strategem (No. 1724) deserves special mention. We congratulate you upon your success.

E. W. (Boulogne).—A player cannot castle after either K or R has been moved. The laws of chess, and much valuable information concerning them, are set forth fully in Staunton's "Chess Praxis," a copy of which can be obtained through any bookseller.

E. R. (Hampstead).—Calais is the fanciful name conferred by Sir William Jones upon the heroine of a poem on chess published by him in 1763.

Problems received from T. F. Smythe, O. M. Baxter, T. Guest, and D. Daffily.

CONCISE SOLUTIONS OF PROBLEM No. 1728 received from B. Edges, J. Harnden, G. R. Kent, Treunuch, D. H. Monkey, F. O. Evers, Edipus, Vig, Laeta, T. Letchford, G. Whitehead, Pau, Jans N, C. J. S., and E. W. Wilmet.

CONCISE SOLUTIONS OF PROBLEM No. 1724 received from J. de Houtzart, Woolwich Chess Club, W. Leeson, J. Woods, and H. B.

NOTE.—As only five correct solutions of this remarkably difficult problem have been received, we hold over the answer for a week in order that our correspondents may have another opportunity of discovering it. In the meantime it will, perhaps, be satisfactory to the eighty-three correspondents who believe they have solved this problem by 1. Q to a4, to point out that, in reply to that move, Black can play 1. B to B 7th, and should White continue with 2. R takes B, the answer is, 2. B takes Kt, after which Black cannot be mated on the third move. Against 1. R to K 2nd—a very plausible line of play—Black's defence is 1. Kt takes Kt; and, if White persists with 2. Kt to K 6th (discovering check), Black interposes the Kt, and so prolongs the mate beyond the stipulated number of moves. The other suggested solutions—Kt to Kt 4th (ch); Kt to K 6th (ch); B to Kt 6th; and B takes P at E 6th—are also ineffective, as a little careful examination should show.

PROBLEM No. 1736.

By A. E. STUDD.

BLACK.

WHITE.

White to play, and mate in two moves.

CHESS IN LONDON.

An amusing skirmish, that occurred recently, between the Rev. G. A. Macdonnell and Mr. J. I. Minchin. (Scotch Gambit.)

WHITE (Mr. M'D.).	BLACK (Mr. M.).	WHITE (Mr. M'D.).	BLACK (Mr. M.).
1. P to K 4th	P to K 4th	Very well played. If Black now captures the R, White wins easily. Suppose—	
2. Kt to K B 3rd	Kt to Q B 3rd	15. Q takes K P	Q takes R
3. P to Q 4th	P takes P	16. Q takes K P	R to K 4th
4. B to Q B 4th	B to B 4th	This appears to be his best move.	
5. Castles	P to Q 3rd	17. B takes E	K takes B
6. P to Q B 3rd	B to K Kt 5th	18. Q to B 5th (ch)	K to K 2nd
7. P to Q Kt 4th		19. B to Kt 5th (ch)	winning the Q.
Mr. Macdonnell is very partial to this move in off-hand games. Although inferior, in our judgment, to 7. Q to Kt 3rd, it is less hackneyed, and always produces a lively game.		15. Q to K 2nd	Q to K 2nd
		16. Q takes Q	Kt takes Q
		17. P takes R P	Kt to B 3rd
		18. P to Q 6th	R takes P
		He has nothing better to do. White's last clever stroke secured the victory.	
		19. B takes R	P takes B
		20. B to B 3rd	K to K 2nd
		21. P to B 3rd	B to Kt 3rd
		22. Q to B 4th	R to Q 4th
		23. R takes P	R takes R
		24. R to Q sq.	and Black resigned.

A smart affair played in London, a few days ago, between the Rev. A. Cyril Pearson and Mr. W. (Danish Gambit.)

WHITE (Mr. P.).	BLACK (Mr. W.).	WHITE (Mr. P.).	BLACK (Mr. W.).
1. P to K 4th	P to K 4th	13. B to B 2nd	K takes B
2. P to Q 4th	P takes P	14. B to B 2nd	Q to B 3rd
3. P to Q B 3rd	P takes P	Black might have safely taken the R with Kt; for, if White should then play 15. Q to Q 4th (ch), Black interposes the Q, and White cannot take the B without submitting to the loss of a second Rook.	
We prefer 3. P to Q 4th at this point. The move in the text is sound enough, but it permits White to get a formidable attack in the opening.		15. Kt to Kt 3rd	K to R sq
4. B to Q B 4th	P takes P	16. Q to B 5th	P to K B 3rd
5. B takes Kt P	B to Kt 5th (ch)	Q to Kt 2nd would obviously have been better. The move made serves but to expose the K still more to the action of the opposing forces.	
6. Kt to Q B 3rd	Kt to Q B 3rd	17. Kt to B 5th	
7. Kt to K 2nd		White conducts this part of the game with much force and vigour.	
In view of the advance of the K P, this Kt would have been better posted at B 3rd.		18. Q to R 3rd	Kt takes R
		19. Kt takes R P	Q to Kt 2nd
		20. Kt to Kt 4th (dis. K to Kt sq ch)	
		21. Kt to B 6th (ch), and wins.	

CHESS INTELLIGENCE.

On Wednesday evening last the members of the City of London Chess held high festival in celebration of the twenty-fifth anniversary of the foundation of the club. Mr. E. F. Gastineau, the president, filled the chair, the vice-chair being occupied by Mr. J. A. Manning, the vice-president, and among the company assembled were a large number of the leading English chessplayers. After the usual loyal toasts had been duly honoured and the health of the several officers of the club had been received with acclamation, the toast of "The Lady Chessplayers" was proposed by M. Delannoy, the well-known chess-writer. "The Chess Press" and "The Visitors" brought the list of toasts to a conclusion. The proceedings were enlivened by some good singing and an excellent performance upon the pianoforte by Mr. Hailes.

Captain Sir G. S. Nares, R.N., K.O.B., was, yesterday week, admitted to the freedom of the City, as a citizen and shipwright of London, by Mr. B. Scott, F.R.A.S., the Chamberlain, in pursuance of an order of the Court of Aldermen. Sir George was presented to the Chamberlain by a deputation from the Court of the Shipwrights' Company.

WILLS AND BEQUESTS.

The will, dated Dec. 21, 1875, of the Right Hon. Thomas Baron Ribblesdale, late of Gisborne Park, Yorkshire, who died on Aug. 25 last, at Loobes les Bains, Switzerland, was proved on the 1st ult. at the Wakefield District Registry by the Rev. William Parsons Warburton, William Henry Melville, and Arthur Ingram Robinson, the executors, the personal estate being sworn under £14,000. The testator bequeaths to his eldest son, the Hon. Thomas Lister, all the portraits of his ancestors, family pictures, plate, and furniture at Gisborne Park; to his sisters, the Hon. Adelaide Drummond, the Hon. Isabel Mary Warburton, and the Hon. Elizabeth Theresa Melville, £1000 each; to his half-sister, Lady Georgina Adelaide Peel and Lady Victoria Villiers, £500 each; to his steward, Thomas Chew, £250; to George Leopold Greville and Thomas Lister, of The Cottage, Groby, near Leicester, £5000 each; and the residue of his property, real and personal, to all his children, except the son who succeeds him in the title.

The will of Mr. John Floyer, late of Hints Hall, in the county of Stafford, who died on Jan. 1 last, has been proved in the Lichfield District Registry by Thomas Argyle, Edward Argyle, and Thomas Argyle, jun., all of Tamworth, gentlemen, the trustees and executors, the personal estate being sworn under £180,000. The testator bequeaths all his plate to his cousin, Philip Stapleton Humberston, Esq., and his paintings and pictures to his cousin, John Levett, Esq. His mansion-house, called Hints Hall, with the manor and estate of Hints, and all his personal estate, he gives and devises to his said trustees, upon trusts for absolute sale and conversion; testator bequeaths an annuity of £200 per annum to his housekeeper, for long and faithful service, and legacies to all his old servants; he gives pecuniary legacies, amounting to about £70,000, amongst which are the following:—To the Staffordshire Infirmary and Birmingham General Hospital, £500 each; and to the cottage tenants on the estate at the time of his death, £200, to be divided amongst them, at the discretion of his executors; the residue is bequeathed equally to his cousins, John Levett, Edward Levett, Robert Thomas Kennedy Levett, Charles Levett, and Henry Levett, Esquires.

The will and codicil, dated April 15 and June 5, 1875, of Mr. Xenophon Balli, late of No. 20, Great Winchester-street, and of No. 31, Pembroke-gardens, who died on Jan. 17 last, were proved on the 3rd inst. by Mrs. Calliope Balli, the widow, John Balli, the son, and John Hollams, the executors, the personal estate being sworn under £160,000. The testator bequeaths to his wife all his furniture, plate, pictures, household effects, horses, and carriages; to Mr. Hollams, as some acknowledgment for his trouble, 200 guineas; and the rest of his property to his three sons, John, Nicholas, and Xenophon. The testator states that the reason he makes no provision for his wife and his two daughters, Mary Panas and Angeliue Pagliano, is that he has already otherwise provided for them.

The will, dated March 24, 1857, of Mr. Walter Thomas Fawcett, late of No. 29, Threadneedle-street, and of No. 70, Westbourne-terrace, Paddington, who died on Jan. 30 last, was proved on the 17th ult. by Mrs. Frances Fawcett, the widow and sole executrix, the personal estate being sworn under £90,000. The testator gives, devises, and bequeaths all his real and personal estate to his wife for her own absolute use and benefit.

The will, dated March 9, 1867, with a codicil, dated Aug. 13, 1869, of Mrs. Emily Chappell, late of No. 14, George-street, Hanover-square, who died on Jan. 21 last, was proved on the 9th ult. by William Chappell and Samuel Arthur Chappell, two of the sons of the deceased, the surviving executors, the personal estate being sworn under £70,000. The testatrix, subject to a few legacies, divides her property between her nine children.

The will, dated Nov. 8, 1875, of Mr. George Charman Haines, M.R.C.S., late of No. 5, River-street, Bath, who died on Dec. 28 last, was proved on the 5th ult. by Allen Chandler, the nephew, Henry Frederick Napper, Albert Napper, and Allen Chandler the younger, the acting executors, the personal estate being sworn under £30,000. Subject to a few legacies, the testator leaves all his property upon trust for his daughter, Mrs. Mary Moline, for life; at her death one half is to go to her son, Percy Moline, and the other half to her two daughters.

The will and codicil, dated Dec. 1, 1876, and Jan. 9, 1877, of Mr. Francis Lyon Barrington, late of Hetton Hall, Durham, who died on Jan. 15 last, were proved on the 5th ult. by Robert Heale Gamlen, Josiah Burdett, and the Right Hon. George William Viscount Barrington, the executors, the personal estate being sworn under £25,000. The testator gives to Viscount Barrington, £1000; to his other executors, £100 each; to Miss Mary Ann Swindall, £250 and an annuity of £500; and legacies to all his servants. All his real estate and the residue of his personality he settles upon the Right Hon. Elizabeth Jane Dowager Viscountess Barrington for life; with remainder to Francis Lyon Bowes, the second son of the present Earl of Strathmore.

The will, dated June 29, 1875, of the Rev. Edward Stuart, Vicar of St. Mary Magdalen, Munster-square, who died on the 15th ult., at No. 2, Munster-square, Regent's Park, was proved on the 27th ult. by Sir William John Walter Baynes, Bart., the brother-in-law of the deceased, the sole executor, to whom, subject to the payment of his lawful debts and funeral expenses, he gives and bequeaths all he may die possessed of. The personal estate is sworn under £8000.

The *Manchester Courier* says that the late Mr. N. Green-halgh, in addition to providing funds for the erection and endowment of two churches and schools at Bolton, has bequeathed £1000 each to the Church Missionary Society and Bible Society, £1000 towards a new infirmary at Bolton, and £500 to the sustentation fund for the Royal Albert Asylum, Lancaster. All the seats in the churches are to be free. The personal estate was sworn under £120,000.

Miss Ann Maxwell Graham, of Williamwood, near Glasgow, has left £500 to the National Life-Boat Institution for Scotland, and other legacies to local charities, amounting in all to £4600, with residue amounting to over £20,000, to form a charitable society for the relief of Protestant persons bearing the names of Maxwell or Hutchison, and for the higher education and starting in business of their children.

The Chancellor of the Duchy of Lancaster has appointed Mr. T. M. Shuttleworth to be seal-keeper of the county palatine, in the room of his deceased father.

Mr. Salt, Parliamentary Secretary to the Local Government Board, presided, on Monday, over another sitting of the Select Committee appointed to inquire into the propriety of sanctioning the use of steam-cars upon tramways. Mr. Hughes, engineer, of Leicester, and Mr. C. B. King, C.E., of London, gave evidence in favour of the proposition. Mr. Hughes described a steam-engine which is doing good work on the Edinburgh tram-lines. The evidence was unanimous that the use of steam does not frighten horses, while it was shown that the cost was considerably below that of horse power.

NEW MUSIC.

THE MUSICAL TIMES. Published Monthly. Increased to Fifty-six Pages. Price 3d.; post-free, 4d.—London: NOVELLO and Co.

Price, net, 1s. 6d. each
WHEAT and Co., Hanover-street.

WHY DO OUR TEETH DECAY?—Who has ever travelled among the Indians of North America that has not been struck with the superior whiteness and soundness of the Indians' teeth? Many have wondered how these dusky savages could preserve such full rows of ivory, even to the latest age, when premature decay of the teeth was the rule with the whites. What once was a mystery is no longer one. The extracts from plants which the Indians have for ages chewed have been concentrated into a liquid called **FRAGRANT FLORILINE**, a deeper drop of which on a wet toothbrush causes a sort of foam in the mouth, which penetrates every crevice, and cleanses the teeth from all impurities, hardens the gums, and prevents tartar. The "Fragrant Floriline" should be used in all cases of bad breath, and particularly by gentlemen after smoking. The Floriline combines, in a concentrated form, the most desirable cleansing and astringent properties. At the same time, it contains nothing which can possibly injure the most sensitive and delicate organization. It beautifies the teeth and gums.
It arrests the decay of the teeth.
It acts as a detergent after smoking.
It renders the gums hard and healthy.
It neutralises the offensive secretions of the mouth.
It imparts to the breath a fragrance purely aromatic and pleasant.
Put up in large bottles (only one size) and in elegant toilet-cases, complete, at 2s. 6d. Sold by all Chemists and Perfumers. Prepared only by HENRY C. GALLUP, 483, Oxford-st., London.

FLORILINE. For the TEETH and BREATH.

Sweet as the ambrosial air,
With its perfume to the teeth and gums;
Sweet as violets at the dawn,
Which the emerald buds adorn;
Sweet as rosebuds bursting forth,
From the richly-laden earth.
Is the "FRAGRANT FLORILINE."

The teeth it makes a pearly white,
The gums and lovely to the sight;
The gums assume a rosy hue;
The breath is sweet as violets blue;
While scented as the flowers of May,
Which cast their sweetest from each spray,
Is the "FRAGRANT FLORILINE."

Sure, some fairy with its hand
Cast around its mystic wand,
And produced from fairy's bower
Scented perfumes from each flower;
For in this liquid gem we trace—
All that can beauty add and grace—
Such is the "FRAGRANT FLORILINE."

FLORILINE. For the TEETH and BREATH.

In the best liquid dentifrice in the world, it thoroughly cleanses partially decayed teeth from all parasites or living "animalcules," leaving them pearly white, imparting a delightful fragrance to the breath. Price 2s. 6d. per bottle. The Fragrant Floriline removes instantly all odours arising from a foul stomach or tobacco-smoke.

For children and adults whose teeth show marks of decay its advantages are paramount. The "Floriline" should be thoroughly brushed into all the cavities; no one need fear using it too often or too much, as a stimulant. Among the ingredients being soda, honey, spirits of wine, borax, and extracts from sweet herbs and plants, it forms not only the very best dentifrice for cleansing ever discovered, but one that is perfectly delicious to the taste and as harmless as sherry. The taste is so pleasing that, instead of taking up the toothbrush with dislike, as is often the case, children will on no account omit to use the "Floriline" regularly each morning if only left to their own choice. Children cannot be taught the use of the toothbrush too young; early neglect invariably produces premature decay of the teeth. "Floriline" is prepared only by HENRY C. GALLUP, 483, Oxford-street, London; and sold by all Chemists and Perfumers throughout the world at 2s. 6d. per bottle.
"Floriline" Powder, put up in large glass jars, price 1s.

FLORILINE. For the TEETH and BREATH.

I have heard a strange statement, dear Fanny, to-day,
That the reason that teeth do decay
Is traced to some object that forces in the gums,
And eat them in time quite away.
Animalcules, they say, are engendered—that is,
If the mouth is not wholesome and clean
And I also have heard to preserve them the best
Is the fragrant, the sweet "FLORILINE!"

Oh, yes! it is true that secretions will cause
Living objects to form on your teeth,
And certainly and silently do they gnaw on
In cavities made underneath;
But a certain preservative Gellup has found,
To keep your mouth wholesome and clean;
And you're no longer afraid, for now, to preserve,
This "nothing like sweet" "FLORILINE!"

"It's nice and refreshing, and pleasant to use,
And no danger its use can be proved;
For clever physicians and dentists as well
Their uniform praise now is heard.
They say it's the best preparation that's known,
And evident proofs have they seen,
That nothing can equal the virtues that dwell
In the fragrant, the sweet "FLORILINE!"

FLORILINE. For the TEETH and BREATH.

It may or may not be generally known that microscopic examinations have proved that animal or vegetable parasites gather, unobserved by the naked eye, upon the teeth and gums of at least nine persons in every ten; any individual may easily satisfy himself in this matter by placing a powerful microscope over a partially decayed tooth, when the living animalcules will be found to resemble a partially-decayed cheese more than anything else we can compare it to. We may also state that the **FRAGRANT FLORILINE** is the only remedy yet discovered for the removal of these parasites from the teeth and gums without the slightest injury to the teeth or the most tender gums.

Read this.—From the "Weekly Times," March 25, 1877.—
"There are so many toilet articles which obtain all their celebrity from being so much and extensively advertised that it makes it necessary when anything new and good is introduced to the public that special attention should be called to it. The most delightful and effective toilet article for cleansing and beautifying the teeth that we in a long experience have ever used is the new **FRAGRANT FLORILINE**. It is quite a pleasure to use it, and its properties of imparting a fragrance to the breath and giving a pearly whiteness to the teeth make it still more valuable. Of all the numerous nostrums for cleaning the teeth which from time to time have been fashionable and popular, nothing is so complete, so good, so pleasant, and so economical as the **FRAGRANT FLORILINE** has hitherto been produced, whether considered as a beautifier or a valuable cleanser and preserver of the teeth and gums."

The Fragrant Floriline is put up in elegant toilet cases, and sold by all Perfumers and Dealers in Toilet Articles in the Kingdom, at 2s. 6d. per Bottle.
Prepared by HENRY C. GALLUP, 483, Oxford-street.

FLORILINE. For the TEETH and BREATH.

What Charm does **FLORILINE** possess,
That it should rank so high,
And round the globe that magic name
Like lightning swiftly fly?
What is it? Why its celestial force,
Which day by day is seen,
And now no toilet is complete
Without there's **FLORILINE**.

What charm does **FLORILINE** possess?
The breath it renders sweet;
The teeth it makes as white as snow,
With pearly lustre to the eye;
The mouth it makes so fresh and pure,
And healthy, too, and clean;
And those are charms which all admit
Arise from **FLORILINE**.

What charm does **FLORILINE** possess?
It cleanses well the mouth,
And renders it most agreeable
To the flowers of sunny youth;
Preservatives of pearly teeth,
From tartar keeps them clean;
And thus it has a special charm,
The fragrant **FLORILINE**.

FLORILINE. For the TEETH and BREATH.

The "Christian World" of March 17, 1877, says, with respect to **FLORILINE**:—"Floriline bids fair to become a household word in England, and one of peculiarly pleasant meaning. It would be difficult to conceive a more efficacious and agreeable preparation for the teeth. Those who once begin to use it will certainly never give it up."
Mr. Eckel, the celebrated dentist, 14, York-place, Portman-square, London, writes as follows:—"April 15, 1877.—I have tried your **FLORILINE**, and find it not only a great assistance in my practice in cleansing the teeth and sweetening the breath, but it gives entire satisfaction. I recommend it to all my patients, and I believe hundreds that would never visit a dentist would be much benefited by the use of your **FLORILINE**."

May be had of most respectable dealers in all parts of the world:—M. Swann, 12, Rue Castiglione, Paris; W. Kingston, Bathurst and Cecil-street, Calcutta; B. G. Arthur Tooth of Heston, and every marked personage of Royalty and Renown, a complete new edition of the Exhibition of Today is now exhibited. Admission, One Shilling; Children under Twelve, Sixpence. Open from Ten till Ten.

S. T. JAMES'S HALL. The extraordinarily successful ENTERTAINMENT produced by the Management of the MOORE and BURGESS MINSTRELS will be repeated EVERY NIGHT AT EIGHT, and on MONDAY, WEDNESDAY, and SATURDAY AT THREE ALSO.

Fauntails, 5s.; Sofa Stalls, 3s.; Area, 2s.; Gallery, 1s. Doors open for the Performance at 2.30; for Evening ditto at Seven. No Fees. No Charge for Programmes.

EASTER HOLIDAYS, 1877.

ST. JAMES'S GREAT HALL, Regent-street and Piccadilly. ON EASTER MONDAY AFTERNOON, APRIL 2, THE MOORE AND BURGESS MINSTRELS will give

TWO GRAND HOLIDAY PERFORMANCES IN THE GREAT HALL.

Producing an ENTIRELY NEW and MOST ATTRACTIVE PROGRAMME, which has been in rehearsal for several weeks past. The AFTERNOON PERFORMANCE will commence at Three. The EVENING at Eight.

TWO THOUSAND SHILLING SEATS. On EASTER TUESDAY AFTERNOON an EXTRA DAY PERFORMANCE will be given in Messrs. Moore and Burgess's own elegant and commodious Hall. Tickets and Places for these Performances may now be secured at Austin's Office, by Post or Telegraph.

MASKELYNE and COOKE WILL NOT PERFORM during Passion Week until the Saturday following Good Friday, when two representations, viz., at Three and Eight, will be given, and continued each day as usual. The Box-office will be open all the week, and seats can be booked for future days. W. MORRIS, Manager.

GEOLOGY. — SIX ELEMENTARY LECTURES, adapted to a Juvenile Audience, will be given by Professor TENNANT, at his Residence, 149, Strand, W.C., in the EASTER HOLIDAYS, APRIL 2, 3, 4, 5, 6, 7, at Ten a.m. and Three p.m. Terms, Half a Guinea for the Course. Professor TENNANT will probably afterwards REPEAT the ELEMENTARY LECTURES on MINERALOGY given during last Christmas Holidays.

FOREIGN POSTAGE

THE ILLUSTRATED LONDON NEWS.

Copies of the Foreign Edition of this week's Number will require to be prepaid with double the usual postage.

THE ILLUSTRATED LONDON NEWS.

LONDON: SATURDAY, MARCH 24, 1877.

The first Ottoman Parliament was opened by the Sultan in person on Monday last. The place in which they met was the Imperial Palace of Dolma-Baghtche. The ceremony was conducted with great solemnity in the presence of "the Imperial Ministers, the chief religious, civil, and military Dignities, the heads of the non-Mussulman communities, the diplomatic body, and the principal State functionaries." The event has been so announced to the Turkish Ambassadors in the different courts of Europe in a telegraphic despatch by the Minister for Foreign Affairs at Constantinople. The Address delivered from the Throne, or rather by a high official representing the Throne, has been communicated far and wide, and is probably much better understood and much more intently studied by intelligent politicians in most of the States of Europe than by his Imperial Majesty's own subjects, even in the central seat

of Government. It has all the features of a clever imitation and adaptation of Western methods to Oriental affairs and habits. It presents the appearance of an electro-plate production, the value of which consists rather in the skill with which it is worked up, than of the substantial materials of which it is composed. It is written rather with a view to be offered to the Powers, than to please the people over whom the Sultan sways a still autocratic sceptre. It looks one way, it steers its course in an opposite direction.

The Sultan opens with a statement to the effect that the grandeur of the Empire in former times was due to the practice of justice, respect for the laws, and the good administration of the country, and that its gradual decadence had been owing to the forgetfulness and abandonment of these wise examples up to the reign of the Sultan Mahmoud, who was the first to understand and commence reforms in the Empire, and to lead the country into a path of civilisation and progress. His own Father, the Sultan said, continued the good work, the benefits of which, however, were impeded by the Crimean War, which compelled the Treasury to have recourse for the first time to a loan. After peace had been restored, Turkey would have entered upon a new era of progress and prosperity if intrigues and culpable agitation had not paralysed the efforts of the Government. Hence, on the breaking out of the Insurrection in Herzegovina, they felt themselves obliged to ignore engagements contracted by the Porte. It was under these difficult circumstances that he was called to the Throne. He had first placed the forces of the country in a condition to ensure its security and independence, and had then devoted all his efforts to internal reform by promulgating a constitutional charter which, enabling the nation to participate in the enactment of laws and the administration of public affairs, would guarantee to all liberty, equality, and justice. After commending to the attention of Parliament several bills, the heads of which appear to coincide with the points of reform urged by the late Conference, he announced the restoration of peaceful relations with Servia, expressed his hopes of a favourable issue respecting the negotiations entered into with Montenegro, and declared that, though the Conference did not result in a definitive understanding, it had been none the less demonstrated that, both before and since the meeting of that body, the Government of the Porte was and is ready to anticipate in practice those wishes of the Powers which can be reconciled with existing Treaties, with the rules of international law, and with the exigencies of the situation. "My Government," he concluded, "has constantly given proofs of sincerity and moderation, which will aid in drawing closer the bonds of friendship and sympathy which unite us with the great European family."

If this Imperial Address can be accepted as really meaning what it says, Turkey would appear to have undergone a Revolution of unparalleled magnitude. In ascertaining this point, however, it is impossible to overlook the means that have been employed to bring this first Ottoman Parliament together. It is to a large extent a nominee Parliament. It represents the will of the Government rather than of the people. It is mainly Mohammedan—a concentration not of the most enlightened representatives of that creed, but of those who are steeped to the lips in provincial fanaticism, ignorance, and barbarism. We shall see what it consists of when it begins its debates; and the probability is that we shall witness, as the result of its labours, no real improvement in the administration of the country. There is not so much promise respecting what it will do as there was in the first Parliament constructed for France by Napoleon III. If, indeed, it were otherwise, if it had its roots in political sincerity and truth, it would go far to break up the already tottering Ottoman Empire. Representative institutions depend for their worth upon the character and will of the people represented. It is vain to expect solid progress and prosperity, or, in the words of the Sultan, "liberty, equality, and justice," from assemblies brought together with a view to do the behests of those who are profoundly ignorant of what those words signify. Were they to enter upon the path of reform they would paralyse the system by which a circle of Pashas trained to regard their own wishes only have brought, and are still bringing, their country to the verge of ruin. We are always disposed to exercise hope under circumstances which will admit of hope. We desire to recognise sincerity and to place confidence in all who profess themselves sincere, or have established the slightest claim to such confidence. But, seeing the anarchy which still prevails over no small portion of the Turkish Empire, European as well as Asiatic, and bearing in mind the cause of that anarchy, it is impossible to come to a conclusion hopeful of success for the Ottoman Parliament.

Perhaps, however, it is better that the experiment should have been tried. Better that the European Powers should wait for awhile to see what comes of it. The general opinion seems to be that it will hasten the dissolution of the Turkish Empire. Be it so; but even that is preferable to destroying it by the sword. Meanwhile, the Powers will need to exercise constant vigilance, lest the inevitable breakdown of Western methods of government in the East should suddenly bring about a collapse of the empire tempting to a general scramble to get something out of its remains.

THE COURT.

The Queen and Princess Beatrice visited the mausoleum at Frogmore yesterday week, it being the sixteenth anniversary of the death of the Duchess of Kent. By her Majesty's command, the mausoleum was kept open three hours, to enable the members of the household to visit it. The Judge Advocate-General had an audience of the Queen. The Dean of Windsor and the Hon. Mrs. Wellesley dined with her Majesty.

Princess Louise of Lorne and the Marquis of Lorne arrived at Windsor Castle on Saturday last. Princess Christian, with Princesses Victoria and Louise of Schleswig-Holstein, visited the Queen. The Right Hon. Lord John Manners and General the Right Hon. Sir William Knollys dined with her Majesty.

Sunday was the twenty-ninth anniversary of the birthday of Princess Louise of Lorne. The Queen, Princess Louise of Lorne, Princess Beatrice, and the Marquis of Lorne attended Divine service in the private chapel of the castle. The Rev. T. Teignmouth Shore, Incumbent of Berkeley chapel, Mayfair, officiated. Prince and Princess Christian and Princess Christian Victor and Albert of Schleswig-Holstein visited her Majesty and remained to luncheon. Dr. Becker dined with the Queen.

The Prince of Wales visited her Majesty on Monday, and remained to luncheon. The Queen's dinner party included Prince and Princess Christian, the Lord Chamberlain and the Marchioness of Hertford, Viscount and Viscountess Halifax, and Major-General H. and the Hon. Mrs. Ponsonby.

Princess Louise of Lorne and the Marquis of Lorne left the castle on Tuesday for London. Her Majesty held a Council, at which were present the Duke of Richmond and Gordon, the Earl of Derby, the Marquis of Hertford, and the Right Hon. R. A. Cross. Mr. Charles Lennox Peel, Clerk of the Council, was in attendance. Previously to the Council the Queen received General and Madame Ignatieff. The Countess of Derby presented Madame Ignatieff to her Majesty, and the Russian Ambassador presented General Ignatieff. The Secretary of State for Foreign Affairs was present. The Duke of Richmond and Gordon, the Earl of Derby, and the Lord Chamberlain had audience of the Queen. Her Majesty conferred the honour of knighthood upon Mr. Walter H. Medhurst, late her Majesty's Consul at Shanghai; Mr. James Gell, Attorney-General, and Mr. William Leese Drinkwater, First Deemster, of the Isle of Man. The Queen has also knighted Allen Young, Esq. Her Majesty received the sad intelligence of the death of Prince Charles of Hesse, father to her son-in-law, Prince Louis. The late Prince was in his sixty-eighth year, and universally beloved and respected.

The Queen, with the members of the Royal family, has taken daily out-of-door exercise.

THE PRINCE AND PRINCESS OF WALES.

The Prince of Wales hunted with the Queen's staghounds, near Maidenhead, yesterday week. In the evening his Royal Highness, with the Princess, attended the Lenten service at St. Anne's, Soho. The Prince, President of the Royal Commission for the Paris Exhibition, presided, on Saturday last, at Marlborough House, over a meeting of the Finance Committee of her Majesty's Commissioners. His Royal Highness visited the Queen at Windsor Castle on Monday. The Prince and Princess went to the Criterion Theatre. The Prince hunted with the Royal Buckhounds on Tuesday; the "meet" was at Two-mile Brook, near Slough. The deer Rob Roy was first uncarted, and ran through Slough, Chalvey, the Brocas Meadows, and then crossed the Thames near the cavalry barracks, Windsor; again took to the Thames and swam past the Cobler, and down the weir, landing in the Eton playing-fields, when he was hunted as far as Datchet, where he crossed the Thames and housed himself in the Home Park. The hounds trotted back to Slough, where The Truant was released and went away by Burnham and Taplow. The Prince and Princess, with their elder children, went to the Adelphi Theatre in the evening. The Prince and Princess visited the exhibition of the Society of British Artists in Suffolk-street on Wednesday. In the afternoon their Royal Highnesses reopened the Charing-cross Hospital, and visited the new wards which have been added to the institution. Prince Christian visited their Royal Highnesses at Marlborough House. The Prince dined with the Earl of Beaconsfield, at his residence in Whitehall-gardens, and was afterwards present at a concert given by the Earl and Countess of Dudley, at Dudley House. The Princess was unavoidably prevented from being present at the concert at Dudley House.

The Prince and Princess will leave Marlborough House today (Saturday) for a cruise in the Mediterranean, in the Royal yacht Osborne, during which the Prince will visit the Duke and Duchess of Edinburgh at Malta, and the Princess will visit the King and Queen of the Hellenes at Athens. Their Royal Highnesses are expected to be absent about six weeks.

The Prince is appointed Captain of the Royal Naval Reserve Forces.

The Duke and Duchess of Edinburgh have returned to Malta from Palermo.

The Duke of Connaught dined with Lodge XII. on Thursday week in the Freemasons' Hall, Molesworth-street, Dublin. His Royal Highness was present at the annual ball in celebration of St. Patrick's Day, given by the Lord Lieutenant of Ireland and the Duchess of Marlborough, in St. Patrick's Hall, Dublin Castle. The Duke was present on Monday night at a ball in the Dublin Exhibition Palace given by Mrs. Henry Roe, and on Tuesday at the farewell ball given in the Exhibition Palace by the Inniskilling Dragoons previous to their departure from Dublin.

Prince Leopold has been elected Eminent Preceptor for the ensuing year of the Cour de Lion Preceptory of Knights Templar, Oxford.

Prince Christian was present on Monday at a meeting of the committee of management of the National School for Music.

The Duke of Cambridge is recovering from his recent relapse of gout.

The Duchess of Teck is so far recovered from her bronchial attack as to be able to take drives.

Marriages are arranged between the Hon. Archer Turnour, third son of Earl Winterton, and Miss Bryant, daughter of the late Mr. John Henry Bryant; and between Mr. Albert Grey, only son of the late Hon. General Grey, and his presumptive of Earl Grey, and Miss Holford, daughter of Mr. K. S. Holford, of Dorchester House, Park-lane.

GENERAL IGNATIEFF.

General Ignatieff, accompanied by Madame Ignatieff and attended by Prince Tzeretew, Second Secretary of the Russian Embassy at Constantinople, arrived at Claridge's Hotel yesterday week from Paris. The General and Madame Ignatieff dined with his Excellency Count Schouvaloff at the Russian Embassy. His Excellency and Madame Ignatieff were received by the Prince and Princess of Wales on Saturday, at Marlborough House, and afterwards proceeded to Hatfield House, on a visit to the Secretary of State for India and the Marchioness of Salisbury, returning to town on Tuesday; after which the General and Madame Ignatieff travelled by special train to Windsor, and were received by the Queen at the castle, returning to town in the afternoon, when they returned to

Hatfield House, where, as on the occasion of the previous visit, a large and distinguished company were assembled. His Excellency and Madame Ignatieff returned to London on Wednesday, when the General had an interview with the Earl of Derby at the Foreign Office. His Excellency and Madame Ignatieff dined with the Earl of Beaconsfield, at his residence in Whitehall-gardens, the Prince of Wales being present. The General and Madame Ignatieff left town on Thursday for Dover, en route for Paris and Vienna. His Excellency, with Madame Ignatieff, paid various private visits and numerous visitors called upon them at Claridge's Hotel during their stay.

RECENT DOINGS IN DUBLIN.

The Lord Lieutenant of Ireland visited the exhibition of the Irish Amateur Drawing Society on the 13th inst. His Grace bought a clever production of Sir J. Coghill's, entitled "Pigeons and Rooks." Next day the Duke of Connaught visited the gallery, and expressed a warm interest in the laudable work of the society.

On Thursday, the 15th inst., the Lord Lieutenant distributed the prizes to the successful pupils in the School of Art attached to the Royal Dublin Society. The Duchess of Marlborough and other ladies of his family were present. The report on the working of the schools for the past year by Mr. E. Lyne, the Head Master, showed that in the national competition at London the students had obtained one gold medal, besides two silver and three bronze medals, and one Queen's prize; in the competition for prizes of the highest or third grade thirty students obtained thirty-nine awards, while sixty-two males and fifty-eight females, fourteen of the former and ten of the latter being classed as "excellent," passed in the second grade examination. The gold medal this year was won by Miss M. Irwin.

His Excellency, accompanied by the Earl of Portarlington, visited the National Gallery, on the same day, where he was received by Mr. H. E. Doyle, R.H.A., the director, and spent a considerable time in examining the chief works in the various sections of the collection.

The Duke and Duchess of Marlborough gave the annual full-dress ball in celebration of St. Patrick's Day yesterday week. Their Graces entered St. Patrick's Hall, shortly after ten o'clock, accompanied by Lord and Lady Randolph Churchill, the Marquis and Marchioness of Ormonde, the Marquis and Marchioness of Headfort and Lady Adeline Tylour, Mr. Gustavus, Lady Fanny, and the Misses Lambart. The Duke of Connaught was present.

Last Saturday being St. Patrick's Day, the time-honoured custom of trooping the Queen's colours on the Esplanade, near the Royal Barracks, took place. After the ceremony of trooping the guard proceeded to the upper Castle yard, headed by their regimental band, which, during the relief of the old guard and for some time after, played a selection of national airs. The Lord Lieutenant was present at the castle on the occasion, and, with the members of his Excellency's family, appeared on the balcony, accompanied by the Duke of Connaught, the Lord Mayor and Lady Mayoress, the Marquis and Marchioness of Ormonde, and the Marquis of Headfort. The Duchess of Marlborough and her daughters were dressed in green, and the Lord Lieutenant and his suite wore large shamrocks on their breasts, a compliment to the national custom, which was highly appreciated. The Duke of Connaught wore such a large bunch of the national emblem that he was hailed by the crowd as "a real Paddy," and vociferously cheered. The greatest good-humour prevailed.

The citizens and corporation of Dublin resolved on Monday to adopt the Free Libraries Act in that city.

The Duke of Connaught, the Duke and Duchess of Marlborough, Lord and Lady Randolph Churchill, and Lady Rosamond Churchill, were present on Monday night at a ball in the Dublin Exhibition Palace, given by Mrs. Henry Roe.

We are requested to notify that the council of the Royal Horticultural Society, in conformity with the alteration made in the bylaws at the annual meeting in February last, have suspended for the present year the payment of an entrance fee on the election of new Fellows; and that they have also adopted the principle of admitting members on the payment of one guinea annually, who will be entitled to admission to all shows and meetings of the society at South Kensington and Chiswick, the only exception being to the annual and special meetings.

Commander Dawson, R.N., writes to us stating that, owing to the insertion of his appeal for disused books for the use of merchant seamen on shipboard, 932 persons collected for the Missions to Seamen, during last year, 6570 disused bibles, 1012 testaments, 10,609 old prayer books, 17,993 hymn books, 12,610 books for ship's libraries, and 161,254 magazines and other periodicals. As these have all been issued to foreign-going merchant-vessels, he will be thankful to receive further supplies, which may be sent in hampers, boxes, or sacks, by rail, addressed to Commander W. Dawson, R.N., Missions to Seamen, Buckingham-street, Strand, London, W.C.

The weekly return of metropolitan pauperism shows that the total number of paupers at the end of last week (the second week of March) was 85,942, of whom 39,150 were in workhouses and 46,792 received outdoor relief. Compared with the corresponding weeks in 1876, 1875, and 1874, these figures show a decrease of 866, 13,018 and 21,600 respectively. The number of indoor paupers last week was 2235 more than in the corresponding week of last year, but there was a decrease of 3101 in the number of those who received outdoor relief. The number of vagrants relieved on the last day of the week was 545, of whom 383 were men, 130 women, and 32 children.

St. Patrick's Day was celebrated, last Saturday, in many ways in London. At Willis's Rooms Sir Michael Hicks-Beach presided at a dinner given in aid of the funds of the Benevolent Society of St. Patrick, a charity the annual expenses of which are about £2000. The company was numerous and influential, and the amount of the evening's subscriptions was £875. Amongst the speakers were the Marquis of Londonderry, the Earl of Courtown, Lord Inchiquin, and the Attorney-General for Ireland. The Home Rulers, under the presidency of Mr. Isaac Butt, M.P., dined together at the Cannon-street Hotel; and at the Surrey Gardens "a grand National demonstration" was held, in which some members of Parliament took part.

Among the candidates for the post of director of the Art-Museum about to be established in Dublin is Mr. Henry Parkinson, and a most influentially signed memorial in his favour has been presented within the past few days to his Grace the Lord President. This document bears the signatures of 200 noblemen and gentlemen, including those who take a leading part in science, art, and education in Ireland. It bears testimony in the strongest terms to Mr. Parkinson's fitness for the proposed office, owing to his official connection as secretary with the various exhibitions which have been held in Ireland. Mr. Parkinson, who is now the hon. secretary of the local committee in Dublin for the Paris Exhibition of 1878, has made himself personally acquainted with the management of most of the art-museums on the Continent. The post is an important one, and we hope that the best man may win.

The Coloured Supplement.

CROSS-COUNTRY COLOURS.

Notwithstanding all that has from time to time been said and written against steeplechasing as a hazardous amusement, it ranks, unquestionably, as one of the most popular of modern pastimes. Among the grave charges raised against this established national sport is cruelty towards the horse and danger to the rider. There can be no doubt that, in the enjoyment of a sport so congenial with the dauntless spirit of the amateur jockeys of the present day, "moving accidents by flood and field" cannot but be expected. It is, nevertheless, no small gratification to know that, amid the multiplicity and variety of the dangers to which riders in a steeplechase are often exposed, comparatively few instances can be adduced where any very serious mishap has been the result of their encounter. Instances have occurred wherein the life of rider and horse has been sacrificed; but, over a judiciously selected course, with fair hunting leaps, it seldom happens that any accident worthy of note occurs, particularly as the riders have the opportunity of making themselves acquainted with the various peculiarities of the ground. Many who denounce steeplechasing as a cruel exhibition, with not one feature to recommend it, are not equally severe against fox-hunting, in which they probably often take delight. Yet how constantly do we read of "a brilliant run, five-and-twenty miles as the crow flies, best pace throughout; all the nags were dreadfully distressed; two, indeed, died on the field; one dislocated a hip, and was ruined by the fall; three more also gave up the ghost before the end of the week; and Tom, the huntsman, fears his old brown horse, Forester, is not worth another day's work." Thus, on the one hand, a horse that breaks his neck or his back in going four miles over a fair steeplechase country, or a rider who dislocates his collar-bone, are certain to draw forth lamentations and no very charitable observations on this relic of foolhardiness and cruelty; while, on the other hand, a hunter who drops down and dies from sheer exhaustion in attempting to struggle through a run of many miles, racing pace, creates little, if any, sympathy. The steeplechase, like coursing, divides a season between the close of one year and the commencement of another. Its origin can be traced to an anxiety on the part of Meltonians to test the merits of their horses four miles across the country, a test which could rarely be satisfactorily proved in the hunting-field, owing, perhaps, to a blank day, or a short running fox. To carry out the above, a windmill or steeples was selected, and, with the understanding that no gates were to be opened, he who arrived first at the goal was declared the winner. For many years the above system was carried on, and match after match took place; after a time open sweepstakes were introduced, professional riders were allowed to contend for them, and the steeplechase became a national sport. Our Illustration gives a vivid description of the scene at a yawning brook, where three horses and men, "candidates for brooks," are put hors de combat. The rider of the chestnut being in a most perilous predicament, the "boy in yellow" rattles on, rushing at the water-jump, which, if he clears cleverly, and does not get entangled with the fallen horses, may still "win the day;" while the "red and purple," "white and blue cap," "blue and yellow sleeves," "brown and blue cap" jockeys are well in the race. He in the "red with white belt" is not out of the betting; while the rider in "blue and red sleeves" is mounted on an animal who has evidently a hydrophobic dread of water. To those who have the humanity to stop their horses when they find they cannot win, steeplechasing may be enjoyed without cruelty or danger; under any circumstances, however, the obstacles should only be such as a good hunter would take in the course of a run.

THE CLASSIC SITES OF ANCIENT GREECE.

ELEUSIS.

This place, celebrated in connection with the ancient religious mysteries, is distant only a drive of an hour and a half from Athens. The present road is supposed to go almost upon the same line as the old Sacred Way. After leaving the Pass of Daphne the traces of this Sacred Way can be seen, where it has been cut along upon the solid rock, close to the sea, and parallel to the present road. The Bay of Eleusis appears to be of a crescent form, into the hollow of which the Thriasian Plain projects. This is a large and fertile tract, the cultivation of which may have given origin to the rites of Ceres. The bit of ground between Eleusis and the sea, a space of about half a mile, is the soil where, according to tradition, corn was first cultivated. At the present day this cultivation is still going on, and men and women may be seen at work, the men ploughing with the primitive implement, made of wood, scarcely differing from the plough, to be seen all over the East. The plain is irrigated with the waters of the Eleusinian Kephissus, and the women may be seen letting the water flow by opening channels in the ditches. A ridge of rock extends into the plain from the west, terminating opposite the middle of the bay, and at this point the town stands. It is a small and unimportant village. The large temple, noted in former times as one of the largest in Greece, no longer exists; and almost the whole of the present village would require to be removed to find its foundation. There is a small Greek chapel, with a detached belfry, on the top of the rock seen in the Illustration, where was formerly the Acropolis. Beneath that point the ground is strewn about with large fragments of marble. This was the propylæa leading to the Temple. These blocks show that buildings of the Doric and Ionic orders stood here, and some of them are so late as the Roman period. Some of the sub-structures which have been exposed are also Roman. Portions of the old walls of the town can be seen among the houses of the village. The tower shown in the sketch, on an elevation of the ridge to the west, belongs to the Byzantine period.

MARATHON.

The battle of Marathon was fought on Sept. 23, 490 B.C. The Greeks lost only 192 men, who were buried on the field, and a mound was raised over them. This is the only thing remaining connected with the battle, except the landscape. The Bay of Marathon, with its deep blue water, where the Persians landed; the village of Marathon, which gave the name to the plain; and the village of Vraní, where the Temple of Hercules stood, and where there is now a small convent, are still to be viewed. Here is the gorge down which the Plataeans came, and the position which was occupied by the Greeks. All these places of immortal renown are pointed out to visitors. The plain is very level, and is cultivated. The mound does not seem to have been opened; a mud house or look-out station appears to have been made on the top, which makes the summit irregular. The mound is about 50 ft. or 60 ft. in diameter, and about 25 ft. high. The snowy peaks in the distance are in the island of Euboea, and the view here given of the mound is taken with the back to the Greek position in the famous battle.

ELEUSIS.

MARATHON.

"BREAKFAST." BY EDOUARD FRERE.

"BREAKFAST TIME."

A pleasing scene of the daily life of children in a cottager's family, not that of an English farm labourer, but of a French or Flemish peasant, is here depicted by M. Edouard Frère. That well-known artist has the gift of making a homely and rustic simplicity, in the subjects of this kind treated by him, agreeable to refined taste by his truthful expression of natural feelings, and by a tone of humane kindness, which reminds us of the poetry of Goldsmith. In the present instance, however, we might as well resort to Burns or Bloomfield for something appropriate to say upon a theme so common, though not at all vulgar, in the household experiences of humble rural folk. There is a touch of nature, indeed, that makes the whole world kin; and it is an affecting sight, anywhere, to see the little ones eating their plain food in a poor man's dwelling, if we think of all that is here implied, the love sweetening labour, and the mingled hopes, cares, and fears of a parent in that condition, who may sometime be hard put to it for the necessities of life. But we are assured that "their Father in Heaven knoweth that they have need of all these things," and we believe it is not His will "that one of these little ones should perish."

FOREIGN AND COLONIAL NEWS.

FRANCE.

Yesterday week the Chamber of Deputies was enlivened by a discussion of party politics. The occasion was the presentation of the report of the committee in favour of granting authority to the Government to prosecute M. Paul de Cassagnac for seditious articles against the Republic published in the *Pays*. The accused made a moderate speech, contending that he had not committed any offence, and denying that he had attacked the Government, which, he added, he should respect until 1880. He was replied to by M. Simon, who argued that an offence against the common law—namely, inciting to civil war—had been committed; and the Chamber, by 296 votes to 197, granted the Government authority to prosecute. An amendment which would have deferred the case to the jurisdiction of the assize court and a jury, instead of the Correctional Police, was negatived by another division of 309 to 181.

After this exciting sitting, the Chambers had dull meetings on Saturday. In the Senate M. Chesnelong questioned the Government respecting the suspension of the Mayor of Orthez, a step which, he asserted, was a violation of the rights of the Roman Catholic population of the place. M. Simon, however, contended that the Mayor himself was wholly in the wrong. The Government, he said, did not question the right of public functionaries to join processions as private persons; but in this case the promoters of a demonstration had, in spite of the sub-Prefect, carried out their own wishes, and they had been officially supported by the Mayor, who, having acted in violation of his duty, had been suspended. The Lower House on Saturday adopted the bill suppressing the tax on soap, and proceeded with the discussion on the railway project, which was again adjourned. In Monday's sitting of the Chamber of Deputies Committee on the question of military service M. Thiers spoke in favour of the re-establishment of the system of substitutes, and, if that should be impossible, he asked that volunteers should serve two years. The majority of the Committee appear to be in favour of the latter proposal. On Tuesday the Committee on the motion to prosecute persons taking part in the Bonapartist movement of Dec. 2 presented a report adverse to the prosecution.

A Government bill establishing a new customs tariff has been distributed among the members of the Chamber of Deputies. The preamble states that the measure is intended to replace that in force, which is no longer in harmony with the true requirements of commerce. It adds that the time has come for giving up old ideas of isolation, antagonism, and reprisal, and for acting in accordance with the necessities of the home supply and the extension of the export market. The new tariff will therefore be mainly based upon the principles of the commercial treaties.

The Tribunal of the Seine has given judgment in favour of the heirs of M. de Montalembert in the action brought against M. Loyson (Father Hyacinthe) for the publication of the work "Spain and Liberty."

ITALY.

The discussion on the Government proposal for an extraordinary grant of 15,000,000 lire for military purposes was begun in the Chamber of Deputies on Monday.

The Pope held a Consistory on Tuesday morning, at which he performed the ceremony of closing and opening the mouths of seven of the new Cardinals at present in Rome. He is said to have repeated in still more severe terms all the assertions contained in the Allocution of the 12th, already published. He declared that he would protest, in face of the whole world, against the manner in which the Italian Government would limit even the liberty of his word and his Apostolate.

Signor Mancini, Minister for Public Worship, has addressed a circular on the subject of the Pope's recently delivered Allocution. In it he alludes to the bad impression which has been created by the violent language used by the Pope against the Italian laws, the national institutions, and the King.

SPAIN.

King Alfonso left Ceuta on Tuesday night for Cadiz, where he arrived the next day. Three of the members of the Cabinet and Mr. Layard, the British Minister to Spain, received his Majesty on landing.

HOLLAND.

On Wednesday the Second Chamber unanimously adopted the bill establishing in the Dutch Indies a gold standard, together with the silver standard.

GERMANY.

On Thursday the Emperor William completed the eightieth year of his age, and the auspicious event was celebrated with the conventional signs of rejoicing in various parts of the Fatherland. The Kings of Bavaria and Wurtemberg sent Princes of their Royal Houses as special envoys to carry their congratulations; and the other Sovereign Princes arrived at Berlin to express their good wishes, and to present him in the name of all the German Princes with a great picture representing the proclamation of the German Empire when his Majesty assumed the Imperial title at Versailles on Jan. 18, 1871.

Prince Bismarck has received from the Emperor the appointment of Hereditary Chief Ranger of the Duchy of Pomerania. The Emperor has accepted the resignation of General von Storch, the chief of the German Admiralty.

In the German Parliament on Saturday last a bill was read the first time empowering the Emperor to decree laws for Alsace-Lorraine, with the consent of the Federal Council, but without that of the German Parliament, provided the Provincial Committee of the province agree to such laws. Two of the Alsace-Lorraine deputies supported the measure, and two opposed it. The latter complained of the composition of the Provincial Committee, which, they said, could never really represent the province until elected directly by the people. On Tuesday the House passed the second reading of the bill. The Government bill fixing Leipzig as the seat of the Supreme Court of Justice was passed on Wednesday.

AUSTRO-HUNGARY.

Yesterday week the Government brought forward in the Lower House of the Austrian Reichsrath a bill relative to the election of the deputation of the Reichsrath to be charged to negotiate the proportion of expenses to be borne by Austria and Hungary respectively in affairs concerning the whole monarchy. On Tuesday the House voted the supplementary money grants demanded by the Minister of Commerce and Agriculture and the Minister of Justice to cover the deficit arising from the execution of certain projects in connection with their Ministries, and to obtain the requisite means for the purchase or subvention of some railway lines by the State. The Minister of Finance was authorised to issue 6,875,000 fl. in gold rentes.

The Constitutional party held a meeting at Vienna on Sunday, at which, after a long discussion, Herr Sturm's proposal for a modification of the laws relating to the delegations was rejected by 102 votes against 158.

DENMARK.

A joint committee of both Chambers of the Danish Rigsdag was elected, on Tuesday, to discuss the Budget. Count Frijs von Friesenborg, a former Minister, was appointed reporter, and M. Dinisen secretary of the committee, which is composed of sixteen members of the Right and fourteen of the Left.

At the instance of the Danish manufacturers and tradespeople, the Finance Committee of the Folkething has resolved to propose a grant of 125,000 crowns to defray the expenses of Denmark's participation in the Paris Exhibition.

AMERICA.

It was determined at the sitting of the Washington Cabinet, on Wednesday, to summon an extra session of Congress for June 4; also to send a commission of prominent public men to Louisiana before taking final action in regard to the conflict existing in that State.

A petition has been presented to the District Court of New Orleans by Mr. Nicholls, the Democratic Governor, for a writ of ejectment against Mr. Packard and the other persons holding the State House. Recruits are being enrolled by Mr. Packard for the defence of the building, which is surrounded by large crowds of negroes. Mr. Nicholls has arrested the officers engaged in enrolling recruits.

Mr. James Donald Cameron, Republican, has been elected senator for Pennsylvania, succeeding his father.

New Hampshire has returned one Democratic and two Republican candidates to Congress.

President Hayes's appointment of Mr. Frederick Douglas, a coloured man, as Marshal of the District of Columbia, was confirmed on Saturday by the Senate.

Every exertion is being made by the French Minister at Washington to secure the participation of the United States in the Paris Exhibition of 1878.

Intelligence has been received from San Francisco stating that a gang of white men had attacked six Chinamen, five of whom they killed.

Twelve persons have been killed and others injured by the bursting of a boiler at a saw-mill at Worthington, Indiana.

CANADA.

Lord Dufferin met with an accident while walking on Wednesday week at Ottawa. His Lordship slipped and fell on the pavement, breaking a rib and straining one of his ankles. No serious results are anticipated, however.

On Tuesday the Dominion Senate, by 38 votes against 23, adopted a resolution, moved by Mr. Campbell, thanking the Imperial Government for refusing the request of the Dominion Government for the appointment of six more senators.

By a majority of 31 the Lower House, on Saturday last, negatived a motion for granting increased protection to Canadian products. The Minister of Marine announced, on Tuesday, that Canada had appointed Mr. Galt Fishery Commissioner under the Treaty of Washington. The name of the United States Commissioner had not been communicated to the Dominion Government, and the appointment of the third Commissioner had not yet been announced.

AUSTRALIA.

Having sustained a defeat in the Legislative Assembly, the Ministry of New South Wales has resigned.

The death of the Roman Catholic Bishop of Sydney was announced on the 16th inst.

THE CAPE COLONIES.

We have news from South Africa, by way of Madeira, to Feb. 27. The Transvaal Volksraad was opened on the 13th. The terms of peace with Secocoeni were approved. President Burgers, in his opening speech, advocated union with Great Britain. Peace was concluded with Secocoeni on Feb. 5, the treaty being signed by his delegates. The forts will not be evacuated, however, until the conditions of the treaty are ratified by Secocoeni. They are, in general terms, as follow:—

Secocoeni, as a subject of the State, submits to the country's laws, and will obey all the decrees of the Government regarding him and his people. He also pays 2000 cattle as a war indemnity. Lulu Mountain and a strip of land on each side of it are granted to him to live on with his tribe. Commander Ferreira, with a strong police force, is to be stationed in Secocoeni's town as Resident Commissioner.

The troop-ship *Crocodile* has arrived at Spithead with the 55th Regiment from India.

It is proposed to establish a new "Imperial College" at Simla for the daughters of high-grade Europeans in India. It is to be a memorial of the Delhi assemblage, and ostensibly a free gift to the English from the Indian Princes there assembled. The sum of five lakhs is being collected from them at present for this purpose.

The Postmaster-General gives notice that the financial condition of the colony of St. Helena is such as to require that the rate of postage on letters between the United Kingdom and that colony should be raised to the amount at which it stood previous to the reduction which took place in July last. Consequently, from April 1 next, the postage upon prepaid letters for St. Helena, when sent by mail-packet, will be increased to one shilling the half-ounce. Unpaid and insufficiently-paid letters will be charged one shilling each, in addition to the deficient postage.

The *Honolulu Gazette* of Feb. 28 reports an extraordinary volcanic outbreak in Kealakeakana Bay, near the entrance to the harbour. The eruption occurred on the 24th, appearing like numerous red, blue, and green lights. In the afternoon the water was in a state of great activity, boiling and broken, and heaving up blocks of red-hot lava. A severe shock of an earthquake was felt by the residents of Kannakakiel during the night of the eruption.

Mr. Thomas Edward, the Banff naturalist, was presented with a public testimonial at Aberdeen on Wednesday last. The presentation consisted of 333 sovereigns, which were enclosed in a neat olive-wood casket. Lord Provost Jamieson presided, and the gift was presented by Dean of Guild Walker.

THE CHURCH.

PREFERMENTS AND APPOINTMENTS.

Babbington, Basil Blogg, to be Vicar of Westwood, Wilts.
Burland, M. B. H., Rector of Stanton-with-Snowhill.
Candy, Herbert, Curate of Hythe, Southampton.
Carey, A. H., Vicar of Abington.
Clementson, William, Vicar of Womenswold.
Copenman, A. C., Honorary Canon of Norwich Cathedral.
Cree, Edward David, Vicar of Benenden, Kent.
Darby, G. E., Vicar of Billericay.
Druce, G. W., Chaplain of Ipswich Borough Gaol.
Edge, William John, Vicar of Holy Trinity, Upper Tooting.
George, P. E., Vicar of St. John the Baptist, Bathwick.
Gibson, Edward P., Rector of Harford, Stock-cum-Ramsden, Bellhouse.
Greenham, Frederick John, Perpetual Curate of Holy Trinity, Halstead.
Harvey, Gilmour, Vicar of Maughold.
Hick, John St. Clare, Perpetual Curate of Nether Witton.
Kermode, William, Rector of Ballaugh.
Legge, Augustus, Honorary Canon of Rochester Cathedral.
Le Maistre, William Brine, Rector of St. Peter's, Jersey.
Maddison, George, Archdeacon of Salop.
Revelley, R., Vicar of Moreton, Valence.
Robinson, Charles J., Rector of West Hackney.
Rudd, T., Rector of Hetton-le-Hole, near Durham.
Smith, Sidney Lidderdale, Canon of Hereford Cathedral.
Scott, M. H., Prebendary of Bobenhall in Lichfield Cathedral.
Smith, T. J., Perpetual Curate of St. Michael and All Angels, Howe Bridge.
Stephens, Alfred, Vicar of Tongue with Brightmet.
Webb, John Cadman, Perpetual Curate of St. Andrew's, Livesey.
White, Henry Gratton, Vicar of Kirk-Santon.
Wrenford, William Henry, Vicar of St. Nicholas, Devon.—*Guardian*.

Four stained-glass windows, by Heaton, Butler, and Bayne, have recently been placed in the chancel of St. Bartholomew, Haslemere, by Mr. J. Stewart Hodgson, of Lythe-hill. The east window was given a few years ago by the same gentleman.

The New Testament Company of Revisers assembled on Tuesday, at The Deanery, Westminster, for their sixty-eighth session—the Bishop of Gloucester and Bristol presiding; and the Company proceeded with the revision of the seventh chapter of Revelations.

Leominster Priory Church, undergoing restoration by Sir G. G. Scott, Bart., R.A., is making such satisfactory progress that the committee hope to complete the south nave for re-opening in August or September next. Additional funds are urgently needed for the completion of the remaining portion of the works.

During the past week Sir Gilbert Scott made a thorough examination of the west front of Lichfield Cathedral, with the view to its restoration. The mouldings and masonry were found to be so much broken, and the chief of the most beautiful work destroyed, that it is thought the whole of the front will have to be renewed. The Consistory Court is undergoing restoration.

The Governors of Queen Anne's Bounty Corporation, at the annual meeting held on Wednesday at their office, Dean's-yard, Westminster, distributed the surplus income of the year 1876 in grants to meet benefactions for the benefit of poor benefices. The number of benefices augmented was 132. The benefactions in money and real estate amounted to £34,021, and the sum granted to £25,450, together forming the additional capital sum of £59,471.

The new church of St. George, Oldham-road, Manchester, which has been in course of erection for the last four years, from designs of Mr. Henry Lord, was consecrated on the 16th inst. It has been built to replace the old church of St. George, which was sold to the Lancashire and Yorkshire Railway Company for £5000. The total cost, including site £4000, church £6400, and parsonage £1600, is estimated at £12,000, of which £10,569 has been raised. Accommodation has been provided for 600 persons. The Bishop preached from Phil. iv. 4, 5, on the dangers and encouragements of the present crisis, urging the necessity of cultivating the spirit of mutual forbearance, unity, and love.

A mural tablet has been placed in Castle-Donington parish church, near Derby, by Miss Henry and Mrs. Jane Mary Macnabb, to the memory of the late Lady Flora Elizabeth Hastings, Lady of the Bedchamber to the late revered Duchess of Kent, in whose service she died, in Buckingham Palace, July 5, 1839, in her thirty-fourth year. The tablet is oval—a wreath of passion-flowers crowned by seven stars, in high relief, white marble, with a dove border. It is also to the memory of her last surviving sister, Lady Selina Constance Henry, who died in 1867. A handsome lectern has recently been presented to the same church by Mrs. Macnabb in memory of Lady Flora's parents—Francis, first Marquis of Hastings and Flora Mure Campbell, Countess of Loudoun. The lectern, has their medallions in marble, and is of oak, carved with the lotus, thistle, rose, shamrock, and heraldic rose.

The usual monthly meeting of the Incorporated Society for Promoting the Enlargement, Building, and Repairing of Churches and Chapels was held on Monday, at the society's house, 7, Whitehall, S.W.—the Earl of Powis in the chair. Grants of money were made in aid of the following objects, viz.:—Building new churches at Ford, near Folkestone, and The Tything, near Worcester; rebuilding the church at Little Leigh, near Northwich; and towards enlarging or otherwise improving the accommodation in the churches at Brightlingsea, near Colchester; Collingbourne Ducis, near Marlborough; Forest Gate, Emmanuel, near Stratford, Essex; and Newton Bromswold, near Higham Ferrers. Under urgent circumstances, the grant formerly made towards re-seating and restoring the Church of St. Petrock, Bodmin, Cornwall, was increased.—The Archbishop of Canterbury has appointed Friday, May 4, as the day when the annual general court of the Incorporated Church-Building Society is to be held, at which his Grace will preside.

THE UNIVERSITIES AND PUBLIC SCHOOLS.

OXFORD.

The Jenkins' Exhibition at Balliol College (worth £100 a year, and tenable for four years) has been divided between T. T. Massingham (open exhibitor of Balliol) and C. E. Vaughan (scholar of Balliol). The examiners have awarded a prize of £50 to A. T. Ashton (scholar of Balliol). This exhibition was founded by money left by the late Master of Balliol, Dr. Jenkins.

The Hall and Hall Houghton prizes for proficiency in the study of the Greek Testament and of the Septuagint and Syriac versions of the Holy Scriptures have been awarded as follows:—To the Senior Greek Testament prize, H. E. Clayton, B.A., of Brasenose; proxime accessit, G. C. Blaxland, B.A., Pembroke. To the junior Greek Testament prize, H. Sands, Oriel College; proxime accessit, C. H. Fox, Hertford. To the senior Septuagint prize, A. T. Miller, B.A., Exeter College. To the junior Septuagint, T. T. Walker, Queen's; proxime accessit, A. W. Oxford, B.A., Christ Church. To the Syriac prize, G. H. B. Wright, Queen's.

CAMBRIDGE.

The class-list of the Classical Tripos examination has been issued, but we must reserve its publication till next week.

Mr. Frederick Brian de M. Gibbons, B.A., scholar of the college and second wrangler 1877, has been elected to a Fellowship at Gonville and Caius College.

The first Bell Scholarship has been awarded to G. M. Edwards, scholar of Trinity; the second to E. O. Perry, scholar of King's. The Abbott Scholarship has been awarded to R. St. John Parry, scholar of Trinity.

The prize given annually by the representatives of the University in Parliament for the best English essay on some subject connected with British history or literature has been awarded to Mr. Percival Maitland Lawrence, B.A., of Corpus Christi College. The subject given out was "Anthony, first Earl of Shaftesbury."

The open scholarships at St. Peter's have been awarded as under:—J. Eccles, Royal Academical Institution, Belfast, a mathematical scholarship of £80 per annum; F. W. Jones, Perse Grammar School, Cambridge, a classical scholarship of £60 per annum; G. F. Mathews, King's College, London, mathematical scholarship of £80 per annum; W. New, Dulwich College, classical scholarship of £60 per annum.

At Jesus open scholarships have been adjudged as under:—Mathematical: H. Cox, Tunbridge School, £50; A. J. Canter, Aldenham School, £40; W. E. Chadwell, Owens College, Manchester, £30 exhibition; F. Attewell, Warrington Grammar School, £30 exhibition. Classical: R. H. Banton, Oundle School, £50; A. Ivatt, Shrewsbury School, Rustat Scholarship; L. J. Jones, Durham School, and W. Street, Durham School (equal), Rustat Scholarship.

ST. ANDREW'S.

Dean Stanley, Lord Rector of this University, gave a valedictory address to the students in the Old Parliamentary Hall yesterday week, the subject of his discourse being the religious difficulties of the day, the danger arising to religion from the apparently increasing divergence between the intelligence and faith of our time, which he designated "the rock ahead." Principal Tulloch, vice-chairman of the University, presided.—Last Saturday the Dean held a reception of the students in the Old Parliament Hall, and on Sunday preached in the college and parish churches to large congregations.

Mr. W. K. Hilton, of Corpus Christi College, Oxford, has been appointed Registrar of the University of Durham and Bursar of University College.

Mr. Edward R. Taylor, Master of Lincoln School, has been elected Head Master of the Birmingham School of Art. Under the new scheme—aided by an anonymous donor, who gives £10,000 to the school—the salary of the Head Master is fixed at £600 a year.

The new buildings of Dover College, the foundation-stone of which was laid in June last by Earl Granville, are completed. They consist of a new house for the Head Master, with separate bed-rooms for fifty boys, and a class-room for sixty boys. The number of pupils has grown from fifteen to 117 in less than six years.

METROPOLITAN NEWS.

The sixth annual drawing of the Printers' Art-Union takes place at the Cannon-street Hotel to-day (Saturday).

A table cloak, the property of a foreign lady of title, was sold at Debenham and Storr's, on Tuesday, for 460 guineas.

We are requested to state that the armoury and regalia at the Tower of London will be closed from the 26th to the 30th inst., inclusive.

The twenty-fourth annual exhibition of pictures by artists of the Continental schools at the French Gallery, Pall-mall, will be opened next Monday.

Mr. John Wood has been offered and has accepted the professorship of clinical surgery at King's College Hospital, vacant by the death of Sir W. Ferguson.

On Tuesday evening the twelfth annual gathering of the master and workmen butchers of London took place at the Metropolitan Tabernacle. About 2000 butchers were present.

About £3000 has been received at the Mansion House towards the fund being raised for the relief of the widows and orphans of the crews who were lately lost in the North Sea.

The anniversary festival of the Highland Society of London was celebrated, on Wednesday evening, at the Freemasons' Tavern, the guests numbering about seventy.

The Charing-cross Hospital, which has been remodelled and greatly enlarged, was on Wednesday reopened by the Prince of Wales, who was accompanied by the Princess. An illustration of the ceremony will be given next week.

The first exhibition of spring flowers at the Royal Botanic Gardens this season was held on Wednesday; and on the same day the third show this season at the Royal Horticultural Society's Gardens took place.

Sir Charles Reed presided over the weekly meeting of the School Board for London on Wednesday, at which a report from the by-laws committee and the new education code were the principal subjects of discussion.

Count Van Bylandt, the Netherlands Minister, presided on Wednesday evening at the annual festival of the Friends of Foreigners in Distress, at which subscriptions amounting to upwards of £3000 were announced.

It is announced by the *City Press* that the Alexandra Palace has been leased for twenty-one years to Messrs. Bertram and Roberts, and it is understood that it will be reopened the first week in May.

A deputation of tailors pressed upon the attention of the Home Secretary, yesterday week, that disease is spread by cloth being given out from clothiers' establishments to be made into garments in houses where infectious disorders prevail.

Mr. T. Letts, of Queen Victoria-street, has published, very appropriately, a new "Boat-Race Map of the Thames." It is on the scale of six inches to the mile, and has been copied from the recent Ordnance plans of Middlesex and Surrey.

The twenty-fourth anniversary festival of the London Association of Foremen Engineers and Draughtsmen was held at the City Terminus Hotel, last Saturday evening—Mr. Semuda, M.P., in the chair.

The proprietors of the Bank of England have unanimously resolved to present to the nation their collection of gold and silver coins, which has been for some years past in custody of the trustees of the British Museum. The value of this gift is estimated at £7000.

There were 26.5 hours of sunshine in London last week out of 81.9 hours during which the sun was above the horizon. On Sunday there was as much as 9.6 out of 11.5. On Friday the sun shone for 6.2 hours, and on Saturday for 5.2 hours. On Monday and Tuesday it did not shine at all.

At the annual meeting of the Corporation for Middle Class Schools, yesterday week, an encouraging account was given of the prosperity of the schools. Mr. Goosen, who presided, pleaded for increased means to pay off a debt and to improve the educational appliances. A movement is on foot among the City companies for establishing a technical college.

The President and Fellows of the Chemical Society dined together on Tuesday evening, at Willis's Rooms—Professor Abel presiding. Professors Huxley, Odling, Tyndall, and Williamson, and Mr. Bramwell, C.E., were amongst the speakers. Professor Huxley referred at some length to the influence of grants by Government upon the advancement of science.

The eight metropolitan volunteer regiments known as the "Grey Brigade" paraded last Saturday evening, under the command of Lord Abinger, and marched through the principal streets of the West-End. One of the most interesting features was the fact that the Lady Mayoress, with her two sisters, rode at the head of the column through a great portion of the route, under the escort of Lord Abinger and his staff.

The total number of births registered in London last week was 2587; and there were 1800 deaths from all causes. Allowing for increase of population, the births exceeded by 40, and the deaths by 153, the average numbers in the corresponding week of the last ten years. The deaths included 100 from smallpox, 44 from measles, 15 from scarlet fever, 5 from diphtheria, 36 from whooping-cough, 21 from different forms of fever, and 10 from diarrhoea. Thus to the seven principal diseases of the zymotic class 231 deaths were referred, against numbers increasing steadily from 187 to 213 in the four preceding weeks. These 231 deaths exceeded by six the corrected average number from the same diseases in the corresponding week of the last ten years. The Registrar-General reports that the deaths from smallpox, which had been 84 and 96 in the two preceding weeks, further rose last week to 100: 42 were certified as unvaccinated, 30 as vaccinated, and 28 were "not stated" as to vaccination. The disease is still most fatally prevalent in East London, where the deaths were more numerous last week than in any previous week since the commencement of the epidemic. The deaths from fever were 15 below the corrected average number. The deaths referred to diseases of the respiratory organs and phthisis further rose to 687 last week, from 471, 524, and 678 in the three preceding weeks. In Greater London 3096 births and 2090 deaths were registered.

IRON AND STEEL INSTITUTE.

The eighth annual meeting of the Iron and Steel Institute was begun on Tuesday, at the Westminster Palace Hotel—Mr. W. Menelaus presiding. The report showed a considerable addition to the number of the members, there being 946 on the books in December last; and it stated that the council had awarded the Bessemer medal for this year to Dr. John Percy, of the Royal School of Mines. It was with deep regret the council had to announce the death of the late foreign secretary, Mr. David Forbes, in December last. Mainly through Mr. Forbes's exertions, the institute was at an early date placed in direct communication with all the leading Continental metallurgists. The chairman moved the adoption of the report, which was seconded by Mr. E. A. Cowper and carried unanimously. The scrutineers announced that all the gentlemen nominated as members had been elected. A vote of thanks to the president and council was then passed. Acknowledging this vote, the chairman observed that the institution was progressing most satisfactorily and making great strides, and he was enabled to say that the events of the past year had been most satisfactory.

On Wednesday Mr. Menelaus vacated the office of president, which was taken by Dr. C. W. Siemens, who delivered his opening address. In this he advocated the establishing, in provincial centres, of institutions like the School of Mines, in order that the metallurgists of Great Britain might be afforded equal opportunities with those of the Continent of obtaining a technical education. Another chief subject of his address was the progress being made in economical processes in the application of fuel.

Several papers were read on Thursday.

Next year's meeting is to be held at Newcastle-on-Tyne.

ROYAL NATIONAL LIFE-BOAT INSTITUTION.

The annual meeting of the patrons and supporters of this institute was held, on the 15th inst., at Willis's Rooms, under the presidency of the Duke of Northumberland. In opening the proceedings his Grace said a few words in respect of an institution which commanded such universal respect and had received such generous assistance from the public. It was very natural that such should be the case, considering how closely the prosperity, the wealth, and the safety of the country were connected with our seafaring population. The last year had been one of great calamity at sea. Gales had been more frequent and more violent than had been the case for many years past, and in the result the loss of vessels and the loss of lives which had been beyond the reach of any human assistance had been greater than any previous period on record. During the past year there had been two instances of loss of life in manning the boats, arising partly from backwardness and partly from negligence of the men in not putting on their life-belts. His Grace alluded to the recent sad loss of the North Sea fishing fleet and the crews as an evidence of the uncertainty of life attendant on a sailor's existence, and forcibly urged the claims of the Royal National Life-Boat Institution to the support of the public.

Mr. R. Lewis, secretary of the institution, read the report, which stated that, during the past twelve months, twelve new life-boats had been or were about to be placed on the coasts of the United Kingdom, and that the committee were prepared to station others wherever there was a probability of their being useful. During the past year the institution's life-boats had saved 515 persons, besides assisting to rescue nineteen vessels from destruction. For those services, and for saving eighty-five lives by fishing-boats and other means, one gold medal, eight silver medals, eighteen votes of thanks inscribed on vellum, and £2814 had been granted by the institution. The number of lives saved from the establishment of the institution to the end of the year 1876, either by its life-boats or by special exertions for which it has granted rewards, is 24,369. For those services the institution had voted ninety-two gold and 878 silver medals, besides pecuniary rewards to the amount of £51,600. The total amount of the donations, subscriptions, and dividends received last year had been £33,801, and of that sum £6216 was the result of special gifts to defray the cost of eleven life-boats. The expenditure had amounted to £36,793.

The report was adopted, and resolutions in furtherance of the objects of the institution were passed.

Admirals Sir R. Collinson, Sir G. Sartorius, Sir W. Tarleton; Lord Erne, Sir E. Perrott, Bart., and Mr. MacGregor were among the speakers.

The Victoria (Australia) Shipwreck and Humane Society have presented Mr. Lewis, the secretary of the National Life-Boat Institution, their silver medal, "as a slight recognition of the many valuable services rendered by him in the cause of humanity." It may be mentioned that Mr. Lewis had previously received French, Austrian, and Belgian decorations in addition to a special and magnificent present from the Grand Duchess Czarévna, patroness of the Russian Life-Boat Society, in acknowledgment of his long services and writings on behalf of the life-boat cause.

NATIONAL SPORTS.

After a specially dreary recess the sound of the Lincoln saddling-bell was eagerly welcomed by all classes of turfites, and the "special" from London to the fen county on Monday morning was very heavily laden. Since last season considerable further improvements have been made in the course, which has been made wider, both at the starting-post for the straight mile and at the junction of the old and new courses; so that Mr. M'George had plenty of room to get even the largest fields off on equitable terms. Slight odds were laid on F. Archer in the Trial Stakes, the first flat race of the season, and he gained several lengths by hugging the rails closely, while all the rest ran wide; but age does not appear to have given little Brigg Boy increased stamina, and it was once more apparent that a mile is too far for him, as he stood still within the distance, and Winifred caught and beat him easily. Cannon Ball, who was a fair but unlucky colt last season, was made favourite for the Bathynary Stakes, which he won easily; and Archer was again second for the Tathwell Plate, the first two-year-old event of the season, which fell to Sir Frederick Johnstone's Bena. The card on Tuesday was not a particularly strong one; and we need only refer to the Brocklesby Stakes, for which a field of ten assembled at the post. Matthew Dawson supplied the favourite in Fair Penitent, a smart, speedy-looking filly, by Julius—Repentance. She was by far the most forward of the party, and nothing else was backed with much spirit, except a filly by Blair Athol—Little Agnes, who carried Count Fesetic's colours. The favourite got well away and led to the distance, where she was done with; and after a great race home, Bishop Burton, Fiddlestring, and a filly by Knowsley—Bab-at-the-Bowster finished in the order named, only a head and a neck separating them. The winner is a roan son of Strathconan, and is the property of Mr. Bush, whose bad luck on the turf has become almost proverbial; but we trust that this victory is the precursor of many others. The Bab-at-the-Bowster filly was unquestionably the best-looking of the party.

On Wednesday the only event of importance, except the great race, was the Lincoln Club Cup, in which Fiddlestring confirmed the truth of the running in the Brocklesby Stakes by securing an easy victory; and Mr. Jennings was certainly lucky to pick up a fairly smart youngster for only 20 gs., which was the price he gave for him as a yearling at the sale of Mr. Smith's stud. There were no less than thirty-two runners for the Lincolnshire Handicap, a number that has only once been exceeded, when Tomahawk beat thirty-four opponents. Bruce (7 st. 2 lb.) was unquestionably the most admired of all the competitors, and, in spite of his weight, which seemed to make his chance hopeless, he had a host of staunch supporters, and there were numerous regrets expressed that such a grand-looking three-year-old should have been omitted from the nominations for the Derby. Petrarch (8 st. 13 lb.) did not join the others until they had been at the post some little time; but the fears that had been entertained of his showing temper proved quite unfounded, as he was perfectly quiet and well-behaved. He was never really dangerous in the race, in which the favourite, Touchet (6 st. 6 lb.), and Bruce ran very well until close home, when the weight told upon them, and they were passed by Footstep (7 st. 2 lb.), Pouraivant (7 st. 13 lb.), and Lord Lincoln (6 st. 12 lb.), who finished in the order named, Lord Wilton's mare winning a fine race by a neck. Lord Lincoln was four lengths off, and, probably, only obtained his position on sufferance; but Bruce did so well that he must have an immense chance for the City and Suburban, in which he has less weight to carry.

The University crews have done some good regular work during the week preparatory to the race of to-day. Last Saturday Cambridge got aloft shortly before ten a.m., and, having paddled up as far as Chiswick, turned and rowed down to the Aqueduct, accomplishing the distance in 12 min. 44 sec. They started rowing at 35 and finished at 36 strokes. Oxford rowed the whole course in the afternoon in 20 min. 55 sec. They were picked up at Hammersmith Bridge by a scratch crew, stroked by Mr. Goldie, C.U.B.C., but, by the time the top of Chiswick Eyot was reached, the latter had found their want of condition tell against them, and were half a length astern of the Oxonians. On Monday morning Cambridge had a steady pull as far as the Grass Wharf, and came back in a couple of sharp bursts, rowing 40 to the minute at the finish. In the afternoon, starting from a skiff at 36 to the minute, they rowed the whole distance in 19 min. 57 sec., there being a marked improvement in the rowing, especially between the Crabtree and Hammersmith, where the wind might have been expected to bother them. After this the crew walked home. Oxford did a good piece of work in the morning; and then, getting aloft again in the afternoon, about 4.30, rowed as far as Chiswick and then turned, having a sharp spin both ways with a scratch eight, stroked by Mr. Hastie, Thames Rowing Club. On Tuesday Cambridge had a spin with another London crew, of which Mr. F. S. Gulston was stroke. The Cantabs had slightly the best of it at starting, and very soon forged still further ahead; while Oxford rowed on as far as Barnes, encountering some very dirty weather by the way. In the afternoon things looked even worse, and but little work was done. Cambridge went as far as Hammersmith on the flood in the midst of a snow-storm, and, turning, rowed hard down against the tide, being pretty well drenched when they had completed their work. Oxford had a sharp spin between Putney and Wandsworth and back again, finishing strong and well together. On Wednesday Oxford were out first, and, having paddled up as far as Barker's rails, with Mr. Darbishire, as usual, in attendance, they turned and drifted to the Ship at Mortlake. Starting thence at 36, they passed Barnes Bridge in 3 min. 5 sec., and in spite of the rough water reached Chiswick Church in 8 min. 5 sec., rowing smart and clean through the rough water they encountered. Not long after this, No. 4's slide getting out of order and refusing to act properly, the boat stopped while matters were set straight; and, then paddling to Hammersmith Bridge, they reached the Aqueduct in 7 min. 55 sec., the stroke being increased up to 40 between the Point and the Aqueduct. About half an hour later Cambridge went out, and paddling as far as Chiswick church, turned, and, rowing steadily at 34, passed Hammersmith Bridge in 4 min. 50 sec. At the Grass Wharf Shafto quickened gradually up to 36, and finished the distance in 12 min. 30 sec., the time from Hammersmith being 8 min. 6 sec. In comparing this, however, with the Oxford time, the slower rate of stroke must be borne in mind. They did not go out again in the afternoon, and Oxford contented themselves with a short burst.

Appended are the names and weights of the two crews:—

THE UNIVERSITIES BOAT-RACE.

THE UNIVERSITIES BOAT-RACE.

PARLIAMENT.

LORDS.

It has continued to be the general rule for the Upper House to meet and separate either after a very brief official statement in relation to the Eastern Question, or after half an hour—rarely more than hour—has been devoted to business; so that the Parliamentary system may not be sensibly deranged by the adjournment of noble Lords for the Easter vacation from the eve of the Boat-Race to Thursday, April 12.

The Lord Chancellor, in reintroducing the Bankruptcy Law Amendment Bill yesterday week, briefly remarked that it was much the same as the Government measure of last year; and the bill was read the second time, after a few remarks had been made by Lord Hatherley, the Earl of Powis, and the Bishop of Peterborough, who feared that one of the clauses would interfere with the revenues of sequestered beneficiaries devoted to supplying the spiritual wants of certain parishes.

On Monday Lord Derby said, in reply to Earl Granville, that on Sunday, the 11th inst., he had received from the Russian Ambassador the draught of the Russian protocol, to be signed by the Powers, as embodying their views on the present position of affairs in the East. The draught having been considered by the Cabinet, certain modifications were proposed, and the modified protocol handed to the Russian Ambassador for the consideration of the Russian Government, who had, on their part, suggested fresh alterations, which the Cabinet had not yet deliberated upon. Answering Lord Stratheden and Campbell, the noble Earl explained that it had been his wish that Sir Henry Elliot should return to Constantinople, but that, as Sir Henry needed rest after his arduous and continuous labours, he would remain in England on leave, "retaining his present position," and temporary arrangements would be made at Constantinople. The Irish Peerage Bill was read the third time and passed. Replying to Earl Fortescue, the Duke of Richmond stated that measures had been taken to guard against the spread of the cattle plague, which had broken out in various parts of the country. Lord Selborne reintroduced his Schools of Law and Inns of Court Bill.

The Duke of Richmond, resuming for the nonce his rôle of leader of the Upper House, gave notice on Tuesday that he should move the second reading of the Burials Bill on April 17, and likewise announced his intention to move for a Select Committee to inquire whether means could not be adopted to prevent the recurrence of floods. The Irish Beer Licenses Bill was then read the third time and passed.

Notwithstanding the withdrawal on Thursday of the notice given by Lord Stratheden in reference to the Eastern Question, on the ground, as his Lordship stated, that it would be untimely to raise a discussion whilst critical negotiations were still going on, Earl Dudley moved for further papers, and expressed a strong opinion against the conduct of Sir H. Elliot as a diplomatist. The Duke of Somerset complained very warmly that an attack should be made upon Sir H. Elliot without public notice. Lord Derby agreed that the course adopted by the noble Earl was singularly inconvenient as regarded the transaction of public business. If the noble Earl had taken the trouble to read the published papers he would have seen that diplomatic negotiations were never broken off with Turkey. In the noble Earl's view the peace of Europe seemed to be altogether a secondary consideration, the primary object being the better government of certain provinces of European Turkey; but a European war would produce far greater horrors than those which had occurred in the provinces referred to. The wording as well as the conditions under which the protocol should be signed, if signed at all, were still under the consideration of the Government, and the steps taken would not be kept secret unnecessarily for one hour. The business subsequently transacted by their Lordships was not of a very important character.

COMMONS.

Dull though the course of events has been, as a rule, for the past week, there has yet been a slight ripple of liveliness now and again. Thus promise of an animated debate on the Eastern Question was held forth when Mr. Fawcett rose from his seat on the front Opposition bench below the gangway yesterday week, and, in his usual clear and deliberate tones, gave notice that he would, on the earliest opportunity, call attention to the evidence contained in the despatches of Lord Derby and the Marquis of Salisbury that "the misrule which has brought such misery on the Christian subjects of the Porte will continue unless the European Powers obtain some such guarantees for better administration as were agreed upon at the Conference." Mr. Whalley again afforded amusement the same evening by his persistent advocacy of the cause of the "Claimant." The Chancellor of the Exchequer having informed the Marquis of Hartington of the state of the negotiations with respect to the Russian protocol, the Home Secretary assured Sir Henry Holland that steps would be taken to render Hammersmith Bridge safe on the morning of the Boat-Race, when the bridge would be closed to the public from eight to ten a.m., and no one would be permitted to remain on it during that time. The House then drifted into an Irish debate on the motion by Mr. O'Shaughnessy that it was expedient to adopt measures to promote elementary education among the Irish people who, the hon. member considered, would be willing to accept compulsion, and would not be frightened by the "cuckoo cry of coercion;" but the motion was withdrawn when the subject had been well discussed by several Irish members: Mr. Butt being of opinion that their first effort should be to enlist the sympathies of all religious creeds and of all classes, and then compulsion would not be necessary; Lord Charles Beresford infusing a sailor-like freshness into the discussion by his naive remarks, warmly approved by the "Yur, yur!" of Mr. Butt; and Sir M. H. Beach disagreeing with Mr. Forster, who thought compulsion would be the only remedy, the Secretary of State for Ireland maintaining that the time had not yet arrived for practically dealing with the subject. When an hon. member opened his speech on the question of Salmon Fisheries in the Solway Frith with the formal words, "Mr. Speaker, Sir," it was, perhaps, inevitable that the phrase of "In the name of the Prophet—figs!" should be brought to mind; and the earnestness evoked by the salmon among hon. members generally was noteworthy. Earnest, if sometimes scarcely audible, was Mr. S. Howard, whose motion was to the effect that a Royal Commission should sit on the stake-sets of the Solway; earnest were the members who followed him, the best speech by far being that of Mr. E. Noel, whose distinct elocution might well be imitated by the majority of speakers in the House; and Mr. Cross, in agreeing to the motion, once more proved himself a model Home Secretary—from a quarter session point of view. How a good cause may be damaged by the wearisome prolixity of a long-winded advocate was almost instanced by Sir George Campbell in a long and tedious speech on the surrender of an African slave who had escaped to a British man-of-war at Jeddah last December. Neatly and effectively answered by Sir Henry Holland, who had served with him on the Royal

Commission, the hon. member for Kirkcaldy, if not brief himself, had the negative merit of eliciting brief speeches from others, Mr. Whitbread's observations being marked by that high tone and feeling characteristic of the hon. member's Parliamentary deliverances, and Mr. Bourke's reply being of the regulation red-tape nature peculiar to official explanations. After the tragedy, the farce; after the surrender of a fugitive slave, the Tichborne case. There was a fair assemblage of members to hear Mr. Whalley's formal speech on this eternal case, the House was kept in a roar by the ingenuous utterances of the hon. member for Peterborough, who was not undeserving of a certain amount of admiration for his stanch and steadfast adherence to the cause of the convict whom he believes to be Sir Roger Tichborne. Mr. Whalley was not to be disconcerted, roared the House never so heartily as it did at his assertion that no less a personage than the Lord Mayor said the "Claimant" was no more Arthur Orton than he was, at his grandiloquent allusion to the letters of "Junius to Mr. Cross," and at his disparaging reference to Dr. Kenealy, who was not in his seat. Members of the Government could not laugh directly in the face of the hon. member, so they covered their faces with their hands, and their frames could be seen to quiver with suppressed mirth. We have been treated to some dissertations of late on the marvellous power General Ignatieff has over his countenance. But Mr. Cross is surely the equal in this respect of the distinguished Russian with the "diplomatic eyes." He was the embodiment of gravity when, in a tone absolutely devoid of feeling, he deprecated the continual reference to this bygone trial, said he had read every petition and paper on the subject, and had seen no reason to doubt the prisoner's guilt. The House then thinned rapidly, and the rest of the sitting was occupied with the agreement to the report on Supply, the granting of £1,213,502 out of the Consolidated Fund for ways and means, the passing of certain bills through various stages, and the rejection of the County Boards Election Bill for Ireland.

The inquisitiveness of the Opposition as to the affairs of Turkey is only equalled by the disinclination of the Opposition to challenge the conduct of the Government on the Eastern Question. This curiosity must have somewhat taxed the patience of the Chancellor of the Exchequer and Mr. Bourke on Monday. Sir Stafford Northcote, answering Mr. Forster, virtually repeated the statement made by Lord Derby in "another place" with respect to Sir Henry Elliot being at present absent on leave from Constantinople, though he could not state what were the temporary arrangements which were being made at the British Embassy. Mr. Bourke, replying to Mr. James, said outrages by Bashi-Bazouks in Macedonia had been complained of to the Porte, the officer in command had been placed on trial, and, moreover, the British Consular force in Bulgaria would be increased. Respecting the outrages reported by the Pera correspondent of the *Times* to have been perpetrated daily on the women of the Bulgarian villages of Gul-Boumar, Souroute, and Koumkein, Mr. Bourke informed the House, in answer to Mr. H. Samuelson, that Mr. Jocelyn had been requested to find out if there were any foundation for such reports, and to communicate with the Vice-Consul at Adrianople on the matter. Mr. Butt's motion that it was desirable to introduce the Estimates for the year early enough to allow them to be fully explained was withdrawn, after Sir Stafford Northcote and Mr. W. H. Smith had said that everything in their power should be done to make the Estimates complete. Ere Mr. Ward Hunt could get into Committee of Supply, Lord Charles Beresford, with youthful confidence, endeavoured to enlighten him as to the increasing power of torpedoes, particularly the Whitehead; and Captain Pim, delivering himself of the opinion that the time had come for a searching inquiry into the Admiralty and into the state of the Navy, asked—but asked in vain—for a Select Committee on the matter. In Committee, the First Lord of the Admiralty allowed Mr. Reed, Mr. Forster, Mr. Shaw Lefevre, Mr. Seely, Mr. Lloyd, Sir W. Harcourt, Mr. Samuda, and Mr. Goschen to criticise him as freely as they liked until a late hour, only interposing Mr. Egerton to reply on behalf of the Government to Mr. Shaw Lefevre. Hon. members were generally in favour of the idea of improving the position of engineers in the Navy (as pointedly recommended in Mr. Tenniel's *Punch* cartoon last week); and Mr. Ward Hunt said it was proposed to obtain naval engineers of a higher social status, and to place them in the military branch of the profession—chief engineers to be enabled to rise to the rank of commander, engineers of ten years' standing to rank with Lieutenants of eight years' standing, and so on. Mr. D. Jenkins made a show of moving a reduction of the vote before the House by £5600, being of opinion that engineers were sufficiently well paid, but withdrew his motion; and the £2,684,048 for the wages of seamen and marines was agreed to, and also £1,178,600 for victuals and clothing.

Hon. members made amends for their late sitting into the small hours of Monday night by indulging themselves with a "count-out" early on Tuesday evening. Sir Stafford Northcote could not promise Mr. Forster any further papers on the Eastern Question till after Easter. Mr. Courtney said he would postpone his motion on the Tripartite Treaty. But Mr. Fawcett declared it was still his intention to bring forward the Turkish motion standing in his name. The way being cleared, Mr. R. Yorke, who said there was a kind of original sin attached, more or less, to all who took part in the proceedings of the Stock Exchange, and there could be no hope of a better state of things until a radical reform was effected, moved—

That a humble address be presented to her Majesty praying that her Majesty will be graciously pleased to issue a Royal Commission to inquire into the origin, objects, present constitution, customs, and usages of the London Stock Exchange, and the mode of transacting business in, and in connection with, that institution; and whether such existing rules, customs, and mode of conducting business are in accordance with the principles that should govern such policy; and, if not, to advise her Majesty in what respect they might be beneficially altered, and how far legislation might be usefully employed for that purpose.

The hon. member concluded a speech which met with general approval by saying that the Athenians paid an annual tribute of blood to the Minotaur, and we had paid for some time past an annual tribute to the Stock Exchange of ruin, tears, and broken fortunes; but he trusted that if this Commission were granted it would prove a modern Theseus, which would destroy the monster. Sir C. Russell seconded the motion, but Alderman Cotton opposed it; and, speeches for and against having been made by Sir Edward Watkin, Mr. E. Stanhope, Sir Henry James, Mr. Hubbard, Mr. Norwood, and Mr. Bentinck, Sir Stafford Northcote performed a strategic movement which seems to have especial merit in his eyes, but which is scarcely consistent on the part of a member of a Government with a large majority. The Chancellor of the Exchequer gathered there was a strong feeling in favour of the motion, but the drift of his speech went to prove its inutility and the inadvisability of adopting it, albeit, in the end he said, though there was no reason for the Commission, he would not oppose the motion. Mr. Lowe forthwith demonstrated that there were reasons for the Royal Commission, the motion for which, after a mild objection from Mr. Goschen, was agreed to without a division.

Wednesday was devoted to the consideration of Mr. Butt's

bill for recompensing Irish farmers for improvements effected by them, and the hon. member said the measure was practically the same as last year's. The rejection of the bill was moved by Mr. Herbert; but various Irish members supported the bill, which was eloquently opposed by Mr. Plunket, on the ground that it would transfer land from its present occupants to the tenants. This argument did not prevent Mr. A. M. Sullivan and Mr. Courtney from favouring the measure. The O'Connor Don and Sir M. H. Beach spoke adversely to the bill. Mr. Butt replied. Then, amid interruptions from Irish members anxious to divide, Mr. John Bright indignantly denied the truth of the charge made by Mr. Downing against Mr. Buckley, whose uprightness Mr. Bright vouched for as a personal friend of his. The political ingratitude of the Irish members who showed this discourtesy to so stanch a friend of Ireland as Mr. Bright can scarcely be regarded as an amiable trait of the noisy section of the Home Rule party, whose bill was thrown out by 323 votes to 84.

The notice-paper of the House on Thursday presented a large number of questions, chiefly affecting our relations with foreign Powers. Amongst those questions, that of which Sir G. Campbell gave notice occasioned a remarkable demonstration in the House. As it stood upon the paper, it not only referred to the promised reforms of the Turkish Government and the communications made to Lord Derby on the subject, but it proceeded with a further inquiry as to whether Colonel Baker, who was employed in a military capacity by the Government of the Porte, was the same individual who had been convicted of a criminal offence in this country a short time ago. The moment Sir George had risen to put his question he was met by a storm of opposition, expressed by yells and groans, which did not abate until the hon. gentleman intimated his intention, under advice, not to press the last paragraph of his recorded interrogatory. The Chancellor of the Exchequer, instead of Mr. Bourke, the Under-Secretary for Foreign Affairs, to whom the inquiry was addressed, rose to reply. In a tone of unusual gravity, he administered a severe rebuke to the hon. knight for the notice he had given, and said he thought that he had exercised a wise discretion in omitting to put his last question, and he could only express his regret that he should have put it on the paper at all. The Government, he said, was always ready to give the most frank and complete answers to all inquiries, but he must say that questions of a similar kind were sometimes put to it, not for the purpose of obtaining information, but as vehicles for making attacks on absent individuals of an indirect character. He had only to inform the hon. gentleman, in answer to his inquiry, that Lord Derby had received communications from the Turkish Government indicating its intention to carry out certain reforms. The right hon. gentleman informed Mr. Gourley that no foreign Consuls in the United States had powers to settle disputes between the masters and crews of ships of their own nationality. Negotiations, however, were in progress for a Consular convention, but some difficulties had arisen with respect to jurisdiction, which he hoped would be surmounted. Replying to Mr. W. E. Forster, the right hon. gentleman said that her Majesty's Government considered it desirable that her Majesty's interests should be represented at the Porte by a representative of higher rank than a chargé-d'affaires; and, as Sir H. Elliot was not able to return there, Lord Derby was considering the matter, but was not at present able to make any statement on the matter. Mr. Bourke, in response to a query from Mr. Fawcett, said that a reply had been received by telegraph to the effect that outrages had occurred in the neighbourhood of Adrianople, but they had been exaggerated. The Consul at Adrianople had been directed to go himself or to send a trustworthy person to inquire into the matter. In reply to Sir H. D. Wolff, Mr. Fawcett stated that he intended to persevere with the motion of which he had given notice on the Eastern Question, but, in consequence of information received within the last few days with respect to the condition of the Christian subjects of Turkey, he would add to his motion words which would afford the House an opportunity of considering the present position of the people of Bosnia, Bulgaria, and Herzegovina. The principal subject for consideration during the rest of the night was the Prisons Bill in Committee. The lugubrious nature of the subject was occasionally diversified by speeches from Dr. Kenealy, Mr. Goldamid, and several of the Irish members, in which many piteous and affecting narrations were given of the unmerited sufferings of untold prisoners. Amongst the most interesting and remarkable of the facts related on the occasion were the autobiographical relations made by Mr. O'Sullivan and Mr. A. Sullivan during their incarceration on untold charges of a political character.

THE EGYPTIAN RED SEA SQUADRON.

A correspondent at Alexandria furnishes us with a sketch of the two ships appointed by his Highness the Khedive to proceed down the Red Sea with a view to the suppression of the slave trade, with regard to which his Highness has shown so much laudable solicitude. The larger vessel, a corvette carrying fourteen guns, is the *Latif*, which sailed a month ago, with his Excellency Gordon Pasha, R.E., for Massowah, whence he would proceed by land to the seat of the governorship lately confided to him by his Highness the Khedive. The other ship is the *Toor*, in which Captain Morice Bey, R.N., Deputy Controller-General of Egyptian Ports and Lighthouses, left Alexandria on the 2nd inst. for the same port, and upon his vessel arriving at Massowah, and being reinforced by the *Latif*, he was to take command of the naval expedition. This, indeed, as previously arranged, was to have been under the command of Admiral McKillop Pasha, R.N., Controller-General of Ports and Lighthouses; but, owing to sudden and severe indisposition, that officer was reluctantly compelled to resign the command to his representative, Morice Bey. We were told by a telegram from Cairo, dated the 11th inst., that one of the Egyptian cruisers in the Red Sea had been destroyed by fire; but this alarming story has not been confirmed.

Major-General Stephenson has arranged his plan of operations for the volunteer review on Easter Monday. He has decided that the defensive force shall take up a position on the line of heights running from Tottenhoe to the Maiden's Bower, with a view to covering Dunstable in rear. The attacking army will move by way of Stanbridge Ford, and either deploy on the open plain in its front or among the shelter of the numerous valleys between that spot and Tottenhoe.

The Clothworkers' Company have subscribed 100 guineas towards the building fund of the British Horological Institute.—The committee of the London Fever Hospital have received £50 from the Queen, and £21 from the Prince of Wales.—Lady Burdett-Coutts has offered £100 towards the expenses of the exhibition in connection with the Canton Celebration.—The Company of Clothworkers and the Company of Merchant Taylors have each contributed 100 guineas to the sum being raised by the Chemical Society for the promotion of chemical research. A few months ago another City company, the Goldsmiths, presented £1000 to the same fund.

THE CRISIS IN TURKEY.

Our Special Artist at Constantinople has sketched a very curious scene that he witnessed in that city, upon the occasion of the late eclipse of the moon, which excited in the minds of the Turkish populace, as such phenomena have often done among barbarous nations, a general sentiment of superstitious terror. They seemed to think the realms of celestial space were invaded by the Evil Spirit, with dire and baneful intentions of disturbing the harmonious relations between suns and their surrounding planets; and they resorted to the expedient of assembling on the shore of the Golden Horn and making a great noise, with shouting and firing of guns, to drive away the ghostly intruder. A practice of the same kind has been described by travellers in Africa as in usage throughout Negro-land, especially in Dahomey and Ashantee, and the darkest regions of heathendom on the West Coast. We should not expect to be told that it is anywhere sanctioned or recommended by the authorised expounders and ministers of the Mussulman faith; but it seems to be tolerated, by a concession to the wild fancies and crude opinions of the vulgar, even in the metropolis of the Turkish empire.

As a singular novelty in that quarter, and a striking contrast to the absurd proceeding just noticed, we have to record that, on Monday last, the first Turkish Parliament was opened by the Sultan in person, with much state.

The Speech from the Throne was read by the First Secretary of the Sultan. After stating that the Empire owed its grandeur in former times to the practice of justice, respect for the laws, and the good administration of the country, the Sultan in this speech declares that the gradual weakening of his Empire was due to the forgetfulness and abandonment of these wise precepts down to the reign of the Sultan Mahmood, who was the first to understand and commence reforms in the Empire and cause the country to enter the path of civilisation and progress. The Sultan then calls to mind the fact that his father, Sultan Abdul Medjid, continued the work of his grandfather by promulgating the Tanzimat, but that its benefits were impeded by the Crimean War, which compelled the Treasury to have recourse for the first time to a loan; that, peace having been restored, thanks to the efficacious aid of the Great Powers the allies of Turkey, and the integrity of the Empire having been placed under the guarantee of the European Powers, the country would have entered upon a new era of progress and prosperity if intrigues and culpable agitation had not paralysed the efforts of the Government, which was obliged to maintain considerable armies and exhaust the Treasury by purchases of war materials. These causes, joined to the bad administration of the finances, involved the State in difficulties to such an extent that, when an insurrection broke out in Herzegovina, the Government had to have recourse to exceptional measures; but, as these measures consisted in reducing the interest on the debt, they seriously affected the credit of the State, because they ignored engagements contracted, which the Porte had always respected. Called to the throne in most difficult circumstances, his Majesty had, first of all, placed the forces of the country in a condition to ensure its security and independence, and had then devoted all his efforts to internal reform by promulgating a Constitutional Charter, which, following the example of the most civilised States, made the nation participate in the enactment of laws and the administration of public affairs. The Charter for this purpose created a Parliament composed of a Senate and Chamber of Deputies. It is a Charter which secures to all liberty, equality, and justice. The Sultan, speaking of the Constitution, says:—

"Henceforth all my subjects, having become children of the same fatherland and living under one and the same law, will be called by one and the same name—Ottoman." His Majesty returns thanks to Providence for having been able to open the first Session of his Parliament, and he then enumerates the principal laws which the two Assemblies are called upon to discuss during this Session. There are an Electoral Bill, a Provincial Bill, a Bill on Commercial Regulations, a Code of Civil Procedure, measures for the reorganisation of the Tribunals, the promotion and retirement of public functionaries, a Press Bill, a bill for the organisation of a Court of Accounts, and finally the Budget Law. The Sultan specially recommends the study and adoption of the Financial Bills, and he states that measures will be taken to offer the creditors of Turkey, with the concurrence and consent of their representatives, the most solid guarantees for the execution of the engagements to foreign creditors, while at the same time reconciling them with the urgent necessities of the Treasury. While awaiting the creation of institutions intended to develop public instruction, the Sultan announces that he has resolved to enlarge at his own expense and under his patronage the existing civil school with the object of preparing youths to fill posts in the public service. After paying homage to the patriotism of his people and the bravery and devotion of his Army, the Sultan proceeds to announce the pacification of the country and the restoration of peaceful relations with Servia. He also expresses hopes of a favourable issue to the negotiations entered into with Montenegro, a result which would enable the Government to send the troops at present under arms to their homes, to the great advantage of agriculture. Finally, the Sultan declares that, though the Conference which met in Constantinople, on the proposal of England, did not result in a definitive understanding, it has been none the less demonstrated that both before and since the Con-

ference his Government was and is ready to anticipate in practice those wishes of the Powers which can be reconciled with existing treaties, the rules of international law, and the exigencies of the situation. The Sultan concluded his speech as follows:—"My Government has constantly given proofs of sincerity and moderation which will aid in drawing closer the bonds of friendship and sympathy which unite us with the great European family. The disagreement between my Government and the Powers rests rather in the form and method of application than in the substance of the question. All my efforts will be devoted towards bringing to perfection the progress which has been already realised in the situation of the empire, and in all the branches of its administration. But I consider it to be one of my most important duties to remove any cause which may be detrimental to the dignity and independence of my empire. I leave to time the task of proving the sincerity of my intentions of reconciliation."

The senators and deputies took the oath of allegiance to the Sultan on Tuesday. The Address in reply to the Speech from the Throne has been discussed in the Senate and Chamber of Deputies this week, and the public debates in both Houses will commence next Monday.

The Montenegrin delegates are still awaiting fresh instructions from Cetinje, but the armistice between Turkey and Montenegro has been prolonged to April 1. It is stated that Prince Nikita has withdrawn his demand for the cession of the port of Spizza, and of the forts on Lake Scutari. In Bosnia there is still an irregular force, under Despotovich, in the field against the Turkish Government. The restoration of peaceful relations between Turkey and Russia is by no means yet certain; and there are still large bodies of troops in movement towards the Danube, both from the south or east, to defend the Turkish frontier, and from the north, in seeming preparation for an intended attack. But it is quite possible that war may for this time be averted, by the moderation of the Czar's counsels, and by a prudent deference, on the part of the Sultan, to the opinion of civilised Europe.

A meeting in aid of the establishment of an Indian and Colonial Museum in London was held at the Mansion House on Tuesday—the Lord Mayor presiding. Mr. E. P. Bouverie, Mr. Twells, M.P., Professor Fawcett, M.P., and Sir George Campbell, M.P., were amongst the speakers.

NEW BOOKS AND PUBLICATIONS.

London, March 24, 1877.
NOTICE.—THE PRINCE OF WALES' TOUR IN INDIA. By Dr. W. H. RUSSELL, having been exhausted and a large surplus ordered on the day of publication, the Publishers beg to announce that the SECOND EDITION is now at press, and will be ready for delivery about April 12. Orders received after April 2, as previously announced, can only be executed at the advanced price of 2s. 6d. (The present price is 2s.).
N.B.—A Large Paper Edition, to royal quarto, cloth extra, gilt edges, price 4s., will be ready on Wednesday.
LONDON: LOW, MARSHTON, SEARLE, and RIVINGTON, Crown Buildings, 188, Fleet street.

"WE HAVE NO HESITATION IN GIVING CASSELL'S FAMILY MAGAZINE THE FIRST POSITION AMONG THE MONTHLIES for the People—its character is so marked and decided."—*Edinburgh Courant*.

Ready March 26, price 7d.
CASSELL'S FAMILY MAGAZINE for APRIL, containing:—
1. YOUR BANK HOLIDAY.
2. SOME TRIUMPHS OF POOR MEN.
3. BARRISTERS' CLERKS.
4. POPULAR SCIENCE SCHOOLS AND CLASSES.
5. HOW TO WRITE A GOOD LETTER.
6. ART NEEDLEWORK.
7. RONDEAU: A Song with Music.
8. GARDENING IN APRIL.
9. CHIT-CHAT ON DRESS.
10. A TALK OVER A TRAP.
11. THE COUNTY SCHOOLS AND CAVENTISH COLLEGE.
12. HOW TO BUILD CITIES OF HEALTH.
13. SOME RULES OF NEATNESS.
14. OUR MISTAKEN GENEROSITY. A Short Story.
15. JOHN MAYNARD.
16. TOLD BY HER SISTER. A Short Story.
17. FROM HIS LOVING MOTHER.

Sixth Edition, with Illustrations, crown 8vo, 7s. 6d.

DOG-BREAKING. The most Expeditious,

Certain, and Easy Method, whether great excellence or only mediocrity be required; with Odds and Ends for those who love the Dog and the Gun. By GEN. W. N. HUTCHINSON.
"Colonel, how General Hutchinson's work on dog-breaking is sufficiently known, and accepted as a standard authority, not to require any fresh commendation. Apart from the technical advice given in this work, even non-sporting readers may enjoy the amusing anecdotes which it contains."—*Saturday Review*.
"General Hutchinson's book is the standard authority on the subject he deals with, and is familiar to all who have to do with dogs. The volume is one that we commend to those who own dog dogs. To the owners of sporting dogs it is indispensable."—*John Bull*.
"Let every dog lover read its anecdotes, some of them so strange, others so amusing. Let every dog fancier take to heart the advice, and let every dog trainer and sportsman keep it always about him. We shall have a better breed of dogs in England if this is done."—*Edinburgh Daily Review*.
"A medley of delightful reading."—*Graphic*.
JOHN MURRAY, Albemarle-street.

With Portrait of the Author by Maclean, and numerous Illustrations by Aiken. Crown 8vo, 5s. Coloured, 7s. 6d.

THE CHACE—THE TURF—AND THE

ROAD. A Series of Descriptive Essays. By NIMROD (C. J. APPELEY).
"This capital work, by 'Nimrod,' needs no recommendation. It is one that should be in every gentleman's library."—*John Bull*.
"As a memorial of the past this work is without equal, and should find a place on the bookshelves of all sportsmen."—*Sell's Life*.
"Mr. Murray has brought out a new and elegant edition of Nimrod's classic work on 'The Turf, the Chace, and the Road.' Though the Turf has changed very much since Nimrod's day, his essays will always be read with delight by the votaries of racing."—*Baily's Magazine*.
JOHN MURRAY, Albemarle-street.

Shortly will be issued,

A MODERN MINISTER.

Being the Initial Work of a Series, to be called

LIGHT-BROWN COD-LIVER OIL.
THE ONLY KIND

which produces the full curative effects in
**CONSUMPTION AND DISEASES OF THE CHEST,
 CHRONIC BRONCHITIS, WINTER COUGH,
 DEBILITY OF ADULTS AND CHILDREN.**

SELECT MEDICAL OPINIONS.
Sir G. DUNCAN GIBB, Bart., M.D.,
 Physician to the Westminster Hospital.

"The value of Dr. DE JONGH'S LIGHT-BROWN COD-LIVER OIL, as a therapeutic agent in a number of diseases, chiefly of an exhaustive character, has been admitted by the world of medicine; but, in addition, I have found it a remedy of great power in the treatment of many Affections of the Throat and Larynx, especially in Consumption of the latter, where it will sustain life when everything else fails."

DR. SINCLAIR COGHILL,
Physician to the Royal Hospital for Consumption, Ventnor.

"I have convinced myself that in Tubercular and the various forms of Strumous Disease, Dr. DE JONGH'S LIGHT-BROWN COD-LIVER OIL possesses greater therapeutic efficacy than any other Cod-Liver Oil with which I am acquainted. Dr. DE JONGH'S OIL is the only Cod-Liver Oil used in the Royal National Hospital for Consumption and Diseases of the Chest."

Dr. PROSSER JAMES.
Lecturer on Materia Medica, London Hospital.

"DR. DE JONGH'S LIGHT-BROWN
COD-LIVER OIL contains the whole of the active
ingredients of the remedy, and is easily digested.
Hence its value, not only in Diseases of the Throat
and Lungs, but in a great number of cases to which
the Profession is extending its use."

DR. HARDWICKE,
Medical Officer of Health, Paddington.

"In the class of Tubercular Diseases, including Consumption, so prevalent in our great centres of population, the use of DR. DE JONGH'S LIGHT-BROWN COD-LIVER OIL is attended with manifold advantages; and I know of no therapeutic agent which, in connection with judicious sanitary measures, is better calculated to stay the ravages of these great consuming plagues of the British Islands."

DR. DE JONGH'S LIGHT-BROWN COD-LIVER OIL
is sold ONLY in capsuled IMPERIAL Half-Pints, 2s. 6d.; Pints

SCHLIEMANN'S RESEARCHES IN GREECE.

The arrival of Dr. Schliemann in London, and his address to be delivered here to the Society of Antiquaries, must increase the amount of public interest already felt in his successful explorations of the sites of ancient classic history, or early traditions of romantic events in Greece, celebrated by the epic and tragic poets of that highly gifted nation. Our readers are fully aware of the direct efforts made by the proprietors of this Journal, in the employment successively of two Special Artists on the spot, as well as at Athens, to provide complete and accurate illustrations of Dr. Schliemann's remarkable discoveries. Views more especially of the ruins of Mycenæ, in the Peloponnese, and of the relics of antiquity found there, have been presented upon several occasions, with sufficient explanations of their general bearings; but an exact topographical view of the subject was yet desired. This is now supplied by our well-known artist, Mr. W. Simpson, from whose pencil we have obtained many effective illustrations, and whose pen, guided by considerable archaeological and ethnological experience, has contributed some notes upon the significance of the recently unearthed memorials of a remote past age. The portrait of Dr. Schliemann, which accompanies the other illustrations given in this Number, is offered as a tribute of personal respect, in recognition of his laudable endeavours

DR. SCHLIEMANN, THE EXPLORER OF TROY AND MYCENÆ.

and large pecuniary sacrifices, at his own private risk, to carry on these laborious and costly researches. His example at the present time appears more worthy of note, from the circumstance that he is not a man trained to the profession of literary and academic scholarship; that he has never been a professor of any of the German or other Universities: but that his youth and part of his manhood, in Hamburg and in London, as we understand, were incessantly occupied with commercial business. Since his retirement, within the last few years, from an active mercantile career, he has devoted nearly all his time, and a great deal of his money, to the self-imposed task of examining the places associated with the chief actions related in Homer's "Iliad," and those of collateral importance described in the narratives or dramatic compositions of other Greek poets. His success in the Troad, or that district of the coast of Asia Minor, just below the Dardanelles, where two or three different sites had been alleged for the famous city of Ilium, or Troy, was, perhaps, the commencement of a new era in the progress of classical archaeology. There is no story, outside of the Bible, which has appealed to such a multitude and variety of human sympathies, during such a long period, and in so many different parts of the world, or stages of moral and intellectual culture, as this most widely popular "tale of Troy divine" has done. It was formerly intermixed, by the whimsical and capricious

IN THE ACROPOLIS OF MYCENÆ.

SKETCH PLAN OF THE SITE OF MYCENÆ AND OF ITS ACROPOLIS.

fancy of ignorant chroniclers, with the primitive notions of early British history; and the names of Homeric and Virgilian heroes, mingled with those of King Arthur and his knights of chivalry, appear in the mediæval romances, of Celtic or of Northern French authorship, which to Chaucer and Spenser, to Shakespeare and Milton, seemed to have a foundation of reality and truth. The nicknames of "Trojans" and "Grecians," applied to the juvenile inhabitants of two rival quarters of a respectable old city in the West of England, have been the signal for sharp battles with fists and sticks and stones within the last half century, proving the continuance of some traces of that unhistorical belief among the less instructed classes of provincial society. Both Trojans and Grecians, or Danaans, Argives, and Achæans, certainly existed on the opposite shores of the Ægean Sea, and probably fought against each other, as such warlike nations, ruled by military feudal chieftains, would naturally do, some generations before the first precise date of chronological record. It is very likely that there was a King Priam of Troy, with his Asiatic neighbours to support him; and a King Agamemnon, reigning over the towns of Argos and Mycenæ, at the head of an Achæan or Hellenic confederacy of similar petty States, each subject to its native local Prince. The presumption of the reality of these facts is strong enough to warrant our admitting them without dispute, while we reject as mere poetical figments the more romantic passages and characters of Homer's epic and of the later tragedies, seemingly of mythological import, in which Æschylus, Sophocles, and other writers dealt with the fate of Agamemnon and the fortunes of his son Orestes, and of Electra, the daughter of that murdered King. We must therefore conclude that no just reason exists for a disposition beforehand to receive with incredulity the pretensions of Dr. Schliemann to have found the relics of an actual Troy, with the palace and tomb of Priam, and those of Agamemnon at Mycenæ; for it was quite to be expected, upon the ground of believing those Kings to have really lived some 2500 years ago, that a few remnants of their massive edifices, fragments of sculptured stone, and specimens of the metallic wares belonging to their opulent household, should have been preserved from destruction or pillage underneath the accumulation of ruins and the soil of the land surface. We know that this is the case with the Assyrian and Egyptian monuments, which are of far greater antiquity; and we ought not to feel much surprised, though highly interested and gratified, by the recent discovery of many relics at Mycenæ, evidently belonging to a Royal House, which is supposed to have been the House of the Atreids. The elder branch of that princely family, we doubt not, was actually represented at one time by Agamemnon, son of Atreus, reigning at Mycenæ over both that city and Argos, which is seven miles distant on the sea-shore.

DR. SCHLIEMANN'S TREASURES FOUND AT MYCENÆ.

Our Special Correspondent and Artist writes as follows:—

Athens, Feb. 26.

The objects found by Dr. Schliemann have been more than once on view, in one of the rooms of the National Bank. These precious articles have been placed there for safety, and will remain there in the strong room till a suitable museum can be provided, where they will all be labelled, and will be exposed, in proper cases, for the public to see them. Till this is done, it will be only privileged individuals who will have a chance of getting a peep at what has so long lain quietly under the earth at Mycenæ. Mr. Newton, from the British Museum, is expected out here by next French mail, and will no doubt have a special view of all that is important. At present these objects are being photographed, for the purpose of illustrating the work upon which Dr. Schliemann is now employed, relating his discoveries. This is to be published by Mr. Murray, and it is said that £8000 is the sum the publisher has agreed to pay for the copyright. If I mistake not, that is about what Dr. Livingstone received for his *Travels in Africa*.

Two cases of the seventeen at present containing this collection were taken out the other day, and were laid on a table for Admiral Sir James Drummond and the officers of the fleet to look at. These two cases seemed to contain the most valuable of the gold articles, and they are, perhaps, the most important as bearing on the art of the period. The predominating form of ornament is that of a circle, which is filled up in various ways, but most often with radiating lines, each line being connected with a semicircle at the circumference. It might be taken for a subjective style of representing the petals of a flower. The beautiful cow's head, with golden horns, has one of these circles of gold, about two inches in diameter, attached to the forehead. This Dr. Schliemann, I understand, identifies as a symbol of the sun; and it is quite possible that such is the meaning of the raylike lines upon it. Its connection with the crescent horns of the cow is undoubtedly a strong confirmation of this idea. It is a combination which was very common in past times; and a crescent with a star is still a favourite emblem among the Mohammedans, who are thus, we find, only continuing an emblem that existed in the most archaic period. This particular ornament might be seen on almost every one of the gold objects exhibited. The golden girdle is covered with it; it is upon the gold covering of what have evidently been dagger-sheaths; it figures upon drinking-cups; and there were trays exhibited of circles in gold all impressed with this favourite symbol. The signification which Dr. Schliemann ascribes to this ornament will become an important point of discussion when his book appears, for it is the predominating feature of all the art which had been developed at the period of the Atreids. It is more frequent than the meander or spiral ornament, and the well-known Greek fret seems not to have come into existence at that early date. If it was a solar symbol, its importance and constant repetition beyond that of all other ornaments may thus find an explanation. The spiral form of ornamentation is also found among these gold relics. The meaning of this particular form is doubtful. It may possibly have been merely a result of working with gold wire. The same material is still in use in our own day, as we find it in the beautiful filigree work of Malta and Trichinopoly, where the spiral form is a feature springing from the condition of the material. It is now becoming evident that the exquisite tracery and spiral ornamentation of the Celtic and early Anglo-Saxon period first began from a similar source. That the early Greeks did use wire in this way is evidenced by one or two small specimens found by Dr. Schliemann at Mycenæ, where the wire itself is wrought into spiral objects of ornamentation. One of the symbols which Dr. Schliemann's wonderful discoveries at Troy revealed was that of the swastika, or fylfot, and he has also found it frequent in his late discoveries. This is another ornament common all over the East, and its constant repetition on the whorls and other objects of the Archaic Trojan period was in itself a discovery in the science of symbolism. This outline will be the simplest way of conveying an idea of the symbol, which is important from its being only a variety of a cross. It is an old Buddhist symbol, common among the sculptures and coins of that faith in India. The word "Swastika," by which it is

often designated, is Sanscrit, and is explained by General

Cunningham to be an expression meaning "So be it," as a declaration of acceptance and resignation to whatever happens in this life. The General states that it was the formula of the "Atheistical Swastikas," a sect who were thus named from it. Emile Burnouf gives another explanation of it. According to him, it was formed of pieces of wood, upon which another piece was revolved between the palms of the hands, till fire was produced. It is, in fact, a fire-wheel, from which Agni, or the sacred fire of sacrifice, was evolved. This is the explanation which Dr. Schliemann has adopted; and in his eyes it is only another symbolical form signifying the solar power. It is frequent on the buttons and other objects found at Mycenæ; and there is a triple-formed symbol found on the buttons, which one is inclined to believe is only a variety of the Swastika. If this should turn out to be the case it will throw new light on the arms, or one might say the legs, of the Isle of Man, and of Trinacria, or Sicily. These buttons are very beautifully made, and, although they naturally recall Birmingham to the mind, there is nothing "Brummagem" about them; it is doubtful if that noted Buttonopolis could produce better at the present moment. Although these articles have been called "buttons," it may be doubted if they served the purpose which we associate with such things in the present day. They may have been placed as studs on shields—"on the wall-orbed ox-hide shields," or on such as that of Ajax, which was covered with brass—or, perhaps, upon harness. Many of the circular plates of gold were no doubt used for purposes of this kind as ornament. They may have also been used for overlaying wood or ivory—the word "Chryselephantine" implies that this last mode of decoration was

A. Spiral ornament sculptured on stone.
B. Patterns incised on vase of earthenware.
C. Another incised pattern on earthenware.
D. Stones for grinding flour.

FORMS OF SOME ARTICLES FOUND AT MYCENÆ.

common. Among the subjects represented on these circular plates, and a not unfrequent one, is that of a butterfly; and among the repoussé, as well as the smaller articles of cast metal, there is one form which is rather a surprise—that is the octopus. There are a number of specimens of it, and it is so well represented that there need be no doubt of its being the animal we are now so familiar with in our aquariums. It is very plentiful in the market of Athens even now, and, clearly, the ancient Greeks were not less familiar with it; but whether it is used on these golden articles as a symbol, or merely as an ornament, has yet to be ascertained. There are also birds and animals, generally in subjective forms; among them a hare, or fawn-like animal, is repeated, recalling the clasp on the mantle of Ulysses, who, while still disguised, describes it to Penelope as an evidence that he had seen her husband. According to the description, it was "a clasp of gold made with two fastenings, and in front it was variegated: a dog held in its fore feet a spotted fawn, enjoying its panting, and all marvelled at it, how they being of gold, the one strangling the kid was enjoying it, but the other, eager to escape, was convulsively struggling with its feet."

From these specimens of ancient art found at Mycenæ Dr. Schliemann insists, still with his usual enthusiasm, upon the reality which belongs to everything which Homer describes in relation to Troy, and that we are now getting revealed to our own eyes what the poet was familiar with when he wrote. The modern theory that the story of the Iliad is nothing more than a myth finds no entrance into the mind of Dr. Schliemann. The golden cups are entirely new in form; the most important of them is not above six inches high, and the single handle at the side clearly suggests that it was a drinking-cup. The pouring of wine into cups is often spoken of by Homer; and we have an allusion by Agamemnon himself to his own cup. In the fourth book of the Iliad the son of Atreus says:—"The nobles of the Argives mix in their cups the dark red honourable wine; for though the other created Greeks drink by certain measures, thy cup always stands full, as [mine] to me, that thou mayest drink when thy mind desires it." This habit may have given some colour to the accusation of Achilles that Agamemnon was a "wine-bibber;" and if we adopt the realistic views of Dr. Schliemann as to the Iliad, it is a pleasing probability to indulge in that the cup mentioned by Homer is, after so many years, again visible, and may be touched and felt. Prominent amongst the objects exhibited, and perhaps

the most interesting in the whole collection of what has turned up at Mycenæ, is the cow's head with the golden horns. This Dr. Schliemann identifies with Herè, or Juno. She was said to have been born at Argos; hence it is more than probable that she would be a favourite deity in that region. The cow was sacred to her, and was never offered as sacrifice at her temple. This is said to have been owing to her having assumed the form of that animal. This head which has been found is not so large as that of a cow; its proportion would fit better to that of a human figure, and, if it was not used as a mask, it may have been the head of a statue, supposing, perhaps, the rest of the figure to have been in the form of a woman, to represent the goddess. The head is said to be of silver, but it is now oxidised into a brown coffee-colour. The horns are of gold, still bright; and the nostrils also still retain evidences of gilding. The head is very well executed, and is in itself a good proof of the artistic skill of the time. The only ornament upon it is the gold disc on the forehead, which has already been described. As the explorations of Troy produced a large number of owl forms as representations of Minerva, and most of them in the rudest style of art, so the diggings at Mycenæ have produced a multitude of figures of Juno, all belonging to very archaic and primitive types. The principal part of these small objects is a crescent, which is supposed to be only a form of the horns of the cow. The continuation, for there is nothing which could be called limbs, is only a stand, terminating in a base, by means of which the idol could be placed in an upright position. Some images have a rude development of a head which is between the horns of the crescent, but the crescent is entirely below the head, so that they stand up rather as arms than horns. This suggests a strange comparison with the celebrated figure of Juggernaut, which General Cunningham identified with the trisul, a trident-formed emblem, peculiar to Buddhism and Brahminism, and to which a face has merely been added on the central prong, making a combination perfectly analogous to these rude idols of Juno which have now been first brought to light. Some of these figures found at Mycenæ have nothing to indicate a head. The central member stands up, forming, with the crescent horns, a trisul or trident; and the fact that a female figure is meant can only be determined from the breasts, which are distinctly marked on the crescent. These are curious contributions to our knowledge of the symbolism which was current in the earlier periods of Greek history. The golden girdle was also upon the table at the Bank; but little can be said of it except that the circular ornament was its prevailing decoration. As *Punch* has so satisfactorily explained the buttons which have been found, he may also find a solution of this supposed piece of female adornment. If the "buttons" belonged to the pages of Agamemnon, then there need be little doubt but this was the apron which Clytemnestra put on during the afternoon, to receive her visitors at her five o'clock tea.

I send you this short description of what I saw during a very hurried visit. Dr. Schliemann himself goes in the course of a week or so to England, and with his own more accurate descriptions, and the very realistic photographs which he is having made, and a few of which, by his kindness, I was permitted to look over, those who are interested in such subjects will be able to judge for themselves as to the importance of these discoveries. Dr. Schliemann has brought the long dead past literally out of the tomb for us to look at. He is working day and night just now at his book, and it will very soon be before the public.

DR. SCHLIEMANN'S EXCAVATIONS IN THE ACROPOLIS.

The Acropolis of Mycenæ is on an isolated rock, which fits, not unlike a wedge, into the valley between two very prominent hills. The northern one is Iretus, known now as Mount Agios Elias, and the other as Sara. The rocky scarp of the Acropolis, towards the last named hill, is so precipitous that no attack would be likely on that side. Still, there are remains of old Cyclopean masses of wall yet standing in places where the cliff is less perpendicular. On the other side, which was easier of approach, a long wall of the same ancient kind of masonry extended the whole length. This terminates at one end where the rocky point of the wedge looks to the east up the valley, and at the other where the wall turns to the south-east, forming one side of the approach to the wall-known Lion Gateway, so named from the sculpture, over the doorway, of two lions who act as supporters on each side of a pillar. The masonry of the wall, at this point, is of a different character. The stones here are squared, and show an approach to the rectangular or Hellenic type. This would indicate a later date than the other, which has been known as the Cyclopean, but is now called Pelasgic, or the Polygonal, from the irregular form of the large blocks of stone. From the Lion Gateway the wall is again continued pretty nearly south-west for a short distance, when it turns with an angle to the south-east, in which direction it runs again till it comes to the rocky gorge already described. There are inner walls of old masonry within this, inclosing the higher ground of the Acropolis. A reference to the sketch plan of Mycenæ and its Acropolis, where the position of the explorations are indicated, will make this description better understood. Mycenæ was destroyed 468 B.C., when the city was deserted, and it is a wonder that any of its walls should have been now standing; but the massive masonry of the period has, in this long struggle against time, given evidence of its durability. Some parts of these walls are still as good as when first erected; while in many places the large stones have tumbled down, and the irregular blocks are scattered about, so that at a very little distance they cannot be distinguished from the masses of rock amongst which they lie.

Dr. Schliemann made a number of experimental borings or shafts all over the Acropolis, and ultimately determined to carry out his operations at the south-west corner, between the Lion Gate and the wall; and here his scent seems to have been on the right track, as the wonderful results have given proof. The drawing which I send of the ground as it now stands since the excavations have been made, and which is accompanied with a rough sketch plan, will give a pretty clear idea of the spot. The view is taken from the top of the old wall, south of the Lion Gate, and the base of one of the two hills. The one called Mount Sara forms the background, giving a peep to the right of the Argolic plain, now green and red from the spring crops and newly-ploughed soil. The Acropolis of Argos is at its southern extremity; beyond is the Gulf of Argos; and the high chain of mountains, their summits covered with snow at this season, separating it from Arcadia and Laconia, forms the extreme distance of the picture. The Lion Gateway can now be entered, and it forms a fitting approach to the scene of Dr. Schliemann's discoveries. By entering it we come upon the spot, as those did who were living when Mycenæ was the chief city of Greece, and when this spot must have been sacred and celebrated from the illustrious dead who were interred there with all the solemnity of the ancient Greek ritual.

On passing the large blocks of the ancient portal, and turning to the right, the first things which we come upon are some

old walls laid bare by the recent excavations. As the inclosures formed by these remains present no indication of either doors or windows, the visitor is inclined to believe that they were more likely to be the houses of the dead than of the living. Some other walls, found at the south-east corner, have been judged by Dr. Schliemann to be the remains of a palace—"A vast Cyclopean house" is his description of it—and the discovery of gold and other valuable articles within these walls he considers as evidence of its having been a regal abode. Supposing it to have been a palace, its close proximity to the Royal tombs would seem to show a custom in early Greece similar to that mentioned in the Bible, where Manasseh is described, in 2 Chron. xxxiii. 20, as having been buried "in his own house," or, as it is put in 2 Kings xxi. 18, "in the garden of his own house." A reference to the Sketch-Plan will show how near the places of sepulture were to the Royal residence at Mycenæ. These tombs are connected with a very remarkable structure, which has been brought to light by Dr. Schliemann's explorations. It is a structure which is entirely new to the students of classic archaeology. No similar construction has yet been found anywhere, in Greece or any other part of the world. It is, no doubt, of a high antiquity; and its exact date will most likely become one of the important points connected with Dr. Schliemann's discoveries.

This interesting monument is a circle about 100 ft. in diameter. It is composed of two concentric circles of stones, about 3 ft. 6 in. apart. As most of these stones are broken or embedded in the earth, it is not easy to give their height; but one or two, which have been left standing, are between 5 ft. and 6 ft. high, about 2 ft. 6 in. wide, and over 4 in. thick. Some of them are now only about a couple of feet above ground; but to what extent they were originally covered below it is now impossible to say. The space between these two circles seems to have been bridged over with slabs of stone, and the upper edges of the stones have been all morticed to receive tenons, which, no doubt, kept the horizontal slabs above in their places. All these stones seem to have been worked tolerably smooth and fitted neatly together; so that the whole, when complete, must have had much the appearance of a circular stone bench. The only break in this circle is at its north side, where there is what now seems a recess; but, as the outer extremity is not composed of similar slabs to the rest of the construction, but is, on the contrary, filled up with rude stones and rubbish, it was most probably open, and formed the door of the inclosure. The idea that it was the entrance is strengthened by its being on that side of the circle nearest to the Lion Gate, at which it would be approached by those entering the Acropolis. There is a very remarkable arrangement on each side of this entrance or recess. The upright slabs are so placed as to form inclosures like cells. They are scarcely long enough for a tomb, but a living man could easily be stowed away in one. A prisoner to be tried could be kept there till the Judges assembled. No doubt these stone boxes were also connected with the slabs, like the rest of the circle.

In the drawing I have made, the stones forming the circle can easily be traced, and a fair notion of its present condition may be gained from it. At the same time, the reader's mind will, without difficulty, be able to conceive the restoration of the whole which has been just described. It is something new for the classic student to consider and explain; it is a sort of puzzle ring for archaeologists to put together and solve its meaning. When Dr. Schliemann's work comes out, giving all the minute details of what he found inside, there will then be more material to guide us to our conclusions. At present we can only make a comparison of this structure with what seems to approach nearest to it. The Pnyx at Athens suggests a slight parallel. In a constructive sense there is no comparison, for it is a semicircle, and its heavy excavation into the solid rock, and the ponderous blocks which have been used to build up its supporting wall, place it in quite a different category of architecture from that to which the fragile slabs of the ring at Mycenæ belong. But as a place of public assembly, open to the public, so that all going on within could be seen, and yet separated from the outward crowd by a line of inclosure, the parallel holds good. These are conditions common to both structures. That public places of assembly and justice were held in circular inclosures, we have evidence from Homer himself; and, as his evidence takes us back to the period when Mycenæ existed, his descriptions are of value as bearing on this point. When Nausicaæ is telling Ulysses how he is to follow her to her father's house she mentions the temple of Poseidon, and the forum around it, which she says was "fitted with large stones dug out of the earth." Again, in the shield of Achilles there is a description of an assembly where a case of ransom-money is being tried. The litigants had friends in the crowd, for they "were applauding both, and the heralds were keeping back the people; but the elders sat upon polished stones, in a sacred circle." Such are Homer's words, and they all but describe this remarkable discovery of Dr. Schliemann's. The quotation seems to re-people this spot, and we see the old inhabitants of Mycenæ, the judges, and the herald, and the actors in the trial, and, without the circle, the crowd watching what is taking place within. The close position of this inclosure to the Lion Gate, it may be remarked, is an additional reason for accepting this view of the matter. It was a very primitive period, when the king, or chief, sat in the gate to administer justice; and, later, when the court had to be extended, its judicial duties were still performed in this open, public way. We may suppose that the nearest open space within the gate would be selected, and the lower terrace of the Acropolis, overlooking the city, like the Pnyx at Athens, is exactly suited for the purpose.

It was within this circle that the tombs were discovered by Dr. Schliemann, which yielded such a harvest of ancient treasures of all kinds. Its character as a place of sepulture may have added to its sanctity as a court of justice; for, in the description of the shield of Achilles, the circle was "sacred," but what made it so is not told. The so-called "tombs," which still remain at Mycenæ, are most elaborate constructions; but they have no resemblance whatever to this inclosure of stone slabs. A different purpose has to be found. That here given may be taken as merely suggestive of the use it was applied to. The only explanation I have heard is—and the one, I understand, that Dr. Schliemann is inclined to—that it was a garden over the graves, and this is not at all unlikely; the burial of Manasseh in the garden of his own house become a good confirmatory support of this idea. If Dr. Schliemann can find in Homer any description that would show the form of gardens at that early date, and that a circle was common, few would be found to dissent from the idea. But it will be better not to decide till we hear all he has to say. With Homer at his finger ends, he will, no doubt, be able to give us every quotation that can bear on the subject; and he has details, not yet given to the outer world, which may help to unravel this recently found monument of the past. There is one important point worth noting regarding its construction—the mortice in the upper edges of the slabs would indicate that a pre-existing wooden type had been followed in its erection.

KEY TO PLAN OF THE SITE OF MYCENÆ AND ITS ACROPOLIS.

- | | |
|---|--|
| A. Lion Gate of the Acropolis. | H. Cyclopean Masonry. |
| B. Small Gate. | I. Aqueduct. |
| C. Tomb. | J. Earth thrown out. |
| D. Tomb. | K. Base of Mount Iretus. |
| E. Isolated hill, with masonry on summit. | L. Base of Mount Sara. |
| F. Treasury of Atreus. | M. Ancient Bridge on road to Tiryns and Argos. |
| G. Tomb of Clytemnestra. | N. Village of Charvati. |

KEY TO PLAN OF THE ACROPOLIS OF MYCENÆ.

- | |
|--|
| A.—The Lion Gate, Principal Entrance to the Acropolis of Mycenæ. |
| B, B.—Ancient Walls; very large stones, rudely squared. |
| C, C, C, C.—Ancient Wall of the Acropolis, Cyclopean masonry. |
| D, D, D, D.—Earth thrown over the wall during Dr. Schliemann's excavations. |
| E, E.—Inner Wall (ancient) partly exposed by the late excavations. |
| F, F, F.—Circular inclosure of two rows of stones, which originally were covered with flat stones laid across, something in the form of a lintel, or of a lid, the space between being about 3 ft. 6 in. The circle is about 100 ft. diameter. |
| R.—A Recess in the Circle: it is formed of upright stones similar to those in the circle. Its outer side is blocked up by a rude heap of stones and earth. It may have been the entrance to the circle, or it may have been a recess. |
| G, H, I, J, K.—The Tombs excavated by Dr. Schliemann within the circle. |
| L, L, L, L.—Excavations between the Circle and Outer Wall of the Acropolis. |
| M, M, M.—Inclosures formed of Stone Walls, without any appearance of doors or windows. |
| N, N, N.—Inclosures with Walls discovered during the excavations. This Dr. Schliemann described in the <i>Times</i> as a "Vast Cyclopean House," and he considered it to be the Royal Palace. |
| O.—Tomb excavated by Dr. Schliemann. |
| P.—Old Aqueduct or Drain. |
| Q.—Temporary Wooden House for the military who guard the place to prevent unauthorised persons from digging or removing articles. |
| S, S.—Part of the South-West Wall of the Acropolis, Cyclopean masonry. |
| T.—One or two of the Covering Slabs still remain in their place at this point. |

MUSIC.

THE OPERA SEASON.

Mr. Gye's prospectus announces the opening of the Royal Italian Opera for Tuesday, April 3. Most of the principal vocalists of previous seasons are re-engaged, including those special favourites, Madame Adelina Patti and Mdlle. Emma Albani; and Mesdemoiselles Zare Thalberg, Bianchi, Marimon, D'Angeri, Smeroschi, Mesdames Saar and Dell' Anese, Mademoiselle Cottino, Madame Scalchi, Mademoiselle Ghiotti, M. Capoul, Signori Nicolini, Marini, Manfredi, Pavan, Piazza, Sabater, Rossi, Carpi, Graziani, M. Maurel, Signori Cotogni, Baggiolo, Capponi, Ciampi, Ghiberti, Scollara, and Raguer.

New appearances are to be made by Mdlles. Avigliana, De Synnerberg, Sonino, Dotti, De Riti, and Sarda; Signori Gianini, Gayarre, and Caracciolo. Signor Tamagno's name is announced doubtfully, law proceedings being in progress in consequence of his non-appearance last season, as promised.

The orchestra and chorus are to maintain their reputation, although some few individual changes have been made in their constitution. Signori Vianesi and Bervignani again alternate the duties of conductor, Mr. Carodus continues to be principal first violin and soloist, Mr. Betjemann leader of the ballet, and Mr. Pittman organist. The office of stage manager, vacated by the death of M. Desplaces, is to be filled by Signor Tagliacolo, whose name accordingly disappears from its accustomed place in the list of vocalists.

In the way of novelties, three at least out of the following operas are promised:—Verdi's "Les Vêpres Siciliennes" (the chief character by Madame Adelina Patti); a grand opera seria, composed by the Duke of Saxe-Coburg Gotha, entitled "Santa Chiara"; a grand new romantic opera, "Nero," by Anton Rubinstein; Nicolai's comic opera, "Le Vispe Comare di Windsor" ("Die Lustigen Weiber von Windsor"); and Wagner's grand opera, "Il Vascello Fantasma" ("Der Fliegende Holländer"), (the principal character by Mdlle. Albani).

Those clever scenic artists, Messrs. Dayes and Caney, will continue to exercise their pictorial skill; and Mdlle. Girod will again appear as a principal dancer, the first appearances being promised, in this department, of Mdlles. Helena and Laura Reuters.

The Floral Hall (the annexe of the Royal Italian Opera-House) will be used, as heretofore, for morning concerts, under the direction of Sir Julius Benedict.

Mr. Mapleson's season is to begin on Saturday, April 28—this year at Her Majesty's Theatre, in the Haymarket.

The specialty of last week was the first performance at the Crystal Palace, on Saturday, of the "Elegiac Overture" of Herr Joachim, which was produced on the previous Thursday week, at Cambridge, on the occasion of the composer receiving the degree of Doctor of Music from the University. The composition referred to has already been spoken of in reference to its earliest public hearing. Again, on Saturday, it received a performance worthy of its merits. Madame Schumann's fine rendering of her late husband's pianoforte concerto (in A minor) was another special feature of the concert, which included Schubert's unfinished symphony in B minor; Handel's "Largo" for solo violin (Mr. T. Watson), orchestral strings, harp (Mr. Lockwood), and organ (Mr. Deane)—this piece was encored; and Auber's overture to "La Sirène." The vocal music consisted of Mr. Gadsby's clever new setting of Longfellow's lines (from "Hiawatha"), "Onaway, awake, beloved," well sung by Mr. Barton McGuckin, and accompanied by the composer; and other vocal pieces, rendered by the same singer and Madame Antoinette Sterling.

We last week referred briefly to the performance of Bach's "Passion Music" by the Royal Albert Hall Choral Society, on the Thursday, conducted by Mr. Barnby. The choruses—especially "Have lightnings and thunders" and the grand old Lutheran chorales—were most impressively given; and the solos were very efficiently rendered by Miss Anna Williams, Madame Antoinette Sterling, Mr. Cummings, Mr. Kempton, and Mr. Thurley Beale. Among the several effective pieces of this class may be specified the contralto solo, "Have mercy upon me," expressively sung by Madame Sterling, the elaborate violin obbligato having been skillfully executed by Mr. Pollitzer. Other important incidental obbligati passages were finely played by Mr. Svendsen (flute). Mr. Parker accompanied the recitatives on the pianoforte, and Dr. Stainer presided at the organ.

The second subscription concert of Mr. Henry Leslie's choir took place, at St. James's Hall, on Tuesday evening, when the selection included a repetition of Bach's sublime motet for double choir (unaccompanied), "Sing ye to the Lord"—produced at the first concert, as noticed by us—other fine works, secular as well as sacred, choral and solo, having made up an interesting programme.

A posthumous manuscript trio, by Balfe, for pianoforte, violin, and violoncello—was performed at last Saturday's Popular Concert by Mdlle. Krebs, Herr Joachim, and Signor Piatti. The work is bright and pleasing in character. Each movement was much applauded, and the "scherzo" was encored. We shall probably soon have another opportunity of speaking of the trio. The last afternoon performance takes place to-

day (Saturday), and the last evening concert of the season on Monday, this being the director's benefit. An extra concert, of great interest, was given on Wednesday afternoon, when the programme comprised Beethoven's posthumous quartets (op. 127 in E flat and op. 133 in F), rendered by MM. Joachim, L. Ries, Straus, and Piatti; the same composer's solo pianoforte sonata dedicated to Count Waldstein, played by Madame Schumann; and vocal pieces sung by Herr Henschel.

The concert given at St. James's Hall, yesterday (Friday) week, in aid of that excellent institution the Royal Normal College and Academy of Music for the Blind, was one of very great interest. It included the first performance in London of the picturesque instrumental movement, "Der Ritt der Walküren" (from "Die Walküre," the second of Wagner's four "Nibelungen" operas), as specially adapted by the composer for concert use. This necessitated the engagement of a band of unusually large proportions, upwards of one hundred in number, the basis having been the fine orchestra of the Crystal Palace, with Mr. Manns as conductor. Beethoven's seventh symphony (in A) was given with grand effect; Herr Joachim played, with his accustomed excellence, the same composer's violin concerto, and, with his clever young pupil, M. Henri Petri, two movements from a duet by Spohr—the instrumental selection having been completed by Tchaikowsky's pianoforte concerto, brilliantly executed by Herr Hartvigson. Wallace's song, "Sweet and low," was expressively sung by Miss Reece, who was associated with Misses Campbell and Jones in Mendelssohn's trio, "Lift thine eyes;" and some part-songs were nicely sung by a select choir, all these vocalists being pupils of the college. Herr Henschel also contributed Handel's air, "Revenge! Timotheus cries."

Mr. George F. Gear held his first concert on Tuesday afternoon, at St. George's Hall. He was assisted by Madame Edith Wynne, Madame Patey, and Mr. Edward Lloyd; by Herr Oberthur, on the harp; Herr Wiener, on the violin; and Herr Daubert, on the violoncello—Mr. Wilhelm Ganz and Mr. Gear conducting.

Another successful season (the eleventh) of the London Ballad Concerts closed on Wednesday evening, with a programme of the usual varied and popular interest.

Mozart's Twelfth Mass and Rossini's "Stabat Mater" were given at the Crystal Palace on Wednesday evening.

The third concert of the Philharmonic Society, on Thursday evening, was rendered special by the production (for the first time in London) of Schumann's music to "Faust" (the third part). Of the performances we must speak next week.

The programme of the Classical Subscription Concerts, now in progress at the Langham Hall, are of sterling interest. String quartets and pianoforte music by the great masters form prominent features. The performances at the second concert included a string quartet by Schubert, and trio by Beethoven, and pianoforte solos, classical and brilliant, played by Mr. Bond Andrews (from the Leipzig and Vienna Conservatoires). The selection for the third concert—on Tuesday next—comprises a quartet by Brahms, Beethoven's "Serenade" (for string trio), Mr. W. Macfarren's sonata for piano and violoncello, and other pieces. Miss Turner-Burnett will be the solo pianist on this occasion. Mr. Pollitzer and Mr. A. Kummer are, alternately, the leading violinists; Mr. A. Pettit, Mr. A. Brouil, and Mr. Boatwright, violoncellists; and Mr. Zerbin sustains the viola part. The list of vocalists engaged for the two series of concerts include the names of Mdlles. Thekla, Friedlander, and Redeker; Madame Patey, Mr. E. Lloyd, Mr. Shakspeare, and Mr. C. King. The first series is announced to extend to the beginning of July, the second series beginning on Sept. 11, and ending early in January.

The concert of the Sacred Harmonic Society yesterday (Friday) evening consisted of a performance of Haydn's "Seasons."

At the same time an evening concert of classical chamber music was to take place in the concert-room of the Royal Academy of Music, the programme consisting of string quintets by Beethoven and Schubert, Brahms' sextet in G, and vocal pieces contributed by Mdlle. Thekla Friedlander. A concert of a similar character is to be given next Tuesday evening.

Yesterday (Friday) evening the eighth annual concert of the Metropolitan and City Police Orphanage was given, at St. James's Hall, in aid of that institution's funds, by which at present 201 fatherless children are benefited. The artists engaged for the occasion were Madame Edith Wynne, Miss Banks, Miss Emily Mott; Messrs. Sims Reeves, Lloyd, Winn, and Thomas; with Mr. Sidney Naylor as conductor.

To-day (Saturday) afternoon Miss Lillie Albrecht gives her fourth matinee musicale, at 59, Lowndes-square, Belgravia, by permission of Mr. Eyre.

On Good Friday "The Messiah" will be performed by the Royal Albert Hall Choral Society; and there will be a sacred concert at the Crystal Palace.

The Royal Albert Hall Amateur Orchestral Society will begin its fifth season at St. James's Hall, on April 7, when the performances will be given in aid of the funds of the London Society for Teaching the Blind.

The 139th anniversary festival of the Royal Society of Musicians will take place, at the Freemason's Tavern, on April 18. Lord Skelmersdale will be the president of the day.

A series of Wagner concerts is to be given at the Royal Albert Hall, conducted by the composer, beginning early in May. The performances will probably be given on alternate days of the week, extending over a fortnight. Herr Wilhelmj is to be the leading violinist, a position which he held at the performance of the "Nibelungen" series of operas, at Bayreuth, last autumn. It is expected that some of the music of these works will be given at the Albert Hall concerts.

The Mayor of Leeds, who is president of the Leeds Musical Committee, has received a letter announcing that her Majesty has consented to become the patron of the festival to be held next September.

The thirteenth anniversary of the Home for Little Boys was held on Monday evening, at the Royal Albert Hall, where an ample musical programme was performed. The Lord Mayor and Lady Mayoress, with the Sheriffs, attended in state. A special appeal was made for additional subscriptions. The institution, which is situated at Farningham, now contains 320 little boys, who would otherwise be homeless and destitute.

Mr. Edwin Chadwick, C.B., gave evidence, on Monday, before the Select Committee of the Metropolitan Fire Brigade. He stated that he appeared from the committee of the Society of Arts, and attended to give evidence as to the best means of preventing fires. He believed that better protection against fires, at less cost to the ratepayers, would ultimately be the result of introducing unity of action, constant service, high pressure, and greater economy in the distribution of water. Mr. Chadwick added that he would recommend the purchase of the existing companies by some public authority.

DR. SCHLIEMANN'S EXCAVATIONS
FROM A SKETCH BY

IN THE ACROPOLIS OF MYCENÆ.

BY SPECIAL ARTIST.

THEATRES.

The management of Drury Lane, wisely regardless of the newspaper correspondence between the author of "Haska" and the solicitors of the young lady who had purchased the right of appearing in the title-role, have proceeded to strengthen their bill by producing "The Corsican Brothers" as an after-piece. Mr. H. Sinclair has appeared in the double part of Louis and Fabian dei Franchi, and sustained it with picturesque effect. Mr. Howard Russell, also, as Chateau Renaud, was duly impressive and impassive. We have a word of commendation for Miss Murielle as Emilie de Lesparre, and another for Miss Cicely Nott as Madame dei Franchi. The celebrated ball at the Opera was illustrated by an additional ballet, well calculated to give increased attraction and popularity to the performance. To-night, "The Colleen Bawn" will be revived.

A new comedieta was on Saturday produced at the Globe. It is entitled "The Magpie and Thimble," and is written by Mr. Thomas Smelt. The materials are exceedingly simple. The heroine, Mrs. Doveton (Miss Telbin) was, when a spinster, a barmaid, a circumstance which, now she is a wife, she wishes to forget. The chief actor in the embarrassing incidents that follow is Mr. W. H. Stephens, a deaf old gentleman, who visits the house, not knowing that the former inn has been converted into a private residence, and treats the lady as the barmaid who had been accustomed to serve him. Having mislaid his ear-trumpet, Mr. Ruggles cannot be made to understand the altered position of matters. Out of this slender hint Mr. Stephens has elaborated a rich portrait, which will be remembered to his credit.

At the Aquarium Mr. W. S. Gilbert's version of "Great Expectations" has been revived with some success. As a dramatised police case, the performance has both interest and merit. Some of the acting was superior. Thus Miss Maggie Brennan as Pip and Miss Kate Manor as Joe Gargery's wife stand out from the canvas as prominent figures. It requires the spectator, however, to have read the tale and studied the characters to thoroughly appreciate the romantic argument of the adaptation and the special points of the performance. These are many and also minute, requiring close attention. Particularly, Mr. Belford's Orlick deserves a severe critical analysis; nor should Mr. E. F. Edgar's Magwitch be carelessly observed. The performance is illustrated by good scenery, painted by Mr. Perkins.

On Monday, at the Olympic, Mr. Henry Neville took his benefit, which was well patronised. "The Wife's Secret" was the play selected for performance. Mr. Henry Neville supporting the character of Sir Walter Amyott, and Miss Bella Pateman that of the suspected wife. Both parts were satisfactorily sustained.

Mr. and Mrs. German Reed are usually fortunate in the production of the various pieces with which they are accustomed to delight the fashionable audiences by whom they are patronised. Their latest production at St. George's Hall is of a more elaborate structure than usual, and displays considerable ingenuity on the part of Mr. Gilbert A. Beckett, who has furnished the libretto, and of adaptive skill in Mr. Alfred Cellier, who has supplied the music. It is entitled "The Two Foster Brothers." The charm of the play lies in the contrast of character. One brother, with a title, detests all conventional observances, and the other, a mere peasant, aspires to rank and dignity. Both, in the end, are glad to return to their original positions, and to find happiness in the paths appointed for them by Providence. Sir Talbot Towers found an admirable representative in Mr. Conney Grain, and James Winzle, the bailiff, in Mr. Alfred Reed. Mrs. German Reed appears as Lady Fyddleton, a getter-up of banquets and festivities, and the especial horror of the Baronet. The scene in which this instructive story is enacted consists of an old Somersetshire farmhouse, painted by Messrs. Gordon and Harford, the kitchen of which becomes the arena of various and eccentric action. Much of it is in a true comic vein; and the whole forms a very agreeable entertainment, sure to become popular.

MUSICAL PUBLICATIONS.

"Nachklänge" is the title of a series of pianoforte pieces (op. 34) by Heinrich Hofmann, a composer whose music has lately attracted much favourable notice in Germany. That this is justified appears to be proved by the pieces now referred to, nine in number, each with a distinctive and suggestive title, some in an expressive, others in a vivacious and playful style. Nearly all are distinguished by marked individuality of character, and are replete with charming traits of fancy, melody, and rhythmical variety. They are not only highly interesting in themselves, but also form excellent studies of execution, phrasing, and expression. Another work of similar merit, by the same composer, is a set of four short pianoforte duets, entitled "Silhouettes from Hungary," in which some striking national melodies are happily treated. These works are published by Messrs. Witt and Co., of Conduit-street, who have also issued (among other publications) a set of "Mädchenlieder," by Hermann Scholtz, eight very pleasing short pianoforte pieces, in a lyrical style.

On Monday night the Solicitor-General for Scotland addressed the St. Andrew's Students' Conservative Association. He said that there were falsehoods and tricks played in connection with political interests (on both sides) that would imperil men's positions if done in affairs of private life. He strongly protested against such a course, and urged upon them to act upon fixed and general principles.

In addressing a gathering at Botley, on Monday, Mr. Beach, M.P., President of the Central Chamber of Agriculture, spoke with great regret of the reappearance of the cattle plague, and said that if the Privy Council had adopted the resolutions presented by the chamber last year to the Duke of Richmond and Gordon, the plague would not have reappeared. The Government must be urged to adopt more stringent regulations in regard to the importation of foreign cattle.

There have been several art-sales lately. In the pottery and porcelain belonging to the Earl of Limerick, sold at Messrs. Christie's, on Friday, the 16th, there were some interesting specimens of old English pottery, and some tolerably good specimens of Worcester and Chelsea china; and on the same day some valuable specimens of old Dresden and Oriental china were sold. On Saturday last Messrs. Christie and Co. sold a number of valuable pictures from different collections, the day's sale realising £11,400. The pictures and Oriental objects removed from Gaunt's House, near Wimborne, Dorset, were sold at Christie's, on Saturday, the total of the day's sale being £11,468. The sale of the fifth section of the Bohn collection of old Sèvres china and French faience, with a large number of various examples of almost every kind of porcelain and faience, except the German and Italian, and many fine specimens of ancient glass, both engraved and enamelled, began, on Monday, at Christie's, and was continued on the three following days.

ROYAL INSTITUTION LECTURES.

THEORY OF MUSIC—HARMONY.

Dr. William Pole, F.R.S., in his fifth lecture, given on Thursday week, resumed the consideration of the theory of harmony with illustrations of the simplest combinations of two notes sounded together, and specially noticed a physical phenomenon attending them—namely, the production of a resultant third sound, which, having been observed and used by the celebrated violin-player Tartini in the middle of the last century, has been usually termed the "Tartini harmonic." Helmholtz, after investigating its nature and showing its bearing on harmonical combination generally, has named it "the difference tone." The lecturer then passed on to the combinations of more notes than two, which are necessary to produce practical harmony, adverting to the differences of opinion among writers as to the treatment of chords, and the many conflicting attempts to account for their derivation on natural principles. He said that the easiest way of studying their character is to analyse the simple elementary binary combinations of which they are composed, as these will give a clear idea of the nature of the complex combination. Such a mode of analysis involves no theory or hypothesis, being simply a statement of facts, and in accordance with philosophical analogy in other scientific investigations. He then went through the list of the chords in ordinary use, showing their character on the pianoforte, and illustrating their degrees of consonance or dissonance by a tabular statement. The simplest chord is the well-known major triad, or common chord major, which has the peculiarity of being contained in the most prominent natural harmonics of a compound sound, and may therefore be said to be dictated by nature. It also possesses, naturally, one note of more importance than the others, corresponding to the fundamental of the compound sound, which it is customary to call the root of the chord (the "générateur" of Rameau). The next important chord is the minor triad, which was shown to have no natural origin, except very indirectly, and therefore may be considered to be an artificial combination, although many musicians hold a different opinion. These two triads, termed "concorda," are the only consonant combinations, but they form the chief element of music, and may be used alone with considerable effect, being very appropriate for church music and other music of a grave character, of which Dr. Pole gave a striking specimen. Discordant harmonies were next considered, being necessary to give variety to modern music, and the aesthetic principle warranting their admission was explained. This was followed by specimens of a series of dissonant chords ordinarily used, selected from the works of Handel, Beethoven, and Mendelssohn, with comments on their nature and peculiarities. These included the diminished and augmented triads, the dominant, diminished, and other chords of the seventh, and the augmented sixth. Besides these there are other dissonances, which are not substantive chords, but arise in an accidental way, and are tolerated by the ear on an aesthetic principle easy of explanation.

ARMENIA AND ARARAT.

Dr. James Bryce began his discourse on the results of his visit to Armenia, given at the Friday evening meeting on the 16th inst., with some general remarks on the interest attaching to Armenia and the Caucasian countries, their singular physical structure, their great variety of races, religions, and languages, and the commanding position of Transcaucasia, strategically and commercially. Armenia is the meeting-point of three great mountain systems, the Caucasus, the Taurus, and the mountains of Iran. The Caucasus, a long, comparatively narrow, very steep chain of great persistent altitude, is historically important as separating the nomad steppe people from the more civilised races to the south. A link descending from the Caucasus at Suram separates Imeritia from Georgia. Armenia consists of bare, dry, high plateaux, with lake basins, mostly volcanic. Its climate is one of extremes—being intensely cold in winter, from its height and the severity of north-east winds, and very hot in summer, especially towards the Caspian. There is a remarkable contrast in the moist climate on the west side of the Suram ridge and the dryness of the lower Kur and Aras valleys, and wood and water are consequently scarce in Armenia, except in the Aras valley. Of the five races inhabiting Armenia, the Armenians themselves, about four millions, forming the bulk of the agricultural population, are active, peaceful, and industrious, their church being the oldest of the Latin churches; the Persians, chiefly dwelling in the towns, such as Erivan, were described as deceitful and stealthy. The Tartars or Turks are the chief carriers, and often brigands; the Kurds are pastoral nomads and robbers, wandering over the mountains; and the Russians are mostly official residents in the town. These races live side by side, but do not mingle, being kept apart by religious differences. Ararat, the sacred centre of Armenia, and by the people held to be the centre of the world, is not known to them by that name. The Armenians call it Masis and the Persians Kuh-i-Nuh (Mountain of Noah). The tradition that it is the spot where the ark rested is as old as the time of Josephus, which Dr. Bryce considers perfectly natural, since it is not only the highest peak between the Caucasus and the Hindoo Koosh, but the most prominent single isolated summit anywhere in Western Asia. Few peaks in the world are so impressive, owing not only to its isolation, but to the low level from which it rises, the Aras plain being only 2600 ft. above the sea level, thus giving a sheer height of above 14,000 ft. from base to top; whereas in the Alps we never get more than about 10,000 or 11,000 ft. Ararat is obviously a long since extinct volcano, there being no evidence of activity, even in the lower slopes, within historical times. The rocks are all volcanic—trachytes, dolerites, or basalts, tuffs, and in some places scoriae and obsidian. There is no crater on the summit, but several well-defined minor craters on the north slope and on the S.E. slope towards Little Ararat. The snow-line is remarkably high, considering the latitude—probably about 13,500 ft. This is considered to be due to the isolation and the dryness of the air. There are few springs or streams, and a comparatively scanty flora. In conclusion, Dr. Bryce gave a brief account of his ascent of the mountain, made (on Sept. 12, 1876) from Aralykh, a Russian military post at the east foot of the mountain. The first night he slept at a height of 7500 ft. The next morning he started with a party of Cossacks and Kurds, most of whom refused to ascend above 12,000 ft.; two only went on, but decisively stopped at about 13,500 ft. The rest of the ascent was made alone. The effect, on arrival at the snowy summit, was most solemn and impressive—the view extending from the Caucasus, on the north, to the Tigris valley about Mosul and Nineveh, on the south. The height was too great to permit the recognition of any definite object. In closing his discourse, Dr. Bryce alluded to the future of Armenia and Russian Transcaucasia, and to the strategic and commercial importance of these regions to Russia.

EFFECTS OF THE FRENCH REVOLUTION ON ENGLISH LITERATURE.

Professor Henry Morley began his fourth lecture, given on Saturday last, with additional remarks upon Wordsworth,

whom he characterised as the great poet of nature, and specially of man, and justly entitled to rank with Chaucer, Spenser, Shakespeare, and Milton. In his "Prelude" and "Excursion" Wordsworth describes how he came to have a more judicious view of the worth and dignity of individual man; to put aside the mere abstract creation of the brain and to set up the highest attainable ideal for the millions to strive after, generation after generation. Thus, in 1814, he claimed education for every English child, a right but just now recognised. Only a thousand copies of the "Excursion" were sold in thirteen years, and he encountered and lived down much ridicule and opposition. Professor Morley next narrated the successful establishment of the *Edinburgh Review*, in 1802, by Francis Jeffrey, Sidney Smith, and other young ardent spirits, anxious for the gradual reform of the political and literary evils of the time. This was followed by the setting up of the *Quarterly Review*, in 1809, which became the organ of the opposite party, both reviews doing good service in the advancement of civilisation. After noticing the repression of the free exchange of thought in 1814, through the newspaper stamp and the duties on advertisements and paper, the Professor commented on the novels of Jane Austen, Wordsworth's contemporary, who, with very limited experience, yet with much genius and wise simplicity, in her "Sense and Sensibility," written in 1797, but not published till 1811, began the reaction against the false ideal of the Revolution in regard to the relations of man to man, and, accurately describing life as she saw and felt it, showed the beauty of humanity in every form of life. Thus, in her "Emma," she points out the error of our wanting others to see and act from "our point of view," instead of "living their own lives." Proceeding to the more emotional writers, Professor Morley noticed the career of Byron, beginning with his clever and audacious "English Bards and Scotch Reviewers," and commenting upon his "Childe Harold," in which the poet pours forth his generous indignation against the evils he had witnessed in his travels in Spain and Greece, and expressed that earnest sympathy with oppressed nationalities, in whose cause he ended his days. The publication of the first two cantos struck a chord in English bosoms, and, as the poet said, he "awoke one morning and found himself famous." Yet, said the Professor, the emotional Byron, the poet of wild satiric humour, threw off all restraint. It was Shelley who aimed at the purest ideal—nothing less than the precepts of the "Sermon on the Mount." This he declared in the introduction to the "Revolt of Islam":—

So without shame I speak: "I will be wise,
And just, and free, and mild, if in me lies
Such power; for I grow weary to behold
The selfish and the strong still tyrannise
Without reproach or check." I then controlled
My tears; my heart grew calm; and I was meek and bold.

If he had been more judiciously treated by his teachers, Shelley's life might have been very different. The poetry of Keats expresses his deep sense of beauty. He was thus driven back to the Elizabethan poetry, and he held that the first in beauty should be first in power. Finally, the Professor noticed the works of Carlyle, beginning with his vigorous translation of Goethe's "Wilhelm Meister," and his defence of its author from various misconceptions; his life of Schiller, and especially his "Sartor Resartus," in which, as it were behind a comic mask, he pours out his soul in denunciations of shams, urging every man and woman to do earnestly the duty which lies nearest to them—according to the highest ideal. This is the essence of the teaching of other great writers of our day, such as Tennyson and Browning. The progress has been slow, but it is sure.

THE MUSCULAR SYSTEM.

Professor Alfred H. Garrod, F.R.S., in his ninth and concluding lecture on the Human Form, last Tuesday, began with remarks upon the position and nature of the superficial muscles of the chest and abdomen, including the rectus, so conspicuous in the middle line in the front of the trunk by its transverse intersections, closely resembling the abdominal ribs of crocodiles, which forms so prominent a feature of the body in action. The great interior muscle, termed the diaphragm, which is peculiar to mammals, and which forms the comparatively rigid floor supporting the heart, was next described and illustrated; its important action in respiration, and its influence upon the contour of the body, being specially noticed. Reference having been made in this and other respects to diagrams, and a large statue of the Discobolus, explanations were given of the proportionate lengths of the different parts of the body, as based upon the laws laid down by Vitruvius, Leonardo da Vinci, and others, which were exhibited in drawings. Finally, the Professor showed that several of the elements of form, such as the double chin and dimples, are not the result of muscular action, but depend upon the relations between the development of the adipose tissue, or fat, and the movements of the skin upon which it is deposited.

No lectures will be given in Passion (or Holy) and Easter weeks.

Mr. J. Dixon, the engineer to whom Mr. Erasmus Wilson has intrusted the task of removing Cleopatra's Needle from Alexandria to London, gave a lecture on the 15th inst., at a meeting of the Civil and Mechanical Engineers' Society, on the means he proposes to employ for its transport and the plan for its erection.

Dr. George Birdwood, whose many services to our Eastern Empire were recently recognised by the high distinction of the Star of India, has added to them by his useful investigation of the spirit and character of the "native Indian press." Yesterday week he gave a lecture on the subject at the Society of Arts, showing that a full survey of the native press gives us no reason to regret the almost unlimited liberty which the Government extends to it. About 200 native journals in all see the light; but the best and most successful of them, the *Kart Gostar*, has a circulation of only sixteen hundred copies; and the others print, with one or two exceptions, from five hundred to fifty. It is in these little and limited issues alone that anything like disaffection is found, but the vast preponderance of sentiment in the Indian journals is loyal and contented, although sufficiently critical. In regard to the tone of the Indian press upon the Eastern Question, Dr. Birdwood gave extracts which prove how ardently and anxiously the native Mohammedans watch the policy of the European Governments towards the Porte.

Mr. Samuel Morley, M.P., presided yesterday week over a discussion, at the Artisans' Institute, Castle-street, on the subject of Work and Wages, and spoke of the facility with which working men might, if they chose, acquire capital; and on Saturday Mr. Lloyd Jones gave the first of two addresses on the Principles and Policy of Trades' Unions, at Exeter Hall—Mr. Macdonald, M.P., in the chair—strongly commending arbitration and conciliation in the settlement of trade disputes.

Last Saturday afternoon the Geologists' Association paid their first visit for the season to the British Museum. Proceeding at once to the North Gallery, the members were there met, according to appointment, by the venerable Professor Owen, C.B., F.R.S., Superintendent of the Natural History

Department, who at once began to discourse to them and the multitude of other listeners, who flocked to the spot from all parts of the building, on the Extinct Marsupials of Australia.

The free Saturday evening lecture at South Kensington was given by Dr. Alder Wright, on the Useful Properties of Ordinary Metals.

An address upon the water supply was delivered, on Saturday evening, by Professor Corfield, at the rooms of the Society of Arts—the chair being taken by the Right Hon. James Stansfeld, M.P.

Dr. Richardson presided at a meeting of the Social Science Association, Adam-street, Adelphi, on Monday, when Mr. Alfred Haviland, M.R.C.S., read a paper on Physical Geography in Relation to Sanitary Science, and the Valley System in Relation to Disease.

The third of the present series of Cantor lectures on the Chemistry of Gas Manufacture was given on Monday evening, at the Society of Arts, by Professor A. Vernon Harcourt, F.R.S.

OBITUARY OF EMINENT PERSONS.

COLONEL DIGBY.

The death is announced of Colonel G. S. Digby, C.B., Commandant Royal Marine Artillery. He entered the service in 1842, and attained the rank of Colonel-Commandant in May last. He served in the Crimean War, where he was in command of the Royal Marine Artillery in the flotilla of mortar-boats employed against Sebastopol during its siege and fall; also at the bombardment and surrender of Kinburn, was several times mentioned in despatches, and was in possession of the Crimean medal with clasps, the orders of the Legion of Honour and of the Medjidie, and the Turkish medal. He was nominated a Companion of the Order of the Bath in 1857.

CAPTAIN OAKELEY.

Henry Oakeley, Esq., of Oakeley, in the county of Salop, J.P., Commander R.N., died, on the 12th inst., at his seat, near Bishop's Castle, aged sixty. He was fifth son of the Rev. Herbert Oakeley, of Oakeley, Prebendary of Worcester, and succeeded to the estates and representation of the ancient family of Oakeley at the death of his brother, the Rev. Arthur Oakeley, M.A., of Oakeley. The Oakeleys of Plas Tan-y-Cwlich and the family of Sir Charles William Atholl Oakeley, Bart., are younger branches of Oakeley of Oakeley, being descended from William, the third son of William Oakeley, Esq., of Oakeley, M.P., by Barbara Walcott, his wife, niece of James, first Duke of Chandos. Captain Oakeley married, in 1847, Emily Letitia, daughter of Colonel Hamelin Trelawny, Governor of St. Helena, and leaves issue.

MR. PEMBERTON, OF TORRY HILL.

Edward Leigh Pemberton, Esq., of Torry Hill, in the county of Kent, died, on the 12th inst., at 29, Eaton-place, in his eighty-third year. He was younger son of Robert Pemberton, Esq., barrister-at-law, by Margaret, his wife, eldest daughter and coheir of Edward Leigh, Esq., of Bispham Hall, in the county of Lancaster, and succeeded, Oct. 7, 1867, to a considerable portion of the estates of his elder brother, the Right Hon. Thomas Pemberton-Leigh, Lord Kingsdown, the eminent equity lawyer. He married, Dec. 23, 1820, Charlotte, daughter of William Compton Cox, one of the Masters in Chancery, and had six sons and three daughters. His eldest son, Edward Leigh Pemberton, Esq., is M.P. for East Kent.

The deaths are also announced of—

General John Spink, K.H., Colonel of the 2nd Foot, who entered the Army more than seventy years ago.

Admiral Sir Edward Belcher, K.C.B., F.R.S., on Sunday, aged seventy-eight. His portrait will be given next week.

Colonel Tudor Lavis, Madras Artillery, on the 11th inst., aged seventy.

Henry Jeremiah Smith, Esq., of Beabeg, in the county of Meath, on the 13th inst., aged seventy-three.

The Rev. James Blomfield, B.D., Rector of Orsett, Essex, and J.P. for that county, on the 10th inst., aged eighty-two.

The Rev. Richard Smith, B.D., Rector of Newchurch, Kent, and Rural Dean, on the 15th inst., in his seventy-second year.

Lady Sophia Elizabeth Dumaresq, widow of Lieutenant-Colonel Henry Dumaresq and aunt of the present Earl of Lanesborough, on the 12th inst.

The Hon. Jeffery Charles Amherst, late Captain Rifle Brigade, fourth son of the present Earl Amherst, on the 14th inst., at Cannes, aged thirty-two.

Lieutenant-Colonel J. Gillespie, 4th Punjab Cavalry, second son of Thomas Gillespie, Esq., of Ardoch, on the 7th ult., at Dhera, Ghazee Khan.

Alexander Eugene Mackay, Esq., M.D., F.R.C.P., Deputy Inspector-General of Hospitals and Fleets, on the 10th inst., aged fifty-five.

Charles Cowden Clarke, on the 13th inst., in his ninetyeth year, at Villa Novello, Genova, Italy. We shall give Mr. Clarke's portrait next week.

Lieutenant-Colonel Alexander Wilton Dashwood, late of the 19th Lancers and 71st Highlanders, on the 15th inst., at Shenley Grange, Herts, aged eighty; he was grandson of Sir James Dashwood, second Baronet, of Kirtlington.

Louisa Chapman, wife of William Chapman, Esq., of South-hill, in the county of Westmeath, J.P. and D.L., daughter of the late Colonel Vansittart, of Shottebrook Park, Berks, and sister of Lady Vaux of Harrowden on the 13th inst.

Henry Dumbleton, Esq., of Thornhill Park, Hants, formerly of the H.E.I.C. Bengal Civil Service, on the 9th inst., in his ninety-fifth year. He married Ellen, daughter of John Norris, of Hughenden, Bucks, and leaves, with other issue, Henry Dumbleton, of Hall Grove, Bagshot, Surrey.

Mr. Samuel Morley, M.P., who presided, last week, over a public meeting convened by the British Women's Temperance Association, in the Memorial Hall, Farringdon-street, spoke of the necessity of restricting the sale of intoxicating drink.

The biennial ball of the Jews' Deaf and Dumb Home, in Walmer-road, Notting-hill (one of the two institutions founded by the late Baroness Meyer de Rothschild for teaching the dumb to speak by the method of lip reading), was held on Monday night, at Willis's Rooms, and £1600 was collected.

The annual meeting of the Royal Alfred Aged Merchant Seamen's Institution was held, on Monday, at the Mansion House—the Lord Mayor presiding. The institution, which was opened by the Duke of Edinburgh, about ten years ago, at Belvedere, Kent, is for the reception of sailors above sixty-five years of age, and last year 108 inmates and 131 out-pensioners were recipients of its benefits. Mr. Kemp-Welch (president of the institution), Captain Shuttleworth, R.N., Captain Maude, R.N., Admiral Sir B. Collinson, and other gentlemen were among the speakers, by whom earnest appeals for support were made.

CHESS.

TO CORRESPONDENTS.

All communications relating to this department of the Paper should be addressed to the Editor, and have the word "Chess" written on the envelope.

R B (Leipsic).—We are obliged for the trouble you have taken, but problems in ten moves are unsatisfactory.

J K (Norwich).—The problem shows some promise, but it is too simple in theme and commonplace in treatment for our readers.

J G C (Tottenham).—Thanks for the amended position. It shall have early attention.

E P V (Glasbury).—The K can castle after it has been checked, provided it has not been moved. We do not know whether or not problems are solved by good blindfold players without sight of the board.

R R (Paris).—Staunton's last work, "Chess Theory and Practice," was published by Virtue and Co., Paternoster-row.

B R S (Leeds).—For every Pawn advanced to the eighth square you can claim a Queen or any other piece, except, of course, a King.

A B (West Brompton).—The correction of No. 2 is noted. Thanks for the problems.

J T C C (Trinity Coll.).—We are obliged for the information contained in your note.

A M (Moscow).—The game is very acceptable, and we shall be glad to receive further specimens of M. H.'s play.

P S B (Shrewsbury).—The King can legally castle in the position described.

Answers received from A. Dendro, E. H. Gittke, W. Nelson, S. W. Casserley, A. Beck, and J. U. G.; and Games received from T. Bourne and A. Maude.

CORRECT SOLUTIONS OF PROBLEM No. 1725 received from Dolly, P. M. Hall, and A. Corfield.

CORRECT SOLUTIONS OF PROBLEM No. 1724 received from G. Rushby, S. Sircorn, Cant. H. Burgess, J. Keeble, R. H. Brooks, H. M. Pridaux, P. S. Shenale, H. Roe, Pug, Mountain Top, Copiapino, J. Neumann, C. E., and A. Corfield.

CORRECT SOLUTIONS OF PROBLEM No. 1723 received from Triton, Scott, T. R. Y. W. Nelson, H. B., A. G. R. Only Jones, S. Roughhead, Simpax, H. Burger, J. S. W. Mechanic, Long Stop, J. Williams, Black Knight, B. E. Skene, J. Winton, Leonora and Lena, J. Keeble, Dolly, G. Rushby, J. E. Imbrey, Vig, A. Wood, P. Dennis, J. Harnden, Pug, D. Vawdrey, Société Littéraire de Gand, W. Alston, Tallish, O. D. S. Westera, L. S. R. Tippet, Tallish, R. T. King, Paul's Root, W. Lee, E. Worsley, Harrovian, Littlego, P. Myers, B. Lewy, Owllet, G. H. V., E. H. B. V. H. Beaumain, Drapers' College, E. P. Vulliamy, E. L. G., E. Lord, D. H. J. Woods, B. H. Brooks, Woolwich Chess Club, C. E. East Marden, Olive Crosby, J. de Honstern, Cant. P. S. Shenale, Mountain T. P., G. H. Stevenson, Little J., J. Byng, H. M. Pridaux, W. V. G. D., W. Leeson, and Wakham's Dodge.

WHITE.
1. Q to E sq.
2. R to Kt 2nd

BLACK.
B takes Q (best).
Anything.

WHITE.
3. Mates accordingly.

SOLUTION OF PROBLEM No. 1734.

PROBLEM No. 1737.

By JOHN CRUM.

BLACK.

WHITE.
White to play, and mate in three moves.

CHESS IN VIENNA.

A Game played at Vienna, in October last, between Mr. S. HANDEL and Herr SCHWARZ.—(Counter Gambit in the Bishop's Opening.)

WHITE (Mr. H.) **BLACK (Herr S.)**
1. P to K 4th P to K 4th
2. B to B 4th P to K B 4th
3. P to Q 3rd Kt to K B 3rd
4. Kt to Q 3rd

We prefer A. P to B 4th. The move made is essentially defensive. White, in fact, assuming the position of the second player in the King's Gambit Declined.

4. B to K Kt 5th P to B 4th
5. B to Kt 3rd P to K R 3rd
6. B takes Kt Q takes B
7. Kt to K B 3rd P to Q 3rd
8. Q to K 2nd P to K 3rd
9. P takes P B takes B
10. R to K 4th Kt to Q 2nd
11. R to Q 4th

This attempt to break up Black's centre is not very successful. If Kt to K 4th appears a preferable line of play.

12. Castles (K R) B to Kt 5th
13. P takes B B takes Kt
14. P to K Kt 4th K R to K sq
15. K R to K sq P takes P
16. Q to B 4th (ch) P to Q 4th
17. K takes R (ch) R takes R
18. Q takes K P to Q R 3rd
19. K to K 5th looks more attacking, but Black evidently trusts to his pawns to carry the rest.

20. R to K sq R takes R (ch)
21. Kt takes R Q to K R 5th
Last time, as the next move shows.

WHITE (Mr. H.) **BLACK (Herr S.)**
22. Kt to Kt 2nd Q to K 2nd
23. Q to K 3rd K to B 2nd
24. Q takes Q (ch) K takes Q
25. Kt to K 3rd P to Q R 4th
26. K to Kt 2nd P to Q Kt 4th
27. P to K B 4th P to R 5th
28. P to Q B 4th

29. P takes P would not have improved matters, as Black can obtain the passed pawn in any case.

29. P to B 3rd P to R 6th
30. Kt to B 2nd P to R 7th
31. P takes P Q takes P
32. K to B 3rd Kt to B 4th
33. K to K 3rd P to Kt 6th
34. P to R 4th P to B 8th (Q)
35. Kt takes Q Kt takes Kt
36. P to Kt 5th Kt to Kt 6th
37. P to R 5th K to B 2nd
38. K to K 4th Kt to Q 7th (ch)
39. K to Q 4th Kt to B 6th (ch)
40. K takes P P takes P
41. P takes P Kt takes P
42. K to B 5th K to B 3rd
43. P to B 4th K takes P
44. K takes P K to Kt 5th

And White, we are informed, resigned the game. Black could have won easily on the last move by playing Kt to K 3rd; but, after the move in the text, we are unable to see how he could have effected more than a draw if White had continued the game with Kt to Q 5th.

CHESS IN RUSSIA.

The following Game occurred in a match just concluded at Moscow, in which M. HILWID, one of the best players of that city, gave the odds of Rook and Knight alternately to Mr. MAUDE.

(Evans's Gambit.—Remove White's Q R from the board.)

WHITE (M. H.) **BLACK (Mr. M.)**
1. P to K 4th K to K 4th
2. Kt to Kt 3rd Kt to Q B 3rd
3. B to B 4th B to B 4th
4. P to Q Kt 4th B takes P
5. P to B 3rd B to R 4th
6. P to Q 4th P takes P
7. Castles P takes P
8. Q to Kt 3rd Q to B 3rd
9. P to K 5th Q to Kt 3rd
10. Kt takes P B takes Kt
The best continuation here is
10. Kt to K 2nd K Kt to K 2nd
11. Kt to K 2nd P to Q Kt 5th, &c.

THE UNIVERSITY CHESS MATCH.

As our readers are aware, we go to press with this part of the paper too early in the week to be able to furnish them with definite information concerning this interesting contest. There was, it appears, some trouble experienced in providing a suitable place of meeting in London, but only, we believe, because the existence of such a difficulty was unknown to the general community of metropolitan chessplayers. A proposal to play the match at Cambridge had been forwarded to Oxford, when an invitation was received from the members of the St. George's Chess Club, Palace-chambers, King-street, St. James's, and, if the arrangements then made have been adhered to, it was played there on the Thursday of the current week, commencing at one in the afternoon. The respective teams comprise the following players:—Cambridge: Messrs. Chatto (Captain), Keynes, Ball, Gunston, Reade, and two others; Oxford: Messrs. Tracey (Captain), Grundy, Brook, Plunkett, Gattie, Wright, and another.

Mr. W. H. Phillips has been elected county Coroner for the Wolverhampton district, his father having held the office thirty-five years.

WILLS AND BEQUESTS.

The will of William Matthew Coulthurst, Esq., late of 59, Strand, has been recently proved by Edward Marjoribanks, Esq., Hugh Lindsay Antrobus, Esq., Edmund Coulthurst, Esq., the Hon. Henry Dudley Ryder, and Frederic Oury, Esq., the executors, the personal estate being sworn under £600,000. After several legacies to friends and making ample provision for his servants, the testator gives very large legacies to his nephews, John and Edmund Coulthurst, and directs the residue of his estate to be invested in land to be settled on his nephews and their issue.

The will, dated Jan. 26, 1874, of Peter Wood, M.D., late of Woodbank, Southport, Lancashire, who died on the 15th ult., was proved in London on the 14th inst. by James Wood and Peter Frederic Wood, the sons, and William Norris Heald, the executors, the personal estate being sworn under £400,000. The testator bequeaths to his executors £200 each; to Reuben Hutchinson, £100, and Martha Greenwood, £50, if respectively in his service at the time of his decease; to his wife, Mrs. Agnes Wood, all his wines, liquors, watches, jewels, horses and carriages absolutely, and £3000 per annum and his residence, Woodbank, with the furniture and effects for life. There are some specified gifts to his sons, and the rest of his property he leaves to all his children.

Mrs. Helen Blake, late of No. 4, Earls-terrace, Kensington, having died on Sept. 23 last, intestate, a widow, without child, or parent, brother or sister, uncle or aunt, nephew or niece, cousin-german, or any other known relation, letters of administration of her personal estate and effects were granted on the 14th inst. to the Solicitor of the Treasury for the use of her Majesty, the personalty, including leaseholds, being sworn under £140,000. This will not, of course, prevent any person who can prove that they are the next of kin of the deceased recovering back the property from the Crown.

The will of Mr. Arthur Leyland Birley, late of Millbanke, Kirkham, Lancashire, who died on Dec. 31 last, was proved on the 14th ult., at the Lancaster District Registry, by Hutton Birley and Charles Addison Birley, the nephews, the acting executors, the personal estate being sworn under £120,000. The testator bequeaths to his wife, Mrs. Jane Birley, all his wines, liquors, and consumable stores, horses, live and dead stock, and, for life or widowhood, his dwelling-house, Millbanke, with the furniture and effects, and the income of £35,000, in the event of her marrying again she is to have an annuity of £400; upon trust for his daughter, Miss Edith Jane Birley, £25,000, and a further sum of £15,000 on the death of her mother; the remainder of his property, real and personal, he gives to his son, John Leyland Birley.

The will, dated Oct. 22, 1876, of Mr. William Antcliff, late of No. 12, Newnam-street, Goodman's-fields, who died on Dec. 25 last, was proved on the 12th ult. by Mrs. Catherine Antcliff, the widow, William Anderson Banks, and John Hobson, the executors, the personal estate being sworn under £40,000. The testator bequeaths to Mr. Banks and Mr. Hobson £100 each; to his wife his furniture, ready money, and money at the bankers' absolutely, and the residue of his property for life; on her death it is to be equally divided between his son and daughter.

The will, dated June 9, 1876, of Miss Anna Maria Osborne, late of Bitterne, Southampton, who died on Oct. 3 last, was proved on the 9th inst. by the Rev. Henry Osborne, the brother, the sole executor, the personal estate being sworn under £25,000. Among other legacies, the testatrix bequeaths £3000 New Three per Cent stock to the Church Missionary Society; £2000 of the same stock to the London City Mission; £1000 of the same stock each to the British and Foreign Bible Society, the Female Domestic Bible Mission, and the Society for Promoting Female Education in the East; £500 each of the same stock to the Society for Promoting Christianity among the Jews, the Religious Tract Society, Sarah Tucker's Training Institution and for the establishment of town and village schools, the Colonial and Continental Society, the Irish Society, the London Missionary Society for Madagascar at the disposal of Mr. Pool, the Cheltenham Training College, the Home and Colonial School Society, and the Clergy Orphan Female School, St. John's-wood; to the London College of Divinity, St. John's, Highbury, £700; to the Pastoral Aid Society and the South Hants Infirmary, £300 each; to the Orphanage at Jerusalem and other schools connected with the Bishop's diocese, and the Moravian Mission, £200 each; and to the Wanderers' Home, Palestine-place, London, £100.

The will, dated March 26, 1874, of Mrs. Harriet Dickson, late of No. 26, Portman-square, who died on Dec. 27 last, was proved on the 10th ult. by the Right Hon. Hugh McCalmont, Baron Cairns, and Samuel Stephen Bateson, the nephews of the deceased, the executors, the personal estate being sworn under £30,000.

The will, dated July 1, 1876, of Sir John William Kaye, late of Forest-hill, who died on July 24 last, was proved on the 9th inst., by William Stewart, under £1500.

Last week Lord William Lennox lectured on Theodore Hook, with Anecdotes of Contemporaneous Wits, at High Wycombe, and on Wellington at Evesham.

A loan of 20,000,000f. has been contracted by the Municipality of Brussels with Messrs. Rothschild, of Paris, the Société Générale Belge, and the Banque de Paris.

Colonel Gunter, of Wetherby Grange, has sold the celebrated bull Fifth Duke of Tregunter to the Earl of Eversham, Duncombe Park, for 2000 guineas.

The new iron barque Southesk, Captain Gray, R.N., has sailed from Gravesend, bound for Brisbane, Queensland, having on board 62 married people, 158 single men, 82 single women, and 49 children.

Some disturbances took place at Berne on Sunday, the anniversary of the establishment of the Paris Commune, owing to the interference of the police with a demonstration of the Internationalists. Swords and knives were used in the struggle, and several persons were wounded.

We hear that the Earl of Perth has intrusted to Dr. Charles Rogers the papers from his family archives relating to the history of Margaret Drummond, the affianced wife of James IV., and ancestress of many noble families in Scotland. These papers will probably be edited for the Grampian Club.

Anxiety as to the safety of her Majesty's ship Thetis has been relieved by the receipt of a telegram at the Admiralty stating that she was towed into Malta by the Devastation on the 17th inst. Another telegram states that the Devastation towed the Thetis sixty-one miles. The latter's machinery was disabled, and she was short of provisions for seventeen days.

The Tokio Times says:—Mr. Thomas Brassey, M.P., arrived in Yokohama on Jan. 29., in the Sunbeam steam-yacht, of which he is owner and commander, and in which he is making a voyage round the world. He is accompanied by Mrs. Brassey and three children, the Hon. A. Y. Bingham, Dr. Potter, and Mr. Freer.

VALUABLE DISCOVERY for the HAIR.
If your hair is turning grey or white, or falling off, use THE MEXICAN HAIR RENEWER; for it will positively restore, in every case, grey or white hair to its original colour, without leaving the disagreeable smell of most "Restorers." It makes the hair charmingly beautiful, as well as promoting the growth of the hair on bald spots, where the glands are not decayed.
This preparation has never been known to fail in restoring the hair to its natural colour and gloss in from eight to twelve days. It promotes growth, and prevents the hair falling out, eradicating dandruff, and leaving the scalp in a clean, healthy condition.
It imparts peculiar vitality to the roots of the hair, restoring it to its youthful freshness and vigour. Daily applications of this preparation for a week or two will surely restore faded, grey, or white hair to its natural colour and richness.
It is not a dye, nor does it contain any colouring matter or offensive substance whatever. Hence it does not soil the hands, the scalp, or even white linen, but procures the colour within the substance of the hair.
It may be had of any respectable Chemist, Perfumer, or Dealer in Toilet Articles in the Kingdom, at 3s. 6d. per bottle. In case the dealer has not "The Mexican Hair Renewer" in stock and will not procure it for you, it will be sent direct by rail, carriage paid, on receipt of 4s. in stamps, to any part of England.—Prepared by HENRY C. GALLUP, 483, Oxford-street, London.

THE MEXICAN HAIR RENEWER.

WHAT WILL RESTORE THE HAIR?

What will restore the human hair, And make it look as fresh and fair As when it was before its hue Was changed so sadly to the view? The very best Restorer is, In all essential points, this—
THE MEXICAN HAIR RENEWER!

How beautiful the hair it makes! And admiration, too, awakes. It gives luxuriance, riches, grace, And other points we proudly trace, What strengthens it, but never harms? What adds to beauty's dowry charms?
THE MEXICAN HAIR RENEWER!

For either sex it will impart Abundant hair by matchless art. If baldness should, with stealthy power, Arrest its growth in evil hour, Why, what will that annoyance spare, And crown the head with grey hair?
THE MEXICAN HAIR RENEWER!

Thousands of proofs from every side All guarantee its use with pride. It never fails to please the mass Of every rank and every class. The very best Restorer is, In all essential points, this—
THE MEXICAN HAIR RENEWER!

THE MEXICAN HAIR RENEWER

has gained for itself the highest reputation, and a decided preference over all other "hair-dressings," as evinced from certificates and testimonials from the most respectable sources. Being compounded with the greatest care—combining, as it does, all the most desirable qualities of the best hair preparations of the day, without the objectionable ones—it may be relied on as the very best known to chemistry for restoring the natural colour to the hair, and causing new hair to grow on bald spots, unless the hair glands are decayed; for, if the glands are decayed and gone no stimulant can restore them; but if, as is often the case, the glands are only torpid, THE MEXICAN HAIR RENEWER will renew their vitality, and a new growth of hair will follow. Read the following Testimonial:—
From Messrs. H. & C. Chemists, 12, Grafton street, Dublin:—"We are recommending THE MEXICAN HAIR RENEWER to all our customers as the best of the kind, as we have been told by several of our friends who tried it, that it has a wonderful effect in restoring and strengthening their hair."

THE MEXICAN HAIR RENEWER.

Ask your Chemist for it.

WHAT GIVES A GLOSS TO THE HAIR?

What gives the hair a charming gloss, And makes it look as soft as down? What gives luxuriance to the tress? Why, all the world with truth confess That nothing really can outvie, And rank so justly and so high,
AS THE MEXICAN HAIR RENEWER!

What gives the hair an impulse great, And brings it from each known retreat? Why GALLUP'S FAMED HAIR STANDS, And universal praise commands; Whilst all acknowledge with delight That nothing makes it half so bright
AS THE MEXICAN HAIR RENEWER!

All other preparations made It sinks into oblivion's shade; It has the hair's glands revived, and gains, Celebrity likewise obtained; And, what is of importance more, It will the Human Hair restore!
THE MEXICAN HAIR RENEWER!

The natural colour, by its use, Like magic does its powers produce. The hairless, and of compounds rare, Selected with especial care, And thus it is it ranks so high, Whilst one and all may now rely
ON THE MEXICAN HAIR RENEWER!

THE MEXICAN HAIR RENEWER.

The constitution of the person and the condition of the scalp have much to do with the length of time it requires for new hair to grow; also thin or thick hair will depend much upon the vital force remaining in the hair glands. New hair is first seen to start around the margin of the bald spots near the permanent hair, and extending upwards until the spots are covered more or less thickly with fine short hair. Excessive brushing should be guarded against as soon as the small hairs make their appearance; but the scalp must be kept moist with water to assist its growth. The scalp may be pressed and moved on the bone by the finger ends, which quickens the circulation and softens the spots which have remained long bald. On applying the hair-dressing it softens the scalp, and in cases where the hair begins to fall a few applications will arrest it, and the new growth presents the luxuriance and colour of youth. It may be relied on as the best hair-dressing known for restoring grey or faded hair to its original colour without dyeing it, producing the colour within the substance of the hair, imparting a peculiar vitality to the scalp, preventing the hair from falling, keeping the head cool, clean, and free from dandruff, causing new hairs to grow, unless the hair-glands are entirely decayed. THE MEXICAN HAIR RENEWER makes the hair soft, glossy, and luxuriant. Sold by Chemists and Perfumers, at 4d. in stamps to any address free on receipt of 4s. in stamps. HENRY C. GALLUP, Proprietor, 483, Oxford-street, London.

THE MEXICAN HAIR RENEWER.

WHAT ADDS A CHARM TO FEMALE BEAUTY?

What adds a charm to beauty rare, And what a crown of glory? Why, 'tis a smile and lovely hair, As we have read in story; And all who would its growth promote, Why, nothing can be truer Than this—it is accomplished by
THE MEXICAN HAIR RENEWER.

What adds a charm to beauty rare? Why, bright and lovely hair, For nothing makes them look so well, Nor leads to such successes. The hair's a crowning point with all, There's nothing can be truer; And hence it is that all admire
THE MEXICAN HAIR RENEWER.

What adds a charm to beauty rare? Why, hair of bright appearance; This famed renewer keeps it clean—Of dandruff gives a clearance; And if it's faded—grey or white—And hairs grow short and few, What will restore its colour then?
THE MEXICAN HAIR RENEWER.

What adds a charm to beauty rare, When in the ball-room whirling? Why, ringlets light, both free and bright, In graceful curls curling. What makes them so free and beautiful, And what says each reviewer?—Why, nothing can compare with this,
THE MEXICAN HAIR RENEWER.

THE WORDS "THE MEXICAN HAIR

RENEWER" are a Trade Mark; and the public will please see the words are on every case surrounding the Bottle, and the name H. C. GALLUP is blown in the bottle. The Mexican Hair Renewer. Price 3s. 6d. Directions in German, French, and Spanish. Prepared by H. C. Gallup, 483, Oxford-street, London.

May be had of most respectable Dealers in all parts of the world:—M. Swann, 12, Rue Castiglione, Paris; W. Kingston, Maltes, Highgate, and Cecil-street, London; Co. Melbourne; Elizabeth, Cape of Good Hope; Malabar and Co., Kintown, Jamaica; T. Plimmer, Bridgetown, Barbadoes; Rowe and Co., Ramsgate; Treacher and Co., Bombay; J. Vanderveide 40, Rue de la Etoile, Brussels; G. Baker, Chemist, Geneva; Hickford and Sons, Adelaide; J. Grimwade, Chemist, Co. Melbourne; Elliott Brothers, Sydney; Hutton and Laws, Lancaster, Tasmania; J. N. Cliffe, 32, Rue de Bon Vista, Lisbon; J. U. Sharland, Auckland, New Zealand; and Chemists everywhere.

MRS. S. A. ALLEN'S
WORLD'S HAIR RESTORER.

AMONG THE CULTIVATED AND REFINED THROUGHOUT THE WORLD, THIS RENOWNED PREPARATION IS THE ACKNOWLEDGED FAVOURITE WITH BOTH SEXES.

MRS. S. A. ALLEN'S
WORLD'S HAIR RESTORER.

IT CANNOT FAIL TO RESTORE
GREY HAIR TO ITS YOUTHFUL COLOUR, GLOSS, AND BEAUTY. WHEN THE HAIR TURNS GREY, LOSES ITS LUSTRE, AND FALLS OUT, IT SIMPLY REQUIRES NOURISHMENT. MRS. S. A. ALLEN'S WORLD'S HAIR RESTORER, BY ITS GENTLE TONIC ACTION, STRENGTHENS AND INVIGORATES THE HAIR, AND, BY THE OPERATION OF NATURAL CAUSES, GREY OR WHITE HAIR IS QUICKLY RESTORED TO ITS YOUTHFUL COLOUR, GLOSS, AND BEAUTY. IT WILL STOP ITS FALLING, AND INDUCE A HEALTHY AND MOST LUXURIANT GROWTH. USE NO OTHER PREPARATION WITH IT, NOT EVEN OIL OR POMADE, OR ZYLO-BALSAMUM.

CAUTION!—The Genuine only in Pink Wrappers.

Sold by all Chemists, Perfumers, and Dealers in Toilet Articles.

Mrs. S. A. ALLEN manufactures two entirely distinct Preparations for the Hair. One or the other is suited to every condition of the Human Hair. Both are never required at one time. For details as to each preparation, kindly read above and below this paragraph. Readers can easily determine which of the two they require. These preparations have a world-wide reputation. Enormous and increasing sale through forty years. Every Chemist and Dealer in Toilet Articles has both preparations.

MRS. S. A. ALLEN'S
ZYLO-BALSAMUM,

For the Growth and Preservation of the Hair. A cooling transparent liquid, entirely vegetable, without sediment.

A SIMPLE TONIC AND DRESSING
OF INESTIMABLE VALUE TO BOTH SEXES. THE FAVOURITE WITH THE YOUNG AND ALL THOSE WHO HAVE NO GREY HAIR, ZYLO-BALSAMUM MAY BE USED BY THE MOST YOUTHFUL AND THE MOST ELDERLY, NEVER FAILING TO ESTABLISH ITSELF IN GREAT FAVOUR WITH EACH. IT WILL NOT CHANGE THE COLOUR OF THE HAIR, BUT BY EARLY USE IT WILL PREVENT THE HAIR FROM TURNING GREY OR FALLING OUT. IT CLEANSSES THE HAIR, GIVES TO IT A HEALTHY VIGOUR AND GROWTH, REMOVES ALL DANDRUFF, AND IMPARTS A MOST DELIGHTFUL FRAGRANCE. USE NO OIL OR POMADE.

CAUTION!—The Genuine only in Blush Grey Wrappers.

Sold by all Chemists, Perfumers, and Dealers in Toilet Articles.

"BEWARE OF THE IDES OF MARCH!"
was the precaution of the Soothsayer to Julius Cæsar; and the advice is equally applicable to Ladies, on account of the bleak winds and humid atmosphere of the month, so subversive of personal comfort and attraction; hence ensue coarseness of the skin and sallowness of the complexion, unless guarded against by that infallible conservator of the complexion, ROWLANDS' KALYDOR. ROWLANDS' ODOLOGO whitens and preserves the Teeth, prevents and arrests their decay. 2s. 6d. Sold by Chemists and Perfumers. Buy only Rowlands' articles.

AMERICAN CENTENNIAL
PRIZE MEDAL.

FRY'S CARACAS COCOA.
Its pure flavour, delicate aroma, and invigorating qualities have established its position as a first-class dietetic article.

"The Caracas Cocoa of such choice quality."—Food, Water, and Air (Dr. Huxall). "A most delicious and valuable article."—Standard.

FRY'S EXTRACT OF COCOA,
"than which, if properly prepared, there is no nicer or more wholesome preparation of Cocoa."—Food, Water, and Air. Edited by Dr. Huxall. Tenth INTERNATIONAL MEDAL awarded to J. S. FRY and SON.

SCHWEITZER'S COCOATINA.

Anti-Dyspeptic Cocoa or Chocolate Powder. Guaranteed Pure Soluble Cocoa, with excess of Fat extracted. Four times the strength of Cocoa Thickened yet Weakened with Arrowroot, Starch, &c. The Faculty pronounce it the most nutritious, perfectly digestible beverage for "BREAKFAST, LUNCHEON, or SUPPER." Keeps in all climates. Requires no cooking. A teaspoonful to Breakfast cup, costing less than a halfpenny. Samples gratis. In Air-Tight Tins, at 6d., 1s., 2s., &c., by Chemists and Grocers. H. SCHWEITZER and CO., 10, Adam-street, London, W.C.

GRATEFUL—COMFORTING.

E P P S S C O C O A.
"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected cocoa, Mr. Epps has provided our breakfast-tables with a delicately flavoured beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up, till strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame." Civil Service Gazette. Sold only in Packets (Tins for abroad), labelled—JAMES EPPS and CO., HOMOEPATHIC CHEMISTS, 68, Threadneedle-street; and 170, Piccadilly, London. New York Depot, Smith and Vandewater, Park-place.

Price SIXPENCE; or, post-free inland, SEVENPENCE.

Office, 198, Strand.

THE ILLUSTRATED LONDON NEWS.

LONDON: SATURDAY, MARCH 31, 1877.

The flight of time has brought us to the frontiers of Easter, and we pause for a brief interval at that stage of our progress through the year. It has a special interest for most of us. It is, nominally, at least, the end of winter, of the dark days, of long nights, of dormant physical forces, and of meteorological phenomena which test the endurance of the human frame. We have not been tried beyond measure during the rapid run we have had through the winter season. There has been a superabundance of wet, it is true, but the weather has been generally mild. We are now looking forward to longer days, brighter sunshine, the songs of birds, the rehabilitation of the vegetable world, the gladdening aspect of Nature throughout her whole domain. At such a season we are apt to be hopeful. Our spirits rise. Light chases away dark clouds from our minds. We are wont to look back upon the past with thankfulness that it is past, to take stock of our experience, and to indulge in those reflections, pensive or joyous, which it may suggest. We usually connect it, also, with a glance at the future, drawing inferences, brightened with increasing sunlight, as to what is before us. Death and Resurrection are the two great lessons of the times. They enter into and colour our passing ideas. There are, perhaps, few who do not to some extent feel, even if they do not wholly appreciate, the pervasive influence of both. Sobriety and gladness follow each other so rapidly as to appear intermingled.

It is not our vocation, however, to amplify these themes. We leave them to moralists and theologians. The duty which devolves upon us at Eastertide is to take a comprehensive but rapid survey of the political affairs of the country which have happened since the meeting of Parliament. A third of the Session or thereabouts has now passed. The question occurs, What has been

done by those who politically represent us towards giving more definite expression to the vague wants and aspirations of the nation, or towards reducing to a practical form the movements of the public mind? What, for example, has been effected by the discussions and votes of the Houses of Parliament? It will be remembered that when her Most Gracious Majesty opened the Session strong excitement agitated the public mind upon the Eastern Question. What has become of it? It certainly does not remain at the height at which it then stood. There has been no decisive debate in either House upon the policy of the Ministers. Such discussion as has taken place has been incidental rather than formal, and has never led to a division. The Government, still engaged in important negotiation upon the question, has naturally claimed some right to reticence. The Opposition, divided in opinion and unable to ascertain precisely the views of the country as to the policy of the Government, has shrunk from testing those views in the House of Commons. The Holidays have come, and, so far as authentic information is concerned, the country is in no more satisfactory condition than it was at the beginning of the Session. A European War is certainly not less likely now than it was then. Diplomacy has arrived at no more definite result now than then. Peace has been made with Servia, it is true. Peace is still hoped for between the Porte and Montenegro, and may possibly be concluded. An Ottoman Parliament has been inaugurated, but Russian forces still occupy the banks of the Pruth, and the European Provinces of Turkey swarm with soldiers. Upon this state of affairs, upon the causes which have led to it, upon the most appropriate remedial agency which should be applied to it—upon the greatest problem, in fact, of the day and the hour, and one a prompt solution of which involves the most momentous destinies, Parliament has said little or nothing. Perhaps this circumstance results from the difficulties inherent in the question. But it will strike every one as singular, at least, and not highly creditable to the political judgment of the British Legislature, that it appears to stand before the anarchical disorganisation of Turkey as completely baffled as, and in some cases more so than, other States of Europe which have not affected traditional influence over the political conduct of the Porte.

The House of Commons has been fairly led during this first stage of the Session. As its Leader, Sir Stafford Northcote has proved himself to be sufficiently capable—not brilliant, but safe. That he has obtained a greater amount of work out of the popular branch of the Legislature than has usually been transacted before Easter, even when Easter has fallen later than it has done this year, must be set down to his credit. He has made but few mistakes, and those, perhaps, of no very serious character. The proceedings of the House may have been dull, but it has been induced to apply itself earnestly to the work set before it. It has, accordingly, made considerable progress with the Estimates of the Session, and has advanced one or two of the more important Ministerial measures to a comparatively forward stage. The domestic interests of the country have occupied its serious attention, and the arrangement of business has appeared to give general satisfaction. There is no jerkiness about Sir Stafford Northcote's handling of the reins. He plods on soberly and at an even pace, and, up to the present time, has fairly fulfilled the duties which he has undertaken.

As to the future, none, not even the Ministers themselves, can confidently speak. Whether we are to have war or not, or whether it would be possible to avoid war by adopting a warlike tone, are questions which it is, perhaps, beyond the ken of human sagacity to settle. But, of course, the settlement of such questions will necessarily, to a large extent, mould the interests of the country in all other respects. It may be that we are on the eve of troublous times. The signs that we are so are by no means few. We could have wished that Parliament had done something to point out to the country the policy which it would best become it to adopt, and that party considerations had been less powerful with it than simple regard to that "higher expediency" which it is the business of statesmanship clearly to interpret. Should war be at hand, there is, perhaps, no single Power in Europe which will not enter upon it, if obliged, with unfeigned reluctance; nor can anyone venture to predict over how wide an area the conflagration will spread. It was the confident hope of the country, but one which has been bitterly disappointed, that before the arrival of the Easter Holidays Europe would have had assurance of a solid and long-continued peace.

The Queen has approved the following promotions and appointments in the Order of St. Michael and St. George:—To be members of the Second Class of Knights Commanders—Sir Henry T. Holland, M.P., C.M.G., late Assistant Under-Secretary of State in the Colonial Office; Mr. W. W. Cairns, C.M.G., Governor of South Australia; Lieutenant-Colonel H. F. B. Maxse, C.M.G., Governor of Heligoland; and Mr. W. Fitzherbert, C.M.G., formerly Colonial Treasurer in New Zealand and Special Agent for that colony in England. To be members of the Third Class or Companions—Mr. C. H. Kortright, Governor of British Guiana; Lieutenant-Colonel W. Croesman, R.E., lately Special Commissioner to Grigoland West; Mr. H. Lushington Phillips, Puisne Judge in Natal and lately Acting Chief Justice of Barbadoes; and Colonel Mattie, Colonel of the Royal Malta Fencibles.

THE COURT.

The Queen and Princess Beatrice attended Divine service on Sunday in the private chapel at Windsor Castle. The Rev. Professor Lightfoot, D.D., Canon of St. Paul's, Deputy Clerk of the Closet, officiated. Princess Christian visited her Majesty. The Earl of Beaconsfield had an audience of the Queen on Monday. Lord Henry Somerset, Comptroller of her Majesty's Household, also had an audience, to present an address from the House of Commons. Her Majesty inspected Mrs. E. M. Ward's picture of an incident in the life of Princess Charlotte of Wales. The Queen, with Princess Beatrice, has walked and driven out daily. Prince Leopold has taken frequent drives. Lieutenant-General Sir Francis Seymour, Bart., K.C.B., has had an audience of her Majesty on his return from Darmstadt. The Judge-Advocate-General has also had an audience of the Queen. Her Majesty has entertained at dinner during the week Prince Christian of Schleswig-Holstein, the Right Hon. Sir Henry Elliot, K.C.B. (her Majesty's Ambassador at Constantinople), and Lady Elliot, and Colonel and Lady Susan Grant Suttie and Miss Grant Suttie; the Turkish Ambassador and Mdle. Musurus, the German Ambassador and Countess Marie Münster, the French Ambassador (Marquis d'Harcourt), the Austro-Hungarian Ambassador (Count Beust), the Russian Ambassador (Count Schouvaloff), the Italian Ambassador and Countess Menabrea, the Duke and Duchess of Bedford, the Marquis and Marchioness of Tavistock, the Marquis and Marchioness of Londonderry, the Earl of Carnarvon, Lieutenant-General Sir T. M. and the Hon. Lady Biddulph, the Hon. Henry and Mrs. Bouke, the Hon. Mrs. and Miss Grey, the Hon. Mrs. Charles and Miss Mary Grey, and Major-General H. and the Hon. Mrs. Ponsonby.

Her Majesty, with Princess Beatrice, left Windsor Castle shortly before ten on Wednesday morning for Osborne. The Queen and the Princess drove to the Windsor station of the Great Western line, and left at ten by special train. The train arrived at Gosport at 12.15, and the Queen crossed in the Royal yacht to Osborne. Her Majesty will not return to Windsor Castle again before proceeding to Scotland.

Her Majesty will hold Drawingrooms at Buckingham Palace on Tuesday, May 1, and on Thursday, May 3. The knights of the several orders are to appear in their collars at the Drawingroom on May 1, it being a collar day.

The Prince of Wales will, by command of the Queen, hold Levées at St. James's Palace, on behalf of her Majesty, on Monday, May 7, and on Saturday, June 2.

Notice is given in the *Gazette* that her Majesty's birthday will be kept on Saturday, May 26.

Major-General Prince Edward of Saxe-Weimar proceeded to Berlin in order to convey the Queen's congratulations to the German Emperor on the eightieth anniversary of his Imperial Majesty's birthday.

Lieutenant-General Sir Francis Seymour, Bart., represented her Majesty at the funeral of his Grand Ducal Highness Prince Charles of Hesse at Darmstadt. The following were the orders for the Court's going into mourning on Saturday last:—"The ladies to wear black dresses, white gloves, black or white shoes, feathers, and fans, pearls, diamonds, or plain gold or silver ornaments. The gentlemen to wear black Court dresses, with black swords and buckles. The Court to change mourning on Sunday next, and to go out of mourning on Thursday next."

The Earl of Jersey and Colonel W. H. F. Cavendish have succeeded Lord De Ros and Captain C. E. Phipps as Lord and Groom in Waiting.

The Queen has appointed General the Right Hon. Sir William Thomas Knollys, K.C.B., to be one of her Majesty's Gentlemen Ushers Daily Waiters, and also to be Gentleman Usher of the Black Rod, in the room of Admiral Sir Augustus William James Clifford, Bart., C.B., deceased.

THE PRINCE AND PRINCESS OF WALES.

The Prince and Princess of Wales visited the Duchess of Cambridge yesterday week at St. James's Palace, and the Duchess of Teck at Kensington Palace. The Duke of Cambridge and the Duke and Duchess of Teck visited their Royal Highnesses the next day at Marlborough House. The Duke of Cambridge also visited them on Monday. The departure of the Prince and Princess for the Mediterranean on Saturday last was postponed in consequence of a slight indisposition of his Royal Highness. Princess Louise of Lorne has lunched with the Prince and Princess.

Their Royal Highnesses have visited the studio of Mr. J. E. Boehm, and inspected the equestrian statue of the Prince, which is about to be cast for Bombay. The Prince and Princess and their children have given sittings to Mr. L. Desange for their portraits. Mr. Chevalier has submitted his picture of the opening of the Vienna Universal Exhibition of 1873 to the inspection of the Prince; and Mr. Henry Harper has submitted to the Princess the first proof from his picture of "Mount Sinai."

The Prince has appointed General the Right Hon. Sir William Thomas Knollys, K.C.B., to be Groom of the Stole to his Royal Highness; and Major-General Sir Dighton Macnaghten Probyn, K.C.S.I., C.B., V.C., to be Comptroller and Treasurer of the Household of his Royal Highness, in the room of General the Right Hon. Sir William Thomas Knollys.

His Excellency the United States Minister and Mrs. Pierpoint have left Cavendish-square for Torquay.

His Excellency the Japanese Minister, and Madame Wooyeno, and Prince and Princess Nabesimo, of the Japanese Legation, Paris, have left London for Brighton, on a visit to Mr. James Ashbury, M.P.

The Lord-Lieutenant of Ireland and the Duchess of Marlborough, and Lady Rosamond Spencer Churchill, arrived at the Viceroyal Lodge, on Saturday last, from Powerscourt.

The Duke and Duchess of Westminster have gone to Eaton Hall, Chester.

The Duke and Duchess of Bedford and the Ladies Russell have left Eaton-square for Woburn Abbey.

The Duke and Duchess of Northumberland have left Grosvenor-place for Albury Park.

The Duke of Richmond and Gordon and Lady Caroline Gordon-Lennox have left Belgrave-square and joined the Duchess at Goodwood.

The Marquis and Marchioness of Hertford have left Hertford House, Connaught-place, for Ragley Hall.

The Marquis of Salisbury has returned to Hatfield.

The Earl of Beaconsfield has gone to Hughenden Manor; the Lord Chancellor to Bournemouth; and the Right Hon. Gathorne Hardy, with Mrs. and Miss Hardy, to Hemsted Park.

The marriage of Lord Kilmaine and Miss Alice Shute will take place about the end of May. Marriages are arranged between Mr. H. V. Higgins, 1st Life Guards, and Lady Hilda Finch Hatton, youngest daughter of the Earl of Winchelsea and Nottingham; and between Mr. Albert Grey, only son of the late Hon. General Grey, and heir-presumptive of Earl Grey, and Miss Alice Holford, daughter of Mr. R. S. Holford, of Dorchester House, Park-lane.

THE LATE LADY AUGUSTA STANLEY.

It will be remembered that her Majesty the Queen, as a personal friend of the lamented wife of Dean Stanley, attended her funeral, a year ago, in Westminster Abbey. Accompanied by two of her daughters, Princess Louise, Marchioness of Lorne, and Princess Beatrice, the Queen sat apart in the little gallery entered from the Jerusalem Chamber, having just before met the bereaved husband and offered him the assurance of her sympathy with his grief, beside the coffin laid ready to be carried out of his home. Her Majesty has caused a monumental cross to be erected at Frogmore, in Windsor Park, in memory of Lady Augusta Stanley. We give an illustration of this monument on another page. It is of fine blue Cairngall granite, all polished, and is beautifully enriched on the front and sides with entwined ornaments, after the style of the early Christian crosses that may be seen in the west of Scotland. It stands upon a rock base, or unhewn block of granite, and the total height is about 7 ft. Its site is chosen in the private grounds at Frogmore, in front of the mausoleum of her Royal Highness the Duchess of Kent, the Queen's mother. This monument was designed and executed by Messrs. Macdonald, Field, and Co., of Aberdeen and London, under the special directions of her Majesty. The following is inscribed, in gold letters, on the stem of the cross:—"To the dear memory of Lady Augusta Stanley, fifth daughter of Thomas Bruce, seventh Earl of Elgin and Kincardine, this cross is erected by Queen Victoria, in grateful and affectionate remembrance of her faithful labours for thirty years in the service of the Queen, the Duchess of Kent, and the Royal family. Born, April 3, 1822. Died, March 1, 1876." The late Lady Augusta, who was sister to the late Earl of Elgin, Viceroy of India, was attached to the household of the Duchess of Kent from 1846 to 1861, when the Duchess of Kent died; she held afterwards, during two or three years, the office of a Woman of the Bedchamber in the Queen's Household. In December, 1863, her Ladyship was married to the Dean of Westminster.

THE LATE MR. COWDEN CLARKE.

Pleasant recollections of thirty years ago and more—a cheerful face, broadly and brightly beaming with the best of good humour—a mellow voice, with rich tones of hearty mirth and heartfelt tenderness—an offhand, easy freedom of manner, guided by instinctive courtesy, true kindness, and social tact—a flowing strain of animated discourse, marked by keen critical insight and sympathetic enjoyment, upon the treasures of humane wisdom, of imagination and humour, in our glorious Shakespeare and in all our noble English poets—these are what we cherish of our past acquaintance with good old Cowden Clarke. He has long been a resident in the sunny South; and we have not seen his face or heard his voice, either behind the lecture-table or among the private friends who loved him in England—not only in London, but in many a provincial town of the West and the North. A younger generation has grown up, who never knew any of that genial fellowship of contemporary scholars of sterling English literature, the associates of Charles Lamb, of Hazlitt, of Leigh Hunt, and others less distinguished as original writers, but scarcely less accomplished in the knowledge, the culture of mind, the refinement of taste, which is a better reward to its faithful votaries than literary fame. Yet a few disciples of that school, preserving in the most honoured place of their ample libraries the works of those delightful essayists above named, are still living in different parts of this country; and one of them, Mr. Alexander Ireland, of Manchester, is known as the author of a complete analytical catalogue of all their widely-scattered writings. That gentleman has contributed to a local journal the following Memoir of the late Cowden Clarke, which we take as an authentic account of a subject dear to many elders and middle-aged persons in the reading world:—

"This veteran litterateur has just died, at the ripe age of ninety, at his residence in Genoa. In his youthful days he was the intimate friend of John Keats, the poet, who attended a school kept by Mr. Clarke's father at Enfield. He was about seven years older than Keats, and the latter found in his intelligent companion one capable of sympathy with his poetical aspirations and intense love of reading. In this happy intimacy, which continued after Keats left school to become an apprentice to a surgeon in Edmonton, two miles off, and subsequently, when both young men settled in London, the poet's powers found a genial atmosphere for their expansion and exercise. Mr. Clarke has recorded many deeply interesting recollections of the ways and habits of his young friend in those early days. Keats was always borrowing books, which he devoured rather than read; among these was Spenser's 'Faery Queene.' The effect produced upon his mind by its perusal is described as 'electrical.' He could talk of nothing else. His countenance would light up at each rich expression, and his then strong frame would tremble with emotion as he read. Spenser struck the secret spring, and opened the flood-gates of his fancy. The earliest known verses of his composition were in the Spenserian stanza, and to the very last the traces of this main impulse of his poetic life were visible. Clarke also lent him George Chapman's vigorous translation of Homer, and, together, the two youths were in the habit of reading it, turning frequently to Pope's version to compare the rendering of famous passages by the two translators. It was on the occasion of his first introduction to this volume that Keats penned the well-known sonnet—so full of clear thought, heroic simplicity, and noble diction—entitled 'On First Looking into Chapman's Homer.' Mr. Clarke, soon after his removal to London, became the intimate friend of Leigh Hunt, and associated with many of the prominent literary men of the second and third decades of the present century. Among these were William Godwin, Charles Lamb and his sister, William Hazlitt, Mr. Talfourd, and others. For some years he was a bookseller and publisher. He married Mary Novello, the daughter of Vincent Novello, the musician, sister of Mr. Alfred Novello, the well-known musical publisher, and of Clara Novello, the famous songstress of a past generation, who afterwards became the wife of Count Gigliucci, now a member of the Italian Parliament. Mrs. Clarke, as our readers know, holds a distinguished place in the world of literature, on account of her admirable and indispensable 'Concordance to Shakespeare,' the result of sixteen years' labour of love, which will always remain a signal monument of unexampled industry and faithful accuracy. She is also the author of several other works, among which may be named 'The Girlhood of Shakespeare's Heroines.' For many years Mr. Clarke was connected in business with his brother-in-law, Mr. Alfred Novello, and during that time published many volumes, besides delivering numerous courses of lectures in the chief towns of the kingdom on Shakespeare and the Elizabethan dramatists, the novelists, essayists, humourists, &c. The chief among his productions are 'Tales from Chaucer in Prose,' 'Adam the Gardener,' 'The Ribes of Chaucer,' 'Shakespearean Characters—chiefly Subordinate,' 'Molière's Characters,' 'The Comic Writers of England,' 'Shakespearean Jesters and Philopeters,' 'Recollections of Writers Known to an Old Couple When Young,' &c. In conjunction with Mrs. Clarke, he edited several editions of Shakespeare, one of

which contains about 17,000 notes, emendations, annotations, &c. Many of our readers will call to mind his frequent visits to Manchester, some twenty-five years ago, 'when his face was wont to beam across our lecture-tables, giving off an electric aura of humour and imagination which placed his hearers in ready sympathy with a tide of genial talk about the poets whom he loved and has so copiously illustrated.'

"About twenty years ago Mr. Clarke left England to reside in the south of Europe—first at Nice and latterly at Genoa. His married life was peculiarly happy, and extended over a period of between forty and fifty years—years brightened by uninterrupted loving companionship, and made useful by a steady devotion to congenial pursuits:—

Hence had they genial seasons, hence had they
Smooth pleasures, calm discourse, and joyous thought;
And so, from day to day, their little boat
Rocked in its harbour, lodging peaceably.

Mr. Clarke preserved in his green old age so much of the freshness, geniality, and enthusiasm of youth that one could hardly realise the fact that he was an octogenarian. He took a lively interest in politics and the onward movements of the day—in all new phases of literature and art—sympathising keenly with earnest reformers, whether political, social, or religious, and maintaining to the last an undiminished faith in the ultimate triumph of truth and goodness—justifying to the very end of his long and happy life the remark made by Leigh Hunt fifty years ago, that 'my old friend, with his ever wise and young heart, possessed that thorough and rightly-mixed earth-and-heavenly richness of poetical sympathy with Nature and all her lovers, for which I know no man more remarkable, and hardly anyone so much so.'"

Our engraved Portrait of Cowden Clarke is copied from a photograph taken, by J. B. Sciutto, of Genoa, so late as May, 1873, and lent us by his friend, Mr. Edmund Ollier, whose father was the friend and publisher of Keats. The photograph represents Mr. and Mrs. Cowden Clarke together, as befits their harmony of domestic and literary wedded life. It is probable, however, that some of those who knew Mr. Cowden Clarke long ago, while he resided in England, will be much struck by his altered features in extreme old age.

THE TOMB OF GAINSBOROUGH, R.A.

The masterly excellence of this great English artist, in two different branches of his art, was recognised by his brethren while he lived, a hundred years ago. There is a pleasant story of a Royal Academy dinner, at which Sir Joshua Reynolds gave "the health of Mr. Gainsborough, the greatest landscape painter of the day;" to which one of the great landscape painters, Richard Wilson, promptly responded, "Aye, and the greatest portrait painter, too;" whereupon, if we would see how Sir Joshua took the unexpected hit, most likely he did as Goldsmith says of him in "Retaliation," when they "talked of their Raphaels, Correggios, and stuff;" turning his deaf ear to them,

He shifted his trumpet, and only took snuff.

But that Thomas Gainsborough was scarcely, if at all, inferior to Reynolds as a portrait painter is a permissible judgment at the present day, whatever it may have been in his lifetime; and he was also one of the best of the old school of landscape painters. He was a man of rare genius, an accomplished and skilful musician, delightful in social conversation, and his remarks upon a variety of subjects were full of good sense and good taste. He was born in 1727, at Sudbury, in Suffolk, and died in August, 1788, when his body was laid in Kew churchyard. We learnt with much gratification, some time ago, that Mr. E. M. Ward, R.A., the well-known historical painter, had generously provided for the restoration of Gainsborough's tomb in a worthy style. It had fallen into a state of utter ruin, the inscription becoming so illegible that there was considerable difficulty in deciphering the characters upon the stone. It was in this state when Mr. Ward first saw it, and it struck him that, as a brother artist and a fellow-member of the Royal Academy, it would be a proper tribute to adorn the resting-place of the great master. He therefore at once proceeded to have the inscription on the tombstone recut, and caused an ornamental railing to be placed round the grave, in order to prevent its profanation by the footsteps of the unthinking multitude, as a spot so dear to all artists and art-lovers. He also erected, in the interior of the church, a tablet recording the demise of Gainsborough. We may mention that the Vicar then resident at Kew behaved in a most liberal spirit in refusing the fees due to him. The inscription runs as follows:—"Thomas Gainsborough, Esq., died Aug. 22, 1788, aged sixty-one years; also, the body of Gainsborough Dupont, Esq., who died Jan. 20, 1797, aged forty-two years; also, M. Margaret Gainsborough, wife of the above Thomas Gainsborough, Esq., who died Dec. 17, 1798, in the seventy-second year of her age. Restored and inclosed, as a tribute of respect, by E. M. Ward, R.A., September, 1865."

The gold medal presented by Dr. Llewelyn Thomas, physician to the Royal Academy of Music, as a prize for declamatory and expressional singing, was contested by sixteen competitors on Tuesday, and finally awarded to Miss Ellen Orridge, Miss Mary Davis and Miss Marian Williams receiving commendation.

At a meeting held on Tuesday night of the committee formed to collect a fund for the purchase of an annuity for the widow of Mr. George Odger, a number of subscriptions were announced, including £100 from the proprietors of the *Daily Telegraph*. The subscriptions already promised, it was stated, amounted to about £414, and from this there was to be deducted £134 for the family and for the funeral expenses.

It is intended to make on the east coast a new port, to be called Sutton Bridge Docks, the Act of Parliament sanctioning the works having been obtained in the last Session. The directors of the company are the Marquis of Huntly; Robert Tennant, Esq., M.P.; H. H. English, Esq., of Peterborough; M. R. Thorold, Esq. (the representative of Guy's Hospital); and George Frederick Young, Esq., of Wisbech. The object of the company is to provide dock accommodation at Sutton Bridge, which is within the port of Wisbech, for the purpose of facilitating the transport of traffic from the central manufacturing and midland colliery districts of England in connection with the north of Europe. Sutton Bridge has a deep water channel to the sea, and a safe anchorage in the Wisbech Roads; and, in order to afford the best facilities for trade, it is proposed to place the site of the lock at such a level as will admit vessels drawing eighteen feet at neap tides and twenty-four feet at spring tides. The Great Northern Railway Company is without direct access to any port on the east coast, and, recognising the importance of this undertaking, it has agreed to subscribe for £10,000 of share capital, to use the docks, and to pay for the terminal accommodation provided for their traffic. The governors of Guy's Hospital, who are owners of property to a large extent at Sutton Bridge, have agreed to subscribe for £5000 of share capital; and we hear that further subscriptions amounting to £20,000 have been promised by merchants in the district and others interested in the undertaking.

CAPTAIN COOK'S MONUMENT IN THE SANDWICH ISLANDS.

We have received from the Secretary to the Admiralty the following interesting memorandum respecting the monument erected to the memory of Captain Cook at Karakakoa, in the island of Hawaii, or, as the name was formerly spelt, Owhyhee, one of the Sandwich Islands:—

"A report has been received at the Admiralty from Commander Long, of H.M.S. *Fantome*, giving a detailed description of the measures carried out by order of the Lords Commissioners of the Admiralty for the improvement of the site of the monument erected in Kealakekua or Karakakoa Bay, in the Island of Owhyhee, to the memory of the great circumnavigator Captain Cook. Rear-Admiral the Hon. Arthur Cochrane, late Commander-in-Chief on the Pacific Station, after visiting the islands in 1875, drew the attention of the Admiralty to the state of the monument, and, on his application, the Princess Likeliké (now Mrs. Cleghorn), the sister of the King of the Sandwich Islands, who originally presented a piece of ground as a site for the memorial, added to her former generosity by bestowing an additional plot of about half an acre for an inclosure. At the Admiral's suggestion the Admiralty, with the concurrence of the War Office, gave directions for twelve old 32-

MONUMENT TO CAPTAIN COOK AT THE SANDWICH ISLANDS.

pounder guns, which were in store at Esquimalt, being conveyed to the Sandwich Islands, for the purpose of forming a suitable fence.

"The monument is a plain obelisk of concrete, 27 ft. in height, erected on the shore and close to the spot where the great seaman fell. The expense of its erection was mainly borne by English subscribers interested in the island, amongst whom were Lady Franklin, Rear-Admiral Richards, Mr. Follett Syngé, and others. The seaward base of the obelisk bears the following inscription:—'In memory of the great Circumnavigator Captain James Cook, R. N., who discovered these islands on Jan. 18, 1778, and fell near this spot on Feb. 14, 1779. This monument was erected, in November, 1874, by some of his fellow-countrymen.'

"The guns used for the inclosure of the site were conveyed from Esquimalt to Owhyhee, in her Majesty's ship *Fantome*, in September last. They have been fixed in the ground vertically at intervals, and connected by a chain, thus inclosing an area of ground of about 150 ft. square, in which flowers and shrubs, kindly provided by the Rev. M. Davis, of the Church of England Mission, have been planted; also seeds of the algaroba-tree, which is most suitable for the dry and rocky soil. Commander Long states that the appearance of the monument has been greatly improved, and that it is now quite sufficient for so

THE LATE MR. COWDEN CLARKE.

CROSS ERECTED BY HER MAJESTY TO THE MEMORY OF LADY AUGUSTA STANLEY.

disadvantageous a site. He suggests that if it should be desired to erect a better memorial, the addition of a 'Captain Cook's Ward' to Honolulu Hospital would be an appropriate arrangement and well fitted to perpetuate the memory of the distinguished discoverer of the islands, one of whose greatest cares was the health and comfort of his men. Her Majesty's Consul-General at Honolulu states that great credit is due to Commander Long for the spirit and energy with which he carried through the undertaking, which was necessarily long and wearisome, and in which he was well seconded by the officers and men under his command."

MEMORIAL OF JOHN HOWARD.

The benevolent example of this illustrious Englishman, the author of modern reforms in prison management and discipline, and of many improvements in sanitary, educational, and other social affairs, has been recognised by a European fame during three quarters of a century. Yet his last request, for the disposal of his mortal remains after death, was in accordance with the spirit of Christian self-renunciation which had prompted and sustained his ardent life of unceasing labours. "Let no monument," he said, "or monumental inscription whatsoever, mark the spot where I am buried; lay me quietly in the earth, place a sun-dial over my grave, and let me be forgotten." Upon another occasion, expecting the end of his earthly career, he chose for the simple motto of his epitaph, "Christ is my Hope;" and desired that the text of his funeral sermon should be Psalm xvii. 15, "As for me, I will behold Thy face in righteousness; I shall be satisfied, when I awake, with Thy likeness." It was at Kheron, a town of Southern Russia, situated on the Dnieper, about a hundred miles east of Odessa, that the devout and earnest servant

GAINSBOROUGH'S TOMB IN KEW CHURCHYARD.

of humanity died of fever, in January, 1790. He had travelled about 50,000 miles, and spent above £30,000 of his private estate, to perform works of mercy or to pursue statistical inquiries with that intent throughout the world. Such was the admirable course of John Howard, in earlier life a City business man, of Watling-street and Old Broad-street, and residing at Stoke Newington, but latterly a country squire at Cardington, in Bedfordshire, and one year High Sheriff of his county. The renown which he never sought or relished could not be escaped by one responsible for such noble and useful deeds. Parliament voted him, for more than one public service, the thanks of the nation; and his death was officially recorded, though a mere private person and volunteer, in the *London Gazette*; while foreign Princes and literary men or philosophers vied with each other in doing honour to John Howard. Though a steadfast Protestant and a member of the Independent or Congregationalist Dissenting flock, with a certain attachment, we are told, also to the Society of Friends, or Quakers, he seems to have cherished a feeling of Christian sympathy and regard for communities of widely different religious opinions, the Roman Catholics and Unitarians not excepted. In many respects, as well as in this of true religious liberality, but especially in the active, hopeful, indefatigable pursuit of social charity and economy, John Howard was far in advance of his age. We are indebted to the secretary of the Howard Association, whose offices are at 5, Blahopgate Without, for the illustration of the monument erected, notwithstanding Howard's humble wish, over his lonely grave, three miles from the town of Kheron. An official gentleman in the Russian Ministry of Justice, who is a corresponding member of the Howard Association, lately procured the photograph and sent it here. Mr. R. N. Fowler is treasurer and Mr. W. Tallack secretary of the association.

ILLUSTRATIONS FROM "THE PRINCE OF WALES'S TOUR IN INDIA,"

BY W. HOWARD RUSSELL, LL.D.

MADRAS RACES.

LEVEE OF PETS.

"THE PRINCE OF WALES'S TOUR IN INDIA."

A handsome volume is published by Messrs. Sampson Low, Marston, Searle, and Rivington, under the above title, containing the "Diary in India" of Dr. William Howard Russell, who was attached to the personal suite of his Royal Highness there, and some account of the Prince's visits, also, to the Courts of Greece, Egypt, Spain, and Portugal, from the middle of October, 1875, to his arrival home in May last year. The author has long been so well known for bright and vivid narratives of military operations, foreign travel, and courtly festivity or ceremonial, in the columns of the *Times*, that he needs no testimony upon this occasion to the literary merits of his work. The subject, too, has been made entirely familiar to our own readers, since nearly a twelvemonth ago, by the appearance of a very large number of Illustrations, from sketches by Mr. Simpson and other Special Artists, in the weekly issues of this Journal during the Prince's absence from England, and by the subsequent reprint of some of those Engravings, in a collected publication, with a complete account of his voyage, his tour in India, and his return to this country. Another Special Correspondent of one of the London daily newspapers, Mr. J. Drew Gay, of the *Daily Telegraph*, has likewise republished or recast his letters, in a very well written and interesting book, entitled "From Pall-mall to the Punjab," which was produced through Messrs. Chatto and Windus, some time last summer. We do not therefore find it necessary to recapitulate the contents of Dr. Russell's present work, but it may be safely recommended as the most authentic and elaborate memorial of an important "Royal Progress," which has perhaps derived some additional lustre from the more recent adoption, by Parliamentary enactment, of the title "Empress of India," by her Most Gracious Majesty the Queen. It is generally considered that the visit of the Prince of Wales to his illustrious Mother's Asiatic dominions was a great and gratifying public success; and this agreeable impression will be confirmed by the perusal of the very pleasant narrative here put before us. The volume is furnished with many engravings, from the sketches taken by Mr. Sydney Hall, who accompanied the Royal party; and we are permitted by Messrs. Sampson Low and Co. to present in our Journal two of these Illustrations, which represent the Madras Races and the "Levee of Pets." The latter subject is the scene on board the *Serapis*, nearing Portsmouth harbour on her arrival home, when the Princess of Wales and her children, having gone on board that ship to greet his Royal Highness, were diverted with the sight of the strange animals, the tigers, young elephants, deer, ostriches, bears, and tailless dogs of Tibet, which the Prince had brought with him to England.

FOREIGN AND COLONIAL NEWS.

FRANCE.

Both Chambers adjourned, last Saturday, till May 1. The Senate gave a parting rebuff to the Lower House by postponing till the Budget comes before it the bill repealing the excise on soap. Several of the Ministers are about to take a holiday—M. Jules Simon, who has been unwell of late, starting for Venice. In Saturday's sitting the Chamber of Deputies declared the Republican member for Marennes, M. Mestreau, duly elected, notwithstanding the vigorous efforts of M. Robert Mitchell, representing the Bonapartists, to prove that undue influence had been used to secure his return.

Marshal M'Mahon remitted the biretta, on the 22nd inst., to Mgr. Caverot, Archbishop of Lyons, who has recently been raised to the dignity of Cardinal. Mgr. Caverot delivered an address on the occasion, in which he expressed devotion simultaneously towards the Church and towards France, and denied that the devotion of the Catholic clergy to the Church weakened that which they owed to their country.

General Ignatieff paid a flying visit to Paris last week, going thence to Vienna.

Messieurs Louis Blanc and Victor Hugo addressed a crowded meeting at the Château d'Eau Theatre last Sunday on behalf of the distressed silk-weavers of Lyons. The first-named orator devoted his speech to the history of legal charity in England; while the poet spoke of the glory of Lyons as a city of labour, and extolled the era of peace about to be inaugurated by the people at the Paris Exhibition. M. Victor Hugo aroused great enthusiasm by his appeal. The house was crowded, and all the reserved seats at ten francs were taken, the total receipts being considerable.

The first conference of the English and French Commissioners in reference to the renewal of the Treaty of Commerce assembled at Paris on Monday afternoon, under the presidency of the Duc Decazes. M. Teisserenc de Bort, Minister of Commerce and Agriculture, and Lord Lyons were present, and the conference was regularly constituted.

General Sir J. F. Fitzgerald died recently at Tours, at the age of ninety-one years. He was buried, by order of the French Minister, with the honours due to his military rank.

SPAIN.

King Alfonso, having arrived at Cadiz in the course of his journey to various parts of his kingdom, was entertained on Friday evening, the 23rd inst., on board the *Minotaur*, the flag-ship of the British squadron. Rear-Admiral Seymour proposed the health of his Majesty. The King replied in English, and proposed a toast—her Majesty Queen Victoria and the prosperity of the English nation, of whom, he said, he retained a very agreeable recollection. At night the men-of-war in the Bay of Cadiz were illuminated. The King, on his return to the town, was enthusiastically cheered, and there was an illumination in the evening. His Majesty accepted an invitation to lunch on board one of the Transatlantic mail steamers on Saturday, and invited the officers of the British Channel fleet to dine with him in the evening. The Council-General of Cadiz entertained the King at a banquet, at which covers were laid for one hundred guests, including the chief officers of the British squadron.

His Majesty arrived at Seville on Monday afternoon, having stopped three hours at Xeres on his way thither. It is stated that the meeting with the Queen Mother in the station was touching and dignified. There were present the Princess of Asturias and her sister and the Duc de Montpensier and his family. The King's reception was said to be worthy of Seville. His Majesty was to leave there on Saturday for Granada, thence to proceed to Madrid.

A denial is now given in a telegram from Madrid to the recently circulated statement that the King was about to marry the daughter of the Duc de Montpensier.

ITALY.

In the sitting of the Chamber of Deputies on the 23rd inst., the debate on the Government bill authorising a special grant of 15,000,000 lire for the purchase of portable arms was brought to a close, after speeches had been delivered by Signor Depretis, General Mezzacapo, and Signor Nicotera in favour of, and by Signor Sella and General Rottoli against, the bill. On a division being taken by a secret ballot, the grant was sanctioned by 178 votes against 66.

Signor Depretis made his Financial Statement on Tues-

day. He estimated the income from ordinary sources at 1,275,000,000 lire; ordinary expenditure, 1,254,000,000 lire; showing a surplus on this part of 21,000,000 lire. Between, however, the income from extraordinary sources, 122,000,000 lire, and extraordinary outlay, 131,000,000 lire, there would be a deficit of 9,000,000 lire, reducing the surplus to 12,000,000 lire, which he hoped to attain on the actual income and expenditure of the year, independent of the past. The total income for the year from all sources was 1,397,000,000 lire; the total outlay of all kinds was 1,385,000,000 lire; the surplus was 12,000,000 lire. It could not, he said, be asserted that the equilibrium had been attained. There was, undoubtedly, a considerable improvement in the financial condition of the country; but veritable equilibrium, in the logical signification of the term, there was not. To reach it the view of the Government was to permit no reduction in actual taxation, but to endeavour to effect progressive improvements in receipts and to make provision for the abolition of a fixed paper currency. The Chamber subsequently adjourned for the Easter recess until April 9.

An English deputation waited on the Pope last Tuesday to present him with an address of thanks for the elevation of Monsignor Howard to the Cardinalate. His Holiness, in reply, spoke in high terms of the English nation. There are conflicting accounts as to the health of his Holiness.

BELGIUM.

The Electoral Reform Bill, in the modified form approved by the Liberal party, has been unanimously voted by the Central Section of the Chamber of Representatives.

GERMANY.

A letter has been written by the Emperor William to Prince Bismarck, in which his Majesty expresses his thanks for the many tokens of sympathy he received on his eightieth birthday.

The Crown Prince and Princess were entertained at dinner on Monday evening by Dr. Achenbach, the Minister of Commerce. Herr von Schleinitz, Lord Odo Russell, the English Ambassador, and Viscount de Gontaut-Biron, the French Ambassador, also received invitations.

It is now stated that the Emperor has refused to accept the resignation of General von Stosch, and that the question at issue has been arranged in such a way as to allow of his resuming his official duties as chief of the German Admiralty.

It was finally determined by the Parliament, on Saturday, that Leipzig should be the seat of the Superior Imperial Tribunal. The Parliament has adjourned for the recess, after debates of unusual interest.

AUSTRO-HUNGARY.

General Ignatieff arrived at Vienna, on Sunday, and in the early part of the day received short visits from Count Andrassy, the Russian Ambassador, and Count Zichy. In the afternoon he called on the Italian Minister, with whom he dined in the evening. On Monday the General received Aleko Pasha, the Turkish Ambassador, who remained with him for an hour. M. Zukits, the Serbian diplomatic agent, subsequently had a quarter of an hour's interview with the General. General Ignatieff was, on Tuesday, received in audience by the Emperor, with whom he remained half an hour. Subsequently he had an hour's interview with Count Andrassy. The General and Madame Ignatieff were present at a Court dinner.

An Imperial letter patent has been issued convoking the Diet of Bukovina for April 11, the Diets of Bohemia and the Tyrol for the 9th, and the other Diets of the Monarchy, except those of Galicia and Dalmatia, for the 5th.

The Hungarian Minister of Finance brought forward in the Lower House of the Legislature on the 22nd inst. a bill authorising the Government to contract a 6 per cent gold rente loan for the purpose of converting the floating debt, which amounts to 76,500,000 florins. In introducing the bill the Minister stated that the change to be expected in the general political situation would be favourable to the operation. On Monday the House passed the bill without modification by 166 votes against 74. The Upper House of the Hungarian Diet discussed and adopted the bill on Tuesday.

TURKEY.

The negotiations between Montenegro and the Porte have not advanced. Last Saturday the Montenegrin delegates at Constantinople had another conference with Safvet Pasha. The Porte still refuses to make the concessions asked for by Montenegro, and the delegates of that State, on their side, show no disposition to give way.

ROUMANIA.

The Government, being unable to obtain a foreign loan, has resolved to issue a large amount of paper money, which will be gradually redeemed by sales of State property.

DENMARK.

In the Folkething on Monday the Government brought forward their proposal with regard to the Provisional Budget. The Ministers recommend "urgency" for the bill, in order to render a short prolongation of the Session possible, thus avoiding the necessity for a prorogation.

AMERICA.

President Hayes will, it is stated, call Congress together for June 4.

The President has received a deputation of coloured citizens, and, in reply to their congratulations, he said that he had appointed Mr. Frederick Douglass as Marshal of the district of Columbia to show that he was fully determined to act up to the principles of his inaugural address.

Ex-President Grant has left Washington for a western tour. Mr. Packard, the Republican Governor of Louisiana, has been informed by the Secretary of War that New Orleans will shortly be visited by the Special Commission of Inquiry, and that meanwhile the President desires that the situation may remain unchanged. Mr. Chamberlain and General Wade Hampton, the Republican and Democratic Governors of South Carolina, have accepted the President's invitation to consult with him at Washington upon the affairs of the State.

Mr. Elihu B. Washburne, Minister to Paris, has placed his resignation in the President's hands, to take effect when his successor is appointed.

A series of resolutions has been passed by the Centennial Commission and the Centennial Board of Finance thanking Queen Victoria, the British Government, and the British officials for their co-operation in connection with the Philadelphia Exhibition of last year.

Mr. E. H. Kellogg, of Massachusetts, has been appointed American Commissioner on the Fishery Commission created by the Treaty of Washington. The other Commissioners are Mr. Alexander T. Galt, representing Great Britain, and the Belgian Minister at Washington. The Fishery Commission assembles at Halifax next summer.

Mr. Tweed having surrendered 1,250,000 dols. to the New York Municipality, it is expected that the suit against him will be settled, and that he will be released.

John D. Lee, the Mormon Bishop, has been executed, by shooting, for complicity in the massacre of 120 Californian emigrants at Mountain Meadow, Utah, in 1857. The culprit confessed his guilt.

CANADA.

In the debate of the House of Commons of the Dominion Parliament upon the tariff resolutions, an amendment was moved by Sir John MacDonald, last Saturday, in favour of fostering the manufacturing, mining, and agricultural interests in the Dominion. The motion was defeated by 119 to 70 votes.

The Nova Scotia Government has brought forward the Budget in the House of Assembly. It estimates the revenue of the colony at £653,155, and the expenditure at £574,150; thus showing a surplus of £79,005. With reference to the recently raised question of the irregular use of the Great Seal of Nova Scotia, the Court of Queen's Bench of that State has decided that the use of either Great Seal is valid. The matter will be submitted to the Canadian Court. In the House of Assembly the Provincial Secretary has moved an address to the Queen praying for Imperial legislation, in order to settle all doubt on this question. The House of Assembly has approved the Government proposal to send Nova Scotian delegates to the conference to be held upon the question of a legislative union between the maritime provinces.

INDIA.

The Legislative Council at Calcutta was occupied on Wednesday, the 21st inst., in discussing two bills introduced in accordance with Sir John Strachey's scheme for extending the decentralisation of the finances. These bills afforded texts for a long and important debate on the Budget.

The *Times* correspondent at Calcutta, telegraphing last Sunday, says that there was heavy rain last week in nearly all the Madras distressed districts. Heavy showers are also reported in Mysore, but they are said to have been insufficient to do much good. The numbers on the relief works in Bombay show a slight increase, but there is a slight decrease in the numbers on the Madras relief works. Taking both Presidencies together, there is a net increase of 2608. Sir Richard Temple has again visited Sholapore and Kaladji, where he inspected 19,000 relief labourers, and found their physical condition generally satisfactory. The Resident at Hyderabad confirms the opinion that the distress in that State is likely to be less than at first apprehended.

The Viceroy, it is announced, will leave Calcutta on the 2nd proximo. He proceeds first to Lucknow, thence to Nynee Tal, where he will remain a month before going to Simla.

General Norman left India on the 18th inst. His successor, General Johnson, has taken his seat as member of the Council.

We learn by telegram from Calcutta that the Kohat Pass was formally opened on Saturday last, the head men of the Afreedees, who held it, having submitted to the Imperial Government and accepted the terms offered to them.

Synd Noor Mahomed, Prime Minister of the Ameer of Cabul and Special Envoy from the Ameer to the Indian Government, died, at Peshawar, on Monday last.

Her Majesty's Indian troop-ship *Serapis* left Bombay, and the *Euphrates* arrived at Bombay, on Tuesday last.

THE CAPE COLONIES.

President Burger, at the opening of the Volksraad on Feb. 13, referring to the confederation proposals of the Earl of Carnarvon, spoke strongly in favour of union with the British flag. It is stated that all the leading men of the Transvaal Republic, with the exception of Kruger, think it impossible to continue independent. Several petitions for and against the union have been presented, however, those against far outnumbering those in favour of the confederation scheme.

According to the latest intelligence from the Transvaal, scenes of confusion have occurred in the Volksraad upon the refusal of that Assembly to consider President Burger's programme of reforms, the House insisting on the maintenance of the freedom of the Republic.

AUSTRALIA.

A new Ministry has been formed in New South Wales. Mr. Parkes is Premier and Colonial Secretary, the other members being—Colonial Treasurer, Mr. Prodington; Postmaster-General, Mr. Samuel; Secretary for Mines, Mr. Lloyd; Secretary for Lands, Mr. Driver; Secretary for Public Works, Mr. Hoskins; Justice and Public Instruction, Mr. Francis Suttor; Attorney-General, Mr. Windeyer. The new Ministry took the oaths of office on the 20th inst.

The *South Australian Register* of Jan. 27 states that Sir George Bowen, the Governor of Victoria, has suggested to the Earl of Carnarvon that the services of Mr. Earnest Giles, as an explorer in Australia, should be recognised by a suitable grant of land. His services, we are told, have been most valuable throughout Australia generally.

The English cricketers have played and lost a match against the combined New South Wales and Victoria team.

The *Airlie*, 1500 tons, chartered by the acting Agent-General for South Australia, left Plymouth on the 23rd inst. with 463 emigrants, under the charge of Dr. John T. Toll, surgeon. Among them were 142 single female domestic servants.

We learn by a telegram from Singapore, by Eastern Telegraph Company's cable, that the Sultan of Perak was forcibly arrested on Tuesday night. There was no warrant or written authority. A writ of habeas corpus has been moved for and refused by the registrar; there is no Judge in the settlement.

The National Gallery of Berlin has suffered a great loss. One of the finest of its pictures has been stolen. The missing canvas is a small but exquisitely finished specimen of Van Eyck, signed and dated 1440—the subject, the Virgin crowned, seated, with the Child in her lap, and in the background a cathedral.

Two Canadian statesmen—the Hon. George Brown and the Hon. Mr. Mackenzie—have, it is said, declined the honours of knighthood offered to them, on the ground that such honours are not in harmony with the social system and usages of colonial society.

The Crystal Palace Picture Gallery, in which the new pictures have been hung, is reopened for the season.

At the first meeting of the Town Council for the newly incorporated borough of Conway, on Saturday last, Mr. William Hughes, solicitor, was elected Mayor.

There has recently been published an Album of Views of Health Resorts in the South of France and Corsica, auto-lithographed by Mr. R. Cadogan Rothery, an artist who has resided in those parts for some years. The work, which is dedicated, by permission, to the Duchess of Roxburghe, has been printed by Messrs. Maclure and Macdonald, and is worthy of inspection.

Several members of the House of Commons' Select Committee on the use of Mechanical Power on Tramways visited Wantage last Saturday to witness the running of two steam-engines on the line of the Wantage Tramways Company. A number of gentlemen connected with tramway enterprise were also present. The line is two miles and a half long, and runs from the station of the Great Western Railway to the town of Wantage. The engines inspected were Graitham's combined steam car and engine, and a detached engine manufactured by Messrs. Hughes and Co., of Loughborough.

NATIONAL SPORTS.

THE OXFORD AND CAMBRIDGE CONTESTS.

As the chief interest of the past few days has centred in the struggles between the representatives of the rival "blues," we shall give a short account of them before touching on the remaining sporting events of the week. It may be remembered that Cambridge won both the single and double handed billiard-matches, thanks mainly to the good play of Pontifex, who is much beyond the average of amateurs; and the next meeting of the two Universities was at Lillie-bridge last Friday week, when the usual nine events were set for decision. There can be no question but that the form shown in the running and other contests was below the average, and did not create the usual interest. The Oxford men were decidedly unfortunate. Not only did they lose the services of E. R. J. Nicolls, the president, who was unable to compete, owing to a death in his family, but one of their chosen representatives in the Weight Putting, who had frequently covered 37 ft. in practice, was rendered hors de combat by a sprained arm. Thus, in all probability, they lost two events, as it is only fair to presume that Nicolls would have repeated his victory of last year in the Mile. In spite of these misfortunes, Oxford only just lost the odd event, carrying off the 100 Yards with E. C. Treppin, the Hurdle Race with S. F. Jackson, the Long Jump with C. M. Kemp, and the Three Miles with W. R. H. Stevenson. For Cambridge W. Cunliffe ran a good race in the Mile, finishing with great gameness, and catching H. G. Tylecote about fifty yards from home, after being apparently beaten. Of course, G. H. Hales, the president of the C.U.A.C., was quite unapproachable with the Hammer; G. W. Blathwayt won the High Jump; A. H. East secured the Weight Putting; and W. H. Churchill was first in the Quarter Mile, though he was completely run out to beat C. H. T. Metcalfe by half a yard, and we much doubt if he is so good a man as his Cambridge time would lead one to suppose.

Before the last race had been run it became generally known that the boat-race would be rowed at a quarter before eight on the following morning, which was nearly an hour earlier than had been anticipated. As a natural consequence, the attendance on the towing-path and at all the usual "coigns of vantage" was considerably smaller than usual. Of course, there was a marked falling off in the number of ladies present; and the appearance of a good many of the spectators was proof positive that they had been unanimous in determining that the only way to be in time was to sit up all night. Once more the Oxford eight were lucky enough to win the toss for choice of stations, and precisely at eight o'clock they put off from the London Boat Club house in their Clasper boat, which they had at last determined to use in the race, and took the Middle-six side. It was nearly a quarter of an hour before the Cambridge men appeared, and another quarter elapsed before the word "Go!" was given by Mr. Searle. The Oxfordmen started at 39 strokes to the minute, against the 38 of their opponents, and at once drew slightly in front; but at the Duke's Head the Cambridge boat had drawn level. There was nothing between them at Craven Point; but at Rosebank the dark blues were slightly in advance. This advantage was only maintained as far as the Crab-Tree, where the Cambridge coxswain kept much the better course, and in making the shot for the Soap Works drew out with a lead of about half a length. This advantage, however, was but momentary, as a spurt from Marriott rapidly closed up the gap, and as the two boats passed under Hammersmith Bridge Oxford, if anything, had the advantage. The curves in the river were now all in favour of the light blues, who began to creep away. They were perhaps half a length in advance at the foot of Chiswick Eyt, from which point the Oxford men began to row much better together, and gradually gained, in spite of Shafto quickening up to 37, and shortly afterwards to 38. At Chiswick Church the Oxonians were fully half a length to the good, and were rowing in better form than was shown by their opponents. Passing under Barnes Bridge, the leaders had increased their advantage to more than a length; and, as they were gaining slowly but surely, the race was apparently over, when bow caught a crab and broke his oar, which was only held together by the leather. Of course, after this he could only sit and swing, and, in spite of the desperate exertions of the other seven men, the Cambridge boat rapidly gained; and, though the general opinion was that Oxford won by about a couple of yards, the decision given by John Phelps was a dead-heat, a result with few parallels in the history of rowing. Thus appropriately ended one of the most sensational of the Inter-University boat-races. The fluctuations in the betting within the last month have been truly remarkable; and the result, by which all bets are off, will be chiefly regretted by the book-makers, most of whom must have stood to win considerable sums by the victory of either. We append the names and weights of the two crews:—

OXFORD.		st. lb.
D. J. Cowles, St. John's (bow)	...	11 3½
J. M. Boustead, University (+)	...	12 9
H. Pelham, Magdalen	...	12 7½
W. H. Grenfell, Balliol	...	12 10
H. J. Stayner, St. John's (+)	...	12 5½
A. Mulholland, Balliol	...	12 7½

G. L. Davis, Clare (cox.)	...	7 5

Also rowed in 1874. Also rowed in 1875. Also rowed in 1876.
Mr. Davis also steered in 1875 and 1876.

We can devote little space to other topics. The Grand National, which has scarcely excited so much interest as usual this season, brought a field of sixteen to the post. Shifnal (11 st. 5 lb.) regained his position of first favourite before the fall of the flag, though he was closely pressed in the quotations by old Chimney Sweep (10 st. 13 lb.). The latter did manage to run fourth, a position which he occupied last year; but from the last flight of hurdles nothing had a chance against Austerlitz, who, very well ridden by his owner, Mr. Hobson, won easily by four lengths. Congress (12 st. 7 lb.) finished second, a neck in advance of Liberator (10 st. 12 lb.), who was pulling up. The other races of the Liverpool Meeting were of comparatively little importance, and can be passed over without comment.

Last Thursday week the series of competitions for the amateur championships commenced at Lillie-bridge with the boxing, wrestling, and bicycling. We have no space to enter into details, and must simply state that H. Skeate (West London B.C.) won the Light Weight Cup; J. H. Douglas (Broad-street Gymnasium) the Middle Weight Cup, for the third year in succession; and J. M. R. Francis (Richmond B.C.) the Heavy Weight Cup. In the Catch Hold Wrestling, A. Allwright (G.G.S.) beat W. W. Hewitt (G.G.S.); and the

Four-Miles Bicycle Race produced a splendid struggle between W. Wyndham (London B.C.) and R. R. Mackinnon (Brighton B.C.), the former winning by about four yards, in 13 min. 7 sec., the best amateur time on record.

The Amateur Championship Meeting, on Monday, was once more brought off in heavy rain. The best race of the day was that for the Seven-Miles' Walking, in which H. Webster (Knotty Ash), perhaps the finest and fairest walker ever seen in London, beat W. J. Morgan (Atalanta R.C.), by half a yard, after a most determined fight for the whole of the distance. F. T. Elborough (L.A.C.) again secured both the Quarter and Half in ridiculously easy style; and H. Macdougall (L.A.C.) won the 100 Yards, though, had not E. C. Treppin (O.U.A.C.) started so badly, the result might possibly have been different. Perhaps the most popular victory of the day was that of J. H. A. Reay (L.A.C.) in the Hurdles, as his success was gained after three or four years of disappointment.

On Tuesday night Joseph Bennett (ex-champion) and S. W. Stanley played 1000 up even on a championship table erected by Messrs. Burroughes and Watts. The stake was £100, and the match took place at the Gaiety Restaurant, Strand. Stanley proved out of all form, and Bennett, who put together two grand breaks of 76 and 86 after the interval, won by 247 points. The marking of young Oxford Jonathan left nothing to be desired.

THE OPERA SEASON.

We have already given an outline of Mr. Gye's arrangements for the forthcoming season of the Royal Italian Opera (which will begin on Tuesday next), and are now in possession of Mr. Mapleson's programme of that of Her Majesty's Theatre, which will open under his management on Saturday, April 28, being its first application to its intended purpose since the building of the new house on the site of the old one, destroyed by fire in December, 1867. Mr. Mapleson thus returns to the locality which he occupied for several seasons up to the destruction of the former theatre, in which some grand classical operas were splendidly revived during the period of his management, under the skilled and energetic conductorship of Signor Arditi.

Mr. Mapleson's prospectus is of strong interest, both as to performers and performances. His re-engagements include those of Mlle. Titiens, Mesdames Nilsson and Trebelli-Bettini, Mlles. Rodani, Varese, and Alwina Valleria, Signori Fancelli, Rinaldini, Grazi, M. Faure, Signori Rota, Galassi, Medini, Del Puente, Brocolini, Borella, &c. Signor Tamberlik, formerly associated with the Royal Italian Opera, will appear for the first time under this management; and the first appearances are announced of Mlles. Carolina Salla, Mathilde Nandori, Signori Millet Cabero, Carrion, Talbo, and Gayarre.

Besides performances of classical and popular operas that have formed recent as well as frequent attractions under Mr. Mapleson's management, Rossini's "Otello" will be given, with Madame Nilsson as Desdemona, for the first time for seven years, the cast being otherwise exceptionally strong, with M. Faure as Iago and Signor Tamberlik as Otello. The Italian version of Wagner's "Der Fliegende Holländer" is to be revived, Madame Nilsson replacing Mlle. Ilma de Murska as Senta, and M. Faure appearing (for the first time) in the character of Vanderdecken. Another important promise is that of the performance of Cherubini's "Medea," with Mlle. Titiens as the heroine, as in the revival of the opera at Her Majesty's Theatre, under Mr. Mapleson's management, in 1865. Still more interesting, perhaps, is the promised production, for the first time in this country, of Gluck's "Armida," with Mlle. Titiens in the principal character.

Sir M. Costa continues his engagement with Mr. Mapleson in the capacity of director of the music and conductor; as do M. Sainton as principal first violin; and soloists, Signor Li Calsi as "maestro al piano," Mr. Willing as organist, and Mr. E. Stirling as stage manager, Mr. Smythson being appointed chorus master.

THE CAMBRIDGE CLASSICAL TRIPOS.

The list this year contains seventy-two names. There are twenty in the first class, twenty-eight in the second class, twenty-three in the third class, and one agrotat. Last year sixty-five only were approved, twenty-three obtaining a first class, twenty-six a second class, twelve in the third class, and four agrotat. The following is the official list:—

Class I.—Wellton, King's; Sharkey, Christ's; Dyson, John's; Corrie-King's, Fulford, Clare, Mitchell, Trinity, and Savage, Christ's, equal; Chawncr, King's; Davidson, Trinity, and Jeffery, Peter's, equal; Vaughan, John's; Donaldson, Trinity; Kennedy, Pembroke, and E. H. C. Smith, Trinity, equal; Compton, Jesus, Higgins, Emmanuel, and James, Jesus, equal; Bowring, Trinity; Meyrick, Trinity, and Tillard, John's, equal.

Class II.—Leaf, Trinity; Lowry, Trinity Hall, and Vipan, Christ's, equal; Pearson, Trinity Hall; Northcott, John's, and Tarver, King's, equal; Blackett, John's, and Davies, Pembroke, equal; Beade, King's; Lee, Trinity; Dixon, Christ's; Gordon, Trinity; Nethercole, Catherine; Grant, King's, and Rooper, John's, equal; Spencer, Sidney; Patterson, Trinity, Rogers, Clare, and Sutcliffe, Clare, equal; Baxter, Trinity; Evans, Sidney; Briscoe, Trinity; Williams, Clare; Duffield, Queen's; Fitch, Catherine, Fox, Corpus, and Walker, Christ's, equal; Cadman-Jones, Clare.

Class III.—Warren, John's; Benwell, Trinity; Bené, Queen's, and Wilson, Magdalen, equal; Norman, Trinity; Hill, Trinity, and Rhodes, Caius, equal; Carr, John's; Kendall, Corpus, Pownall, Pembroke, and Stephenson, Corpus, equal; Smith, Sidney, Underhill, Magdalen, and Wilson, Pembroke, equal; Grant, Christ's, and Holden, Emmanuel, equal; Briggs, Christ's; Smith, Pembroke; Bull, Trinity, and Norman, Corpus, equal; Mellor, Trinity; Godby, Magdalen, and Postlethwaite, Clare, equal. Agrotat: Smith, Christ's.

Mr. James Edward Cowell Wellton, the Senior Classic, is the eldest son of the Rev. Ind Wellton, of Tonbridge School. He was born on April 25, 1854. He was educated at Eton under Dr. Hornby, where he obtained the Newcastle Scholarship in 1873. In the same year he was elected to a scholarship at King's College. In the course of his undergraduate career he obtained the following scholarships and prizes:—In 1873, the Carus Greek Testament Prize; in 1874, a Bell University Scholarship; in 1875, Sir William Browne's Gold Medal for the best Greek Ode, and in addition was specially commended by the examiners for the Craven University Scholarship. In 1876 he was elected to a Craven University Scholarship, and again obtained Sir William Browne's Gold Medal for the best Greek Ode. He has also obtained a number of College prizes, and has been first in the College Divinity and Classical examinations.

Mr. John Archibald Sharkey, the Second Classic, is the son of Edmund Sharkey, Esq., M.D., Ballinasloe, Ireland, and was educated at Victoria College, Jersey, and Trinity College, Dublin. He obtained the Porson (University) Scholarship in 1875, and was bracketed for the Porson Prize in the same year; he obtained the Waddington (University) Scholarship in 1876.

Mr. Frank Dyson, the Third Classic, is the son of Mr. James Dyson, Chesterton, Cambridge, and is twenty-two years of age. He was educated at the Perse School, Cambridge, under the Rev. F. Heppenstall. In December, 1873, he obtained the first Minor Scholarship for Classics at St. John's, and commenced residence in October, 1873. He obtained a Foundation Scholarship in 1873, and Wright's Prize in 1875 and 1876.

The Chancellor's classical medals have been awarded to Wellton (King's), first; Chawncr (King's), second. Sharkey (Christ's) highly distinguished himself.

At the annual meeting of the Edinburgh Philosophical Institution on Tuesday Mr. Thomas Carlyle was unanimously elected president for the ensuing year.

A return presented to Parliament by the Registrar-General states that the total number of births in England and Wales last year was 887,464, and the total number of deaths 510,308. The number of marriages was 201,835. The estimated population to the middle of 1876 was 24,240,010.

LAW AND POLICE.

Lord Chief Justice Cockburn was presented on Tuesday with addresses by the Mayor and Corporation and the Incorporated Law Society of Bristol, on the occasion of his revisiting that city, of which he had formerly been Recorder, after a period of twenty years. The address of the Corporation was read by the Mayor, and that of the Law Society by its president, Mr. Vassal. His Lordship having returned a separate reply to each address, Mr. Cole, Q.C., as leader of the Western Circuit Bar, expressed the pleasure which the members felt on seeing his Lordship once more among them.

The Court of Appeal had before it last Saturday the case of "Parker (registered officer of the National Bank) v. M'Kenna," in which an appeal was made on behalf of Sir Joseph M'Kenna, M.P., from a decision of Vice-Chancellor Bacon, by which Sir Joseph was ordered to pay £20,000 to the National Bank in respect of 2500 new shares which were issued while he was a director thereof. Their Lordships discharged the order of the Vice-Chancellor, on the ground that the appellant had no beneficial interest in the shares.—In another case affecting the relations of Sir J. N. M'Kenna, M.P., with the National Bank, which came before the Lords Justices of Appeal on Monday, Sir W. M. James expressed his belief that every particle of the charge made against Sir Joseph M'Kenna was entirely without foundation, and he thought it due to him to say, that throughout the whole of this matter Sir Joseph M'Kenna had behaved as an honest, intelligent, and very good servant of the bank. In the opinion of the Lord Justice there was not the slightest ground for imputing to him any of the fraud or falsehood with which it had been attempted to fix him. Lord Justice Mellish and Lord Justice Baggallay concurred, and the costs of the proceeding were allowed to Sir J. M'Kenna.

In the matter of the winding up of the Eupion Gas Company, Mr. J. E. Aspinall has been fixed on the list of contributories for 500 shares, Mr. W. E. Aspinall for 250, Mr. G. White for 600, Mr. H. E. Aspinall for 600, Mr. John Holmes for 25, Mr. W. White for 1000, and Mr. G. B. Knocker for 1200. The legal representative of Mr. John Richardson has been put down for 5900 shares.

The Divisional Court heard a singular case on Monday and Tuesday, arising out of the following circumstances:—About twenty years ago a young lady named Marris, living with her parents at Caistor, in Lincolnshire, made the acquaintance of a youth named Heap, which, when her parents learned, they forbade. He induced her to continue to correspond with him, and after he had removed to London, by the threat that he would tell her father of the relations between them, he persuaded her to sign a bond by which she undertook to pay him one third of the property she would receive on the death of her parents, in consideration of his having waited so long for the marriage, and also an annuity, to begin with £20 in 1875, and to be doubled each year that elapsed without the marriage taking place. The lady's mother died in 1873, and her father in 1875. Under the bond Heap claims £20,000; and the lady, seeking to upset the bond, pleads the peculiar manner in which it was extorted from her. The matter came before the Court on an appeal from an order made at Chambers by Mr. Justice Field, who had struck out some portions of the lady's statement of defence, which, it was alleged, were essential to her case. This order was now set aside (Mr. Justice Field concurring), but without costs, the result being that the pleadings of Miss Marris are allowed.

Miss Letitia Martin obtained a verdict at Cork Assizes on Tuesday against a Mr. Corney O'Callaghan, residing near Cork, for breach of promise of marriage. Damages, £500, were awarded to the plaintiff.

The Judge of the Probate Court on Tuesday granted to the son of an Essex builder administration of his father's estate, passing over the widow, who in 1868 took three of her younger children and proceeded with them to Utah, where she joined the Mormons.

In an action for compensation, brought by the Rev. G. E. Gardiner, Vicar of Box, Chippenham, against the Great Western Railway Company, for injuries received in a collision near Chippenham, the jury, at the Bristol Assizes, on Tuesday awarded the plaintiff £5500 damages.

Mr. Barstow, the sitting magistrate at Clerkenwell, has inflicted six weeks' hard labour on Louis Goldstone, a labourer, for wilfully damaging a public gas-lamp. It was stated in evidence that of the lamps supplied by one large contractor 1000 squares of glass were broken weekly.

At the Glamorganshire Assizes a shipowner, named Watts, has been fined £100 and sent to gaol for one month for sending a ship to sea in a state dangerous to life.

John M'Kenna, who was convicted at the recent Manchester Assizes of the murder of his wife at Rochdale on the 24th ult., was hanged on Tuesday morning.

FINE-ART ILLUSTRATIONS.

The two Engravings which are given this week representing works of fine-art dealing with a most sacred theme will, perhaps, be considered appropriate to the season at which the Christian Church is wont to commemorate our Lord's Passion. The one is copied from an important etching by Rembrandt, in which that great artist made an attempt to express his idea of the scene at the judgment-seat of Pontius Pilate, with the Jewish priests and lawyers pressing to the feet of the Roman Governor, while the Divine Victim of their fury and of all the sins of all mankind stands apart in a sublime attitude of holy and compassionate expectancy, surrounded by the need-less military guard. The other is a picture by a German artist of our own day, Professor B. Plockhorst, of Berlin, which seems to us a design of high merit, on account of the union of dignity and grace in its principal figures, with perfect ease and naturalness, both of gesture and expression of face. It is intended, we presume, to illustrate the parting scene at Nazareth, when Christ bade farewell to His Mother before setting out with the travelling party on His last journey to Jerusalem. This was not, indeed, their last earthly interview, for Mary stood weeping at the foot of the Cross; but it may be permitted to imagine that such an occasion for the solemn interchange of filial and maternal tenderness did take place.

The state apartments at Windsor Castle will be open to the public on and after Monday next.

The collection of pictures formed by the late Mr. Samuel Redgrave was sold by Messrs. Christie, Manson, and Woods on the 23rd inst. It consisted chiefly of water-colour drawings and sketches, which formed a tolerably complete series, illustrative of English water-colour paintings, besides about twenty-five oil paintings and fifty miniatures, some of which were enamel paintings. There were also a few objects of art in Oriental and other china. The sale realised £1500.—The four days' sale of a portion of Mr. Bohn's collection of old Sèvres china and French faience brought in £4300.

"CHRIST BEFORE PILATE." FROM THE ETCHING BY REMBRANDT.

"CHRIST TAKING LEAVE OF HIS MOTHER." BY PROFESSOR B. PLOCKHORST, OF BERLIN.

PARLIAMENT.

LORDS.

Noble Lords have, with rare exceptions, consistently exhibited from the opening of the Session to the adjournment for the Easter holidays that brevity which is said to be the soul of wit; but the Upper Chamber, in lieu of being enlivened by the sardonic humour of the Prime Minister, has had, save on the first few nights of the Session, to be content with the less brilliant utterances of the Duke of Richmond and the Foreign Secretary as the chief exponents of Ministerial policy.

The Duke of Richmond could not dismiss the House of Lords for the vacation, yesterday week; but the sitting only lasted an hour, and was mainly taken up with the announcement by his Grace that the Burials Bill would be proceeded with on April 20; with the reading of the Royal Assent to the Exchequer Bills and Bonds (£700,000) Bill, Publicans' Certificates (Scotland) Bill, and the Beer Licenses (Ireland) Bill; with the second reading of the Metropolitan Open Spaces Bill, moved by the Duke of Westminster; with the appointment, on the motion of the Duke of Richmond, of a Select Committee to inquire into the cause of floods, with the view of adopting measures to prevent them; and with an explanation by Earl Cadogan, for the satisfaction of Lord Bury, of the regulations for enabling junior officers in the militia to enter the Army.

A quarter of an hour sufficed on Saturday morning for the passing of the Somersetshire Drainage Bill and the first reading of the Consolidated Fund Bill; and the twenty-minutes' sitting of Monday was devoted to the formal passing of private bills through various stages, and to reading the third time and passing the Consolidated Fund Bill for £9,841,960 6s. 9d.

The House met on Tuesday, merely to allow the Royal Assent to be given to the aforesaid Consolidated Fund Bill; and was then permitted to break up for the Easter vacation, which is to expire on Friday, April 13.

COMMONS.

Whether it was feared that the Ministry meditated a retrograde movement with regard to the Eastern Question, and therefore required to be reminded of the sentiments enunciated by Lord Derby in his despatches and by the Marquis of Salisbury at the Conference, or whether it was felt that mere questions did not meet the exigencies of the situation, certain it is that prominent members of the Opposition did not allow the House to separate for the Easter holidays before they had copiously ventilated their views on the policy of the Government as revealed in the bluebooks. Thus it has come about that but little time has been devoted to home affairs, Mr. Cross having only reached the new clauses of the Prisons Bill, after a stout fight in Committee; and Mr. W. H. Smith having fruitlessly on two occasions, with Job-like patience, sat out two long debates on the interminable question, in the vain hope that the haven of Supply should be reached at last.

There was a regular Eastern field night yesterday week. The battle was preceded by a parley. In that clear, succinct, and business-like manner characteristic of his speech, Sir Charles Dilke introduced his motion:—

That it is desirable that the hours of polling at Parliamentary elections in Metropolitan boroughs should be extended, and that the discretion now vested in returning officers of other boroughs with regard to the hours of polling at School Board elections should apply to Parliamentary and Municipal elections, and should extend to the fixing of any period of not less than eight hours between eight a.m. and eight p.m.

So good a case did Sir Charles Dilke make out on behalf of the very large class of voters who are not at present able to give their votes because of the early hour at which the ballot closes for Parliamentary elections, and so staunch was the support accorded him by his Conservative colleague (whose elocution, by the way, seems modelled after that of a Ritualistic curate), that Sir Stafford Northcote, on behalf of the Government, accepted the motion of the hon. member for Chelsea with some verbal alteration, and the amended resolution was ultimately agreed to. On the Speaker putting the question that the House should go into Committee of Supply, there rose from the end of the front bench below the gangway on the Opposition side of the House a tall, gaunt figure, and the crowded House was silent when it was seen that the hon. member who claimed a hearing was Mr. Fawcett. All obstacle to the resolution of the hon. member being moved had disappeared through the agreement to Sir Charles Dilke's motion without division. If the manner of Mr. Fawcett in addressing the House still smacks too much of the sing-song of the conventicle to be generally acceptable, the matter of his speech appeared to be approved by hon. members who, both from the tone of their politics and the part of the House in which they sit, may be said to have some affinity to and to correspond with the Extreme Left of the Versailles Assembly. Half turning his head in the direction of the benches behind him, and encouraged by the cheers that proceeded therefrom, Mr. Fawcett raised his voice (the high pitch of which soon became monotonous) in re-assertion of those principles of humanity which were popular at countless meetings throughout the kingdom last autumn, and which, the hon. member hinted, had moulded the policy of the Government with regard to Turkey as surely as a modeller moulds the plastic clay in his hands. Pointing out that the "Bulgarian horrors" were being repeated in Bulgaria and in Bosnia, the hon. member for Hackney concluded a long and effective speech by asserting, with his customary emphasis, that the people of England, "having once put their hands to the plough," would not retire until they had shown Turkey she could no longer enjoy immunity in wrong-doing; and by formally moving the following resolution:—

That, in the opinion of this House, any promises of reform made by the Porte, without guarantees for their execution, will be fruitless; that the Powers have a right to demand, in the interest of the peace of Europe, adequate securities for better government in Turkey; and that the misrule which has brought such misery on the Christian subjects of the Porte will continue unless the European Powers obtain some such guarantees for improved administration as they agreed on at the Conference.

It was plain from the interest Mr. Gladstone took in the speech of the mover that he also intended to speak on the topic which engrosses his attention. But the right hon. member who immediately succeeded Mr. Fawcett was the titular leader of the Opposition. The Marquis of Hartington agreed with much that was said by the hon. member for Hackney, and at an opportune time he would be prepared to give willing support to the terms of the resolution, which he could not see why the Ministry should meet with a direct negative. But at present he thought they had no actual grounds for believing the Government had changed their policy on the Eastern Question, although certain organs professing to be in their confidence had published statements which might justify them in the belief that the Ministry had "abandoned every one of their principles." For the reasons given, the noble Lord could vote neither for nor against the resolution. Mr. Plunket, free from the trammels of office, has not yet lost sympathy for the Government. With Celtic confidence and readiness of speech, he deprecated the introduction of the motion, and glibly delivered himself of a string of inconsistencies, which afforded an opening that Mr. Gladstone was not slow to take advantage of. Rose in button-hole and buoyant as a bridegroom (the right hon. gentleman might indeed, have recently left a wedding-party, so festive was

he in appearance), Mr. Gladstone positively gloried in dissecting the three parts into which Mr. Plunket's short speech was divided, and in exposing how one part contradicted the others. The right hon. member for Greenwich was in his best form—ratiocinative, prompt to reply to interruptions (as when he read out in rich sonorous Italian, for the behoof of Mr. Butler-Johnstone, an extract from the treaty of Kainardji by which Russia obtained the right of protection over the Christians of Turkey), and rising to the highest point of eloquence when he recited the wrongs of the Bulgarians and of the inhabitants of Bosnia. Whilst Mr. Gladstone could not vote for the resolution, he saw no objection to its introduction, inasmuch as it gave the House an opportunity of ascertaining whether there had been any retrogression in the policy of the Government; and he brought a speech of exceptional power and eloquence to a close by inquiring if the Ministry intended to act according to the means at their disposition for the protection of the life and property and honour of the subject races in European Turkey under the peculiar circumstances of exasperation and danger to which they are exposed. The customary chorus of "Hear, hear!" which passes muster for cheering in Parliament came from the Opposition as the right hon. gentleman resumed his seat on the front Opposition bench, which was well filled by ex-Ministers, not the least interested of whom in the earnest peroration of Mr. Gladstone was Mr. John Bright, who gave a sympathetic nod of approval to the closing sentences of the speech, which may be said to have raised the tone of debate from that humdrum commonplace into which it has thus early in the Session threatened to sink. Of the vestry order of eloquence was the address of Mr. Butler-Johnstone, who, having paid a personal visit to Turkey, has thought fit to take the Sublime Porte and all its works under his protection; and more appropriate to a board of guardians than to the House of Commons, it may be considered, was the gusty oratory of Mr. Rylands, who, having digested the despatches in the bluebooks, was able to dictate offhand with sublime self-confidence, how the duties of the Foreign Office may best be carried on to the satisfaction of the country. Sir H. Wolff made a neat speech in defence of the Government (from the point of view of a debating society), and endeavoured to turn the tables on Mr. Gladstone by reading extracts from speeches made by the right hon. gentleman on the Cretan insurrection. It was sought to be proved by these extracts that the ex-Premier then disapproved those sentiments of humanity which he has since advocated in taking up the cause of the Christians of Turkey; and Conservative members welcomed the point with gleesome cheers and laughter; but Mr. Gladstone, for the moment, contented himself with quietly making a memorandum of the attack. Colonel Mure, amid many interruptions from the Conservative side of the House, plaintively entered a plea on behalf of Serbia and Bosnia, in fulfilment of a promise he had given in Serbia. But stillness once more reigned when the Chancellor of the Exchequer, with that peculiar action which makes his arms appear not unlike shafts and suggests the idea that the speaker is guided by invisible reins, ambled through a quiet reply, obviously framed after—very much after—the style of the noble Earl Sir Stafford has succeeded in the leadership of the Lower House. Whilst affording the House not an atom of information as to whether the Government were pursuing a course of policy in accord with their action up to December last, the speech of Sir Stafford Northcote indicated a strong desire on the part of the Ministry to come to a division on Mr. Fawcett's motion. But the Opposition declined the division on the grounds that the result would give a wrong idea of the opinion of the House on the matter. So what proved to be a tedious and profitless prolongation of the discussion took place, Mr. Fawcett offering in vain to withdraw his motion, and the adjournment of the debate being moved from time to time only to be negatived until Sir W. Vernon Harcourt, in the small hours, emphatically declared that the Opposition would sit until it should be time to go to the boat-race, when the Chancellor of the Exchequer and Mr. Hardy fired a parting shot, and, accepting the inevitable, finally agreed to the adjournment of the House.

Though the House did not separate until the small hours of Saturday morning, hon. members sat for five minutes at midday, virtually to read the Consolidated Fund Bill the third time and pass it. Questions respecting the Bulgarian massacres and recent outrages in Bosnia and Herzegovina were either put or announced on Monday; and Mr. Bright appealed to the Chancellor of the Exchequer to satisfy the anxiety of the public mind by making a statement as to the present state of our foreign relations before the adjournment for the Easter holidays. The rest of the sitting was occupied by persistent efforts in Committee to add to clause 42 of the Prisons Bill an amendment affirming that prison rules should be sanctioned by the House before adopted; but this proviso Mr. Cross would only accept in the modified form suggested by Mr. Serjeant Simon. Mr. Parnell and Mr. Biggar tried to wear out the patience of the Home Secretary, and there were repeated divisions, but in the end an amendment of Mr. Serjeant Simon's amendment was agreed to, as were clauses 42 to 51 and some new clauses.

On Tuesday the Eastern Question once again monopolised the attention of the House, which met at two o'clock, there being a good attendance both of members and strangers, in consequence of Sir H. Wolff's notice that he would call attention to Mr. Gladstone's letter to Monday's papers asserting that the extracts read from his speech on Crete were "garbled." The way was cleared for this personal question by Mr. Bourke's red-tape answers to interrogations by Mr. E. Jenkins, Mr. H. Samuelson, and Mr. W. James, as to fresh Turkish outrages; and the issue of Sir H. D. Wolff's formidable indictment was that the answers of Mr. Trevelyan and Mr. Gladstone only went to show that the hon. member for Christchurch had misinterpreted the general tenor of the speech referred to. Then the Chancellor of the Exchequer informed the Marquis of Hartington "that, as the House is aware, negotiations have for some time been going on, and are still going on, between the great Powers with regard to the course that should be pursued with respect to the affairs of the East. I mentioned to the House some time ago that the Government of Russia had proposed the signature of a Protocol, and that discussion was then going on as to the precise language of that Protocol. The language of that Protocol has not been finally settled. It is still under consideration; but at the present moment the question which is under consideration is rather as to the conditions under which the Protocol should be signed. I hope that before the House reassembles we shall be in a very much more advanced position, and that I shall be able to make a more satisfactory statement than I am able to make at the present moment. I will now move that the House at its rising do adjourn till Thursday, April 5." But ere this last-named motion could be carried, Sir Henry Elliot was put on his trial, as it were, Mr. Rylands rising to call attention to the course taken by Sir Henry Elliot and the opinions expressed by him with regard to the treatment by the Porte of the Christian subjects of the Turkish Provinces

and to the announcement made by her Majesty's Government that they contemplate his return as Ambassador to Constantinople. With habitual ponderosity, Mr. Rylands acquitted himself of his task, and was marching out of the House when Mr. Baillie Cochrane recalled him, and warmly repelled the attack made on Sir Henry Elliot. The hon. member for Burnley (who returned to his seat with ready courtesy) might have been a delinquent lieutenant, and Mr. Baillie Cochrane an explosive Admiral of the Fleet, so soundly did the latter rate Mr. Rylands in the good old quarter-deck fashion for being too

Willing to wound, but yet afraid to strike.

Mr. W. E. Forster (who had apparently been incubating a speech on the subject for some few weeks past) raised the question from a personal to a public question by paying a passing tribute to the honour and high ability of Sir Henry Elliot, who, he yet argued, was not a fitting representative of England at Constantinople. The right hon. gentleman based his objection chiefly on the appended passage from Sir Henry Elliot's dispatch, accompanying Mr. Baring's report:—

We may and must feel indignant at the needless and monstrous severity with which the Bulgarian insurrection was put down; but the necessity which exists for England to prevent changes from occurring here which would be most detrimental to ourselves is not affected by the question whether it was ten or twenty thousand persons who perished in the suppression. We have been upholding what we know to be a semi-civilised nation, liable under certain circumstances to be carried into fearful excess; but the fact of this having just now been strikingly brought home to us cannot be a sufficient reason for abandoning a policy which is the only one that can be followed with a due regard to our own interests.

The sentence printed in italics, Mr. Forster asserted, gave the pith of Sir Henry Elliot's idea of British policy in the East, and he therefore protested against the return of Sir Henry as our representative to Constantinople. Mr. Bourke answered the emotional speech of Mr. Forster by reading several extracts from the despatches of Sir Henry Elliot to prove that he had from the first taken the liveliest interest in the Christian subjects of the Porte, and had over and over again urged the Porte to effect the promised reforms and to punish those responsible for the outrages. An eloquent eulogium was passed on the personal character of Sir Henry Elliot by Mr. Gladstone, who, in the course of a long speech—argumentative for the most part, but lit up with animated passages—insisted that Turkey was not the proper sphere for the exercise of Sir Henry Elliot's abilities. The Chancellor of the Exchequer earnestly defended Sir Henry Elliot's conduct in the course of a brief reply; and, after various bills had been passed through certain stages, the House, with schoolboy alacrity, adjourned until Thursday next.

BISHOP SARGENT.

The Right Rev. Edward Sargent, D.D., who was consecrated, with Dr. Caldwell, as a Suffragan Bishop in the Madras diocese, on the 11th inst., in St. Paul's Cathedral, Calcutta, was born in Australia, and went with his parents to India when young. His connection with the Church Missionary Society extends over a period of forty years. In 1839 he visited England, and was ordained Deacon in 1841 and Priest in 1842 by the Bishop of London; since which time he has laboured as a missionary in South India, and has been intimately associated with his brethren, both European and native, in working out the plans of the society for the development of the native Church. As a preacher in Tamil, he has few equals; as a teacher, his experience has been extensive and varied; for, during a considerable part of his career, he has had charge of the Theological Institution, in which many of the seventy-one native clergymen now employed in the Church Missionary Society's missions in the Madras diocese were educated. As a man, he is universally beloved, and therefore it may be confidently hoped that, under his kind and brotherly influence as a Bishop, the native Church will, with the Divine blessing, make still more progress than it has made during the past forty years. In one of his recent letters from Palamcottah, he writes, "My own recollections of this place (the first occupied by the Church Missionary Society in 1820) carry me back forty years; and when I compare the state of things now, with what was then visible, I can indeed say, with wonder and thankfulness, 'What hath God wrought!'" The first time I attended church, there were present a school of about thirty boys and some forty people of the congregation." The South India mission of the society has now grown until, at the close of 1876, there were 50,795 baptized Christians, and 14,078 under instruction as catechumens. Working among these people and upon the heathen around in the Madras diocese, there are thirty European Missionaries, and seventy-one native clergymen—and about 1000 native catechists and teachers.

To assist the Bishop of Madras in the superintendence of this large organisation will be Dr. Sargent's work. He will, no doubt, devote considerable attention to the native clergy and their congregations, and endeavour to foster in them the spirit of liberality, which already is a distinguishing feature among them. During the year 1875 the native Christians, who will be the special objects of Dr. Sargent's care, contributed to the funds for the support of their ministers, their churches, their schools, and the poor, 34,449 Rs., or about £3444.

The Church Missionary Society hopes that Dr. Sargent's labours among them may prepare the way for the appointment of natives as bishops, who, with wisdom and discretion, will be able to lead these native Christians on to become evangelists to the heathen millions of their own fellow-countrymen.

The consecration of Bishop Caldwell, a veteran missionary clergyman in Southern India, connected with the Society for the Propagation of the Gospel in Foreign Parts, took place simultaneously with that of Bishop Sargent; and his portrait, with a memoir, is given on another page of this Journal.

Five persons were killed and many others injured by an accident which occurred early on Sunday morning to the "Flying Scotchman" express from Edinburgh to London. The engine left the rails near Morpeth station and overturned, and some of the passenger-carriages were smashed to pieces.

A grand miscellaneous concert will be given at the Royal Albert Hall on Easter Monday in aid of the funds of the Cheesemongers' Benevolent Institution. It is under distinguished patronage, the entire expense being defrayed by Messrs. Nurdin and Peacock, of Wells-street, who will hand over the whole proceeds, without deduction, to the treasurer of the institution. A similar entertainment given last year realised a large sum. The vocalists will be Madame Lemmens-Sherrington, Miss Anna Williams, Miss Fanny Chatfield, Mdlle. Emilia Chioni (her first public appearance in London), Miss Helen D'Alton, Madame Patey; Mr. Vernon Rigby, Mr. W. Shakespeare, Mr. Thurley Beale, and Signor Foli. The band of the Grenadier Guards, conducted by Mr. D. Godfrey, will attend, and there are other attractions. It will be seen, therefore, that those who aid Messrs. Nurdin and Peacock in their most praiseworthy and liberal effort by attending the concert will have an ample return for their money.

NEW BOOKS.

BIOGRAPHICAL.

No more favourable opportunity could well have been found for the publication of *The Life of Mahomet*, by Sir William Muir, LL.D. (Smith, Elder, and Co.), in one large volume, into which the contents of the four volumes published in 1861 have, by the usual process, been condensed. Islam has been on men's lips and before men's eyes in conversation, in dispute, and in the articles of newspapers, for the last year or more; and men's thoughts have naturally been turned, with more than ordinary interest, towards him with whom Islam originated, towards the Prophet of Mecca and the Prince of Medina. All that can be learned, upon the most trustworthy authority, about him is likely to be found in the volume under consideration; for the author, in an appendix, has fully set forth his ideas about the sources which exist for a biography of Mahomet, admitting the weight of the Coran "as an authentic and contemporary record," showing that Mohammedan tradition "contains the elements of truth," indicating "some canons, by which fact may be distinguished from the legend and fiction so closely commingled with it," enumerating "those early biographical compilations which can alone be regarded as worthy of attention," and giving reasons why "no later authors are possessed of an original and independent authority." The reader is carefully prepared for the circumstances under which Mahomet was born, and which were calculated to facilitate or impede his work as a religious founder, by an introductory account of Arabia before the date of his birth. Nearly everybody has some dim, general idea, whether gathered from the pages of Washington Irving or another, of the famous Prophet and of his life; how he was born after the death of his father, at Mecca, but taken into the desert to be nursed; how in his very early childhood he exhibited epileptic symptoms; how he lost his mother when he was scarcely seven years old; how he was put under guardianship; how he spent a part of his youth in the occupation of a shepherd; how he, at twenty-five years of age, took charge of a mercantile venture for Khadija, a widow of forty; how he found favour in her eyes and married her; how he so loved her that, in after days, the very memory of her made Ayeshah jealous; how he grew poetic, and, with real or feigned inspiration, prophetic; how he gained converts, who believed, or professed to believe, in his Divine mission; how he had to endure indignities and persecution at Mecca; how he fled to Medina; how a period of battles, assassinations, and conquests supervened; how the new faith ultimately triumphed; how submissive embassies were sent from all quarters to the Prince and Prophet; how he, in his old age, went, like Solomon, after strange women; and how, at length, like men in general, he fell sick and died, and was buried; but, unlike men in general, left a name which still exercises a magic influence, whether for religious or political purposes, over millions of the human race. Of all this nearly everybody has some sort of vague notion; but the real history of it, with every curious detail, in all its ramifications, and by the light of critical and philosophical reflection, is most ably and exhaustively set forth in the admirable volume under consideration. There is in that volume one remark with which most readers will, after perusal of the whole biography, be disposed to agree most cordially—namely, that if there be any question of a terrestrial or celestial origin, "Islam is human; Christianity, divine."

Undoubtedly "patient search and laborious reading," as well as qualities of a much higher kind than mere patience and laboriousness, must have been required for the production of the two noble volumes entitled, *Titian; his Life and Times*: by J. A. Crowe and G. B. Cavalcaselle (John Murray), two volumes abounding in interest and useful information, supported by the authority of two gentlemen whose names carry the greatest weight and inspire the utmost confidence, from the portrait of Titian upon the frontispiece of the first volume to the appendix, containing unpublished documents, chiefly of the epistolary kind, which appropriately concludes the second. Of illustrations, exclusive of the portrait, there are nine in the first volume and the same number in the second; and, by an innovation to be applauded rather than deprecated, an index is inserted at the commencement of the first volume, between the preface and the first chapter. In that preface will be found an account of the sources whence the authors have derived their material, of the difficulties they had to encounter in the prosecution of their work, and of the extent to which they have been indebted to their "own study and travel." How unsparing they have been of their personal investigation may be gathered from their statement, "that the pictures to which the name of Titian is attached exceed the number of one thousand, in Italy, in England, and on the Continent;" and that "we have been at pains to visit and to study all but a very few of these works, with which we have compared, when it was possible, numerous engravings and photographs." It is pertinent, at this point, to remark that there are to be found, towards the end of the second volume, lists—not complete, perhaps, but as complete as diligent inquiry could make them—of pictures not specially noticed in the text, and classed as "genuine Titians," as "uncertified Titians," and as "missing pictures"—pictures, that is, "noticed in books as works of Titian," and probably, in certain cases, identical with some of those treated of in the authors' pages, but incapable of indisputable identification. As to when and where Titian was born, "it now seems clear that Titian was not born later than 1477," and that his birthplace was in the district of Cadore, though whether he first saw the light in the cottage which bears an inscription claiming that honour appears to be still an open question. His full name was Tiziano Vecelli; but, according to the fashion to which we are well accustomed, the appellation of his family has derived but little lustre from the fame which has made Titian a household word. About 1488 Titian left Cadore "to learn a trade at Venice;" and he learnt one, as we all know. On Aug. 27, 1576, he fell a victim to the plague, which was then devastating Venice, and died at the great age of all but a hundred. To follow the details of so long a life, as busy almost as it was long, would require more space than is available for such a purpose; and, besides, the whole story will be much more agreeably and profitably ascertained from the pages of the two volumes under consideration. Still, it may be worth while to draw attention to a few of the more interesting events of the great painter's career. It was about the year 1516 that he received a broker's patent in the Fondaco de' Tedeschi, an institution which, in its origin, would seem to have had little to do with painting or any other art, and concerning which the authors of the two volumes have a great deal of interesting information to give, after a perusal whereof the reader will be certainly not more astonished to find a Titian among the brokers than a Burns among the excitemen. Titian's acquaintance with Alfonso I., Duke of Ferrara, with Ariosto, with Pietro Aretino, "pamphleteer, poet, and comic writer," with the Gonzagas of Mantua, with Charles V., and with other less exalted personages is carefully traced, and the first volume concludes with the position of Titian in 1537, when he was sixty years of age, and when his spirit was embittered by the rivalry of Pordenone. With

the story of that rivalry the second volume commences. In the meanwhile Titian had married and had lost his wife, who, at her death, in 1530, had left him with three children, Pomponio, Orazio, and Lavinia (the daughter whose portrait adorns the frontispiece of the second volume). The great painter was not fortunate in his son Pomponio, who "disgraced the priest's cassock and squandered his father's means in debauchery;" but he found Orazio and Lavinia "worthy of his love." And so, from the age of sixty, when the first volume ends, to the age of ninety-nine, when the second ends, we find Titian, full of years and honours, but not without his vexations and troubles, living a life of work, travel, negotiation, and intercourse and correspondence with the great ones of the earth, suffering but little, if at all, from the ailments which generally accompany old age, until the day when the plague came and carried him off. Then, indeed, his greatness was acknowledged in the most unmistakable manner; for, though "laws had been passed to meet the plague then afflicting Venice, which forbade the burial of a victim of the contagion in any of the churches of the city," every ordinance of the kind "was quickly set aside in Titian's case," and "the body was taken solemnly to the Friari and laid in the earth, where now a stately monument, tribute of wonder and admiration of the latest generation of Titian's admirers, stands in all the splendour of marble to do honour to his memory." Yet the painter's house could not escape desecration, and the scenes which occurred after his death "were melancholy beyond description. It is not known whether Orazio was attacked by plague during his father's lifetime, but he certainly died of the contagion almost immediately afterwards; and he died, not in his father's dwelling, but in the Lazaretto Vecchio, near the Lido. No one was left to take care of the painter's place. Thieves broke into the house; and, before Pomponio or the officers of public security could interfere, many precious relics were stolen and destroyed." Still, as it is an ill wind that blows nobody good, this deplorable fact may tend to encourage those picture-dealers and other persons who hug themselves in the belief that they have come by genuine Titians in some extraordinary fashion and for a mere song. Of course the chief charm of the two volumes, for the initiated, will be the history which is given of various masterpieces and the comments which are made upon them, to say nothing of the representative illustrations. Of those illustrations there are, as has been said, nineteen, and very acceptable they will, no doubt, be considered; but there is, after all, something of a mockery in a Titian without the colour, reminding one a little of the play of "Hamlet" with the character of Hamlet left out.

Memory is, no doubt, a broken reed to lean upon, but such support as can be afforded by memory is given to the notion that, within the last dozen years or so, there have been several publications, whether written by a "Tuan Muda" or by anybody else, and whether entitled "Ten Years in Sarawak," or "At Home among the Dyaks of Borneo," or anything else, bearing more directly upon the personal history of the once popular and unpopular "Raja" Brooke, whence all that was likely to be of special interest to the public in the life of that celebrated man, whom some people regarded as a sort of Paul Jones the Pirate, and others a sort of sea-going knight-errant, seeking what wrongs he might redress, could readily be collected; but, whether memory be right or wrong, it has appeared good, for various reasons stated in the preface, to expand into two large volumes, called *The Raja of Sarawak*, by Gertrude L. Jacob (Macmillan and Co.), a narrative which came out in the *Monthly Packet*, a few years ago, under the title of "The English Raja." The characteristic feature of the two volumes is that the account which they contain is for the most part to be extracted by readers for themselves from "letters and journals." The result is, as was obviously to be expected, a mixture of advantages and disadvantages; for, while nothing can be more satisfactory than to have before one the very personality, as it were, of the man whose career and motives are in question, it is, on the other hand, rather wearisome work to piece together for oneself disjointed fragments, and to follow a thin thread of narrative through a labyrinth of overgrown correspondence. However, there is, fortunately, an index, by the help whereof it is possible to put one's finger upon the salient points of the biography. It appears, then, that James Brooke, the future Raja of Sarawak, was the second son and fifth child of a gentleman in the H.E.I.C.'s Bengal Civil Service, and was born on April 29, 1803, at Secrore, or Secrore, "the European suburb of Benares." At twelve years of age he was sent from India to the care of his grandmother at Reigate; was put to Norwich Grammar School, under Mr. Valpy, whom he did not like; left school abruptly, or, in other words, apparently ran away; and at sixteen "received his Ensign's commission in the Bengal army." He soon got his lieutenantcy, a severe wound, sick leave, extension of that leave, and a warning which induced him to resign his commission for fear of forfeiting it by not arriving at his presidency in time. After a considerable amount of travelling, during which he visited that Sumatra which would one day be so familiar to him, he returned home to England, where he seems to have spent much of his time in thinking how he might burst the bonds of civilised society and in brooding over a purpose he had formed of purchasing a schooner, as soon as he had money enough and seamanship enough, and carrying out a scheme of "combining mercantile speculation with opportunities for adventure and discovery." In 1836, having inherited £30,000 at his father's death, the money being "unfettered by claims of any kind," he purchased a "schooner of 142 tons burden," and from that date may be said to have commenced the series of voyages, adventures, and successes which ended in his strange appointment, on Sept. 24, 1841, as Raja of Sarawak. This august position he held until his death, in June, 1868; and he bequeathed his sovereignty "to his nephew, Charles Johnson Brooke, and his male issue; failing such, to his nephew Stuart Johnson, and his male issue." In default of such issue the Raja devised his said sovereignty, "the rights, privileges, and power thereto belonging, unto her Majesty the Queen of England, her heirs and assigns for ever." He died, apparently, at Burrator, "an estate of about seventy acres, with a very small house, in the parish of Sheepstor, on the edge of Dartmoor," an estate which he purchased in 1859; and he was buried in Sheepstor churchyard—a view whereof, with the Raja's grave, forms the frontispiece of the second volume. In or about the year 1833 the future Raja would seem to have been engaged to a clergyman's daughter, but the engagement was broken off, and "Brooke appears from this time to have taken ambition as his only bride." Whether this can in any way account for what has been left on record by one of the ladies who knew him best, that "he had not those views on religious matters which we thought could alone satisfy his needs," is a question no more to be discussed here than the controversy excited by his proceedings in connection with Sarawak—proceedings described, with as much detail as can possibly be desired, in the pages of the two volumes. One thing, however, the biography is likely to impress upon nearly every reader's mind, that it would be very inconvenient for the Government of this

country if many gentlemen of independent means, adventurous yearnings, chivalrous sentiments, force of character, innate powers of swaying the wilder sorts of mankind, and of exercising a benevolent, paternal despotism, as it were, should go about the world establishing little sovereignties in distant countries and afterwards demanding a protectorate, or a recognition, or permission to transfer their acquisitions to the authorities at home, who might find such possessions an embarrassment.

THE LATE SIR EDWARD BELCHER.

In the *Obituary Notices* of last week we mentioned the death of Admiral Sir Edward Belcher, whose name was familiar to the last generation as one of the most enterprising of our Arctic explorers. The second son of the late Andrew Belcher, of Rochampton, he was born in the year 1799, and entered the Royal Navy, at the age of thirteen, as a first-class volunteer, becoming a midshipman the same year. He was present at the battle of Algiers, and served afterwards on the African station, whence he came home invalided in 1820. Lieutenant Belcher next served on the North American station for three years. In 1825 he was selected as assistant surveyor to Captain F. W. Beechey, whom he accompanied to Behring's Strait on his voyage of discovery. In the next few years we find him actively engaged in Spain, in Africa, in South America, on the Indian station, and in China, where he obtained the thanks of the Admiral in command for his gallantry, especially at the reduction of Canton. He was rewarded with a commission as Post-Captain and the Companionship of the Order of the Bath in 1841, and received the honour of knighthood in 1843. From 1842 down to 1847, when he retired from active employ, he was mainly engaged in surveying service in the East Indies. His last important naval employment was in command of an expedition in search of Sir John Franklin, in 1852-4, ending in the abandonment of his two ships. He was nominated a Knight Commander of the Bath in 1867. Sir Edward Belcher's narrative of a Voyage Round the World, performed in her Majesty's ship *Sulphur*, in the years 1836-42 is well known. He was also the author of a "Treatise on Nautical Surveying." Sir Edward married, in 1830, Diana Jolliffe, grand-daughter of Colonel Smyth, of Plean House, near Falkirk, Stirlingshire, and step-daughter of the late Captain Peter Heywood, R.N., well known in connection with the "Mutiny of the Bounty."

We are indebted particularly to Messrs. Maull and Co., of Piccadilly and Chapside, for the photograph from which Sir Edward Belcher's portrait has been engraved.

TEWKESBURY ABBEY.

Tewkesbury, in the western part of Gloucestershire, and close to the borders of Worcestershire, is said to be of Saxon origin, and to derive its name from Theot, a Saxon, who founded an hermitage here in the seventh century. Early in the eighth century two brothers, Dukes of Mercia, founded a monastery, which in the tenth century became a cell to Cranbourne Abbey, in Dorsetshire. In the twelfth century Robert Fitzhamon enlarged the buildings and liberally endowed the institution, in consequence of which the monks of Cranbourne made Tewkesbury the chief seat of their establishment. At the Dissolution the abbey belonged to the Benedictines, and its annual revenue was £1598.

On opening the tomb of the founder of the abbey, the body of the abbot was found arrayed in full canonicals; the crozier was perfect, while the body showed scarcely any symptoms of decay, although it had been entombed considerably above six hundred years. On exposure to the air, the feet alone of the abbot were seen to sink; when the tomb was ordered to be sealed up, and his body was again committed to his darkness.

A great battle was fought on May 4, 1471, within half a mile of Tewkesbury, when the Lancastrians sustained a most disastrous defeat: the Earl of Devonshire, Lord Wenlock, Lord John Beaufort, nine knights, and upwards of 3000 men were slain; Queen Margaret of Anjou was taken prisoner by Edward IV.; the young Prince Edward is stated, in a contemporary manuscript, to have been killed while flying from the field, and not to have been butchered in Edward's presence, as commonly reported; the Duke of Somerset, Lord St. John, and about a dozen knights and esquires were dragged from the church, where they had taken sanctuary, and beheaded, May 6.

This battle was fought in a field, long after known as the "Bloody Meadow." The chief glory of this well-fought field belonged to Richard Duke of Gloucester. At Tewkesbury he commanded the van, and was confronted with the Duke of Somerset, who had taken up so formidable a position, fenced by dykes and hedges, that to carry it seemed hopeless. After a feigned attack and short conflict, Gloucester drew back as if to retreat. Somerset, rash and impetuous, was deceived by this manoeuvre, and left his vantage ground, when Gloucester faced about, and fell upon the Lancastrians so furiously and unexpectedly that they were driven back in confusion to their intrenchments, which the pursuing force entered along with them. Lord Wenlock, who, by coming to their assistance with his division, might have beaten back Gloucester, never stirred; and Somerset no sooner regained his camp than, riding up to his recreant friend, he denounced him as a traitor and coward, and stopped recrimination and remonstrance by dashing out his brains with a battle-axe.

In the stately abbey church—obtained from the King, for the use of the parishioners, at the time of the Dissolution—was buried Brietric, King of Wessex; Norman Fitz-Hamon, Earl of Gloucester; Edward, son of Henry VI.; George Clarence, brother of Edward IV.; and his wife, Isabel, daughter of King-making Earl of Warwick. The church is in the Early Norman style, and has a central tower. The roof is finely groined and carved. There are several ancient chantry chapels in the east end of the choir, which is hexagonal. Some of the monuments are in memory of persons who fell at the Battle of Tewkesbury.

The choir of this fine church has lately been restored, in some degree, to its former beauty, as shown in our Illustration, under the direction of Sir Gilbert Scott, R.A. The parishioners of Tewkesbury, aided by a subscription in the counties of Gloucester and Worcester, have expended some thousands of pounds in the work. A committee, including noblemen and gentlemen from other parts of England, has been formed to raise a national subscription; for which purpose a meeting, presided over by the Bishop of Gloucester and Bristol, was held on the 3rd inst., in the library of Lambeth Palace. The honorary secretary is Mr. C. Locke Smiles, 15, Bedford-row.

The new Middlesex County Lunatic Asylum just completed on Banstead Downs, near Sutton, was thrown open for the reception of patients on Tuesday. The building and grounds cover an area of 100 acres, the cost of the land and of construction amounting to more than £200,000. There is accommodation for about 2000 patients, and these, in the first instance, will be draughted in from Hanwell and Colney Hatch at the rate of about one hundred per week, it being intended to receive only what are called chronic and quiet cases.

THE RIGHT REV. DR. SARGENT, BISHOP IN SOUTHERN INDIA.

THE LATE ADMIRAL SIR EDWARD BELCHER.

THE RIGHT REV. DR. CALDWELL, BISHOP IN SOUTHERN INDIA.

BISHOP CALDWELL.

Two missionary clergymen of the Church of England in India were ordained Bishops, at Calcutta, on Sunday week. They will exercise their episcopal functions, virtually as coadjutors to the Bishop of Madras, among the missionary stations and native church institutions, with which they have long been officially connected, in Southern India. The Right Rev. Dr. Caldwell and the Right Rev. Dr. Sargent are the first two purely Missionary Bishops of the Church of England in India. Dr. Caldwell is a member of an old Scotch family, but was born in Ireland. Parts of his history have some interest. As a very young man he was a promising artist, and worked side by side with Clarkson Stanfield and Noel Paton. Suddenly throwing over the easel, he determined to devote himself to mission work in India—not before a prize-painting of his ("Mule-Train Crossing the Alps") attracted some attention in Dublin. He was hardly of age when he began his studies at Glasgow University, graduated, and went to London to offer himself for mission service in India in connection with the Church of Scotland. He was rejected by three doctors, who declared that his constitution would give way if exposed to the tropical rigour of an Indian climate. At length one luckier or more sagacious doctor was found sufficiently bold to recommend Dr. Caldwell's going abroad, which he did, with Dr. Duff, about forty-two years ago, landing in Madras after having learnt much Sanscrit and more Tamil during the voyage. A week after landing he began extemporary preaching in Tamil in Madras, and subsequently lived as much as possible amongst the natives. During this time, long study of the Christian Fathers of the first six centuries in the original, and of the theo-

TEWKESBURY ABBEY: PROPOSED RESTORATION OF CHOIR.

logical writings of the seventeenth century, induced him to take orders in the Church of England. By this time, too, he rendered himself familiar with about half a dozen Indian languages. A short time elapsed, and he went southward of Madras to take charge of the Edeyengoody mission, in Southern Tinnevely. The journey of 400 miles he accomplished on foot, making geological and botanical observations on his road as a recreation. Arrived at Edeyengoody (i.e., "Shepherd's Habitation"), he found it to be a miserable hamlet, on the side of a sandy desert, and peopled by a number of vagabonds, robbers, and cutthroats. These natives, merely because the surrounding "heathen" despised and turned them away, called themselves "Christians," and sought the protection of the white missionary. The first native congregation Dr. Caldwell had was composed, about forty years ago, of some 180 persons of this kind in his lonely station. His mission work had to begin by turning them out of church; by declaring that he would have every criminal brought to justice if possible; and by setting the whole body of these "Christians" in a state of wild indignation against himself. The consequence was, the shepherd was left; but the flock was nowhere. Soon, however, the sheep came back, one by one. Now, what is the result? Figures, roughly stated, will speak for themselves. During his (approximate) forty years' ministry in Southern India, Dr. Caldwell has baptised some 6000 adults and children. About sixty churches have arisen in his district, many of stone. The population is generally very poor; but a large number of schools are self-supporting, and between 3000 and 4000 children attend school daily. For these there are about eighty native schoolmasters and catechists, superintended by one European clergyman and seventeen native ones.

DR. SCHLIEMANN GIVING AN ACCOUNT OF HIS DISCOVERIES AT MYCENÆ BEFORE THE SOCIETY OF ANTIQUARIES AT BURLINGTON HOUSE.

The once-miserable desert-mission will in a few years, notwithstanding the huge machinery now at work, support itself. Wide tracts of land have come into the mission hands; and large woods, which will soon be valuable, are springing up on them. District post-offices, savings-banks, dispensaries, and charitable institutions are being, and have been, widely erected throughout the district, which is as large as an average English shire, with only two Englishmen generally living in it. Those who imagine that in every part of India mission work is equally unsuccessful should meditate on this picture. The truth of these statements can easily be verified.

After some twenty years of South Indian seclusion, Dr. Caldwell published a work (first edition, Harrison, Pall-mall), entitled "A Comparative Grammar of the Dravidian Languages." A second edition of this, nearly twenty years after the former, has recently been published by Messrs. Trübner. It was mentioned in the *Athenæum* and other papers that this work contained careful grammatical comparisons, entailing the intimate knowledge of the science, scope, and structure of 223 languages and dialects! This is a fact. The philologist may refer to Dr. Caldwell's book, and a scrutiny of the index will lend the clue to these astonishing figures.

Dr. Caldwell is an honorary member of the Royal Asiatic Society, a Fellow of several Universities, a Doctor of Divinity of Durham, and an LL.D. of Glasgow. For more than thirty-five years he has been connected with the Society for the Propagation of the Gospel in Foreign Parts.

One of the chief objects of Dr. Caldwell's life during the last eighteen years has been to give Southern India a really noble church, after the western types of architecture—not a stucco edifice, but one which shall fairly reflect in India the culture and civilisation of Europe. The church of "Holy Trinity," in Edeyengoody, is nearly finished, having taken eighteen years to build, because of the naturally-slender means of a mission. It is wholly of stone. The pillars are of solid cut marble, the chancel ones being of finer stone than the others. The roof timbers were procured on the Malabar coast, some 200 miles distant. The architecture is mediæval Gothic. All the windows are of carefully-cut stone—a species of white marble. Messrs. Cox and Co. have sent out the font, a very fine and costly one, a gift of an English gentleman. About £2000 more is required for the completion of one of the unique churches of the world—rising on the side of a howling desert of red sand, in the midst of many strange phases of Oriental life, its spire over-topping a forest of Palmyra palms and plaitain gardens, and deep weedy lakes, and its roof is visible from the ghats, thirty miles away! India is the land of temples. Pious Hindus have an innate reverence for the architectural accompaniments of religious observance. It would be a pity for a work like Dr. Caldwell's (which has progressed for eighteen years) to fall through, short of completion, just now that that "Church in the Wilderness" has become an Anglican cathedral. The church will accommodate about 2000 persons.

Very strange to say, both the new Missionary Bishops,

Drs. Sargent and Caldwell, saved Dr. Cotton from drowning, at Cape Comorin, a year before his death in Bengal. The Bishop of Calcutta was bathing with the two missionaries, who, as all the South Indian ones are, are first-rate swimmers. Dr. Cotton was suddenly carried away to sea by a strong wave. The two missionaries rescued him. Twelve months afterwards Dr. Cotton met a watery grave in the other extremity of India; and one of his successors has now been called upon to consecrate the very two missionaries who saved the Bishop's life.

We give the memoir of Bishop Sargent on another page.

The first public display by the members of the recently-formed school of arms of the 38th Middlesex (Artists) Rifles took place last Saturday evening at St. George's Hall. The new drill-hall of the 10th Surrey Rifles, situated in Neckinger-road, Bermondsey, was opened last week by Mr. Jonah Oastler, who also distributed the prizes won during the past year at Plumstead. Major Bevington, the commanding officer, gave the statistics of the corps, from which it appeared that there were fourteen more efficient in 1876 than in the previous year. Subsequently the sergeants presented to Major Bevington a handsome illuminated address and timepiece, on behalf of the corps, in recognition of the liberality and personal attention which he had bestowed on it.—The Bristol Rifles have held their cup competition at the Avonmouth range, Colour-Sergeant Ridgway being successful with 76 points, beating Lieutenant Badcocke by one point.

METROPOLITAN NEWS.

On Tuesday the Lord Mayor made a renewed appeal for subscriptions in aid of the sufferers through the shipping disasters in the North Sea; adding that the poor-box of the Court also stood in need of being replenished.

Major-General Tremeneere presided on Tuesday over an extraordinary meeting of the shareholders of the London and South African Bank, at which the scheme of reconstruction recommended by the committee of investigation was adopted.

Last Saturday afternoon, at the Manor Ironworks, Chelsea, the casting of a large equestrian statue of Lord Canning took place. The original model was designed by the late Mr. Foley, R.A. The statue is to be erected at Calcutta.

The last of the series of meetings held during the winter evenings at the Lambeth Baths, for the purpose of promoting the cause of temperance, took place last Saturday evening—Mr. Samuel Morley, M.P., in the chair.

At the annual general meeting of the Society of Painters in Water Colours on Monday the following gentlemen were elected Associate Exhibitors—Mr. A. Hopkins and Mr. E. Buckman, figure-painters, and Mr. Cuthbert Rigby, landscape-painter.

Dr. Risdon Bennett, F.R.S., has been unanimously re-elected President of the Royal College of Physicians; and Professor John Wood, F.R.S., has been appointed to succeed Sir William Fergusson as Professor of Clinical Surgery to King's College.

A meeting was held on Tuesday evening at the rooms of the Society of Arts—the Earl of Shaftesbury in the chair—to promote a scheme for conveying instruction upon political subjects to the working classes. A letter from Professor Seeley upon political education was read to the meeting.

Mr. J. Holms and Mr. Fawcett, the members for Hackney attended the annual soirée of the Borough of Hackney Advanced Liberal Association on Monday. The latter gentleman spoke at some length on the subject of the Eastern Question, and maintained that a policy of courage and resolution was the only one to maintain peace.

A fire broke out last Saturday evening, about ten o'clock, in the mill-house and bakery of the Middlesex House of Correction at Cold-bath-fields. By the strenuous exertions of the firemen, two of whom were injured, the flames were got under about half-past twelve. More than 1800 prisoners were confined in the building, but none received any injury.

The four missionaries selected by the London Missionary Society to proceed to Tanganyika—the Revs. Roger Price, J. B. Thompson, M. Hare, and A. W. Dodgshun—were present, on Monday night, at a farewell meeting held in the Memorial Hall, Farringdon-street. Mr. W. H. Willans occupied the chair, and amongst those who took part in the meeting were Dr. Moffatt and Sir Charles Reed.

Mr. E. Hutchinson read a paper on the Best Trade Route to the Lake Regions of Central Africa on Tuesday before the Society of Arts. The chair was occupied by Sir Samuel Baker. Mr. Hutchinson held that for England the best route to the interior of Africa must commence at Zanzibar. The reading of the paper, which had been introduced by some general observations from the chairman, elicited a good deal of discussion and a generally conceded meed of approval.

On Sunday afternoon the new East London Synagogue at Stepney-green was consecrated. The Rev. Dr. Adler, Chief Rabbi, solemnised the dedication ceremony, the service being conducted by the Rev. A. L. Green. The ceremony began with a perambulation of the edifice by the Chief Rabbi, the wardens, and others, carrying the scrolls of the law, a psalm being sung during each of the circuits made. The ordinary afternoon service followed, and then Dr. Adler delivered a sermon, afterwards offering up the consecration prayer. The synagogue is capable of holding several hundred worshippers.

The Merchant Taylors' Company have contributed 250 guineas towards the fund for rebuilding the Metropolitan Free Hospital.—The Court of Assistants of the Saddlers' Company have given the following donations:—Mansion House Fund Shipping Disasters in the North Sea, 25 guineas; Royal National Life-Boat Institution, 10 guineas; Christian Blind Relief Society, 2 guineas.—His Excellency the Chinese Ambassador, recognising the international character of the Seamen's Hospital (late Dreadnought), Greenwich, has intimated the intention of the Chinese Government to subscribe £20 annually to the charity.

In response to a general desire on the part of the employees of the firm of Messrs. Copestake, Moore, Crampton, and Co. to testify their appreciation of the great kindness shown to them by their late lamented employer, Mr. Moore, a committee was formed, consisting of the most influential gentlemen connected with the establishment, for the purpose of raising a fund to perpetuate his memory by an appropriate memorial. It having been decided that the memorial should take the form of a life-boat to be named the "George Moore," the sum of £500 has been handed to the Royal National Life-Boat Institution, who have consented to place a life-boat on the coast for this sum. The balance of the sum collected will form the nucleus of a fund intended to perpetuate the memorial, and will be called "The George Moore Employees Memorial Life-Boat Fund."

The weekly return of metropolitan pauperism shows that the total number of paupers at the end of last week (the third week of March) was 85,686, of whom 39,035 were in work-houses and 46,651 received outdoor relief. Compared with the corresponding weeks in 1876, 1875, and 1874, these figures show a total decrease of 508, 12,468, and 21,619 respectively; but as regards indoor paupers only, the return shows an increase of 2304 compared with the corresponding week in 1876, of 2527 compared with 1875, and of 2201 compared with 1874. The number of vagrants relieved on the last day of the week was 609, of whom 440 were men, 137 women, and 32 children under sixteen.

There were 2532 births and 1802 deaths registered in London last week, the former having exceeded by 47, and the latter by 133, the average numbers. The deaths included 76 from smallpox, 32 from measles, 17 from scarlet fever, 3 from diphtheria, 37 from whooping-cough, 25 from different forms of fever, and 11 from diarrhoea; thus to the seven principal diseases of the zymotic class 201 deaths were referred, against numbers increasing steadily from 187 to 231 in the five preceding weeks. These deaths were 29 below the corrected average number from the same diseases in the corresponding week of the last ten years. Bronchitis and pneumonia have during the last four weeks, since the night temperature fell below freezing point, been the prevailing fatal diseases. The deaths referred to diseases of the respiratory organs, which in the four previous weeks had increased from 303 to 498, further rose last week to 575, and exceeded the corrected average by 184. The mean temperature was 37.7, which was 4.2 below the average.

The Lord Mayor presided on Monday over a public meeting at the Mansion House, convened for the purpose of affirming the proposal to celebrate, in June next, the 400th anniversary of the introduction of printing into England. Amongst those present were Mr. Anthony Trollope, Count Münster, Mr. C. H. Palmer (Deputy Governor of the Bank of England), Sir C. Dilke, M.P., Mr. Ingram, M.P., Sir Charles Reed, Dr. Parker, Mr. G. Spottiswoode, Professor Marks, Bishop Claughton, the Rev. W. Milman, and Lord C. Bruce. The Lord Mayor, after explaining the objects of the promoters of the movement, said that the Queen had graciously signified her willingness to contribute to the exhibition some of the literary treasures of the Royal library at Windsor. Any pecuniary profit that might arise from the undertaking would, it was proposed, be used for the establishment of permanent pensions for aged printers, their widows, or orphans—the Printers' Corporation being the society to be assisted for the attainment of this end. Resolutions in approval of the object of the gathering were passed, and a subscription-list was opened, the contributions to which represented a sum of nearly £700, including fifty guineas from Mr. Walter, M.P., twenty-one guineas from Sir Charles Reed, £100 from Mr. Horace Marshall, £100 from Baroness Burdett-Coutts, and £210 from Mr. Henry Stephenson, of Sheffield.

GODETIA LADY ALBEMARLE.

A magnificent new variety, growing one foot high, flowers three to four inches across, and of the most intense carmine crimson colour, extremely hardy and easy of cultivation. Awarded a first class certificate Royal Horticultural Society, Aug. 2, 1876. Seed, with cultural directions, 1s. 6d. per packet, post-free.

DANIELS BROS., The Royal Norfolk Seed Establishment, Norwich.

AMERICAN CENTENNIAL PRIZE MEDAL.

FRY'S CARACAS COCOA.

Its pure flavour, delicate aroma, and invigorating qualities have established its position as a first-class dietetic article.

FRY'S CARACAS COCOA.

"The Caracas Cocoa of such choice quality."—Food, Water, and Air, Dr. Hassall.

FRY'S EXTRACT OF COCOA.

"In which, if properly prepared, there is no nicer or more wholesome preparation of Cocoa."—Food, Water, and Air, Dr. Hassall.

Sold by all Grocers. TAYLOR BROTHERS, London, Sole Proprietors.

GRATEFUL-COMFORTING.

E P P S S C O C O A.

"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected cocoa, Mr. Epps has provided our breakfast-tables with a delicately flavoured beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up, until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—Civil Service Gazette.

Sold only in Packets (Tins for abroad), labelled—JAMES EPPS and CO., HOMEOPATHIC CHEMISTS, 48, Threadneedle-street; and 170, Piccadilly, London.

NEW BOOKS AND PUBLICATIONS.

London, March 28, 1877.
"THE BOOK OF THE SEASON."—Morning Post.
THE TOUR OF THE PRINCE OF WALES. By W. H. RUSSELL, LL.D. Illustrated by Sydney Hall, M.A.
NOTICE.—As the First large Edition of this Work was exhausted on the day of publication, the Publishers beg to announce that a Second Edition is in active preparation, and will be ready about April 12. As already announced, in consequence of the fact that the Work contains more illustrations and nearly 200 pages more of Text than were contemplated when the Work was announced at £2 2s. last year, the price—which, to keep faith with the many subscribers who had already sent in orders, was fixed at £2 2s. for a time—will be advanced to £2 12s. 6d. on and after April 12; and no Orders which are received after this date will be executed at the original price. Copies of the Large-Paper Edition, in royal quarto, handsomely bound in cloth extra, gilt edges, price £4 4s., will be ready on March 28.
DAMSON LOW, MARSTON, SEARLE, and RIVINGTON, Crown Buildings, 88, Fleet street, London.

P. J. SMITH and SONS' IRON-STRUTTED PIANOS

DR. SCHLIEMANN'S EXCAVATIONS AT MYCENÆ.

ROCK-CUT CHAMBER IN THE TREASURY OF ATREUS.

INTERIOR OF THE TREASURY OF ATREUS.

DR. SCHLIEMANN'S RESEARCHES AT MYCENÆ.

We published in the last week's Number of this Journal the Portrait of Dr. Schliemann, with Views and Plans of his excavations on the site of the Acropolis of Mycenæ, drawn by our Special Artist, Mr. William Simpson, and with some Illustrations of the relics of Greek antiquity there found by Dr. Schliemann, which are now deposited in the Bank of Athens, as the property of his Majesty the King of Greece.

On Friday evening last week, a meeting of the Society of Antiquaries was held at its rooms, Burlington-House—Mr. Frederick William Ouyry, president, in the chair. There was a crowded attendance of Fellows and visitors. Among those present were Mr. W. E. Gladstone, M.P., Lord Houghton, Lord Acton, Lord Aberdeen, Sir George Gilbert Scott, the Hon. Spencer Walpole, Mr. Beresford-Hope, M.P., the Rev. Dr. Thompson (Master of Trinity College, Cambridge), Mr. Alfred Tennyson, Mr. W. R. S. Ralston, Professor Leone Levi, Sir Philip Egerton, Earl Stanhope, Professors Colvin and Machaffy, and Mr. James Spedding.

Mr. Watson, secretary, having read the minutes of the last meeting, which were confirmed, the following gentlemen were admitted members:—Lord Houghton, the Rev. Dr. Thompson, the Hon. Spencer Walpole, Lord Acton, the Earl of Aberdeen, and Mr. Philip Egerton. The secretary then said that they had arrived at the real business of the meeting. After eight days and nights of incessant travelling, Dr. Schliemann arrived in this country only this morning, with the object of reading his paper before the society on his discoveries at Mycenæ. In illustration of these discoveries photographs and plans were exhibited on the walls. Upon the last occasion Dr. Schliemann was present the late president, who then occupied the chair, said he was certain that if the lecturer again visited this country he was sure to have a good reception. The crowded meeting that night verified the late Lord Stanhope's prophecy.

On rising to read his paper the illustrious discoverer was greeted with the heartiest welcome. Dr. Schliemann said that, in his opinion, there was, next to Troy, no Eastern prehistoric city of so high archaeological interest as Mycenæ, because, owing to its secluded site in a rugged wilderness, the grandeur and massiveness of its ruins, and its distance from Argos and Nauplia, it has not attracted the modern mason, who found it much easier to cut new blocks from the quarry according to his wants than to destroy Mycenæ's walls and to carve their enormous and amorphous stones. Hence the conservation of Mycenæ's ruins, which can hardly have deteriorated since Pausanias visited them, A.D. 170. At all events, they are far better preserved than those of any one of the Greek cities, the flourishing condition and splendour of whose monuments he describes. His short description (II. 16, 6) of Mycenæ runs thus:—"Among other remains of the wall is the gate, on which stand lions. They (the wall and the gate) are said to be the work of the Cyclopes, who built the wall for Pærus in Tiryns. In the ruins of Mycenæ is the fountain called Perseia, and the subterranean buildings of Atreus and his children, in which they stored their treasures. There is a sepulchre of Atreus, with the tombs of Agamemnon's companions, who on their return from Ilium were killed at dinner by Ægisthus. The identity of the sepulchre of Cassandra is called in question by the Lacedæmonians of Amyklæ. There is a tomb of Agamemnon and that of his charioteer, Eurymedon. Teledamos and Pelops were deposited in the same sepulchre, for it is said that Cassandra bore these twins, and that, when still little babies, they were slaughtered by Ægisthus, together with their parent. Hellanikos (B.C. 495-411) writes that Pylades, who was married to Electra by the consent of Orestes, had by her two sons, Medon and Strophios. Clytemnestra and Ægisthus were buried at a little distance from the wall, because they were thought unworthy to have their tombs inside of it, where Agamemnon reposed, and those who were slain with him." Pausanias gives no further details, but his short description is of prime interest to science, because it proves that by tradition the great subterranean domelike buildings had been treasuries, to hoard the wealth of Atreus and his children; it further proves that tradition had handed down the site of the five tombs where Atreus as well as Agamemnon, Cassandra, Eurymedon, and their companions, who had been murdered along with them by Ægisthus, lay buried. "But, luckily for me," continued Dr. Schliemann, "this passage of Pausanias regarding the site of these tombs had always been misunderstood—nay, misinterpreted—by such eminent scholars as W. M. Leake, Edward Dodwell, Prokesch, and Ernest Curtius, who, with Pausanias in hand, explored the Peloponnesus for years, and wrote on it learned works, which will for ever remain celebrated." They had misunderstood their author, because they thought that in speaking of the wall he meant that of the city, and not the great Acropolis wall, and they, therefore, imagined that he finds the site of the five sepulchres in the lower city, and the site of the tombs of Clytemnestra and Ægisthus outside of it. But that he had the citadel walls only in view he shows by saying that in the wall is the Lions Gate. True, he afterwards speaks of the ruins of Mycenæ, in which he saw the fountain Perseia and the Treasuries of Atreus and his sons, by which latter he can only mean the large Treasury, which is, indeed, in the lower city, and, perhaps, some of the smaller Treasuries. But as further on he again says that the graves of Clytemnestra and Ægisthus are at a little distance outside the walls, because they were thought unworthy to be buried inside of it, where Agamemnon and his companions reposed, there cannot be any doubt that he had solely in view the huge Cyclopean walls of the citadel. Having adduced other grounds for his having always understood Pausanias in the sense that the five tombs are in the Acropolis, citing for the fact that such was his opinion in 1869 his work, "Ithaque, le Péloponnèse, et Troie" (p. 97), Dr. Schliemann said that on the strength of it he, three years ago, sunk thirty-four shafts in different parts of the Acropolis to probe the ground and find the spots where he would have to excavate for the tombs. In twenty-eight he found nothing; but the other six, which he sunk in the first western and south-western terrace, gave encouraging results, and particularly those two which he had dug one hundred yards south of the Lions Gate. For not only did he there strike two Cyclopean house-walls, but he found also there a number of female idols and small cows in terracotta. He, therefore, began extensive diggings here, but met with serious hindrances, and only at the end of last July did he find it possible to carry out his plans. But going, with Mrs. Schliemann, from Nauplia to Mycenæ, they found it impossible to pass Tiryns, the Royal city of Proetus, and the birthplace of Hercules, without stopping a week to explore it, its huge Cyclopean walls, deemed by the Greeks themselves the work of the demons, and more stupendous than the Pyramids of Egypt, bound them with a spell the more resistless from the fact that the pickaxe of no explorer had ever touched its virgin soil. There they worked a week with fifty-one labourers, digging a long and large trench, and sinking twenty shafts, 6 ft. wide. After further details of the work, Dr. Schliemann said they brought to light Cyclopean house-walls, and in three shafts found Cyclopean water-conduits

of a primitive kind, being composed of uncut stones, joined without cement. The accumulation of the rubbish in Tiryns having been formed by the débris of the successive populations, one sees there how the terra-cottas gradually become more and more archaic the deeper one digs. Since its capture by the Argives (B.C. 468) the citadel of Tiryns, as proved by the pottery, was never again inhabited until the Middle Ages—say, the thirteenth century—when it was for a long time the site of a villa, with its dependencies. Immediately below the strata of the ruins of this villa follows the archaic pottery, to which archaeology cannot assign a later date than the sixth century B.C., or the beginning of the fifth. He would not on that occasion describe the beautiful Tirynthian pottery, because he would have to speak of the Mycenaean, with which it was homogeneous. He would only remark that Hera (Juno), the tutelary goddess of Mycenæ, seems to have been the tutelary of Tiryns also. For there, too, just as at Mycenæ, he found the horned idols of the "cow-faced Hera." After mentioning other finds at Tiryns, including coins, Dr. Schliemann continued the account of his excavations at Mycenæ, where he gradually increased the number of his workmen to 125, which for four months had been the average. He ordered the workmen near the Lions Gate to open a passage into the Acropolis, which, when the citadel was taken, had been blocked up by the huge stones hurled by the Mycenaean men at the besiegers and by the ruins of houses which had been washed down from the top of the Acropolis, producing a heap of débris much higher than the gate itself. A much larger gang dug 40 ft. from the gate trench, 113 ft. square. A third party of workmen dug a trench on the south side of the Treasury in the lower city, near the Lions Gate, in search of the entrance. This Treasury, like that of Atreus, was to turn out subterranean. But either by accident, as some of the inhabitants of the Argolid say, or by the sacrilegious hands of Vely Pasha, son of the notorious Ali Pasha, who is said by others to have tried to force an entrance this way, the upper part of the domelike vault has been destroyed and the stones had fallen into the interior building, which had by degrees been almost filled with the rubbish. The examination of this Treasury, under Mrs. Schliemann, had been one of the most difficult they had ever made, partly from the nature of the terrain and partly from the obstructiveness of the delegate of the Greek Government, under whose Argus eye all the excavations were conducted. Hence they succeeded only in clearing out the passage of the entrance to the central part of this Treasury. The door has the enormous height of 18 ft. 5 in., and is 8 ft. 4 in. broad. On the threshold, which consists of a hard breccia, and which is 2 ft. 5 in. broad, was found a very thin round plate of gold. In the entrance also was one of the 4 ft. 3 in. high long-fluted semi-columns of calcareous stone; one of a pair which once stood to the right and left of the entrance. There was also a large fragment of a frieze of blue marble, with an ornamentation of circles and rows of wedge-like signs in form of fish spines; further, an almost entire frieze of white marble, with an ornamentation of beautiful spirals. Nothing further was found in this Treasury, which was evidently empty when the upper walls fell in. There are here no signs of the walls having been lined with brazen plates; it is, besides, less sumptuous, and seems older than the Treasury of Atreus. In the Acropolis Dr. Schliemann had entirely cleared the famous Lions Gate, which he went on to describe, discussing also the old question of the symbolism of the lions surmounting the gateway, and of the altar surmounted by a column, on each side of which rest the forepaws of one of the two lions. One theory was that the column related to the solar worship of the Persians; another that the altar is a fire-altar, guarded by the lions; a third that we have here a representation of Apollo Agyieus. Dr. Schliemann himself was of this last opinion, which he thought was borne out by the Phrygian descent of the Pelopidæ. The lion-cult of the Phrygians was well known. Besides, among the jewels found in the tombs, of which he was to speak afterwards, and especially in the first tomb, this religious lion symbolism reappeared. On two of the repoussé gold plates there found was seen a lion sacrificing a stag to Hera Boëris, who was represented by a large cow's head, with open jaws, just in the act of devouring the sacrifice. On entering the Lions Gate were seemingly the ancient dwellings of the doorkeepers, of whom some account was given. Further on, as at Troy, was quadrangular Cyclopean masonry, marking the site of a second gate of wood. Still further on were two small Cyclopean water-conduits; to the right of the entrance-passage were two Cyclopean cisterns. A little further on came to light that large double parallel circle of closely jointed slanting slabs, which had become so famous during the last three months. Only about one half of it rests on the rock, the other half rests on a 12 ft. high Cyclopean wall, which has been expressly built to support it in the lower part of the Acropolis. The double circle had been originally covered with cross slabs, of which six are still in situ. Inside the double slabs was, first, a layer of stones, for the purpose of holding the slabs in their position. The remaining space was filled up with pure earth mixed with long, thin cockles, in the places where the original covering remains in its position, or with débris of houses mixed with countless fragments of archaic pottery wherever the covering was missing. This circumstance could leave no doubt that the cross slabs were removed long before the capture of Mycenæ by the Argives (B.C. 468). The entrance to the double circle was from the north side. In the western half of the circle Dr. Schliemann discovered three rows of tomb stelæ, nine in all, made of calcareous stone. All stood upright; four only which faced the west had sculptures in relief. One stelæ, precisely that beneath which was found the body with the golden plates representing the lion sacrificing the stag to Hera Boëris, represents a hunting scene. The two next sculptured sepulchral slabs represent each a battle scene. Details of these scenes were given, as well as of those presented by the other sculptured tombs, of which Dr. Schliemann's letters in our columns have already given some account. The Mycenæ slabs, he said, were unique of their kind. The manner in which they fill up the spaces not covered by men and animals with a variety of beautiful spiral ornaments reminds us of the principles of the painting on the so-called Orientalizing vases. But in the Mycenaean sculptures nowhere do we see a representation of plants, so characteristic of ancient Greek ornamentation of this class. The whole is rather linear ornamentation, representing the forms of the bas-relief. Hereby we have an interesting reference to the epoch in Greek art preceding the time when that art was determined by Oriental influences, an epoch which may approximately be said to reach far back into the Second Millennium (B.C.). Dr. Schliemann knew of no example in history of an acropolis having served as a burial place save the small building of the Caryatides in the Athenian Acropolis, the traditional sepulchre of Cecrops, first king of Athens. But we now know with certainty that Cecrops is nothing else than Kacyapa, the sun-god, so that the story of Cecrops having been buried in the Acropolis is a pure myth. But here in the Acropolis of Mycenæ the tombs are no myth, but a reality. The paper then discussed the question—who were these great personages entombed here, and what were the services

rendered by them to Mycenæ which deserved such splendid funeral honours. It was argued at length that the inhabitants of these tombs could be none other than the very persons spoken of in the extract Dr. Schliemann had cited at the outset from Pausanias, in spite of the certainty that the traveller of the Antonine age could never have seen the tombs, which were then covered by a 10 ft. thick layer of prehistoric rubbish. No ancient writer mentioned that Mycenæ was rebuilt after B.C. 468, and Strabo even said that the site had remained uninhabited ever since its capture; but facts proved that the city had been rebuilt about B.C. 400, and again about B.C. 200. Dr. Schliemann then proceeded to state what he had found below the ruins of the Hellenic city. He spoke of the vast masses of splendidly painted archaic vases. Iron, he remarked, was found in the upper Hellenic city only, and no trace of it in the prehistoric strata. Glass was found now and then in the shape of white beads. Opal glass also occurred as beads or small ornaments. Sometimes wood was found in a perfect state of preservation, as in the board of a box (*καρτέ*), on which were carved in bas-relief beautiful spirals. Rock-crystal was frequent, for beads and also for vases. There were also beads of amethyst, onyx, agate, serpentine, and the like precious stones, with splendid intaglio ornamentation representing men and animals. When, towards the middle of November, he wished to close the excavations, Dr. Schliemann excavated the spots marked by the sepulchral slabs, and found below all of them immense rock-cut tombs, as well as other seemingly much older tombstones, and another very large sepulchre from which the tombstones had disappeared. These tombs and the treasures they contained, consisting of masses of jewels, golden diadems, crowns with foliage, large stars of leaves, girdles, shoulder-belts, breastplates, &c., were described in detail. He argued that as one hundred goldsmiths would need years to prepare such a mass of jewels there must have been goldsmiths in Mycenæ from whom such jewels could have been bought ready-made. He spoke of the necklaces, too, and of the golden mask taken from one of the bodies, which must evidently be a portraiture of the deceased. Dr. Schliemann then proceeded to show that in a remote antiquity it was either the custom, or, at least, it was nothing unusual, for living persons to wear masks. That also immortal gods wore masks was proved by the busts of Pallas Athênê, of which one copy was in the British Museum and two in Athens. It was also represented on the Corinthian medals. The treasures of Mycenæ did not contain an object which represented a trace of Oriental or Egyptian influences, and they proved, therefore, that ages before the epoch of Pericles there existed here a flourishing school of domestic artists, the formation and development of which must have occupied a great number of centuries. They further proved that Homer had lived in Mycenæ's golden age, and at or near the time of the tragic event by which the inmates of the five sepulchres lost their lives, because shortly after that event Mycenæ sank by a sudden political catastrophe to the condition of a poor powerless provincial town, from which it had never again emerged. They had the certainty that Mycenæ's flourishing school of art disappeared, together with its wealth; but its artistical genius survived the destruction, and when, in later centuries, circumstances became again favourable for its development it lifted a second time its head to the heavens. In conclusion, he said that if they thought Mrs. Schliemann and he had by their disinterested labours contributed a little to show that Homer did not describe myths, but real events and tangible realities, this would be to them a most flattering acknowledgment and a greater encouragement in the continuation of their works in Troy, which they would resume very soon, for they had the necessary Firman of the Turkish Government in their hands.

After a few remarks from Mr. John Evans, Lord Houghton, and Mr. Watson upon the discoveries of Dr. Schliemann,

Mr. Gladstone rose to address the meeting, and was loudly cheered. He said Dr. Schliemann had over-bountifully paid him for the little he had been able to do in the fields of Homeric inquiry. He felt the lecturer's liberality must react in weakening the foundation of anything he (Mr. Gladstone) presumed to say on Dr. Schliemann's behalf, and must lead to the suspicion that he was only endeavouring to requite the generosity shown. He (Mr. Gladstone) was glad that another person besides Dr. Schliemann had been mentioned on this occasion—he meant Mrs. Schliemann. In every respect Dr. Schliemann by his immense labours had gone far beyond expectations. There was one point, however, in which they felt he was not so happy. They had means, when he came back from Ilium, of verifying more or less almost everything he had seen in the way of weapons, utensils, &c., by comparing them with the poems of Homer. It was the standard of an age in which they could carry these remains. He (Mr. Gladstone) was still very strongly of opinion, as he was hopelessly impressed at first with the belief that a very remarkable correspondence would be found to exist between them. Now, thanks to splendid munificence, unwearied perseverance, and discernment, they seemed to have attained to a great accession to the antiquarian wealth of the world. They were told there were great men before Agamemnon who remained unknown because they had no sacred poet to sing their praises. Dr. Schliemann's present discoveries seemed to fall between the period of Homeric literature and the Classic age of the Greeks. It was probable that it would be reserved to Dr. Schliemann—such was his energy and such was the large fund of buoyancy and strength which seemed to abide both in him and Mrs. Schliemann—to traverse the scenes so as to complete and explain his own discovery. Although the impression given in listening to him was that, for the most part, they were dealing with the remains of a later age than the Dorian Conquest, yet there might be among the objects which he described some which were of greater antiquity even than what were referred to in the poems of Homer. He had seen comments upon some of these discoveries of Dr. Schliemann which had filled him with pain, because they had not been conceived in that spirit of generosity and brotherhood which ought to unite whatever differences of opinion might arise in this inquiry. He was only sorry to say that even in Germany, among that great and learned fraternity, they were not united by that true brotherhood and spirit of generosity in this matter. The only point upon which Dr. Schliemann had dwelt which he was tempted to refer to was regarding his theory and belief as to the Hera Boëris. It might be well supposed that he was not prepossessed in favour of Dr. Schliemann's view of the "owl-faced Athênê;" yet he might be allowed to cite his own "Homeric Synochronism" as to the cow-faced "Hera." Mr. Gladstone then proceeded to read the extract in which the relation was pointed out between the Egyptian cow-goddess Isis and Hera and Io the Argive deities, who were each represented as Boëris. This, added Mr. Gladstone, was an important link between the animal worship of the Nile land and the anthropomorphism of Greece. This attached itself to a large subject. It was quite plain from these remains that persons coming from Egypt imported into Greece a great deal of the animal worship of that country, and it would be strange if they did not do so. Egyptian worship remained locally in Greece in the local superstitions more than it was allowed to

assume in the literature of Greece. The mind and thought of that country seemed to repel all the grosser elements. If there was anything in these views of Dr. Schliemann, they seemed to see that the Egyptian animal worship and the epithet *Soëris* was very probably the link between these two religious systems. He only mentioned this as an illustration of the immense interest that attached to these subjects. If they had full and rational information upon them, they had here a development of the most interesting and remarkable trait of the Greek mind. He would no longer trouble the society, but tender to Dr. Schliemann his most hearty congratulations upon the success of his labours, and express his personal gratitude for the enlargement of knowledge in an age rather degenerate by this noble and high-minded enthusiast.

Professor Sidney Colvin, M.P., and Mr. Lloyd followed with a few remarks, after which the chairman proposed Dr. Schliemann as honorary Fellow of the society, which was carried by acclamation, and the meeting terminated.

We give two more sketches of the excavations of Mycenæ, representing the interior of the Treasury of Atreus, and a rock-cut chamber in the same. Other illustrations will be given in our next.

MUSIC.

PHILHARMONIC SOCIETY.

As briefly recorded last week, the third concert of this society, on the Thursday evening, included the first performance in London of the third part of Robert Schumann's music to "Faust," its earliest hearing in England having been at one of the concerts of the Cambridge University Musical Society, conducted by Mr. C. V. Stanford, in 1875. The music referred to is illustrative of selected scenes from Goethe's poem, and was composed at different periods from 1844 to 1853.

The elevated grandeur, the beauty, and dramatic power manifested in Schumann's "Faust" music must have caused a wish in many of the audience for the production of the whole. Among the movements that created a special effect were the opening chorus, "Woods crown with trembling hold;" the very melodious chorus, "Tell us, Father, where we wander," including bass solo passages for Pater Seraphicus; the stately choral movement, "A noble ray of light," with the incidental graceful passages for soprano solo and choral sopranos; the bass solo for Doctor Marianus, "Highest Empress o'er the world," enhanced by some beautiful orchestral contrasts in the accompaniments; and the closing "Chorus Mysticus" for double choir, in which are some grand effects of full vocal harmony and some clever fugal writing—in the free style—with an ingenious augmentation of the subject. The performance was as good as could be expected, considering the elaborate nature of the music and the difficulty of obtaining a sufficient number of rehearsals. A very effective chorus of about 180 voices was assembled; and the vocal solos were rendered by Mrs. Osgood, Miss Mary Davies, Madame Worell-Duval, Mrs. Irene Ware, Misses Bolingbroke, Kate Steel, and Reimar, Mr. Henry Guy, Mr. Wadmore, and Mr. Henry Pope.

The orchestral pieces at the concert referred to were Bennett's overture to "Parisina" and Weber's to "Der Freischütz;" the remaining important feature having been Beethoven's "Choral Fantasia," the prominent pianoforte solo part in which was well played by Miss Agnes Zimmermann. Beethoven's charming trio, "Tremate empi tremate," was effectively rendered by Mrs. Osgood, Mr. Guy, and Mr. Wadmore; and the lady just named gained a deserved encore for her powerful declamation of the scene, "Liebes-tod," from Wagner's "Tristan und Isolde."

The next concert, on April 16, is to include a performance of Brahms's new symphony in C minor.

Madame Arabella Goddard gave a recital at St. James's Hall yesterday (Friday) week, when the accomplished pianist performed, with her well-known powers of brilliant execution, various pieces in the classical and romantic styles, from Bach and Handel to Mendelssohn, Schubert, Schumann, Chopin, and Rubinstein. A special feature in the programme was the beautiful sonata, by Sterndale Bennett, entitled "The Maid of Orleans," one of his last important compositions, written in illustration of passages from Schiller's play. The sonata was dedicated to Madame Goddard, and this occasion was her first performance of it in England. The pianist evidently felt special interest in it, and was greeted with loud applause at the conclusion of the piece, as she was after most of the other portions of the programme.

Last week's Crystal Palace Saturday concert was devoted to a selection from the works of Beethoven, in commemoration of the fiftieth anniversary of his death. The programme was of strong and varied interest, the orchestral pieces having consisted of the first of the three "Leonora" overtures in C, and the great "Eroica" symphony. How finely they were rendered need scarcely be said. In the "Choral Fantasia" the prominent and important pianoforte part was brilliantly executed by Madame Arabella Goddard, who also played the thirty-two variations on an original theme in C minor. The other portions of the concert consisted of an elegy for vocal quartet (Misses Mary Davies and Reimar, Mr. H. Guy and Mr. H. Pope), with accompaniment of stringed orchestra, and a selection from the opera of "Fidelio," including the quartet (canon), the trio of the last act, and the grand finale, in which, besides the vocalists just named, Miss Jessie Jones, Mr. Wadmore, Mr. Sauvage, and the Crystal Palace choir co-operated. At next Saturday's concert Brahms's new symphony is to be performed.

One of M. Gounod's latest compositions, his "Messe du Sacré Cœur de Jésus," was performed, for the first time in England, at the Royal Albert Hall on Saturday last. The work is full of that melodious grace and refinement, and those delicate orchestral traits, which are well-known characteristics of the composer; while, in some instances, it is perhaps more devotional in style than his celebrated "Messe Solennelle." The Mass now referred to was first produced at the Church of St. Eustache, Paris, in November last, when it created a great impression. In its performance, on Friday, the charming "Benedictus," for solo vocal quartet and chorus, was encored. The choral portions of the mass were well rendered by the large and excellent choir trained by Mr. William Carter, who conducted. The solo vocalists were Miss Anna Williams (who suddenly replaced Madame L. Sherrington in consequence of the indisposition of this lady), Madame Patey, Mr. E. Lloyd, and Signor Foli. Other pieces by M. Gounod followed the mass, his air "There is a green hill," sung by Madame Patey, and encored; his "meditation" on the first prelude of Bach's well-known series of forty-eight preludes and fugues (tenor solo Mr. Lloyd); and the motet "Gallia" (soprano solo, Miss A. Williams). The concert closed with Rossini's "Stabat Mater," the solos by the vocalists already named.

An interesting orchestral concert was given by the students of the Royal Academy of Music, at the institution, on Saturday evening, when Schubert's mass in E flat was performed for the first time in London. The work is one of great beauty—perhaps the finest of his six masses—and it was generally well rendered on the occasion referred to.

The nineteenth season of the Monday Popular Concerts closed, this week, with the director's benefit. The programme was of rich and varied interest, opening with Beethoven's string quartet in E flat, op. 74, finely played by MM. Joachim, L. Ries, Zerbini, and Platti. The selection also included pianoforte and violin solo pieces, the former executed by Madame Schumann and Mdlle. Marie Krebs, the latter by Herr Joachim; some of Brahms's Hungarian dances, as arranged by Herr Joachim for violin and pianoforte, rendered by that gentleman and Mdlle. Krebs; and vocal solos by Mesdames Sophie Löwe, Redeker, and Friedländer. Sir J. Benedict conducted.

The second of the concerts of chamber music at the Royal Academy of Music took place on Tuesday evening, when the programme included Schubert's string quartet in D minor; Schumann's pianoforte quartet in E flat, with Madame Schumann as pianist; and Brahms's pianoforte quintet in F minor, with Mdlle. Krebs at the piano. The string-quartet party consisted of MM. Joachim, L. Ries, Straus, and Platti; Mdlle. Redeker having been the vocalist, and Mr. Deacon the accompanist.

On Tuesday evening the annual Lenten service was held in St. Paul's Cathedral, the anthem having, as on former occasions, consisted of a selection from Bach's "St. Matthew" Passion Music.

There were concerts of sacred music at the Royal Albert Hall and the Crystal Palace on Good Friday. At the former place "The Messiah" was given, conducted by Mr. Barnby, the solo vocalists named having been Mesdames Lemmens-Sherrington and Antoinette Sterling, Mr. Sims Reeves, Mr. W. Shakespeare, and Signor Foli. At the Sydenham building the performances consisted of a selection of sacred music, the programme having included the names of Mesdames Sherrington and Patey, Mr. E. Lloyd, Mr. Patey, and Signor Foli as solo singers, Mr. T. Harper's trumpet obbligato having been a feature in both announcements.

The dates of the Wagner Festival at the Royal Albert Hall are now fixed for Monday evening, May 7; Wednesday evening, May 9; Saturday morning, May 12; Monday evening, May 14; Wednesday, May 16; and Saturday morning, May 19. The orchestra is to number about 200 performers, led by Herr Wilhelmj, who occupied the same position at last year's performances of the "Nibelungen" series of operas at Bayreuth, much of the music of which, as well as of others of Wagner's operas, is to be heard at the approaching Albert Hall Festival. According to the present arrangements, the selections will be—on May 7, from "Rienzi," "Tannhäuser," and "Das Rheingold;" on May 9, from "Der Fliegende Holländer" and "Die Walküre;" May 12, "Tannhäuser" and "Siegfried;" May 16, "Die Meistersinger," "Götterdämmerung," and "Siegfried;" and on May 19, "Tristan und Isolde" and "Götterdämmerung." Some of the vocalists who were engaged at the Bayreuth Festival are to co-operate in these performances.

This year's Gloucester Festival performances are to take place on Sept. 4, 5, 6, and 7.

THEATRES.

The changes that have taken place during the week consist simply of the transference of dramas between Drury Lane and the Adelphi. At the former house on Saturday "The Colleen Bawn" succeeded the performance of "Haska," and was enacted to a crowded house; and at the latter Mr. A. Selous's drama of "True to the Core" attracted a large audience. The cast was good. Martin Truegold was admirably represented by Mr. Emery, and Wicket by Mr. Henry Sinclair. Mr. Shore, also, as Dangerfield, and Miss Rachel Sanger as Mabel, were thoroughly efficient. Miss E. Stuart likewise merits praise as Sarah. The scenery is especially appropriate and picturesque.

The Theatre Royal, Manchester, was set apart on Monday night for the exclusive benefit of Mr. Compton. As the performances were intended as a testimonial to that gentleman on his enforced retirement from the stage, the house was crowded with an enthusiastic audience. This testimonial performance is supplemented in Manchester by voluntary contributions amounting to about £450.

The Surrey Gardens reopen on Easter Monday, and in the theatre there will be a new spectacular entertainment by the Brothers Pearse and Oswald Allan.

MUSICAL PUBLICATIONS.

The productive power of Franz Abt as a song composer seems to be absolutely inexhaustible. Messrs. Robert Cocks and Co. have recently published three songs—"At Evening Time," "Spring Morning," and "Golden Sunshine"—which will no doubt find as wide an acceptance as that which has been accorded to innumerable previous productions of Abt. While extremely simple, both in the voice part and in the accompaniment, the songs specified are melodious and expressive in style. Somewhat similar praise may be accorded to "Far Away, White Dove," song, by Odoardo Barri; "Summer in the Heart," ballad, by H. Pontet; and "Song of the Sailor Boy," ballad, by Stephen Adams, all likewise published by Messrs. Cocks and Co.

Mr. Brinley Richards, although chiefly known by his numerous works for the pianoforte, can also write well for the voice, among many proofs of which is his graceful and expressive song, "O, speak but the word!" published by Messrs. J. B. Cramer and Co., who have also issued a pleasing serenade, "Luna, Veil thy Light," by C. E. Tinney.

THE SAILORS' HOME, BOMBAY.

Among the important public buildings erected during the past fifteen years in the great commercial and political metropolis of Western India may be enumerated the University Hall, the Elphinstone College and High School, the Crawford Markets, the Victoria and Albert Museum, the Sir Jamsetjee Jejeebhoy Hospital, the David Sassoon Institution, the New Post Office, and the Public Works Office, besides the new Custom House and High Court. The building of which we give an illustration is the Sailors' Home, which is certainly not the least effective as an architectural ornament to the city. It was designed by Mr. F. W. Stevens, the architect, and erected under his superintendence. It stands on the Apollo Bunder, officially styled Wellington Pier, which is the chief landing-place for passengers and marts from the Peninsular and Oriental Company's steam-ships, in the harbour of Bombay. The cost of this fine building, which amounted to upwards of £25,000, was defrayed by the munificent gift of Khanderao, the late Guicowar of Baroda, upon the occasion of the visit of the Duke of Edinburgh to India.

Mr. Sydney Smirke has resigned his seat in the Royal Academy, and been placed on the list of honorary retired Academicians. An election to fill the vacancy thus caused will be held in June.

ENLARGEMENT OF CHARING-CROSS HOSPITAL.

Those who well remember the old wards of Charing-Cross Hospital as they existed some fifteen or twenty years ago, with their nooks and corners, the kitchens, and sleeping-rooms for matrons, abutting everywhere, and impeding the free circulation of air, limiting the cubic space, and deteriorating the hygienic condition, will most cordially recognise the labours of the members of the Building Committee, under whose superintendence, it appears, the whole of the improvements of the Hospital have been successfully accomplished. Thanks are due specially to the more hardworking members of this committee—namely, the treasurers (Messrs. R. Few and H. A. Bosanquet), Mr. Jabez Hogg, Mr. F. Hird, and Dr. Julius Pollock, who, together with the excellent secretary of the hospital, Mr. Woolcott, have been long and earnestly engaged in bringing order, cheerfulness, salubrity, and extended usefulness, out of chaos; and in more thoroughly adapting the institution, in every department, for its great and useful work of charity.

To effect the alterations and additions, which have involved an expenditure of about £13,000, the institution was partly closed for a year, and altogether for two months, and there are now 180 beds available for in-patients. The undertaking of the work arose from the fact that the congregating under one roof of a larger number of patients, afflicted with serious diseases, than had been accommodated previously, rendered it necessary to obtain a greater amount of cubic space and increased facilities for ventilating and warming every part of the hospital. These advantages have been gained by completely remodelling the whole of the wards. The construction of the old wards impeded the free circulation of air. The obstructions have been removed, and the whole made uniform and neat throughout. An excellent ward, containing thirty-two beds, has been obtained on the third story for children. The old sliding casement windows have been replaced by louver windows, which secure a perfect ventilation of the wards. The closets, lavatories, and bath-rooms have been rearranged and constructed on the best sanitary principles; the sculleries have been completely separated from the wards, and provided with thorough ventilation; the wards are now in a perfect hygienic condition, and uniformity of temperature is maintained day and night by means of hot-water pipes and ventilating stoves; and a fourth story has been erected, thus affording additional and appropriate rooms for the sisters and nurses. The out-patients department has been remodelled, the dispensary enlarged, and better accommodation secured for the comfort and convenience of out-patients. These and numerous other improvements have vastly increased the suitability of the hospital. They have been effected under the superintendence of the architect, Mr. John J. Thomson.

The ceremony of reopening the Hospital took place on Wednesday week, in the presence of the Prince and Princess of Wales and a numerous and distinguished company—including the Duke and Duchess of Westminster, with Lady Beatrice Grosvenor, Lord Overstone, Lord Tenterden, the Bishop of London, Bishop Cloughton, Admiral Strange, General Alexander, Sir James Tyler, Lieutenant-General Sir Lintorn Simmons, Colonel Loyd-Lindsay, M.P., and Mrs. Loyd-Lindsay, Major Littledale, Sir Joseph Fayer, the Master of the Clothworkers' Company, Mr. W. H. Smith, M.P., Mr. Kinnaird, M.P., Sir Richard Wallace, M.P., Mr. Gregory, M.P., Mr. Talbot, M.P., Sir Charles Russell, M.P., the Rev. W. Crichton, General Sir Richard Wilbraham, General Walker, Mr. Robert Few, Mr. J. Manship Norman, Colonel W. Stuart, Mr. Henry Austey Bosanquet, the Rev. Mr. Russell, and many others.

The Prince and Princess of Wales arrived at the principal entrance, where a guard of honour of the Queen's (Westminster) Volunteers was drawn up, at half-past three o'clock, and were received by the President, Lord Overstone, the Duke of Westminster, Sir Joseph Fayer, and the other Vice-Presidents and the Treasurers. Their Royal Highnesses, who were accompanied by Lord Suffield and General Sir William Knollys and the Countess of Morton, were then conducted through the various wards, where the senior medical officers were in attendance. On entering the reception-room at the close of the inspection of the new and remodelled buildings the National Anthem was sung by the choir of the Chapel Royal, Savoy, under the direction of Mr. Frost, organist of the chapel.

Their Royal Highnesses having taken their places on the dais, prayers were said by the Bishop of London. The hymn, "Thy powerful aid, Almighty Father," was then sung, after which one of the Treasurers, Mr. H. A. Bosanquet, read the address of the Governors, stating the facts above mentioned and describing the position of the hospital. It afforded relief in 1875 to upwards of 16,000 poor and suffering patients, including 4306 cases of accident and emergency, which necessarily required immediate attention and relief, and for which the position of the hospital is specially adapted. The nursing of the patients is in the charge of the Sisterhood of St. John. There is an efficient staff of paid nurses, under the superintendence of lady sisters, who nobly give their services to this work of charity. The governors wish that this should be the starting-point for the further extension of the hospital, for which end they have already obtained the leases of several adjacent houses, and they earnestly hope at no distant day to receive sufficient funds to enable them to provide accommodation for 350 in-patients, and to perfect the arrangements of the hospital by the addition of a chapel and a residence for a chaplain. Finally, they reminded the Prince and Princess that her Majesty, before she became Queen, allowed the principal ward for female patients to be called the Victoria Ward. They now requested permission to name one of the wards for male patients the Albert Edward Ward, and the ward for children the Alexandra Ward. (Their Royal Highnesses were more than an hour in the wards; and in the children's ward, more especially, the Princess lingered over the beds in a most affectionate and motherly manner.)

The Prince of Wales, in replying to the Governors' address, expressed the great pleasure which he and the Princess had felt upon this occasion. His Royal Highness then declared the hospital opened, and the Bishop of London pronounced the benediction. Their Royal Highnesses retired, loudly cheered on leaving, as they had been on their arrival, by a large crowd assembled in the vicinity of the hospital. The greater number of the visitors remained to inspect the wards. It may be added that the cost of the contemplated extensions of the hospital, including the purchase of the reversions of the leaseholds, is estimated at about £50,000, which sum, it is hoped, will be raised by contributions during the present and the four succeeding years. The president, Lord Overstone, has made a donation of £1000 towards the extension fund.

A Board of Trade inquiry into the sinking of the schooner Matilda and four of her crew by the Anchor liner Californian, on Feb. 11, off Sanda Island, was concluded last Saturday in Glasgow. The Court held that there was not a proper lookout on the Californian, and that her sailing rules were not observed. The Court suspended for six months the certificate of David Overstone, the captain, and Thomas Martin, the chief mate, of the Californian.

SCIENTIFIC RESULTS OF THE MONTH.

In the January number of the organ of the Berlin Horticultural Society the size is given of the Wellingtonia planted at Windsor by the Crown Princess of Prussia in 1856. It was then four years old, and 18 in. high. At the beginning of last year it was a handsome tree, 36 ft. high and 55 ft. in circumference. The girth of the trunk close to the ground was 8 ft.

The *Mining Journal* and other technical papers record the trial of one of Bourne's high-speed engines lately applied to drive a rolling-mill in Sheffield. The engine, though of small size, is reported to have performed its task with ease and success, demonstrating the inutility of employing the large, cumbersome, and costly engine heretofore deemed necessary for such work. The engine, it is stated, notwithstanding its small size, is capable of working up to 400-horse power.

At the Paris Exhibition of next year a garden is to be formed in the Champ de Mars, in which will be erected green-houses, hothouses, and tents, where every description of agricultural produce may be exhibited. A series of twelve exhibitions will be held, each lasting a fortnight; and the plants shown must remain during the fortnight, and be attended to by the exhibitor. The Exhibition will be open from May 1 to Oct. 31.

The lecture lately delivered by Sir J. Lubbock, before the Society of Arts, on the relations between plants and insects, seems to imply a consciousness and volition on the part of plants with which they have not heretofore been credited. Ants are as fond of honey as bees; and how comes it that the ants fail to appropriate the honey, or some part of it, which is gathered by the bees? Simply because the plants are provided with an apparatus of protection against the ants, which does not hinder the approach of the bees, the visits of which are advantageous, as they carry from one flower to another pollen, by which the plants are fertilised. Many flowers are slippery and hanging, so that ants cannot enter them, but winged insects can; some are protected by chevaux de frise of hairs which yield to the bee but not to the ant, and others exude a sticky secretion which prevents the approach of a creeping insect.

The Castalia recently made a trip to try the Aston patent disc-blade paddle-wheels, having on board the designer of these wheels, Mr. J. J. Aston, Q.C., of Middle Temple-lane, together with Captain Dicey, General Atkinson, Captain Howe, Captain Baker, and Mr. J. W. Cole, civil engineer, of Victoria Chambers, Westminster, who was present on the part of the mortgagees. The paddles of these disc blades are straight narrow metal blades, a few inches wide, and when fixed upon the spoke of the wheel resemble a huge pair of old-fashioned parallel rules, separated on their hinge sufficiently wide apart to allow the iron to be fastened on to the spoke itself. The paddle-floats by which the Castalia has been driven hitherto were eight feet in length, three feet six inches broad, and four inches thick, with arms, radius-rods, brackets, &c., of great weight and proportionate size. With Aston's disc the weight and area have been reduced on all the proportions as twelve is to thirty-two. Mr. Cole has reported to the owners of the Castalia to the following effect:—"I cannot close this report without paying a compliment to the utility and simplicity of the improved paddle-wheels employed in this ship, as taking it for granted that the driving result be obtained, which appears in this instance to have been established beyond doubt, it is very clear to the meanest mechanical capacity that, as a seagoing piece of mechanism, compared with the feathering float-wheel, it is an improvement of the most marked and desirable description."

The condition of our armour-clad Navy is at length beginning to excite serious uneasiness in official circles, and certainly nothing could be more idiotic than the course which has hitherto been pursued on this subject. What is the purpose of armour? To keep shot out. But in the application of armour such thicknesses have only been applied as existing guns could pierce, and the armour has thus become not only useless but mischievous. And why mischievous? Because the pieces of armour punched out and broken up by the penetrating projectile constitute a cone of destructive splinters; because the weight of the armour renders more displacement necessary, and therefore a larger and more costly vessel; and because such a vessel requires great power and a large consumption of coal to propel her at the necessary speed, which large consumption limits the distance the vessel can run under steam. The *Alexandra*, working to over 8000-horse power, cannot carry more than three days' coal at full speed; and, as the armour can be pierced by existing guns, the vessel is not shotproof after all. The Italians, it is said, now propose to construct vessels with three feet of armour and 15,000-horse power, and certainly we have no gun yet in existence which can pierce that. But such a gun can be made, and probably will be, if thought advisable, before the vessels can be built. Such vessels, however, would probably not be attacked above water at all, but below water, by submarine guns and torpedoes, against which they would be as vulnerable as other vessels. The Chinese have had some gun-boats of the Staunch class lately built, with powerful guns, but with a speed of only nine knots. Such craft would be easily run down by any ordinary steamer of strong construction and good speed, and we fear must prove little better than mantraps to the persons on board.

Last month an interesting paper on Indian Railways was read before the Society of Arts by Mr. Juland Danvers, and an instructive discussion thereupon ensued, of which our limits prevent us from giving any adequate epitome; but we may recapitulate a few of the main facts brought into view. The East Indian line, 1280 miles long, has cost about 27 millions; the Great Indian Peninsula, 1278 miles long, about 23½ millions; the Madras, 856 miles, about 10½ millions; the Bombay and Baroda, 408 miles, 7½ millions; and the Scinde, 663 miles, 11 millions. Mr. Crawford stated that it had been formerly considered impossible to bring grain from the upper parts of India to Calcutta at a profit. But wheat had lately been brought from Cawnpore to Calcutta, a distance of 684 miles, at a cost of 6s. 4d. per quarter. Wheat could now, consequently, be brought from the internal parts of India to England at a profit; and on the railway it could be carried with profit at 4d. per ton per mile. It seemed to be generally agreed in the discussion that the plan of making and working the railways by companies was better than that of the Government doing this work, although there was a constant propensity on the part of Government officials to magnify their office by getting as much of this work as possible into their hands. On the whole, the Indian railways seem to have been efficiently carried out. But one great mistake was made in adopting a 5½ ft. gauge, instead of the common gauge of 4 ft. 8½ in.; and a still grosser error was made when the metre gauge was introduced for some of the recent lines. The original deviation from the standard gauge no doubt assumed that the European and Indian systems would never be connected. But the metre gauge was adopted with the consciousness that all the evils of break of gauge would be immediately incurred.

ATHLETIC MEN AND ANIMALS.

After the University boat-race on Saturday great numbers of the spectators, interested in outdoor sports and exercises, remained in the neighbourhood of the river-side, and in the afternoon there was a large gathering of them at the Lillie-bridge Grounds, West Brompton. Here they witnessed a series of novel and peculiar exhibitions in various contests of strength, under the most unusual circumstances, which had a very whimsical effect, the principal attraction being a tug of war between an elephant and fifty men. Shortly after noon the first event on the programme was a ten-mile race between D. Stanton on a bicycle, and J. Beavan, of Camberwell, on foot. The latter received a start of twenty-four minutes, and, managing to keep in front all the way, eventually won by a quarter of a mile. No time was taken. A one mile walking-race, between an elephant and J. Miles, afforded the spectators much amusement, and in the end resulted in a victory for the biped by sixty yards, the time being 8 min. The dog-racing resulted as follows:—Lady Golightly beat Palmflower, Venus beat Diana, and Lady Golightly beat Venus, and won. A mile race between a donkey and a couple of camels that was included in the programme was, in consequence of the stubbornness of the camels, who rushed wildly all over the grounds, unable to be decided. A two-mile match between J. Keen, champion bicyclist, and Mr. Hodgkins's celebrated trotter Queen of the Turf, late Lady Moscow, was won by the bicyclist, who led all the way and passed the post a winner by one hundred yards, in 6 min. 31 3-5 sec. Several tugs-of-war competitions were held between a large number of men belonging to the Coldstream Guards, and then thirty-four of the strongest men were pitted against a couple of powerful cart-horses, and, after some good pulling, the horses were drawn over the line. Adding another half-dozen men and another horse, the balance of strength was then in favour of the quadrupeds. The event of the day was then decided—a trial of strength between fifty men of the Coldstreams, and one of Messrs. Sangers' large elephants. A couple of thick ropes were attached to the huge animal by a stout leather collar round his neck. The men took up their stations behind the elephant, and commenced hauling at the ropes; whilst, in order to induce the elephant to exert his powers of resistance, loaves of bread were held just within his reach, and he was allowed to eat several. The tug lasted for about four minutes, the elephant, having a good foothold, remaining almost immovable, bellowing, however, the while most lustily. At last the huge creature began to tire, and was dragged slowly backwards over the line. The elephant, in fact, did not seem either to like or understand his task. We give a few sketches of these odd and fantastic performances at Lillie-bridge.

ROYAL INSTITUTION LECTURES.

THEORY OF MUSIC—HARMONY.

Dr. William Pole, F.R.S., in his sixth and concluding lecture, given on Thursday week, explained and illustrated on the pianoforte harmonic progressions, or the transitions from one combination of notes to another. As this forms, in the ordinary mode of instruction, an essential part of harmonic doctrine, it is necessary, he said, to inquire what justification it has on philosophical grounds. The only reason why any combination may not be followed by another combination is an æsthetic one—that the mind requires some kind of relation between the two. This is no mere arbitrary musical idea, but is in analogy with many other similar cases in art and literature. The question, therefore, is, what kind of relations can be established between musical chords? Consonances and dissonances must be distinguished, as the latter require peculiar treatment; but some relations are applicable to chords generally. In the first place, as was shown, there is the relation of tonality: the sequence of chords must be in the same key, unless it is intended to modulate, when this relation is intentionally broken. Then there is a relation through one or more notes being common in two consecutive chords, which forms a link between them; and, thirdly, there is a less obvious, but perhaps more important, relation, derived from the harmonics of compound tones. This was one of the great discoveries of Rameau, who founded on it his system of "basses fondamentales," and this explained, on natural principles, the well-known close relations between the chords of the tonic, the dominant, and the subdominant, which have been probably the most important in practical music, and which have dictated the universal forms of cadence or close. Dr. Pole next considered the peculiar treatment of dissonances, and in regard to the doctrine that they must be "resolved" (that is, have certain chords after them), explained that, as a dissonance is only a combination somewhat rougher to the ear than a concord, the rule must be simply æsthetic, since the mind prefers to rest on agreeable rather than on disagreeable impressions, especially at the close of a piece or a long phrase. Peculiar dissonances require to be resolved in a peculiar way, partly on account of the general relations of harmonic combinations, and partly in relation to the movement of the single parts of which the chords are composed. As these combinations originated in vocal music, it has been considered necessary to make the movement of the parts as easy and singable as possible; and hence, when a singer has a dissonant note to execute, he is directed to approach it and leave it by the easiest steps. From this also arose the rules for the preparation and resolution of dissonances, which have been incorporated in general musical practice. After quoting from Helmholtz, Richter, and others in support of these views, Dr. Pole concluded with a summary of the principal conclusions he had arrived at in his course, expressing his opinion that the more the theory of music is understood the greater will be the enjoyment derived from its practice.

CHEMICAL STRUCTURE AND LIGHT.

Professor J. H. Gladstone, Ph.D., F.R.S., began his discourse at the Friday evening meeting, on the 23rd inst., with illustrations of the interesting phenomena of refraction, such as the bending, magnifying, and diminishing the rays and the production of coloured fringes when light is transmitted through glass and other transparent media. This refraction varies with the amount of inclination of two surfaces to one another, in such a way that the sine of the angle of refraction bears a constant ratio to the sine of the angle of incidence. This constant number, termed the "index of refraction," belongs only to the one substance, each solid, liquid, or gas having its own index. In a discourse delivered in 1868, Dr. Gladstone explained what is meant by the "refraction equivalent" of a substance. The specific refractive energy he defined as the refractive index, minus unity, divided by the density, and as constant, or nearly so, at all temperatures or pressures, even in passing from the liquid to the solid or gaseous condition, and notwithstanding solution or great changes of chemical combination. The product of this number and the atomic weight is the "refractive equivalent;" and a table was exhibited giving the equivalents of fifty-one of the elements. In this table some curious relations were pointed out between the numbers; and in regard to the metals it was shown that their specific refractive energy is,

roughly speaking, inversely as the square root of their combining proportion. If an element, however combined, always retained the same action on light, this property, it was said, would never tell us anything about the chemical constitution of bodies; but it is otherwise. Thus, there are two refraction equivalents for the metal iron as existing in its soluble salts—viz., 12.0 and 20.1; and this depends upon its atomicity, the lower number being in ferrous and the higher in ferric salts. The carbon compounds were shown to afford a still more striking instance of the evidence derived from the passage of light through a substance confirming the views of theoretical chemists. Thus, in all those compounds in which carbon is tetratomic, its refraction equivalent is 5.0; but in benzole and the whole aromatic group, in which six atoms of carbon are supposed to be linked together, the refraction and dispersion are considerably higher. As a rule, isomeric bodies have the same refractive energy; but there seem to be exceptions, which must be taken into account in considering the difference of their chemical structure. Other instances were given of the assistance which chemists might derive from a consideration of the phenomena of refraction, some of the points of the lecture being illustrated by experiments.

THE PRINCIPLE OF OUR PRESENT LITERATURE.

Professor Henry Morley, in his fifth and concluding lecture on Effects of the French Revolution upon English Literature, given on Saturday last, began with a brief summary of his course, specially noticing the ideal of liberty, fraternity, and equality set up by the leaders of the French Revolution, with the judgment of Burke upon it that such an ideal state requires ideal citizens, and that men must previously be adapted to such a condition before it can succeed. This ideal was, however, maintained and hoped for by Mackintosh, Campbell, Shelley, Byron, and others, and is still sustained in our own day with just discrimination. After noticing the good and wholesome work of Maria Edgeworth, who, like Jane Austen, accurately depicted the life of her day in her excellent tales, and greatly promoted the reaction against false sentiment, the Professor described the advance of our monthly periodical literature, beginning with *Blackwood's Magazine*, which attained immediate success through the vigorous writing of John Wilson (Christopher North), Lockhart, and others, who combined much audacious impertinence and humour with genuine good-will. The good work was also carried on by Lamb, De Quincey, Hood, and others in the *London Magazine* and *Fraser's Magazine*. But these publications were not for the people, who greatly needed education to fit them for the exercise of the powers given by the Reform Bill. Fortunately, however, the need met with a timely supply. Chambers's "Edinburgh Journal," price 1½d., appeared first on Feb. 4, 1832, followed by Charles Knight's "Penny Magazine," six weeks later, and, with other wholesome literature, speedily superseded much pernicious cheap trash; but it was not till 1855 that the stamp duty on newspapers was wholly abolished. The penny newspaper press then sprang into vigorous life, doing most excellent service by giving utterance to every variety and shade of thought, showing us as we really are; telling us where our duty lies, and how we ought to do it. In perfect accordance with Carlyle, who says, "The situation that has not its duty, its ideal, was never yet occupied by man . . . Not what I have, but what I do, is my kingdom." Selecting "In Memoriam" from the works of our Poet Laureate, Professor Morley then showed how Tennyson, in his abiding monument for his dear friend Arthur Hallam, deals with the problem of social life in the same spirit as Wordsworth. Beginning with overwhelming grief, he gradually rises up to the consummation of hope in the bridal, typifying immortality; and thus expresses his desire for the like elevation of his fellow-men:—

I would the great world grew like thee,
Who grew not alone in power
And knowledge, but from hour to hour
In reverence and charity.

A similar earnest desire for the elevation of the race permeates the works of Robert Browning, who specially declares the need of the union of the worker and thinker, particularly in his "Paracelsus." In his "Sordello" he says,

God has conceded two rights to a man—
One, of men's whole work, time's completed plan;
The other, of the minute's work, man's first step
To the plan's completeness.

After mention of Thackeray and other writers, the course was concluded with reference to the works of George Eliot, more especially "Adam Bede," "Romola," and "Middlemarch," in which is set forth the noblest ideal with fine examples of the best work.

No lectures will be delivered in Easter week.

The following arrangements have been made for after Easter:—Professor J. H. Gladstone, five lectures on the Chemistry of the Heavenly Bodies, beginning on April 10; Professor Tyndall, eight lectures on Heat, beginning on April 12; Mr. Edward Dannreuther, two lectures, with musical illustrations—on Chopin, on April 14; on Liszt, on June 7; the Rev. A. H. Sayce, three lectures on Babylonian Literature, beginning on April 21; Mr. Walter H. Pollock, three lectures on Modern French Poetry, beginning on May 12; Mr. Charles T. Newton, two lectures on the Recent Discoveries at Mycenæ, on June 2 and 9.

The Friday evening meetings will be resumed on April 13, when Mr. Spottiswoode, the secretary, will give a discourse on Experiments with a Great Induction Coil. The succeeding discourses will probably be given by Mr. Frederick Pollock, Lieutenant-General R. Strachey, the Rev. W. H. Dallinger, Messrs. D. Mackenzie, Wallace, G. J. Romanes, and Oscar Browning, and Professor Tyndall.

Captain Sir George Nares read at a meeting of the Royal Geographical Society, on Monday, a paper on the Navigation of Smith's Sound as a Route towards the Pole. Referring to the recent Arctic expedition, he expressed the opinion that unless the boundaries of Greenland tended more to the northward than was generally supposed, no travellers would get nearer to the Pole than the point which had hitherto been reached. Some discussion followed.

Professor Corfield gave a lecture at the Society of Arts, last Saturday evening, to the members of the Trade Guilds of Learning, on the Choice of a Place to Live in. The lecturer began by explaining the effects of moisture. The effects of a warm, moist atmosphere were enervating to the physical and nervous systems, and a general want of tone was the result. After describing the principal diseases which were most prevalent under certain climatic conditions, Dr. Corfield went on to say that persons who desired the lungs to be freely exercised should go to a mountainous country, because there inhalation would be quickened. Those who require the contrary effects to be produced might go to the seaside. He then explained the relative advantages of dwelling in houses erected on pervious and impervious soils, giving in a general way preference to the latter. In conclusion, he detailed the disad-

NEW MUSIC.

ASHDOWN and PARRY'S CATALOGUES of MUSIC.

PART 1. PIANO, ORGAN, HARMONIUM.
PART 2. VOCAL.
PART 3. HARP, GUITAR, CONCERTINA.
PART 4. VIOLIN, VIOLONCELLO, ORCHESTRA, &c.
PART 5. FLUTE, CORNET, CLARINET, &c.
Sent post-free to any part of the world.
ASHDOWN and PARRY, Hanover-square, London.

THE GALOP OF THE SEASON.

GO-BANG. New Galop. By CHARLES COOTE, Jun. Equal in every way to the well-known "Roulette," "Archery," and "Croquet" Galops by the same popular Composer. Price 3s.
London: ASHDOWN and PARRY.

NEW WALTZ. By CHARLES COOTE, Jun. EARLY SPRING. One of the most successful Waltzes by this accomplished composer. Price 3s.
London: ASHDOWN and PARRY.

POPULAR WALTZES. By CHARLES COOTE, Jun.

SYDNEY SMITH'S FLYING DUTCHMAN. A most successful and effective piece on the melodies in Wagner's grand opera. Price 3s.
London: ASHDOWN and PARRY.

STEPHEN HELLER'S COMPOSITIONS FOR THE PIANO.

Of the numerous popular and beautiful works by this eminent Composer the following are choice specimens:—
Allegretto con Grazia, in D flat ("Wanderstuden.") No. 3) .. 3 0
Andante con Moto in E ("Dances Boles") No. 8) .. 3 0
Andante in B flat ("Promenades d'un Solitaire") No. 4) .. 1 0
Allegretto con Grazia in E ("Restless Nights") No. 9) .. 1 0
Tarentelle in A flat .. 2 0
Transcription of Mendelssohn's "Parting Song" .. 3 0
Improvisation on Mendelssohn's melody, "Auf Flügeln des Gesanges" .. 4 0
Caprice on Schubert's Song, "La Truite" .. 4 0
Three original Melodies ("The Marmalade," "The Wind," and "The Water") .. 3 0
Chant du Berger (from the Preludes) .. 3 0
Berceuse (from the Preludes) .. 3 0
Albade (from the Preludes) .. 3 0
Album dédié à la jeunesse, Short Pieces. Four Books, each 3 0
ASHDOWN and PARRY, Hanover-square.

POPULAR CLASSICS.—A series of sterling compositions for the Pianoforte Solo. Selected, Edited, and Fingered by WALTER H. HARRIS. Post-free to any part of the world. ASHDOWN and PARRY, Hanover-square.

GAVOTTE, in E Minor. By SILAS. Played by Madame Esdaill at her Concerts in England and America with immense success. A new edition of this celebrated Gavotte is now ready. Price 3s.
ASHDOWN and PARRY, Hanover-square.

ARTHUR SULLIVAN'S Celebrated Song, THE SAILOR'S GRAVE. Editions of this beautiful song are now published for Soprano or Tenor (in F), and Mezzo-Soprano or Baritone (in E flat). Price 4s.
ASHDOWN and PARRY, Hanover-square.

SONG SHOULD BREATHE OF SCENTS AND FLOWERS. By J. L. HATTON. Ashdown and PARRY have just published new Editions of this beautiful Song. Soprano in G, Mezzo-soprano in F, Contralto in E. Price 3s.
London: ASHDOWN and PARRY, Hanover-square.

ROCKSTRO'S (W. S.) NEW MUSIC for the PIANOFORTE.
Breves from the Moon, in 3 Shillings on the Burn. Introducing "Thou art gone" and "The Ode of the North."
Lays of Prince Charlie.
Voices from the Barnside.
Price 4s. each.
London: ROBERT COCKS and Co.

ODOARDO BARRI'S NEW SONGS.
The Flower-Child. 3s. Gold and Grey. 3s.
Fly away, white dove. 3s. Then comes rest. 4s.
If I were you. 3s. 'Midst the lilacs. 3s.
All post-free at half price in stamps.
London: ROBERT COCKS and Co.

J. S. MOLLOY'S NEW SONGS.
The Ride. No. 1, in E flat; The Brook and the Wave. 4s.
No. 2, in F; No. 3, in G. Sweet Molly Moreland. 3s.
4s. each.
All post-free at half price.
London: ROBERT COCKS and Co.

H. F. LIMPUS'S LAST SONGS.—The Skylark. 3s.; Evermore. 3s.; Slumber Song. 3s. All original, and free from plagiarisms. Post-free at half price.
London: ROBERT COCKS and Co., New Burlington-street.

ALFRED SCOTT GATTY'S NEW SONGS AND BALLADS.
When I remember. 3s. Love never dies. 4s.
Do not smile. 3s. Only a passing thought. 3s.
Never again. 3s. Oh, let the solid ground. 3s.
All post-free at half price in stamps.
London: ROBERT COCKS and Co.

THE SICK STAG. Fable Songs from Esop. Words by Ros; Music by GEORGE FOX. Finely Illustrated. 4s. post-free.
London: ROBERT COCKS and Co.

THE FIGHTING-CKOCKS AND THE EAGLE. Fable Songs from Esop. Written by Ros; Music by GEORGE FOX. Finely Illustrated. 4s.; post-free, 2s. stamps.
London: ROBERT COCKS and Co., New Burlington-street.

GELIBET UND VERLOREN (Loved and Lost) WALTZES. By MULLER. These celebrated Waltzes, the most charming and fascinating that have been published for many years, may be had of all Music-sellers. Solo or Duet, 2s. net.—DUFF and STEWART, 147, Oxford-street.

NEW EDITION IN F FOR BASS.

THE KING AND THE BEGGAR MAID. By W. O. LEVEY. This popular Song may be had in A for Baritone and in F for Bass. Sent for 2s.
DUFF and STEWART, 147, Oxford-street.

THE KNIGHT'S RETURN. Trio, for Soprano, Contralto, and Bass. Composed by G. A. MACFARREN. May be had of all Music-sellers, post-free, price 1s. 6d. net.—DUFF and STEWART, 147, Oxford-street.

BLOSSOMS. New Song. By J. L. HATTON. "As fresh as it is beautiful. A true musical poem, in fact, fraught with delicate imagery, and conspicuous for its finished workmanship."—Queen. Sent for 2s.
DUFF and STEWART, 147, Oxford-street.

PIANOS, £16; Pianos, £18; Pianos, £20; GREAT SALE of PIANOFORTES returned from Hire. Full compass, equal to new, at reduced prices. Packed free and forwarded to any part. Descriptive Lists post-free on application.—THOMAS OETZMANN and CO., 77, Baker-street.

TWENTY-POUND SCHOOL-ROOM PIANO (Co-operative price for cash). Seven octaves strong, sound, and substantial. Adapted for hard practice. Packed free. Illustrated book of design gratis and post-free.
THOMAS OETZMANN and CO., 77, Baker-street, W.

EBONY and GOLD PIANOS, 25 guineas.—These charming and elegant pianos, with ornate embellishments, repetition action, and every recent improvement, may be obtained at the above low prices for cash, or on the Three-Years System, at 1 guinea per month. The new Illustrated Catalogue gratis and post-free.
THOMAS OETZMANN and CO., 77, Baker-street, W.

PIANOS, £35 (Civil Service cash price).—Richmond, Drawing-room Model, repetition action, grand, rich, full tone, in very handsome Italian walnut-wood case, with elaborately carved and fretwork front, and cabriole trestle legs. The usual price charged for this instrument is 50 guineas. Drawings of this beautiful piano sent free on application.
THOMAS OETZMANN and CO., 77, Baker-street, London, W.

CLERICAL, MEDICAL, AND GENERAL

LIFE ASSURANCE SOCIETY.

15, St. James's-square, London, S.W.

CITY BRANCH.
Mansion House buildings, E.C.
Chairman: Right Hon. JOHN BOSWELL MOWBRAY, M.P., D.O.L.
TENTH BONUS MEETING, 1877.

The Report presented at a meeting held on Jan. 4 last showed:—

1. AS TO THE PROGRESS OF THE SOCIETY.
That the growth and prosperity of the Society during the period, of which it gave numerous details, had been everywhere manifest.

2. AS TO THE FINANCIAL POSITION OF THE SOCIETY
That the Assurance Fund at the date of

Valuation was .. £3,118,407 10 3
and the calculated Liability at the same date .. 1,700,516 13 10

thus leaving a Surplus of .. £1,417,891 6 3
and that, after setting aside the Permanent Reserve Fund of £20,000, and the fractional amount of £790 15s. 4d., there remained for division the sum of £300,000, which was larger by £20,000 than on any previous occasion.

3. AS TO THE RESULTS OF THE DIVISION.
That the sum which fell to the Assured would produce revisionary additions to the Assurances, amounting in the aggregate to £287,014, varying in individual cases from 15 to 81 per cent, and averaging over 50 per cent on the Premiums received in the Quinquennium.

and that the Cash Bonus—which, being the present money value of the Revisionary Bonus, was the true measure of the amount—averaged 30 per cent on the life payments, as compared with 20 per cent in 1872, the highest previous percentage.

4. AS TO THE BASIS OF VALUATION.
That the Institute of Actuaries' new H.M. or Healthy Male Table, based on the experience of twenty of the largest English and Scotch offices, with net premiums and 5 per cent interest, had been used in the investigation;

and that the severity of the new test, as well as the strength and elasticity of the Society, were alike shown by the fact that the Reserve thus required was greater by £24,611 than that which would have been needed by the Carlisle table.

The NEXT DIVISION OF PROFITS will take place in January, 1887, and Persons who effect NEW POLICIES before the end of June next will be entitled at that Division to One Year's Additional Share of Profits over later Entrants.

The report above mentioned, a detailed account of the proceedings of the Bonus meeting, the returns made to the Board of Trade, and every information, can be obtained at either of the Society's Offices, or from any of its Agents.

GEORGE CURTIS, Actuary and Secretary.

BANK OF NEW ZEALAND

(Incorporated by Act of General Assembly, July 29, 1863).

Bankers to the New Zealand Government.
Paid-up Capital, £725,000. Reserve Fund, £200,000.

DIRECTORS.
J. LOGAN CAMPBELL, Esq., President.
George B. Owen, Esq., J. Prior, Esq.,
Alfred Cox, Esq., M.A., James Watt, Esq.,
Samuel Browning, Esq., Hon. Jas. Williamson, M.L.C.

LONDON BOARD.
The Right Hon. Sir James Ferguson, Bart., K.O.M.G.,
Archd. Hamilton, Esq.,
A. J. Mundella, Esq., M.P.

Head Office, Auckland.
BRANCHES AND AGENCIES.

In Australia:—Melbourne, Sydney, and Newcastle.
In Fiji:—Levuka.

In New Zealand:—Auckland, Christchurch, Dunedin, Wellington, Napier, Nelson, Invercargill, Picton, and at seventy-five other towns and places throughout the Colony.

The Bank grants Drafts on all their Branches and Agencies, and transacts every description of banking business connected with New Zealand, Australia, and Fiji on the most favourable terms.

The London Office RECEIVES DEPOSITS of £50 and upwards for fixed periods of two to five years, bearing interest at 5 per cent per annum. The rate for shorter periods can be ascertained on application at the Office.

E. LARKWORTHY, Managing Director.
No. 1, Queen Victoria-street, Mansion House, E.C.

RADLEY COLLEGE.—AN ELECTION

TO FOUR ENTRANCE SCHOLARSHIPS, two of the annual value of £50 each, one of £30, and one of £20, all tenable for four years, will be closed after the Easter Holidays.—Apply to the Bursar, Radley College, Abingdon.

NATIONAL PICTURE OF THE OXFORD

and CAMBRIDGE BOAT-RACE.

A BEAUTIFULLY EXECUTED PLATE OF THE

FIRST DEAD HEAT

KNOWN IN THE HISTORY OF THE

UNIVERSITY BOAT-RACE.

DRAWN BY AN EMINENT ARTIST PRESENT

ON THE PRESS BOAT,

AND CAREFULLY PRINTED ON PLATE PAPER.

Illustrating at once a popular pastime and the most interesting race on record, will be issued during the present week as a national memorial of this exciting event.

By the application of the Coupon System to the Pictorial Representation of a Contest of Nations, interest is so for the first time possible to present to each Coupon-holder, for the nominal price of ONE SHILLING, a picture of a Current Event worthy of a place in every home side by side with the finest steel-plate engraving.

Notwithstanding the unprecedented demand anticipated for this splendid work of art, the Publishers—having made special arrangements—are enabled to undertake that all orders shall be met in the course of a few days, priority being accorded to the earliest applications.

The National Picture of the Oxford and Cambridge Boat-Race will be supplied by any Bookseller or Newsagent in Great Britain or Ireland on receipt of ONE SHILLING and the appended Coupon:—

PROOF PLATE.
PREMIUM VOUCHER.

OXFORD AND CAMBRIDGE BOAT-RACE FOR 1877.

"A DEAD HEAT."

Issued by

THE NATIONAL EVENTS ART-ILLUSTRATION SOCIETY.

Office—10, Mill-lane, Strand, London.

THOMAS FOX, Publisher.

N.B.—Not available after April 6.

or the Plate will be sent, post-free, on receipt of the above Coupon and a Post-Office Order or Penny Postage Stamp for ONE SHILLING by Mr. THOMAS FOX, Publisher, National Events Art-Illustration Society, 10, Mill-lane, Strand, London.

NOTICE TO THE TRADE.

Newspapers and Book-sellers are informed that, on receipt of Coupons, Mr. THOMAS FOX, the Publisher, will forward a corresponding number of Plates on the usual terms, to Cash.

National Events Art-Illustration Society. Office, 10, Mill-lane, Strand, London.

PHOTOGRAPHY SIMPLIFIED.

Landscapes or Portraits taken with DUBRON'S PATENT CAMERA. Its working learnt in half an hour. Apparatus from £2. Instructions four stamps by post.—LECHMILLER, BARBE, and CO., Artists' Colourmen, 60, Regent-street, W.

WEDDING and BIRTHDAY PRESENTS

at HENRY RODRIGUES', 42, Piccadilly, London.

ST. JAMES'S HALL, PICCADILLY.

THE MOORE AND BURGESS MINSTRELS' EASTER HOLIDAY ENTERTAINMENT

AGAIN THE MOST SUCCESSFUL AMONGST THE ENTIRE ROUND OF LONDON AMUSEMENTS.

On Monday last the GREAT HALL WAS CROWDED to its utmost capacity BOTH DAY AND NIGHT, and many thousands turned away from both performances.

Video "Times," April 3.—

"ST. JAMES'S HALL.—Yesterday Messrs. Moore and Burgess gave their twelfth annual Easter Holiday series of performances in the Great Hall, which is capable of seating 500 persons, and the popularity of their entertainments may be gathered from the fact that the hall was crowded both in the morning and evening. Many novelties have been introduced into the programme, consisting of ballets, songs, & a burlesque sketch, entitled 'The Marvellous Gharads,' a new comic scene, called 'A Regular Hash,' and an entirely new burlesque sketch, entitled 'Sombria's Coat,' and the entertainment was unusually received. Messrs. Moore and Burgess, last, with some degree of just pride, that for twelve years, with the permission of a lawful night, they have attracted crowded and fashionable audiences."

THE MOORE AND BURGESS HOLIDAY ENTERTAINMENT.

WILL BE REPEATED NIGHTLY AT EIGHT, AND EVERY MONDAY, WEDNESDAY, AND SATURDAY, AT THREE AND EIGHT ALSO.

Video opinions of the whole of the principal London Papers, April 3.

Extract from the "Morning Post," April 3.—

"ST. JAMES'S HALL.—The twelfth annual Easter Holiday series of performances, whether in the afternoon or evening, could divert from their old allegiance the most faithful and devoted patrons of Messrs. Moore and Burgess's entertainment, who mustered in such force as to fill the great hall of St. James's in all parts. There were two performances yesterday, the first in the afternoon, the second in the evening, and on each occasion the vast audience received the various items in a new and interesting programme with the warmest demonstrations of approval."

THE MOORE AND BURGESS HOLIDAY ENTERTAINMENT.

THE GREAT SUCCESS OF THE SEASON—EVERY NIGHT AT EIGHT, MONDAY, WEDNESDAY, AND SATURDAY, AT THREE AND EIGHT.

Video opinions of the leading papers of London.

Extract from the "Standard," April 3.—

"THE MOORE AND BURGESS MINSTRELS.—Extensive as is the accommodation afforded by St. James's Great Hall, the ability, that accompanied them was yesterday afternoon and evening taxed to its utmost capacity by the crowds who assembled to enjoy the entertainment provided for them by the Moore and Burgess Minstrels. The efforts of this well-known company of vocalists, instrumentalists, dancers, and burlesque performers have always been deserving of wide and cordial approval, and that support has been cheerfully and readily accorded. They have never failed to present for the delectation of their patrons a programme alike interesting throughout in its character and varied in the items of which it consists; but, perhaps, the bill of fare which was offered yesterday, and which will continue to be presented during the holidays, was even more varied and attractive than its predecessors."

ST. JAMES'S HALL, PICCADILLY.

SIGNAL SUCCESS OF THE MOORE AND BURGESS

EVERY NIGHT AT EIGHT, MONDAY, WEDNESDAY, AND SATURDAY, AT THREE AND EIGHT ALSO.

Video extract from the "Morning Post," April 3.—

"In a burlesque performance entitled 'The Marvellous Gharads,' Messrs. T. Sally, James Moore, and Rene exhibited the recent gymnastics of the well-known 'Gharads,' who have been the subject of particular notice in the press, and as a novelty in the very same style and manner. A new 'Interlocutor' appeared for the first time in the person of a gentleman bearing the illustrious name of J. P. Kemble, who, being gifted with a fine voice and a keen sense of humour, is likely to prove an acquisition."

ST. JAMES'S HALL, PICCADILLY.

THE MOORE AND BURGESS MINSTRELS' NEW PROGRAMME,

EVERY NIGHT AT EIGHT, and on MONDAYS, WEDNESDAYS, and SATURDAYS AT THREE ALSO.

Video extract from the notice in the "Echo" of April 3.—

"MOORE AND BURGESS MINSTRELS.—Easter and Christmas command the removal of Messrs. Moore and Burgess's entertainments into the great hall of St. James's, for the simple but eminently satisfactory reason that it is impossible for the patrons of the entertainment to assemble in the smaller hall downstairs. Yesterday the great hall seemed to require the quality of elasticity, for it was so closely packed that the music could not be heard, having a smaller vacuum to fill. Of the entertainment it is not needful to say more, as it is so well known to the public, and its reputation of the troupe, and as it has long stood upon the pinnacle of an unassailable popularity, that it is not needful to say more. Mr. Moore was at his best; Mr. Walter Howard was in great force; Mr. H. De Breuille had a new song, in which of course, he brought down the house; and Mr. Fred. Chapman, ever ready in 'Sweet Anne Moore's' 'comic business' is irresistible, and in the days when the element is nearly dropped out of the pantomime at Christmas the young folks ought to be grateful."

ST. JAMES'S HALL, PICCADILLY.

NEW AND MOST SUCCESSFUL ENTERTAINMENT produced by the MOORE AND BURGESS MINSTRELS

on Easter Monday will be given EVERY EVENING AT EIGHT O'CLOCK, and on MONDAYS, WEDNESDAYS, and SATURDAYS AT THREE ALSO.

Video extract from the "Morning Advertiser" of April 3.—

"MOORE AND BURGESS MINSTRELS.—It was evident from the success with which the public crowded St. James's Hall that these well-known delineators of comic character had lost none of their popularity. Every succeeding holiday Messrs. Moore and Burgess endeavored, by varying their programme, to render their entertainment more attractive, and their efforts have been rewarded by the success which has attended with increasing success. Yesterday the great hall was twice filled to excess, and the management could have no cause to regret the efforts they had made, for they were rewarded by the entire approval of the audience. The unbroken success of these Minstrels is universally known, and it is very safe to predict a continuation of it so long, at least, as their entertainments are managed as the new bill has been. The Easter holidays have given Messrs. Moore and Burgess another opportunity, by varying their programme, to render it more attractive to the public."

THE MOORE AND BURGESS MINSTRELS' EASTER PROGRAMME.

Video following extract from the "Daily News," April 3.—

"THE MOORE AND BURGESS MINSTRELS.—The programme at St. James's Hall was, as always, a long and pleasant one; pretty ballads, expressly sung, interspersed with those humorous songs for which the 'end men' have long been famous, filled a list as good as it was varied, the general excellence of which was attested by the frequent and prolonged applause, which would have constantly justified an encore but for the admirable rule, too often broken elsewhere, which absolutely forbids such expressions of approval."

There were so many items in the programme deserving mention, and everything, from beginning to end, was so good, that it is better, perhaps, to refrain from particular description, and to say that if all the audiences yesterday were as satisfied with their entertainment as those which twice filled St. James's Hall to suffocation, Londoners in search of amusement may congratulate themselves on the successful result of their various visits."

CRYSTAL PALACE PICTURE-GALLERY.—Open all the year round for the Reception and Sale of Pictures by the British and Foreign Schools. For particulars, apply to Mr. C. W. Wase, Crystal Palace.

SOCIETY OF LADY ARTISTS.—EXHIBITION OF PICTURES, NOW OPEN.—Gallery, 48, Great Marlborough-street, Regent-street.—Admission, 1s. Catalogue, 6d. WILL CLOSE THE END OF APRIL.

DORIS GREAT WORKS, "CHRIST LEAVING THE PRÆTORIUM," and "CHRIST ENTERING THE TEMPLE," (the latter just completed), each 33 by 22 ft.; with "Dream of Pilate's Wife," "Christian Martyrs," &c., at the DORE GALLERY, 35, New Bond-street. Daily, Ten to Six. 1s.

ELIJAH WALTON.—EXHIBITION OF WATER-COLOUR DRAWINGS.—EGYPT, NUBIA, and THE NILE; with a number of the ALPINE and other Works.—NOW OPEN, at HURLINGTON GALLERY, 91, Piccadilly. Ten to Six. Admission (including Catalogue), 1s.

THE BACH CHOIR.—TWO CONCERTS, at ST. JAMES'S HALL, on WEDNESDAY EVENING, APRIL 11, and WEDNESDAY EVENING, APRIL 12, at Eight o'clock. At the FIRST CONCERT John Sebastian Bach's Great MASS IN D MINOR will be performed for the third time in England. Artists: Madame Immens-Sherington, Madame Paley, Mr. W. H. Cummings, and Signor Fall, Principal Violin, Herr Strauss, Organist, Mr. Thomas Pettit, Conductor, Mr. Goldsmith, Bass and Front Row in Harmony, 10s. 6d.; Reserved, 7s. 6d.; General Seats, 6s.; Admission, 3s. Stanley Lucas, Weber, and Co., 94, New Bond-street; Mitchell's Royal Library, 35, Old Bond-street; Chappell and Co., 50, New Bond-street; and Austin's Ticket-Office, St. James's Hall.

WAGNER FESTIVAL.—ROYAL ALBERT HALL, MAY 7, 9, 12, 14, 15. Wagner, Conductor. Wilhelm, Leader of Orchestra, Dannreuther, Conductor of Rehearsals. The programmes will consist of selections from the following Operas:—Tannhäuser, "Lohengrin," "Der Fliegende Holländer," "Rienzi," "Die Meistersinger," "Tristan und Isolde," "Der Ring der Nibelungen." Orchestra of 200 Instrumentalists. Vocalists from the Bayreuth Festival.

Tickets of Admission to each Concert:—Private Boxes, from 5s.; Amphitheatre Stalls, 1 guinea; Arena Seats, 1s.; Gallery (first three rows), 1s.; other rows, 10s. 6d.; Orchestra, 5s.; Organ Gallery, 5s.; Gallery, 2s. 6d. Tickets may now be had at the Royal Albert Hall; of the usual Agents; and of HODGE and EX-EX, Directors. Chief Ticket Office, 6 and 7, Argyll-street, Regent-street, London, W.

MUSICAL UNION.—FIRST MATINEE, April 17.—Pajani, Hollander, Walsingham, and Laserra, with Bretnier (pupil of Rubinstein). Members' tickets and record have been posted. Any omnibus address to Director, Professor Ella, Victoria-square.

EGYPTIAN LARGE HALL (England's Home of Mystery). Piccadilly.—Messrs. MASKELYNE and COOKE'S Novel and Original Illusory ENTERTAINMENT DAILY, at THREE and EIGHT O'CLOCK. Added to the programme is the wonderful performance of Mr. Charles Wooding, a variety of Musical Instruments. Admission, 5s., 3s., 2s., 1s., and 6d. on all day, where seats can be booked free of charge. Carriages should be ordered for five and ten o'clock. W. MURDOCH, Manager.

MASKELYNE and COOKE.—NEW SEANCE, TO-DAY, at Three, and TO-NIGHT, at Eight. More Sensational than ever. The Spirits Superseded. Mr. Cooke floats in the Room, taking with him the Cabinet in which he is secured. No spirit Medium can submit to such severe tests as are now applied to Mr. Cooke, and produce any manifestations whatever.

LYCEUM THEATRE.—FIFTY-FOURTH NIGHT OF SHAKESPEARE'S KING RICHARD III.—EVERY EVENING till further notice. KING RICHARD III.—Richard, Duke of Gloucester, Mr. Henry Irving; Queen Margaret, Miss Bateman; Lady Anne, Miss Isabel Bateman; Scory in the grave, Mr. G. H. B. Prentiss; at 8 p.m., by THE LANCET TICKET: A Morning Performance will be given Every Saturday at 7 p.m. On Saturday Morning next, April 14, Miss Bateman as Julia, in "The Hunchback."

OLYMPIC.—THE SCUTTLER SHIP. By CHARLES READE. EVERY EVENING at 7.15. Powerful Company and Extra. Box-office hours Eleven to Five. No booking fee.

THE ILLUSTRATED LONDON NEWS.

LONDON: SATURDAY, APRIL 7, 1877.

A truce to politics this week! The signing of the Protocol and the reported retirement into private life of Prince Bismarck are attractive and suggestive topics enough in their way. The season, however, strongly invites to a range of thought nearer home. The Easter Holidays are over. It is not by any means a trivial question how they have been utilised, and in what way they have been spent, by what, for want of a preciser term, we shall designate "the people." A trustworthy answer to this question may be taken as a fair indication of their social and moral growth. The songs of a people are supposed to have greater influence over them than even the laws by which they are nominally governed; and their amusements, at set times such as Christmas and Easter, more particularly the latter, and the spirit in which they are conducted, are perhaps better evidence of the progress they are making towards a lower or a higher style of life than can be gathered from their serious employments. They are spontaneous, for one thing. They show the bias of the will. They open up wide and varied grounds for the sympathies and affections of large classes of the population. They help us to obtain, if not an accurate, at least an approximate, idea of the tendencies produced by what is described as the civilisation of the times. We propose to look at them for a moment, so far as they have been brought under our notice by the purveyors of the Press; and we think that we discern in them cheering signs of a rapid improvement and elevation of the popular taste.

It would be foolish and futile to set forth the subject *coulour de rose*. There are too abundant proofs of grossness and brutality amongst certain classes of the population not to cast over the picture that we have before us dark shades. Inebriety is still by far too common a feature of holiday seasons. But we think it is observable that a much higher class of recreation is rapidly making way among the working people. There is a far more common yearning for the beauties of Nature than was not very long since the case amongst them. How many myriads there were who, whether from the metropolis or from the great provincial and manufacturing centres, went forth from their homes during the Easter Holidays simply to enjoy the benefit of country air, country sights, and country exercise, there are no definite means of computing. The railways might furnish some data for arriving at a conclusion. But the narrowest range of observation would suffice to convince us that this mode of spending a holiday is growing more and more into vogue with our working people, especially with those whose everyday life and employments confine them almost exclusively to great cities. Usually speaking, moreover, the excursionists on these occasions group themselves into family parties, and thereby strengthen and exhilarate the ties of domestic life.

But take the list of Easter amusements as furnished to us by the daily press. For convenience sake, we confine ourselves, for the present, to the Metropolis. The

entertainments which appear to have excited most interest and to have drawn together the largest crowds of people were precisely those which were more than others intellectual in their character. The British Museum, the National Gallery, the South Kensington Museum and the Royal Polytechnic, attracted a considerably-increased number of visitors this year. Windsor Castle, the Tower of London, and Westminster Abbey gratified many whose tastes were of the architectural and historical order. Of course the Zoological Society's Gardens and the Brighton Aquarium were thronged with visitors; and the Crystal Palace, especially, drew together on Easter Monday an immense crowd of sightseers. Even Madame Tussaud's Exhibition proved itself able to hold its own against other holiday resorts; and the Epping Hunt, the Review of the Volunteers at Dunstable, the Surrey Gardens—whence there was a Balloon Ascent—and other public places of a similar open-air character more or less gratified those who were tempted to pay them a visit.

We augur well of most of the facts to which we have briefly alluded. They appear to us to indicate quite as rapid a growth as could have been expected from the means which the nation is, at no small expense, employing to educate the people and to infuse into the rising generation a higher mental tone. It may be calculated that every year draughts off from a lower to a higher social state an appreciable number of those who have received the advantages of our public elementary schools, and the various provisions which have been made in almost every populous place for the recreation of those who are daily immersed in the cares and toils of life have, doubtless, done their part towards raising the intellectual and social level of thousands who have had access to them. The work remaining to be done is, in all conscience, heavy enough, and will demand time for its success. But that which has already been done offers no little encouragement to prosecute the enterprise before them.

For, as we have already intimated, the customs and manners of the age, as indicated by the holiday amusements of the people, are for the most part of a much higher stamp than they were half a century ago, or than they are now in many Continental countries; and they present a far truer test of cultivation (partial though it be) than any bundle of statistics that may be gathered from Parliamentary Bluebooks. How do people spend their time when opportunity places within their reach a brief interval of leisure? What are regarded as their most coveted recreations? If manly exercises, the gratification of intellectual curiosity, the culture of natural tastes as innocent and pure as they are easily accessible, illustrate to any purpose the social condition of a people, then it may be thankfully acknowledged that, taken altogether, the Easter amusements which were most popular during the past week will compare most favourably with such as used to prevail before the public efforts were made for the advancement of Elementary Education. Our labour has not been altogether in vain. The effects of it should inspire gratitude and hope. We have only to persevere in order to reach the goal of our best and most patriotic aims.

THE COURT.

The Queen, Princess Beatrice, and Prince Leopold attended Divine service on Good Friday at Osborne House. The Rev. George Connor, Vicar of Newport, Isle of Wight, officiated. On Easter Day her Majesty and the Prince and Princess attended Divine service, performed at Osborne by the Rev. Dr. Farrar, Canon of Westminster. Dr. Farrar dined with the Queen. Her Majesty has taken daily walking and driving exercise. Princess Beatrice rides frequently, and Prince Leopold takes daily drives.

Rear-Admiral Sir Edmund Commerell, K.C.B., and Colonel the Hon. Henry Byng have arrived as Groom and Equerry in Waiting to the Queen. Viscount Bridport and Colonel M'Neill, C.B., V.C., have left Osborne.

The Queen has sent £50 to the Princess Mary Village Homes.

The Royal Maunday charities were distributed on Maunday Thursday in Whitehall chapel, with the usual formalities, to fifty-eight aged men and fifty-eight aged women, the number of each corresponding with the age of the Queen. The clergy of the Chapels Royal who assisted on this occasion were the Rev. J. V. Povah, the Rev. T. Helmore, the Rev. J. Antrobus, the Rev. A. H. Sitwell, the Rev. S. Flood Jones, the Rev. J. Troutbeck, and the Rev. W. Harrison.

The Minor Bounty, Discretionary Bounty, and the Royal Gate Alms were, in accordance with ancient usage, distributed at the Royal Almonry in Scotland-yard on Friday and Saturday, and on Monday and Tuesday in the previous two weeks to aged, disabled, and meritorious persons, to the number of 1300, who had been previously recommended by the clergy of the various parishes in and around London.

THE PRINCE AND PRINCESS OF WALES.

The Prince of Wales is happily making uninterrupted progress towards recovery. There have been no unfavourable symptoms, and Sir James Paget and Mr. Oscar Clayton, under whose joint care he is, hope that his Royal Highness will be well enough to set out for the Continent early next week. The Prince has been suffering from an abscess, attributed to the effects of an injury received while hunting. His Royal Highness is at Marlborough House.

The Princess of Wales and Princes Albert Victor and George of Wales attended Divine service on Good Friday at the Chapel Royal, St. James's. Princes Albert Victor and George left Marlborough House on Monday for Sandringham. The Princess, with her daughters, has visited the Duchess of Cambridge at St. James's Palace and the Duke of Cambridge at Gloucester House. Prince Christian, Princess Louise of Lorne, the Duke of Cambridge, and the Duke of Teck have visited the Prince and Princess at Marlborough House.

The Princess left town on Wednesday, en route for Athens, on a visit to her brother and sister-in-law, the King and Queen of the Hellenes. Her Royal Highness travelled from Charing-

cross station at 9.20 p.m., in a special train, which was under the charge of Mr. John Shaw, and arrived at Folkestone at 11.15 p.m., where she embarked on board the South Eastern Railway Company's steamer Victoria, Captain Dane, in which a special cabin had been erected upon deck for the use of the Princess. Her Royal Highness landed at Boulogne at 1.40 on Thursday morning, having during the passage experienced a strong wind and heavy sea. The Princess continued her journey to Paris; and, after passing a few hours at the Hôtel Bristol, left by the Mediterranean line, travelling via Mont Cenis, Turin, Bologna, and Ancona to the port of Brindisi, where the Royal yacht Osborne lay, and on board which her Royal Highness proceeded to Athens.

Prince Louise of Lorne and the Marquis of Lorne, who have been on a visit to the Hon. Mrs. Meynell Ingram at Hoar Cross, visited Lichfield Cathedral on Tuesday.

The Duke of Connaught left Dublin on Tuesday for Birr, and on Wednesday he presented new colours to the 53rd Regiment.

His Excellency the German Ambassador has left London for the Continent.

The Earl and Countess of Minto have arrived at Cannes.

The Countess of Bantry has arrived in town from Bantry House, Cork.

The Earl of Carnarvon has arrived in town from Highclere Castle.

The Earl of Aberdeen has left Grosvenor-square for Haddo House, Aberdeenshire.

Sir Arthur E. Guinness, M.P., and Lady Olivia Guinness have arrived on Carlton House-terrace from St. Anne's, Clontarf, in the county of Dublin.

The Right Hon. the Speaker and the Hon. Mrs. Brand have returned to the Speaker's House from Brighton.

The Right Hon. W. E. Forster, M.P., and Mrs. Forster have returned town from Bonchurch, Isle of Wight.

The marriage of the Hon. John William Plunkett, second son of Lord Dunsany, and Miss Ernie Burton, only child of the late Colonel Plunkett Burton, of the Coldstream Guards, was solemnised on Tuesday at St. George's Church, Hanover-square. The ceremony was performed by the Ven. Archdeacon Cust, assisted by the Rev. Oliver Brighton. The bride was given away by her godfather, the Earl of Darnley. Mr. Moreton Frewen was best man. The bride wore a dress of white satin duchesse, trimmed with volant of Brussels point lace and orange flowers, and wreath of the same and lace veil. The bridesmaids were the Ladies Edith and Kathleen Bligh, the Hon. Constance Plunkett, and Miss St. George, who wore princess dresses of ivory poul de soie and blue damasse silk, with Gainsborough hats of ivory felt, and pale blue ostrich feathers. The breakfast was given at the Buckingham Palace Hotel, to a party of fifty-six guests. The bride and bridegroom left for Folkestone en route for the Continent, where they pass the honeymoon. The bride's costume de voyage was of navy blue silk with trimmings of silver fox, and a hat of the same material. The presents of the bride were costly and numerous.

A marriage is arranged between Miss Margaret Stuart-Wortley, daughter of the Right Hon. James Archibald Stuart-Wortley, and the Hon. Reginald Arthur James Talbot, captain in the 1st Life Guards, and late M.P. for Stafford.

SILVER-MINING IN COLORADO.

The Territory of Colorado, which was admitted to the Federal Union of North America some fifteen years ago, is now to be recognised as a State. It has been formed out of parts of Kansas, Nebraska, and Utah, occupying a large area both east and west of the Rocky Mountains. Several of the loftiest peaks of that grand continental range arise in the centre of this extensive territory, one half of which is a fertile and well-watered plain, destitute of trees; while the western portion is a table-land, with much timber, and with a tolerably good soil. But the mineral riches of Colorado—its gold, silver, iron, and other metals—have engaged a great part of the immigrant population. It is true that wild speculations, and even fraudulent misrepresentations, have brought some discredit on mining ventures in this region; but many successful enterprises have been well substantiated. It is remarkable that Colorado, at the present time, contains probably a larger resident British population than any State in the Union. Apart from the traveller who is constantly met with—attracted by sport, scenery, or the magnificent climate—there are numbers of young Englishmen settled there, either engaged in stock-raising on the plains or mining in the mountains, and each class helps the other; the "mining camps" being, as a rule, excellent markets for farm produce of all kinds.

The sketches we have engraved illustrate a few scenes in two of the mining districts, Geneva and Hall Valley. The majority of the miners resident at these places are Cornish men and Nova Scotians, with a fair admixture of Germans and Swedes. Cornish men are unrivalled in "hard rock"; whilst experience gained in the Government works at Clausthal and Freiberg brings German operatives into great demand in the smelting-works. Hitherto the ore has been packed on mules and sent to market, either at Georgetown or to the neighbouring district of Hall Valley. But local works are now in process of construction. The development of Colorado has been only second in rapidity to that of California; and its people are sanguine that, owing to the permanent nature of their mines (true "fissure veins"), the future of the "Centennial State," as it is called since last year, will prove as bright as the most sanguine can desire.

The sketch which appears in the middle of our page of Engravings gives an idea of the heart of the Rocky Mountains, the ridge opposite, locally known as "Decatur Mountain," being, in fact, the water-shed between the Pacific and Atlantic slopes. It is some 12,500 ft. above sea-level, and about 1500 ft. above "timber-line." It is traversed from N.E. to S.W. by one of the great mineral belts of Colorado, and is perfectly "riddled" with veins (true fissures), containing galena (lead), grey copper, bismuth, and silver. The main or mother lode of the belt, named the Revenue, strangely enough, follows the very sky-line of the mountain. It has been worked for three years past with excellent results, and is now being opened, at a depth of 500 ft., by a tunnel driven in from the east face of the mountain, which at the same time cuts through a number of other mineral veins belonging to the same association, the Revenue Mineral Company.

Above this, on the right-hand side of the page, is a sketch representing Cornish miners at work driving the main tunnel of the Revenue Mine. The contractors generally work in eight-hour shifts, so that the work never ceases. Contract prices depend, of course, on the quality of the rock and working facilities. In "average ground," to run a tunnel 7½ ft. by 4½ ft. by 5 ft. at floor the rate of 2 ft. to 2½ ft. in the twenty-four hours is fair work, from 10 dols. to 15 dols. per foot being paid. The contracts are generally let for one to two hundred feet.

This range of mountain is the very backbone of the Conti-

nent—the dividing ridge between the Atlantic and Pacific slopes. Singularly enough, the "mother vein" of the mountain, the celebrated "Revenue Mine," follows almost the outside "sky-line." Below it, in the mountain face, and parallel to it, are half a dozen other mineral veins, all belonging to the same owners, who are driving a tunnel, as above stated, to cut the same great vein which has been successfully worked for three years past at a depth of 500 ft.

The Hall Valley Furnaces are the subject of an illustration in the lower part of the page. The ore is delivered at the various reduction works in its raw state, having been first roughly separated by hand from the rock. It is crushed, sized, and further separated by machinery; then "roasted," to drive off the sulphur; again crushed, and next delivered to the "chargers" on the "mining floor," immediately above the furnace-house. It is there carefully mixed with fuel (coke or charcoal) and with iron ore, limestone, or slag, and this mixture is fed into the furnace at the rate of fifteen to twenty tons per diem. About every two hours or so the furnace is "tapped" from below, and the molten metal (known as "base bullion") is drawn off, together with the "matte." The slag is then cleaned out of the crucible, the "breast" is bricked up again, the smelting goes on as before, till, after several weeks, the fire-brick requires to be renewed, when the furnace has to be "blown out." The base bullion consists chiefly of lead, containing some 300 oz. of silver to the ton. The copper is chiefly contained in the "copper matte," and is re-smelted by itself. The ores from the Revenue and other "Geneva" district mines have been, till lately, packed on mules and sent across the range to these works, to save the heavy freight. But local smelting works are in contemplation, and have, in fact, been commenced.

THE MIKADO'S COURTIER.

On many former occasions the readers of this Journal have been entertained with the clever sketches of Mr. Charles Wirgman, a skilful artist and genial humourist long resident at Yokohama, who delights especially to portray the whimsical effects of the late sudden revolution in Japanese manners and costumes. The adoption of European hats, coats, and boots, within the last five years, by nearly all the fashionable people in native society, has been remarked with amusement by every traveller visiting the chief towns of that remote East Asiatic insular kingdom. Mr. Simpson, when he sojourned there a week or two, on his way home from Peking by the route of San Francisco, likewise furnished us with a few laughable illustrations of the difficulty experienced by Japanese gentlemen in putting on their stiff and tight leathern foot-gear on their poor unaccustomed feet, and other curious instances of the same kind. A third artistic contributor, M. Régamey, who was in Japan last November, after spending three or four years in America, has supplied, with other sketches, the one reproduced in our Engraving published this week. Its style and character will probably remind our old subscribers of Mr. Wirgman's treatment of similar subjects. The scene here represented took place on the birthday of his Imperial Majesty the Sovereign Mikado of Japan, at the palace of the Governor of Kiyoto, now ranked the first of the Imperial cities. All the Government officials of that city and province had come up to the palace, as in duty bound, to pay their respects to his Majesty, whose illustrious person was not visible, by doing homage to his photographed portrait exhibited in the grand reception hall. These native gentlemen were compelled, by express order, to appear in what is supposed to be the proper dress for ceremonious visits of French or English gentlemen; and it is well known that on the continent of Europe, wherever people have to wait upon a high public functionary, at any hour of the morning, custom requires them to wear the swallow-tail black coat, open shirt-front, and white linen necktie, which in England are usually reserved for a dinner party or evening attire. In the pattern of boots, and the trick of tucking up their trousers, it is to be feared that the Japanese *hommes comme il faut* have not yet attained that degree of masculine elegance which would pass criticism in the polite society of Western nations. There is also, as we see in M. Régamey's sketch, at least one of these gentlemen, who may be a very good rider when mounted in his own fashion, but who does not know on which side an equestrian à l'Anglaise would get upon his horse. In this preliminary act, as well as in "the rule of the road" for meeting another rider or vehicle from the opposite direction, we are guided by the verified proverb, which bears no translation into a foreign language:—

If you go to the left, you are sure to go right;
If you go to the right, you go wrong.

Mr. John Bawtree, of Colchester, has bought the theatre in that town in order to convert it into a soldiers' institute.

At a special meeting of the Oxford Town Council on Wednesday morning Mr. E. L. Hussey, surgeon, of that city, was unanimously elected Coroner, in the place of Mr. W. Brunner, deceased. Mr. Hussey, before his election, retired from the Town Council, and paid the usual fine of £20.

The Queen has approved the following alterations being made in the style and title of the 2nd (Royal North British) Dragoon (Scots Greys), the Scots Fusilier Guards, and the 21st (Royal North British Fusiliers), and of those corps being in future styled respectively the 2nd Dragoons (Royal Scots Greys), the Scots Guards, and the 21st (Royal Scots Fusiliers).

Lord Blantyre writes to point out that the Americans for a long time spent about £30,000 a year on missionary objects in Turkey in Asia, and have made marked and valuable progress in disseminating the purer faith of Protestants. The Turkish Missions Aid Society, of 8, Adam-street, Strand, collect about £3000 a year, and assist the American and numerous benevolent institutions in the East.

The Royal Dublin Society's Spring Show opened on Wednesday and continued until Friday. The entries of fat stock were fewer than those of last year. There were 266 entries, as compared with 380 last year, while of yearling bulls there were 129, as compared with 132, this year's entries being far superior in point of quality. The appearance of the animals in every section was highly creditable, showing that if the herds in the country are diminishing the quality is being maintained at a high standard. Mr. J. P. Tynte, of Tynte Park, Dunlavin, for his shorthorn bull Red Cross, was awarded the blue ribbon of the show; while Mr. Francis W. Low, of Kilsbane, Tipperary, won the second prize. The Chaloner Plate, value £155, was won by Mr. Chaloner himself with his shorthorn roan bull Royal Arthur. Last year also Mr. Chaloner was awarded the cup for his bull Royal Arthur. In the two preceding years it was carried off by Major O'Reilly, M.P. This year in the same class Mr. Arthur J. Campbell, of Fermoy, obtained second prize for his roan bull Earl of Derby. In the yearling heifers class Mr. Gambleton, of Tallow, in the county of Cork, was successful, his red-and-white heifer, Princess Thyra, gaining the first prize. The Duke of Connaught visited the show during the afternoon and spent considerable time in inspecting the animals.

SILVER MINING IN COLORADO.

JAPANESE GOVERNMENT OFFICIALS RETURNING FROM PAYING THEIR RESPECTS TO THE MIKADO.

FOREIGN AND COLONIAL NEWS.

FRANCE.

The report upon the Public Worship Estimates was read yesterday week before the Finance Committee. The report sets forth at some length the necessity of enforcing the obedience of the clergy to the civil law, and declares that it is time to bring them back to a vigorous application of the Concordat. The Government have taken a remarkable step affecting the Roman Catholics in France. It is announced that they have resolved to treat both clerical and secular meetings on a footing of absolute equality and to forbid every Catholic association. Acting in this spirit they have dissolved the Paris Catholic Committee and prevented the general meetings which were to have been held this week in Paris. A private meeting of the members of the committee, in lieu of the general meeting prohibited by the authorities as contrary to law, was held on Tuesday evening—Cardinal Guibert, Archbishop of Paris, presiding. Senator Chesnelong delivered a speech, in which several allusions were made to "the threatened existence" of the Paris Catholic Committee, but which, the speaker affirmed, would, nevertheless, continue to live. Cardinal Guibert, at the close of the meeting recommended the Catholic committees not to deal with purely political questions.

Parisians were favoured with delightful weather for Easter Sunday this year. The day began with the religious services—high mass and general communion in all the sacred edifices. At Notre Dame alone, which is the parish church for the city of Paris, it is calculated that 7000 persons partook of communion. Low mass was said there at half-past seven o'clock in the morning, and afterwards M. Monsabre preached. In the other places of worship the attendance was unusually large, and the number of the Easter communicants exceeded those of many years past.

The *Daily News*' correspondent at Paris states that the rumour of a reconciliation between Prince Napoleon and the Empress Eugénie and her son having been repeated by the *Union*, M. Paul de Cassagnac, the accredited representative of "Napoleon IV.," has contradicted the rumour and attacked the Prince in very violent terms.

Mr. Layard arrived in Paris on Wednesday morning, on his way from Madrid to London, and he was entertained at dinner by Lord Lyons on the following day.

According to some of the French papers, the King of Holland will send 40,000 tulips to the Exhibition of 1878.

A general ball was given on Wednesday, in the saloon of the Grand Hotel, under the patronage of Lord Lyons, for the benefit of the English charities in Paris.

At a meeting of the French Geographical Society, on Wednesday evening, the President announced that the great gold medal of the society had been awarded to Lieutenant Cameron, in recognition of his services in the cause of geographical science.

The long-talked-of drama, "Les Exilés," was brought out on Sunday night at the Porte St. Martin.

M. Edmond Lockroy, the brilliant journalist and deputy for Paris, was on Tuesday married to Madame Charles Hugo, widow of the great poet's son. The ceremony was of a purely civil character, and was attended by many prominent Republicans, including Victor Hugo, Louis Blanc, and Gambetta.

But other than rose-coloured events have to be chronicled. The Paris correspondent of the *Daily Telegraph* reports that two bodies, tightly fastened together by means of a strong cord, were on Tuesday taken from the river Seine at Rouen. They were those of Henri Dominois, a young man of twenty, and Eliza Dupré, his sweetheart, a maiden of eighteen. Henri was the son of M. Dominois, who occupies a good position in life; and Eliza was a simple work-girl, pretty and honest, with whom he fell desperately in love. A letter found in the pocket of the young man told, in a few plain words, their short but tragic story. "Our parents," said this little manuscript, "would not allow us to marry, and we resolved to perish together, in order that we might not be separated in Paradise." The bodies had remained in the river from March 6, when the two young people disappeared from their respective homes.

The death at Blois (Loir-et-Cher) of Mgr. Pallu du Parc, Bishop of that diocese, at the age of seventy-two, from an attack of apoplexy, is announced; and of M. Victor Sixte, of Lyons, at the age of one hundred years.

M. Charles Marchal, painter, on Saturday last, shot himself dead in his studio, Place Pigalle, Paris. Everything in the studio was methodically arranged; the pictures were on the easels as if visitors were expected, and on the mantelpiece were letters containing words of adieu from the unfortunate artist. He had lately been despondent about his eyesight and his professional success.

ITALY.

The Pope rose yesterday week at six o'clock, and, after fulfilling all the usual devotions of Good Friday, received a number of the Cardinals. His Holiness went to St. Peter's to attend Divine service, but had to be carried there. On Saturday he gave audience to more than 1000 strangers of all nations, chiefly French and Spanish, with a few English. He also gave an audience to a number of persons on Sunday. His Holiness continues better. He gave an audience on Wednesday morning in the Raphael Gallery of the Vatican.

Signor Girone, minister of the Italian Methodist Church, has been created Knight of the Order of the Crown of Italy for his services in the education of the young.

Two notorious brigands, brothers, named Alfano, were arrested at Palermo yesterday week. They were escorted to prison by a crowd, which is said to have displayed great joy.

SPAIN.

The King left Seville last Saturday, with the Princess of the Asturias. The festivities of Holy Week attracted 40,000 visitors to Seville. The King and the Royal family, with the Court, the Ministers, and the German Ambassador, took part in every ceremony, as well as in the procession on Good Friday. On his arrival at Cordova King Alfonso was received with a great display of loyalty.

Mr. Layard, the British Minister in Spain, left Madrid on Tuesday, and Sir John Walsham has arrived there to take charge of the Legation. Our Government has determined to send Mr. Layard to Constantinople, to act as temporary Ambassador during the absence of Sir Henry Elliot. Mr. Layard was unpaid Attaché to the Embassy at Constantinople from Nov. 2, 1847, till March 20, 1849; and was appointed fifth paid Attaché at Constantinople April 5, 1849, in order to enable him to carry out his researches in the valley of the Tigris.

GERMANY.

The total number of congratulatory telegrams received at the palace on the German Emperor's birthday amounted to 1858, the letters of congratulation nearly reaching 3000.

The Crown Prince of Germany left Berlin on Wednesday evening for Hanover, to welcome the King of Sweden, who passes that city on his return home from Heidelberg, where the Queen some time since took up her residence on account of the delicate state of her health.

Prince Henry and Princess Charlotte, the children of the Crown Prince and Princess, and Princess Louise Margaret, the daughter of Prince Frederic Charles, were confirmed on

March 28 in the private chapel of the Royal castle. Dr. Koegel, Chaplain to the Emperor, officiated. The ceremony was attended by the Emperor and Empress, with all the members of the Royal family, the Grand Duke and Duchess of Baden, Duke Ernest of Coburg-Gotha, the whole Court, the English Ambassador, several Ministers of State, Field Marshals, and Generals, the President of the Supreme Ecclesiastical Council, the Court Chaplain, the clergy of the cathedral, and the chief burgomaster and municipal authorities of Berlin. The teachers and companions of the confirmees were also present at the service.

Princess Charlotte, the eldest daughter of the Crown Prince of Germany, was betrothed to the Hereditary Prince of Saxemeiningen on Sunday last, the ceremony being performed at the palace of his Imperial Highness. The Princess, who is the eldest granddaughter of Queen Victoria, was born July 24, 1860, and the Prince to whom she is betrothed on April 1, 1851. The *Morning Post* correspondent at Berlin says, "it will be a matter of satisfaction to the English people to know that this union will be one entirely of mutual inclination."

The Emperor and Empress of Brazil arrived at Berlin on Tuesday, and were received at the railway station by the Crown Prince and Princess. Having been visited by the Emperor and Empress of Germany, and having returned the visit, they dined with the Crown Prince.

Sunday being Prince Bismarck's birthday, numerous telegrams and addresses of congratulation reached the Imperial Chancellor from all parts of the Empire, as well as from abroad. The Emperor and Crown Prince visited the Chancellor in the morning, and congratulated him. A concert was given by the bands of the Alexander Regiment and the 2nd Regiment of the Guards. The Prince was born in 1814. It appears that Prince Bismarck is about to take his long-contemplated prolonged leave of absence, and there are rumours that he intends resigning the Chancellorship; but on this point there is much contrariety of opinion.

General Ignatieff reached Berlin on Wednesday week, and, an hour after his arrival, went to the Foreign Office, where he had an interview with Prince Bismarck.

The Emperor has appointed Professor Droysen, of Berlin, to be "Historiographer of Brandenburg History."

The German Empire has concluded commercial treaties with Peru, Nicaragua, and Guatemala.

Count Arnim has lost his sight through erysipelas, and is not likely, it is said, to long survive.

Professor Dr. Braun, director of the Botanical Garden at Berlin, died there on the 29th ult.

AUSTRO-HUNGARY.

The receipts derived from direct and indirect taxes in Austria for the year 1876 were 7,249,000 fl. in excess of the estimate. In the months of January and February of the present year the receipts from taxes amounted to 1,761,000 fl. more than during the same period of last year.

BOUMANIA.

The Chamber of Deputies has decided, by 49 votes to 17, to proceed with the impeachment of M. Bocersa. Five members of the committee who were appointed to inquire into the charges brought against the ex-Minister have tendered their resignations. The vacancies thus caused will be filled up, and the committee will then support the charges against the accused before the Court of Cassation.

In Wednesday's sittings of the Senate and the Chamber of Deputies a message of Prince Charles was read dissolving the Senate and closing the Session of the Chamber of Deputies.

GREECE.

The Session of the Chamber of Deputies was closed yesterday week by a Royal order. After a prolonged discussion the Chamber has unanimously adopted the Government bill creating a special military reserve. The vote is regarded as a mark of confidence in the present Ministry.

DENMARK.

The Session of the Rigsdag was closed last Wednesday by a Royal decree. The Budget has not been voted, as the Landsting and Folkething have adopted proposals directly opposed to each other, the former House by 51 to 13 votes, the latter by 72 to 24. A telegram says that the Folkething prevented all discussion, although the President of the Council signified his desire to address the House.

AMERICA.

General Wade Hampton, the Democratic Governor of South Carolina, had an interview with President Hayes last week, in which he represented that the interests of the State were suffering severely, that a speedy settlement was necessary, and that if the Federal troops were withdrawn the State House would not be seized by the mob, the Government would be established by purely legal means, and all classes of citizens would be protected. But Mr. Chamberlain, the Republican Governor, declares that the withdrawal of the troops will ruin the Republican party in South Carolina, which will then have no means of resisting the forces of General Wade Hampton. President Hayes's Cabinet has directed the Secretary of War to order the removal of the Federal troops from the State House at Columbia (capital of South Carolina) to their camp. President Hayes has formally instructed the Special Commission proceeding to Louisiana to endeavour to remove the obstacles to the establishment of one sole Government; but if they are insuperable, to arrange for the recognition of one of the Legislatures to settle the question. The Commission is also to ascertain the state of public feeling concerning the rights and privileges of all classes of citizens, which the President is determined to protect.

The Senate of the State of New York has rejected, by a vote of 13 to 9, Governor Robinson's nomination of General McClellan as Superintendent of Public Works in the State.

Fifteen ladies obtained the degree of doctor of medicine from the Women's Medical College, Philadelphia last month.

It is stated by the *Daily News*' New York correspondent, that, according to estimates which have been made, the unemployed in the United States number two million.

The New York Rifle Association is, says a Reuter's telegram, obliged to decline the return match in Ireland next June to which they had been invited.

The Republican candidates in Rhode Island have been returned for the post of Governor, and at all the other State offices. The Republicans also have a large majority in the State Legislature over the Democrats and Prohibitionists.

The Indian chief Spotted Tail, with 900 of his followers, is reported to have made peace with the Government. Sitting Bull, however, remains obstinate.

Particulars of the bursting of a reservoir at Staffordville, Connecticut, have been received. The reservoir was 600 acres in superficial extent, and on the breaking of the dam a torrent 30 ft. deep swept through the village of Stafford Springs, a distance of six miles, into the river Willimantic, destroying everything in its course, and doing damage to the estimated extent of 1,000,000 dol. The inhabitants having had timely warning, only two persons are reported to have been drowned.

CANADA.

Meetings of the Immigration and Colonisation Commission in the Canadian Parliament have shown the general opinion of the members to be that immigration should for the present be confined to agricultural labourers. Mr. Le Sage, Minister of Agriculture and Public Works for the Province of Quebec, gave some interesting testimony as to that point. The Roman Catholic Archbishop of Quebec has published a pastoral in which he deprecates the judgment of the Supreme Court in the Charlevoix election in unseating Mr. Lange the ground of priestly interference and bribery. The bishop declares that the electoral law invades the rights of the Catholic Church.

THE CAPE COLONIES.

The programme of the opening ceremonial of the African Exhibition has been published. Sir Henry Barkly will be received at the exhibition building by the Colonial Committee, and an address will be presented to his Excellency. There will be a magnificent show of agricultural machinery and the Exhibition is expected to prove a great success.

By this time, probably, Sir Henry Barkly has handed the Governorship of the Cape Colony to Sir Bartle Leake and the new ruler of our South African Settlements is in face with one of the most perplexing and arduous problems of Colonial politics.

According to the latest intelligence received from the Cape (to March 3), the opinion was gaining ground that the annexation of the Transvaal Republic is inevitable. In his interview with the members of the Transvaal Government, Theophilus Shepstone pointed out that the only means of venting a Kaffir war was union under one powerful hand that it was useless to speak of reforms for maintaining country's independence. Five companies of the 13th Regiment have been ordered to Newcastle, Natal—the best for massing troops should they be required to move into Transvaal or Zululand.

INDIA.

In the Legislative Council on March 28 Lord Lytton delivered a speech upon the Indian Budget. His Excellency reviewing the financial measures proposed, said it had been determined for the future to exclude the expenditure on extraordinary public works from the ordinary account. Regarding the cotton duties, he strongly upheld Salisbury's views, believing that these duties were in principle and contrary to Indian interests; their abolition had therefore been decided upon. With reference to present famine, his Excellency contrasted the estimated expense of £5,250,000 for a larger area of distress in the actual outlay of £6,750,000 entailed by the present famine in the smaller area of Bengal. Proceeding next to speak of the efficiency of the army, Lord Lytton repudiated any hostile intention on the part of the Government against neighbouring States and explained the pacific character of frontier policy. He announced the successful settlement effected with the Khan of Khelat, and stated that confidence had been completely restored by British influence. He believed that the security of the frontier was only attainable by the friendly presence and salutary influence of English gentlemen among the barbarous neighbours of the Empire, and not by military expeditions. His Excellency disapproved of spasmodic gifts of arms and money to civilised States or unreciprocated liability with them. Alluding to the relations with Cabul, Lord Lytton stated that a feeling had been manifested by the envoys sent by the Amir to the Peshawur Conference. The only security against misunderstanding and distrust was frank intercourse. Even Turkey and religious fanaticism were agitating Cabul and disturbed the mind of the Amir, but the Imperial Government had no reason to depart from its non-aggressive policy. His Excellency has left Calcutta for Lucknow, whence he will go to Nynee Tal.

AUSTRALIA.

Sir Arthur Kennedy, the new Governor of Queensland, arrived at Brisbane.

Mr. Samuel Deering, the Acting Agent-General for South Australia, has received the following telegram from the Government in Adelaide, South Australia, dated the 28th ult. "The drought has broken up in South Australia. Heavy rains have fallen over the whole of the pastoral and agricultural districts. Nine inches have fallen at the Great Bight, seven inches on Yorke's Peninsula; over four inches elsewhere extending into the interior and right across the Continent. The general system of telegraphic weather signals stretches over the greater part of Australia. The telegraph from Adelaide to South Australia, to Western Australia is nearly complete. His Excellency Sir W. Wellington Cairns (brother of the Right Hon. the Lord Chancellor) arrived in Adelaide, and on March 24 was sworn in as Governor of South Australia."

About £15,500 has been subscribed to the fund for establishing a bishopric at Rangoon when the last mail left.

Spring has set in at St. Petersburg. A change in weather occurred last Friday night, when a thaw began. It has been the longest winter known in Russia for years.

A new industry was started in Bombay a few days ago. Parsee, Mr. Pherozsha, who opened his pottery-works at Naigaum, a few miles from Bombay.

Mr. Francis Marett, one of the senior Judges of the Royal Court, has been appointed Lieutenant-Bailiff, in place of Lieutenant-Bailiff Lerrier, deceased.

The Sultan has conferred the third class order of Medjidie upon Mr. F. I. Scudamore, in recognition of valuable services in reorganising the postal and telegraphic system of Turkey.

The *Shen-Poo*, a Chinese newspaper, renders Queen Victoria's new title by Yiu-tu-H'wang-ti, and remarks that there are now two H'wangtis in Asia—the one in India, the other in China.

A competition has been opened at The Hague for a statue of Spinoza in bronze on a stone pedestal. Artists of all countries are invited to compete. Details will be given by secretary to the committee, H. J. Bets, The Hague.

The death of M. Jean Baptiste Madou, a well-known Belgian painter, is announced. He was born in 1796, and was a Knight of the Order of Leopold and of the French Legion of Honour, a member of the Royal Academy of Belgium, and an Associate of the Antwerp Academy.

The *National Zeitung* says that the painting of Van Ey recently stolen from the Berlin Museum, has been recovered. A few days ago a saddler took a picture to the secretary of the Museum and inquired if it was the missing work for which reward was offered. He stated that he had purchased it for a stranger for 17½ grochen, and was ignorant of its value and history until his attention was called to the story of the theft by acquaintances. The picture was the missing Van Ey (300 marks) until they have been enabled to test the truth of the finder's story.

The Extra Supplement.

OPENING OF THE TURKISH PARLIAMENT.

We have already given a sufficiently precise account of the opening of the first Parliament of the Turkish Empire, by his Majesty Sultan Abdul Hamid II., at the Imperial Palace of Dolma-baghtché, adjacent to Constantinople, on Monday, the 19th ult. The text of his Majesty's Speech from the Throne, as read in his presence by the First Secretary, Said Pasha, was published in full by means of a telegraphed report; and the letters of several newspaper correspondents have not added much of importance to the descriptions of the ceremony which were received here in the same week. Our illustrations have necessarily required more time for the transmission of the Artists' Sketches to London, and for the production of the Engravings; but the subject has rather gained than lost popular interest, from the anxious expectancy which awaits the deliberative and legislative proceedings of the new Turkish Parliament. The large Engraving presented this week as an Extra Supplement is a very effective representation of the scene in the magnificent "Throne Hall" of the Imperial Palace, at the moment of reading the Sultan's Speech. His Majesty stands in front of the throne. It is shaped rather like a sofa, and is constructed of the finest woods plated with thick gold, in which are set many glittering jewels; the seat has a cushion of black velvet, with rich arabesque embroidery. A small carpet of silk, fringed with gold, is spread in front of the throne. Abdul Hamid is simply attired in an ordinary Turkish overcoat, dark blue, with black trousers, military cap, and white kid gloves; but he wears the splendid badge of the Osmanieh, and his clasped hands rest upon the gorgeous jewelled hilt of a priceless sabre. His two brothers, Reschid Effendi the heir presumptive, and Kemaleddin Effendi, stand at the rearward corner of the throne, on the Sultan's left hand. A few steps in advance of the Sultan, at the right hand front corner of the square carpet, is the Secretary reading the speech, which was handed him by the Grand Vizier, who had received it from the Sultan's own hand. Kiamil Bey, Grand Master of the Ceremonies, or Lord High Chamberlain, stands immediately before the Sultan, with hands folded on his breast, as if waiting for orders. Along both sides of the hall are ranged, in due succession, the Ministers and Court officials, the Pashas, Muchirs, Ulemas, and other dignitaries of the State, and of the Moslem Church. The Senators and Deputies, about thirty of the former and ninety or a hundred of the latter, occupy the lower end of the Hall, to the left-hand side of our Engraving. The President of the Senate is Server Pasha; while Ahmed Vefik Effendi, a learned and enlightened man, with a character for honesty and liberality, is President of the Representative Chamber. We shall give an illustration of the Parliament House, and one of the sittings of this Parliament, in our next publication.

There is little or no positive news of fresh events in Turkey since our last; the negotiations for peace with the delegates of Montenegro, owing to their demand of the cession of Nick-sich, have remained unsuccessful; and the Turkish Government has seemed to be awaiting the result of General Ignatieff's negotiations with Lord Derby for the signature of a joint protocol, in which the European Powers should record their adherence to the resolutions of the late Conference at Constantinople. It is understood that, upon this consideration, whatever may be its practical effectiveness, the Russian Government will order the demobilisation of its army, which would allow the Turkish Government to do likewise. Mr. Layard, the newly-appointed British Ambassador, is expected to be at Constantinople about the end of next week.

METROPOLITAN NEWS.

Mr. Justice Hawkins has consented to preside at the forty-fifth anniversary festival of the United Law Clerks' Society, at the Freemasons' Tavern, on June 4.

Sir R. Colinson presided last week over the half-yearly meeting of the Army and Navy Co-operative Society, which was held at the Westminster Palace Hotel. General testimony was borne to the increased growth of the organisation.

Dr. H. W. Acland, Regius Professor of Medicine in the University of Oxford, has consented to preside at a meeting convened by the Charity Organisation Society, to be held at the Society of Arts, for the purpose of considering the subject of Metropolitan Medical Charity.

The movement for providing institutes for the recreation and instruction of working lads inaugurated at the Mansion House last autumn has been put to a practical test by the establishment of one institution at Mount-place, Whitechapel-road. Between 200 and 300 lads have joined the institute.

At the request of an influential deputation, headed by Lord Dunsany, Lord Montague, and Mr. Samuel Morley, M.P., the Lord Mayor has agreed to convene a public meeting in aid of the plan and operations of the Charity Organisation Society, to be held at the Mansion House on Friday, April 27.

On Wednesday evening the anniversary festival of the London General Porters' Benevolent Institution took place at the Albion, in Aldersgate-street—Mr. Alderman and Sheriff Hadley in the chair. Subscriptions to the amount of nearly £1400 were announced.

There were 24.8 hours of sunshine in London last week out of 88.4 hours during which the sun was above the horizon. The sun shone on every day of the week, but only for six minutes on Monday. On Sunday and Saturday there were on each day upwards of five hours of sunshine.

Mr. J. Hollingshead presided as treasurer at the annual meeting of the Royal Theatrical Fund on Wednesday, in the place of Mr. Buckstone, resigned. The society had paid nearly £2000 to annuitants during the past year and handed over a balance to the capital fund, which now exceeds £13,000.

There was a heavy storm of hail and rain, with lightning and thunder, in London on Wednesday afternoon, which lasted upwards of an hour. The storm was felt in many parts of the country, and telegraphic communication sustained some interruption. One house on East Cliff, Folkestone, was struck, the roof partially lifted off, and four rooms wrecked.

Mr. W. Spottiswoode will deliver a lecture next Friday, at the Royal Institution, on his Great Induction Coil, described in the *Philosophical Magazine* for January last and in the *Nineteenth Century* for March. The lecture will be illustrated with some new experiments on stratified discharges, which a coil of this enormous power has for the first time rendered practicable.

The last of the lectures in connection with the Scientific Loan Exhibition was delivered at South Kensington last Saturday evening by Mr. W. S. Mitchell—Major Festing occupying the chair. After the lecture, the following resolution was unanimously carried by a crowded assemblage:—"We who form the audience at this, the last of the present series of lectures in

connection with the loan collection of scientific apparatus, desire to thank the board of the Science and Art Department for having arranged this series of lectures. We would wish to take this opportunity to express the hope that the loan collection of scientific apparatus may lead to a permanent collection of a similar nature. We beg the chairman to convey this resolution to the head of the department."

The planting of trees in some of the principal thoroughfares has long been talked of, and the Marylebone vestry has decided on effecting this improvement in Hamilton and Upper Hamilton-terrace, St. John's-wood, thus converting the road into an avenue, at an estimated cost of £372, half of which amount will be subscribed by the inhabitants. It is to be hoped that this course will be adopted before long with regard to other streets which are wide enough for the purpose.

A few nights ago a jeweller in Upper-street, Islington, was placing in a box about fifty gold and silver watches, when a man rushed into the shop and ran away with the box and its contents. The jeweller pursued the thief, and was assisted in doing so by several of the passers by. In the course of the pursuit the thief threw away the box, which, with a portion of its contents, was ultimately recovered. The thief escaped, but a man who was found transferring some of the watches from the box to his pockets was taken into custody.

The fourth exhibition for the present season of choice flowers and fruits in connection with the meetings of the fruit and floral committees of the Royal Horticultural Society was held on Wednesday in the Conservatory at South Kensington. Notwithstanding the violent thunderstorm the attendance of ladies was unusually large. As at all similar exhibitions, the chief contributors were nurserymen in and around London; but there were also a goodly number of exhibits from the gardens of private ladies and gentlemen.

We have already stated that the City authorities contemplate the establishment of a National Industrial University of Scientific and Technical Education, under the auspices of the livery companies of the city of London. It is proposed first to erect a building as the central hall of the City Guilds Industrial University, on a plot of ground between the Temple and Blackfriars, on the Thames Embankment, consisting of a large amphitheatre or lecture-room, a council-room with library, a museum of trade examples, and a room for models.

The weekly return of metropolitan pauperism shows that the total number of paupers at the end of last week (the fourth week of March) was 85,732, of whom 38,901 were in work-houses and 46,831 received outdoor relief. Compared with the corresponding week in the years 1876, 1875, and 1874, these figures show a decrease of 237, 11,317, and 20,511 respectively. In the number of indoor paupers, however, there is an increase of 2311 as compared with last year, and of 2664 and 2367 as compared with 1875 and 1874. The number of vagrants relieved the last day of the week was 585, of whom 429 were men, 129 women, and 37 children under sixteen.

At a late hour on Monday night, when about 4000 persons were assembled in the grounds of the Welsh Harp, Hendon, a torpedo, which a man named Tatham, in the employ of the Trinity House, had taken down to that place, exploded. The shock of the explosion was so great that the whole of the windows at the Upper Welsh Harp were shattered, as were also those at the railway station. Every light in the gardens and house was extinguished, and the signal lights for some distance along the line were put out. The shock was also felt severely at the village of Hendon, where a number of windows were broken, and was felt as far off as Harrow, Hampstead, Mill-hill, and the northern parts of London.

The annual spring muster and march-out of the volunteer force of the city of London is fixed to be held on the 21st inst. The troops will, as usual, assemble at Finsbury-square and march to Hyde Park. A brigade field-day has been fixed to be held, under Colonel de Horsey, Grenadier Guards, on the 12th prox., in which the following troops will take part:—London Rifle Brigade, Civil Service, Custom-House Rifles, and Post-Office Rifles. On the same day the Grey Brigade, under Lord Abinger, will be brigaded in Hyde Park. The London Rifle Brigade will have a camp of instruction near London, from May 19 to May 28, inclusive; and camps of a similar character are to be formed at Wimbledon, Esher, Wandsworth, and other places.

The tired artists have laid by their brushes and dispatched their pictures to the fate that awaits them within the walls of the Royal Academy. Tuesday was the last day for sending in works to Burlington House, and to all outside the Sacred Grove the next three weeks will be a time of terrible suspense. The thought and labour of many months are hanging in the scales, and we truly hope that the difficult labours of the Council of the Royal Academy will result in giving average satisfaction to the great body of expectants.—There will soon be another palatial building for the use of artists. In less than a month's time, as we are led to expect, the Grosvenor Gallery, in New Bond-street, will be open. Here we are promised ample space, so that frames may not elbow each other, nor colour awkwardly conflict with colour.

The general annual meeting of the subscribers to the Royal Albert Orphan Asylum was held last week, at the offices, 18, Newgate-street, under the presidency of Mr. William Morley. The report of the governors showed that the subscriptions for the past year had amounted to £1734, and the donations to £796; making, with money received from other sources, a gross income of £5489, showing an increase of £854 over the receipts of the previous year. The industrial department still continued in full working order, all clothing worn by the children being made at the asylum. Forty-five children were received into the institution during the past year, and twenty-five boys and eighteen girls left at the expiration of their time, and all were reported as doing well in situations. The general health of the asylum had been extremely satisfactory. The report closed with an appeal for funds.

The National Union of Elementary Teachers opened their eighth annual conference, on Monday, in the School Hall, Skinner-street, Bishopsgate-street—Mr. W. Gardner, of Liverpool, in the chair. One of the subjects which occupied the attention of the gathering was school discipline. On Tuesday the Conference was resumed at the London Institution, Finsbury-circus—Mr. W. Gardner in the chair. A discussion upon the pupil-teacher system was followed by one upon the annual endorsement of certificates, which was unanimously voted to be unnecessary, unjust, and productive of much dissatisfaction amongst teachers. It was resolved that the executive be instructed to take immediate steps to bring the resolution under the attention of the Education Department. At Wednesday's conference a resolution was agreed to declaring that the scheme for needlework, as given in the new code, is thoroughly impracticable, and will, if enforced, banish needlework as an extra subject for class teaching from elementary schools. In the evening Sir E. H. Currie presided at a public meeting in the Memorial Hall. Plymouth has been fixed upon as the place of next year's meeting.

The births registered last week were 2429, and the death 2052, the former having been 113 below and the latter 35 above the average numbers in the corresponding week of the last ten years. The deaths included 86 from smallpox, 53 from measles, 27 from scarlet fever, 8 from diphtheria, 48 from whooping-cough, 14 from different forms of fever, and 7 from diarrhoea; thus to the seven principal diseases of the zymotic class 243 deaths were referred, against 254 and 201 in the two preceding weeks. These deaths were 4 above the corrected average number from the same diseases in the corresponding week of the last ten years. The deaths referred to diseases of the respiratory organs, which in the five previous weeks had steadily increased from 303 to 575, further rose last week to 645, which exceeded the corrected weekly average by 231; 427 resulted from bronchitis, and 152 from pneumonia. The deaths from this class of disease during the four weeks ending last Saturday exceeded the number in the preceding four weeks by 56 per cent. Seven deaths were caused by horses or vehicles.

Most of the London churches were crowded on Good Friday at the various special services which were held. What is known as "the service of the three hours" has been this year introduced in many churches the clergy of which are not Ritualists or even very pronounced High Churchmen. That portion of the Londoners who regard the day as a holiday had the benefit of exceedingly fine weather, and all the places of resort around the metropolis were thronged with holiday-makers. Nearly all the railway companies ran cheap excursion-trains, one train on the London, Brighton, and South Coast Railway, from London Bridge to Portsmouth, started with between 600 and 700 passengers. At the Lillie-bridge Grounds about 8000 persons assembled to witness the annual sports of the Cumberland and Westmorland Wrestling Society; and at the Crystal Palace the total number of visitors was 26,236. A so-called "mass meeting," convened by the "Commons' Protection League," was held in Hyde Park, when a resolution affirming the desirability of preserving open spaces for the people was adopted. Mr. J. de Morgan was among the speakers.—Vast numbers of persons were abroad on Easter Monday in pursuit of holiday pleasure. By the numerous excursion-trains to distant parts also many thousands of holiday makers left London, tempted by the comparative fineness of the day. A gathering took place in Hyde Park, convened for the purpose of expressing sympathy with the Tichborne Claimant, two of whose children sat near Dr. Kenely, the chairman. A resolution was adopted embodying a petition to Parliament praying for the release of the convict. All the places of popular resort and amusement in London and the suburbs were thronged. Over 58,000 persons went to the Crystal Palace, and 38,592 to the Zoological Gardens—an increase of nearly 2000 over the Easter Monday of last year. The South Kensington Museum was visited by 26,924 persons, which was about 2000 more than went there last year; the British Museum by 18,929 persons—an increase of over 5000; and the National Gallery by over 20,000 persons. Nearly 2400 sightseers visited the Tower of London, and about 5500 persons passed through the state apartments at Windsor Castle during the day. The river steam-boats were heavily laden in the afternoon, and an immense number of holiday-makers assembled in the parks and in the various open spaces around London. At the Mansion House in the evening the Lord Mayor gave his usual Easter Monday banquet.—Following the old custom, the "Bluecoat boys" went to the Mansion House on Tuesday to receive their Easter gifts. Six hundred and thirty-six boys were each presented with two buns and a coin new from the Mint. To thirteen Grecians one guinea each was given, to seven probationers half a guinea each, to 41 monitors half-a-crown each, and a shilling each to the remaining 575 "blues." After this ceremony the Lord Mayor and Sheriffs, and the Bluecoat boys, went to Christ Church, Newgate-street, where the second Spital Sermon was preached before them by the Rev. J. M. Robertson, chaplain to the Lord Mayor.

Markets and fairs have been prohibited in Berkshire.

We regret to announce the death, on the 27th ult., of Mr. W. R. Buckman, for many years one of the artistic staff of this Journal, in his thirty-fifth year.

The Somerset Quarter Sessions has appointed a committee with power to close fairs and markets throughout the county should cattle plague break out.

The Roman Catholic Bishop of Liverpool laid the foundation-stone of a new church at Greenbank, St. Helen's, on Monday. The new building is to accommodate 850 worshippers, and will cost about £10,000.

The Royal Berks Volunteers, numbering about 560, had its first annual drill at Calcot Park, on Monday last, by the permission of Mr. J. H. Blagrove. Under the command of Colonel Loyd-Lindsay, V.C., M.P., the corps went through several evolutions, and he expressed himself well pleased with their efficiency.

The portrait of his Majesty Kalakaua, King of the Hawaiian Islands, which we have engraved, is from a photograph by Messrs. J. H. Goldsmid and Gurney, of New York; and the portraits of Queen Kapiolani and Prince Leleiohoku from photographs by Mr. M. Dickson, of Honolulu. They were lent us by Mr. Serjeant Sleigh, as elsewhere mentioned.

Sir George Elliott, M.P., was on Wednesday installed as Provincial Grand Master of the Eastern Division of South Wales Freemasons at Aberdare. After the close of the proceedings in the Provincial Grand Lodge the brethren adjourned to the Market-house, where a banquet was served, the company numbering 500.

From the West Coast of Africa we have news of a conflict among the natives. In revenge for a raid by the natives of Dido Town, in which the wife of an Acquah chief was carried off, the inhabitants of Bell and Acquah attacked the raiders and effected a great massacre. According to a telegram from Cameron, the victorious tribe were preparing to follow up their success.—Our advices from the West Coast of Africa state that the blockade of the coast of Dahomey is strictly maintained.

A special telegram to the *Daily News* from Alexandria says that Captain Burton has left Suez on a special mission to the Khedive. The object is unknown. The destination of Captain Burton is Moriah, a seaport on the Arabian coast of the Red Sea, near the entrance of the Gulf of Akabah. Captain Burton left in an Egyptian war-vessel, the Sennaar, with two European and two Egyptian staff officers and a body-guard of picked troops.

On Thursday week Messrs. W. T. Weekes and Co. dispatched from Plymouth, for Sydney, the ship Commonwealth, 1345 tons register, commanded by Captain W. A. Sproule, owned by Messrs. C. H. Stewart and Co., of London, and built by Messrs. Russell, at Glasgow, in 1875. She takes out sixty-three married couples, 157 single men, forty-eight single women, sixty boys, fifty-eight girls, and thirteen infants, all of whom have received free or assisted passages.

THE ACROPOLIS OF MYCENÆ.—FROM

ETCH BY OUR SPECIAL ARTIST.

THE EASTERN QUESTION. THE PROTOCOL.

[TRANSLATION.]

The Powers who have undertaken in common the pacification of the East, and have with that view taken part in the Conference of Constantinople, recognise that the surest means of attaining the object which they have proposed to themselves is, before all, to maintain the agreement so happily established between them, and jointly to affirm afresh the common interest which they take in the improvement of the condition of the Christian populations of Turkey, and in the reforms to be introduced in Bosnia, Herzegovina, and Bulgaria, which the Porte has accepted on condition of itself carrying them into execution.

They take cognisance of the conclusion of peace with Servia.

As regards Montenegro, the Powers consider the rectification of the frontiers and the free navigation of the Bosna to be desirable in the interest of a solid and durable arrangement.

The Powers consider the arrangements concluded, or to be concluded, between the Porte and the two Principalities as a step accomplished towards the pacification which is the object of their common wishes.

They invite the Porte to consolidate it by replacing its armies on a peace footing, excepting the number of troops indispensable for the maintenance of order, and by putting in hand with the least possible delay the reforms necessary for the tranquillity and wellbeing of the provinces, the condition of which was discussed at the Conference. They recognise that the Porte has declared itself ready to realise an important portion of them.

They take cognisance specially of the Circular of the Porte of Feb. 13, 1876, and of the declarations made by the Ottoman Government during the Conference and since, through its representatives.

In view of these good intentions on the part of the Porte, and of its evident interest to carry them immediately into effect, the Powers believe that they have grounds for hoping that the Porte will profit by the present lull to apply energetically such measures as will cause that effective improvement in the condition of the Christian populations which is unanimously called for as indispensable to the tranquillity of Europe, and that, having once entered on this path, it will understand that it concerns its honour as well as its interests to persevere in it loyally and efficaciously.

The Powers propose to watch carefully, by means of their Representatives at Constantinople and their local agents, the manner in which the promises of the Ottoman Government are carried into effect.

If their hopes should once more be disappointed, and if the condition of the Christian subjects of the Sultan should not be improved in a manner to prevent the return of the complications which periodically disturb the peace of the East, they think it right to declare that such a state of affairs would be incompatible with their interests and those of Europe in general. In such case, they reserve to themselves to consider in common as to the means which they may deem best fitted to secure the wellbeing of the Christian populations, and the interests of the general peace.

Done at London, March 31, 1877.

SCHOUVALOFF.

PARLIAMENT.

The Speaker took the chair in the House of Commons, on the House resuming after the Easter holidays, at four o'clock on Thursday. In answer to Mr. Forster, who asked if the Chancellor of the Exchequer could give the House any information as to the present position of the negotiations on the Eastern Question, also whether any correspondence with the Russian Government in connection with the Protocol would be published, the Chancellor of the Exchequer said "the Protocol was signed on Saturday last, I think. It has already been presented to the House, together with the procès-verbal, and some correspondence which will throw light on the circumstances and conditions under which it was signed. It will be distributed to-morrow morning, and copies may be had, I expect, at the Votes Office in the course of the evening."

The House next proceeded to consider the various clauses of the Prisons Bill in general Committee. Much discussion then ensued, and several speeches were made upon the past treatment of untried prisoners. Amongst the most remarkable of these were the oratorical deliveries of Mr. Cowen and Mr. Serjeant Simon, the former denouncing in no unmeasured terms the cruelty and tyranny practised under the Liberal Government towards Mr. Kickham (whom he described as an accomplished gentleman, and many other prisoners who, like him, had been arrested under the Treason-Felony Act as Fenians, the latter equally condemnatory of the treatment dealt out to the late Mr. Ernest Jones and other "Chartists." The learned Serjeant availed himself of the opportunity to give an interesting summary of the life of Mr. Jones, and pronounced a glowing eulogium upon both his public and private character. The bill having ultimately gone through Committee, the Prisons (Scotland) Bill was read the second time. The consideration of the Irish Prisons Bill, on the suggestion of Sir M. H. Beach, was deferred. The Civil Service Estimates then occupied the attention of the House for the remainder of its sitting.

Early on Wednesday morning the Queen's Theatre, Edinburgh, was burned to the ground. No lives were lost.

Sir Michael Hicks-Beach, Chief Secretary for Ireland, was entertained at a banquet at Gloucester on Wednesday by his constituents in celebration of his entering into the Cabinet.

Sir Charles Reed, Chairman of the London School Board, last week laid the foundation-stone of Sunday schools at Bridgewater, in connection with the Congregational Church there.

NEW BOOKS.

England, according to some authorities, is, and for some years has been, suffering from a peaceful but oppressive invasion from many quarters—from France, with its victorious race-horses and its handmaids of fashion; from Germany, with its itinerant musicians and its commercial men, and especially its commercial clerks, who will do more work, in better style and for less pay, than their English competitors; from Italy, with its hundreds of organ-grinders; from Belgium, with its cheap labour of many sorts; from America, with its medicine-men and its mediums; and from elsewhere, with whatever of enterprise is not to be frightened away by the "silver streak;" but it is a different kind of incursion which forms the subject of the two large volumes entitled *The Invasions of England*, by Captain H. M. Hozier (Macmillan and Co.), a subject which, if it were to be taken in hand at all, could not well have found a more satisfactory handler than the author who has devoted himself to the task, so generally admitted is his competence both from the military and the literary point of view. But the question is whether, so far as practical purposes and usefulness are concerned, the author might not have confined his labours to the observations which he has made in the score or so of pages forming the last chapter of his second volume. There cannot be many educated persons (and the volumes cannot well be intended for any other class) who have not a sufficiently intimate acquaintance with the history of the various successful and unsuccessful invasions of England from the days of Julius Cæsar to those of Napoleon I., and, even later, to those of Napoleon III., when invasion appeared for a moment to be threatened by the heroic "colonels," who were ready to sail for England at their master's nod and pluck his enemy from the very midst of us. It is true that the author's object was to draw "lessons for the future" from the "history of the past;" but it was surely unnecessary to tell once more the whole of every thrice-told tale. However, at the end of the long account of "invasions to restore the Stuart dynasty," there is a picture which may be studied with advantage, perhaps, at the present time, when there is still prevalent among many excellent people an impression that a particular sort of "atrocities" is perpetrated by Turkish soldiery only. Unless it should be held that English soldiers at the date of Culloden could not be expected to be as humane and civilised as Bashî-Bazouks are expected to be about a century later; for there are some good folks who do not seem to realise the fact that civilisation does not penetrate all countries at the same time to the same extent, and can see no reason why Turkish irregulars in 1876 should be only a little less savage and brutal than English regulars in 1746. But to return to the invasions. They may be divided into foreign and native; that is to say, those which had for their object the imposition of a foreign yoke, and those which merely aimed at substituting one dynasty for another; and they may be further subdivided into those which were effected, those which were attempted, and those which were hardly more than projected. The author has dealt with them all in detail, and with just so much circumstantiality as was requisite to bring out all their bearings, stopping very far short of tediousness. In his last and most important chapter, the author points out that "no invasion has been successful against this country since that which established William III. on the throne of England," and he controverts the opinion that "the invasion of William III. owed its success to the fact that in this country there was a strong party ready to aid him as soon as he appeared upon our shores." Not many readers, probably, will agree with the author. He attributes it "much more to good luck than to good management" that no success, since 1688, has attended the many attempts to invade our shores; and he holds that "the great invasion planned by Napoleon, in 1805, was apparently on the point of being crowned with, to us, most unhappy results, had Villeneuve only had the nerve to push forward." He appears to think that the scientific inventions which have since that time completely altered the conditions of warfare would tell against us, rather than for us; he hints that war may not be so far off as the generality of us imagine; and he describes our prospects, in case of war and invasion, as being so deplorable that if his book should fall into the hands of any foreign potentate whose cupidity has been excited by exaggerated computations of our wealth, it is difficult to conceive how that potentate will be able to refrain from swooping down upon us incontinently. "If," says the author, "an invasion were to take place, and our fleet had either been eluded or overpowered, in what position are we?" We should, no doubt, be in what is called "queer street;" but there is, fortunately, much virtue in an "if," and also in a British fleet, which has not, as a general rule, been hitherto in the habit of being either eluded or overpowered. Still, our fleet may, of course, be useless as a protection; and it may, therefore, be quite worth while, according to our author's suggestion, to expend vast sums upon fortifications and other means of security, such as his military soul loveth.

Expansion is not always wise, and the fragmentary sometimes possesses charms which are diminished rather than increased by subsequent additions made with the view of attaining greater completeness of form and of rounding off the edges; still, it would be ungrateful to regret that the sweet singer who delighted us a while ago with *The Epic of Hades* (Henry S. King and Co.) should have been moved to publish, once more anonymously, another volume supplementary of the former and bearing the same title. The verse is so exquisite and the manner so graceful and winning, so plaintive and sympathetic, so quietly earnest and so brightly hopeful, so simple and yet so scholarly, that the author would always be welcome, if it were only for the excellent example he sets to the modern school of versifiers, who seem to love darkness rather than light, and to aim at mystifying rather than illuminating. And yet it must, however reluctantly, be confessed that in this second volume the author seems to be something more than a little below his former mark. It may be that he merely seems, and is not really; and it may be that the seeming is to be accounted for in a very simple way: because he does not, in this second volume, come upon us with all that freshness and originality which made so great an impression in the case of the former, and consequently does not affect us with so vivid a feeling of agreeable surprise. But, whatever may be the cause, he certainly does seem, in this second volume, to be inferior to his former self in many points—in the structure of his verse, in the happiness of his diction, in the choice of his subjects, in his grasp of them and his power of self-transformation, in his application of the teaching conveyed in the old classical myths, in his occasional bursts of glorious music, in his efforts to reach the loftiest regions. Elegant, as ever, is the versification; but there appear to be, if there are not really, unnecessary and fantastic tricks of metrical style; whilst the sublimity which should be characteristic of him who dares to represent the very nature and the secret thoughts of the gods who live for ever is almost conspicuous by absence. There is abundance of grace in the vision of Artemis, of sweetness in that of Aphrodite, of beauty in that of Apollo; but of celestial majesty and of awful unearthliness there is little trace in the various visions of the deities, though there

is an approximation thereto in the description of the indescribability and invisibility of Zeus. Passion and intensity are powerfully depicted in the stories of Phædra and Clytemnestra; but in them one necessarily misses the cheerful light which, in the first volume, almost invariably broke in and relieved the darkest shade of the most painful picture. The new volume contains two "books," of which one is entitled "Tartarus," and the other "Olympus," and between which the contents of the former volume are intended to take their place as the second book of the complete work. The three books, with their respective headings of "Tartarus," "Hades," and "Olympus," will probably be published, at some future date, in one volume, with a new title; but it is doubtful whether anybody who had the great gratification of reading the first instalment of the work will be beguiled by any new name into regarding the whole production as anything more or less than the gem that first appeared as "The Epic of Hades," with the addition of a setting which will serve very well to give an air of finish, but is in itself of considerably less intrinsic value.

NATIONAL SPORTS.

Four or five years ago the Northampton Meeting had fallen to a very low ebb, and looked like taking its place among the third and fourth rate fixtures of the year; but, with the accession of the Messrs. Frail to office and the resumption of early two-year-old racing, it seemed to take a fresh lease of life. There were two really good days of racing on Tuesday and Wednesday last, though the heavy rain which fell at intervals made matters less pleasant than they would otherwise have been. A capital start was made on the first day with the Northamptonshire Cup, for which Dalham was an absentee, though he had a great pull in the weights. Coomassie, in receipt of 10 lb. from Thorn, naturally started favourite; but, though the mare was greatly fancied by the Newmarket division, she was by no means so fit as could have been wished, and will see a better day. Lollypop ran well for six furlongs, which will be found to be his best course; but at the finish old Thorn had little difficulty in winning from Plaisante. A very good field of sixteen came out for the time-honoured Althorp Park Stakes, the quality of the competitors being much superior to that of the field which ran for the Brockleby Stakes. Lord Clive, by Lord Clifden, from Plunder, and therefore half-brother to Warren Hastings, started a warm favourite. He is a fine-looking colt, though by no means fit, and it is a great pity that, owing to an error in describing his pedigree, his nomination for the Derby and other good races is void. A powerful though rather coarse colt by Pero Gomez—Fair Star was also heavily backed, and the race looked like a match between him and Lord Clive until within fifty yards of the finish, when Hudibras came with a rush and won cleverly. Hudibras, who is by King Victor, probably owed his success to his superior condition; still he is a nice lengthy colt, and likely to win many more races. Pourquivant (8 st. 9 lb.) showed little of his Lincoln form in the Spencer Plate, though he started with the call of his seventeen opponents; and though Coruleus (7 st. 13 lb.) was unquestionably favoured in the weights, Archer had a difficult task to get him home a head in front of Wanderer (6 st. 3 lb.). Ecorais (9 st. 12 lb.) was stopped by an almost hunting g impet, and Lady Ronald (6 st. 3 lb.) did badly; but Chevron (7 st. 4 lb.) showed very prominently up to the distance. Strike (6 st. 10 lb.), about the biggest horse in training, secured the St. Liz Handicap.

There was no race of much importance on Wednesday, except the Northamptonshire Stakes. Perhaps no horse has ever more deserved his name than Scamp (8 st. 4 lb.), as he has disappointed Sir John Astley over and over again, and it was only his fine performance in the Croydon Hurdle-Race which made him a 5 to 2 favourite at Northampton. The race proved one of the most hollow affairs ever seen, as Queen of Cyprus (6 st. 10 lb.), ridden strictly to orders, forced the pace from start to finish, and at last cantered past the post about 100 yards in advance of Talisman (8 st. 1 lb.) and Scamp, both of whom were pulling up. Lord Clive was withdrawn from the Whittlebury Stakes, in which only three ran, Tribute proving much too good for Beauharnais and Jeannine.

The great event of the week in London has been the six-days' walking-match, for £1000, between the famous American pedestrians, D. O'Leary and E. P. Weston. Negotiations for a contest between the pair have long been pending, and at length matters were satisfactorily arranged—Sir John Astley backing Weston, while Mr. S. Hague, of Liverpool, found most of the money for his opponent. The Agricultural Hall was once more the seat of war; and, as usual, each man had a track to himself, Weston taking the inner circuit, which is exactly one seventh of a mile; while O'Leary has to walk thirteen laps to two miles. They started at five minutes past midnight on Sunday, and in the first twenty-four hours Weston accomplished the extraordinary distance of 116 miles 812 yards, by far the best performance he has shown in this country. At this period O'Leary was about three miles and a half behind; but he started again long before his opponent, and during the small hours of Tuesday morning secured a lead which he has since increased. At 45h. 21 min. 33 sec. from the start O'Leary had scored 200 miles, having walked that distance in the fastest time on record by 1h. 13 min. 57 sec. At this period Weston was about seventeen miles in the rear, and at four o'clock p.m. on Thursday the board indicated O'Leary 339 miles (45 during the day); time of last mile, 14 min. 12 sec. Weston, 325 miles (50 during the day); duration of last mile, 15 min. 9 sec. O'Leary was absent from the track at five o'clock, when Weston was within 11 miles 1218 yards of O'Leary's distance. At ten minutes before five Weston left the track, having completed 328 miles; and shortly after five O'Leary, who had rested over four hours, reappeared, looking wonderfully refreshed. Both men looked marvellously fresh and well. Messrs. Payne, Chambers, Atkinson, Conquest, and Watson are the judges; and all the arrangements at the hall are in the hands of the Amateur Athletic Club, represented by Mr. Sydenham Dixon, the secretary.

The prospects of the cricket season are described as being exceedingly good, and the programme of fixtures is said to surpass all its predecessors, both for the number and the importance of the matches.

Lord Salisbury presided at the Hertfordshire Quarter Sessions on Tuesday, and announced that, at the request of a committee appointed by the magistrates, he had consented to withdraw his resignation of the chairmanship.

The Lords of the Admiralty have conferred special promotion to the rank of deputy inspector-general of hospitals and fleets on Fleet-Surgeon Thomas Colan, M.D., for his services with the Arctic Expedition.

A letter has been received by the Mayor of Manchester from Lord Beaconsfield with reference to an invitation sent by the Town Council to the Queen to open the new Townhall in that city, intimating that it is out of her Majesty's power to comply with the request.

THE CHURCH.

PREFEMENTS AND APPOINTMENTS.

Gray, Canon, to be Chaplain to the Earl of Sefton.
 Manley, J. J.; Chaplain of the Lambeth Union.
 Morgan, Dr.; Dean of Watford.
 Cobb, W.; Rector of Newchurch.
 Cornish, William Floyer; Vicar of North Hinksey, Berks.
 Healey, Randolph Edwode; Rector of St. Thomas's, Lower Crumpsall.
 Jones, Cecil; Vicar of Basingbourne.
 Malpas, Francis Robert Willard; Vicar of Little Horwood, Bucks.
 Patterson, Henry Sheridan; Vicar of Deane.
 Pearson, A.; Rural Dean of Chelmsford.
 Pugh, James Baldwin; Vicar of Napton-on-the-Hill, Warwickshire.
 Sampson, S.; Vicar of St. James's, Selby.
 Thomas, Grant E.; Chaplain to the Bishop of Barbadoes.
 Thomas, J.; Curate of Leominster, Herefordshire.
 Thompson, W. Oswald; Vicar of Hemel Hempstead.
 Watfield, H. B.; Rector of St. Allen, Cornwall.
 Whittington, R. T.; Rector of Orsett, Essex.
 Williams, S. F.; Rector of Cold Norton, Essex.—*Guardian*.

A handsome new church is about to be erected at Erlestoke, Wilts. It will stand just within the park gates, and the expense (£5000) will be borne by Lady Charlotte Watson Taylor.

Three windows, from the manufactory of Messrs. Hardman and Co., have been placed in the west end of the north aisle of Willesden parish church by friends of the late Mr. Whitbread Thomson, who died in May, 1876.

The Company appointed for the revision of the Authorised Version of the Old Testament finished their forty-third session yesterday week, at the Jerusalem Chamber. The revision of the Books of Kings was carried as far as 2 Kings xiv. 16.

The Archbishop of Canterbury consecrated Holy Trinity, Dagnall's Park, on the 22nd ult., in the presence of a large congregation. The Rev. A. T. Browne, M.A., is the first Incumbent, and the patronage of the church is in the Vicar of St. James's, Croydon.

Mr. Henry Rogers, of London and Wolverhampton, laid the memorial-stone of a new church at Moseley Hole, near Wolverhampton, on Tuesday. The church will be built at a cost of £1100. It is intended for the accommodation of 300 persons, and it is expected will be opened in July.

On the 24th ult. the Bishop of Gloucester reopened Upper Slaughter church, which has been restored by Mr. J. E. Cutts at an expense of £1700, the principal contributors being the Bagehot Trust and the Rector, the Rev. E. F. Witts, each £300; Mr. H. Brassey, M.P., £250; Sir Thomas Bazley, Bart., M.P., £100; Diocesan Association, £70. The ancient Norman structure has undergone considerable alteration. A new pulpit of polished oak has been erected by Mr. C. S. Whitmore.

The sculptured adornments of Frome church have been increased by the addition of three more works from the studio of Mr. Forsyth. One is a representation of the parable of the "Pharisee and Publican," and completes the series of parable and miracle illustrations in the spandrels between the arches of the nave, making sixteen in all. The two other works are a bas-relief and a statue. The former is a pieta, and is placed in the reredos of the Lady Chapel, over which is a large niche, now occupied by a statue of the Madonna. These two works complete the sculpture in the Lady Chapel.

Some marble steps inlaid with jasper, with the words, "Holy, holy, holy," have been placed in the sacristy of Watford parish church, and were uncovered on Saturday. They bear the following inscription on a brass plate:—"To the glory of God, and to the memory of the Right Hon. Louisa Carolina Elizabeth, Countess of Essex, these steps have been placed by the Vicar, churchwardens, and parishioners of Watford, in remembrance of her loving care for the adornment of God's house, and tender regard for the welfare of all around her. A.D. 1877." A stained-glass window, representing the Crucifixion, bearing a similar inscription, has been placed in St. John's Church.

On the 20th inst., the ancient Church of St. Mary, Easebourne, near Midhurst, Sussex, the chancel of which has been rebuilt, was reconsecrated by the Bishop of Chichester. The whole expense of the restoration, which has been under the care of Mr. A. Blomfield, has been borne by the Earl of Egmont, who has also increased the peal of bells to five, and has provided an organ, built by Messrs. Bevington, of Rose-street, Soho. Lady Egmont has likewise presented a handsome oak lectern. A well-executed three-light east window is the gift of the chief residents in the parish. This, as well as the west window (presented by Miss Tufnell), are by Messrs. Heaton, Butler, and Bayne. The lych gate was erected by the Vicar, the Rev. Edward Tufnell.

The exigency committee of the Wesleyan Conference have passed a series of resolutions on the Burials Bill. They have determined to give the bill the most strenuous opposition, and they say that no measure will be satisfactory which does not provide for burial in the parish churchyard by any duly recognised minister and with any appropriate religious service. The executive committee of the Liberation Society have also passed resolutions condemning the bill, and recommending that it should be strenuously opposed.

A new Stock Exchange for Glasgow, erected at a cost of £52,000, was opened on Tuesday.—An influential meeting was held in Glasgow on the same day, Principal Caird presiding, at which it was resolved to form an association for promoting the higher education of women and procuring the co-operation of the University. The objects of the association are to establish a scheme of examination for women similar to those existing elsewhere, to make arrangements for carrying on classes, and to provide funds. A committee was appointed to take the necessary steps.

The Lord-Lieutenant of Ireland and the Duchess of Marlborough visited Trinity College, Dublin, on Thursday week. Having first visited the examination-hall, they proceeded to the library, where a considerable time was spent in examining the literary and art-treasures in the librarian's private apartment, amongst others the book of Kells, the book of Armagh, a copy of the Vulgate, and other rare works in the library. The harp of Brian Boroihme and the ring money attracted special attention. Having paid a brief visit to the geological museum and the engineering school, the visitors next proceeded to the new medical museum. The dining-hall, containing a portrait of Grattan, of which his Grace took especial notice, was next visited, and the inspection concluded with a visit to the college chapel. The visit occupied two hours. The Duke wrote his name in the visitors' book in the library.—Easter Monday was generally kept as a Bank holiday in Dublin. The weather was mild and agreeable. The Lord-Lieutenant and the Duchess of Marlborough and the Duke of Connaught, together with a brilliant *entourage*, were present at Lansdowne-road Grounds athletic feats.—On Tuesday the Lord-Lieutenant and the Duchess of Marlborough, accompanied by Lord Randolph Churchill, Lady Rossmore Churchill, and Lady Georgiana Churchill, visited the Industrial School for Roman Catholic boys at Artane, and spent a considerable time in examining the working of the institution.

THE UNIVERSITIES AND PUBLIC SCHOOLS.

OXFORD.

Mr C. W. M. Moullin, B.A. and M.A., has been elected to the Medical Fellowship at Pembroke. He was placed in the first class in the natural science school in Trinity Term, 1872, and gained the Radcliff Travelling Fellowship in 1875.

At New the following have been elected to scholarships open to Winchester only:—D. S. Margollouth, O. T. Perkins, C. R. P. Moon, J. S. Budden (mathematical), A. W. C. Sanders, J. S. Parry.

At Kelby the following have been elected to open classical scholarships:—H. A. Johnston, Radley; H. E. Rose, commoner of Keble, and late of the Whitgift School, Croydon; B. H. Abrahall, St. Peter's School, York; A. F. W. Ingram, Marlborough. There were thirty candidates.

The examiners for the Denyer and Johnson Theological Scholarships have awarded them to the following gentlemen, whom they have bracketed equal:—Mr. M. F. Argles, B.A., Fellow of St. John's College; Mr. T. Ford, B.A., Brasenose College; Mr. J. E. Denison, B.A., Christ Church. The scholarships are each of the annual value of £40.

The result of the first examination under the statute for examining women over eighteen years of age has been made known by the delegates. Preliminary examination—Jessie Mary Chambers, Richmond, Surrey; Matilda Oxenham Cocks, Forest-hill, Kent; Helen Sparks, London; Eliza Katherine Wicks, Finchley; Mary Louisa Bostock, Stone, Staffordshire; Laura Elizabeth Cadwallader, Cheltenham; Mary Dorothy Scmers Cocks, Cheltenham; Josephine Elinor Kilquor, Cheltenham; Mary Gabrielle Middlemore, Whittand, Cheltenham. Pass examination—Catherine Margaret Campbell, Cheltenham; Mary Dorothy Somers Cocks, Cheltenham; Lucy Ashley Hall, Cheltenham; M. G. Middlemore, Whittand, Cheltenham. For the honours examination, which was organised on the level of the ordinary University honours examinations, only one candidate appeared—Miss Rogers, daughter of Professor J. E. Thorold Rogers. This lady, who in 1874 was placed first in the senior local examination (beating all the boy competitors of her own age) was on this occasion placed in the first class in Latin and Greek. This is rather more than equivalent to a first in classical moderations.

The examination of candidates for the Oxford Local Examinations will begin simultaneously at Oxford and the various other centres on Monday, May 28. Any person of either sex born on or after July 1, 1861, may be received as a junior candidate, and any person of either sex born on or after April 30, 1859, may be received as a senior candidate; but no one born before those days can be received. Successful junior candidates will be awarded certificates, and seniors will be granted the title of "Associate in Arts." The printed forms issued to the candidates must be filled up and returned to the several secretaries by Saturday, April 7 next, after which no name will be received at any place. The delegates are prepared to undertake the examination of schools, application for which should be made to the Rev. S. Edwards, the secretary to the delegates.

CAMBRIDGE.

Mr. F. B. Gibbons, Second Wrangler of this year, has been elected to a fellowship at Caius.

An open exhibition at Trinity Hall has been adjudged to Henry Henn, of Sherborne School. The value is £70 yearly.

The following minor scholarships and exhibitions have been adjudged:—

At Queens'.—Parker, Griggleswick School, Giles, City of London School, and Herman, Bath Grammar School, £80; Haynes, Wimbledon School, £40; Mackenzie, All Saints' School, Bloxham, £30; Prior, Bedford Grammar School, £30.

At Trinity Hall.—Henry Henn, of Sherborne School, has been elected to an open exhibition of £70. No other exhibition was awarded.

At Sidney.—Mathematics—Stokes, Blundell's School, Tiverton, £30; Splaying, Perse Grammar School, Cambridge, £10. Classics—Reynolds, Boston Grammar School, £80; Palmer, Rossall School, £80; Metcalfe, St. Paul's School, £50; O'Sheahan, Rossall School, £40; Edwards, Canterbury, £36; Natural Science—Shaw, Epsom College, £60.

At Caius.—The Open Scholarship in Classics has been awarded to Robertson, of Rossall School. In Natural Science Hoffmeister has been recommended for the scholarship.

At Clare.—Mathematics—(1) Frost, Derby School and private tuition; (2) Danlow, private tuition, £80 each. Natural Science—Armstrong, Epsom College, £60. The Cave Exhibition was awarded to Alderson, from Wakefield School, and Archdeacon Johnson's Exhibition to Norman, from Uppingham School.

At Pembroke.—Jones, Brighton College, £80 (Beatson Scholar); Leahy, Trinity College, Dublin, £60; Fountain, Marlborough College, £60; Laurence, Shrewsbury School, £50; Simpson, Oundle School, £50. Elected to Exhibitions of £20 each—Searle, Charterhouse; Roberts, City of London School; Grpp, Felstead School; Staveley, private tuition; Farquhar, Trinity College, Glenalmond.

At Emmanuel.—Classics—Elected to a Foundation Scholarship of £70 per annum, M. E. Hoets, Eton College. Minor Scholarship—A. W. Gundry, Dulwich College, £70; Wilson, Marlborough College, £50. Mathematics—F. W. Wait, Reading School, to a Minor Scholarship of £50. E. Hopkinson, Owens College, Manchester, to a Minor Scholarship of £50.

At Christ's.—H. Williams, Sherborne School, £80; W. M. Harvey, King's College School, London, £50; J. A. Robinson, Liverpool College, £50; G. H. Heapel, Shrewsbury School, £30; H. S. Morris, Repton School, £30; P. L. Newman, St. Peter's School, York, £30; F. Temperley, King Edward's School, Birmingham. Natural Science—H. M. Ward, non-collegiate student, £60; H. W. Pigeon, Clifton College, £50.

A meeting, convened by Mr. S. Morley, M.P., was held last week in furtherance of the scheme of Cavendish College, Cambridge. Earl Fortescue presided, and amongst those present was the Duke of Devonshire, Chancellor of the University.

The nineteenth annual report of the Cambridge Syndicate on the subject of local examinations has been issued.

It shows that the local examinations of students not members of the University were held in December last, at seventy-six centres for boys, and sixty for girls, there being several new centres. The number of candidates of both sexes has been yearly increasing since 1872, when the total was 3075, until in 1876 it was 4681. In reporting on the examinations in 1876, the Syndicate express their satisfaction that the proportion of the candidates rejected is unusually small; that among those who satisfy the examiners the proportion of those who obtain honours is unusually great; and that special attention appears to have been paid to the points which had been previously indicated as chief causes of failure.

The prizes of £12 to the best senior boy and girl, and of £8 to the best junior boy and girl have been awarded as follows:—Seniors: A. Young, Tettenhall College, Wolverhampton; A. M. Nall, Yarmouth. Juniors: A. E. Fuller, Finchley; C. Brown, Liverpool; and J. Greener, Milton Mount College, equal. The Royal Geographical Society's medals for Physical and Political Geography have both been awarded to H. L. Temple, Brighton. The Hatheron Scholarship and prizes at St. John's College are not yet awarded. The prize (for girls) for Political Economy has been awarded to A. Mitchell, Regent's Park. The prizes for the best senior and junior girls who obtain the mark of distinction in Mathematics have been awarded to A. M. Nall, Norwich, and C. Brown, Liverpool.

The Cambridge Higher Local Examinations, for persons above the age of eighteen years and a half, begin on Monday, June 18. Forms of entry can be obtained from the following local secretaries, and must be returned to them duly filled up on or before April 20:—

Birmingham (Men): the Rev. E. F. MacCarthy, King Edward's School; Mrs. Seagant, Augustus-road. Cambridge: Miss J. Kennedy, The Elms, Cheltenham; Mrs. Myers, Brandon House. Leeds: Miss Carbutt, 18, Blenheim-terrace. Liverpool: Miss Calder, 49, Canning-street. London (Men): R. St. J. Corbet, Esq., 10, Portman-street, W.; Miss Prideaux, Goldsmith's Hall, E.C. Norwich: Miss Blake, The Lower Close, Plymouth: Miss James, 2, Woodside. Rugby: Mrs. H. Lee-Warner.

The *London Gazette* contains the following notice:—"The Queen has been pleased to appoint the Right Hon. Somerset Richard, Earl of Belmore; the Right Hon. Mountfort Longfield, LL.D.; the Right Hon. Stephen Woulfe Flanagan;

Judge of the Landed Estates Court; Andrew Marshall Porter Esq., Q.C.; Joseph Allan Galbraith, clerk, M.A., Fellow of Trinity College; and John Mulholland, Esq., Member of Parliament, to be her Majesty's Commissioners to inquire into various matters relating to the position of the College of the Holy and Undivided Trinity and of the University of Dublin."

The Irish Government has appointed Dr. Thomas Moffett President of the Queen's College, Galway, in the room of Mr. Berwick, deceased. Dr. Moffett has been twenty-eight years a professor in Galway, and has been identified with the colleges from the time of their foundation by Sir Robert Peel.

"The formation of the Ottoman Empire" is the subject which the Earl of Derby has chosen for the essay for the prize of twenty guineas, which he annually gives during his term of office as Rector of Edinburgh University.

A recital of music appropriate to Easter Eve was given, last Saturday, by Sir Herbert Oakeley in the Edinburgh University music class-room to a much gratified audience.

A large number of students have signed a declaration expressive of their desire that Mr. Gladstone should be elected Rector of Glasgow University.

The late Mr. J. C. Tuffnell has bequeathed £5000 to University College, London, for the purpose of establishing two scholarships—one in analytical and practical chemistry, the other in general chemistry. Candidates must be undergraduates of the University of London.

A special meeting of the Court of Governors of Owens College was held recently at the College, under the presidency of the Duke of Devonshire, for the purpose of receiving and considering the report of the committee appointed in October last with reference to the proposal to seek a University charter for the College. The meeting was numerously attended, and a resolution was passed adopting the report and reappointing the committee, with power to take such steps as may be calculated to promote the success of the proposal.

A Royal charter of incorporation has been granted to Clifton College.

The Scholarship examination at Harrow ended last week with the following results:—A. Macnamara was recommended for the Gregory Scholarship; J. O. F. Murray for the Botfield Scholarship; E. Graham and A. Pagan for other scholarships; H. Rashdall also and E. D. Rendall were among the select candidates. The Need Medal for Mathematics was awarded to D. E. Brown. The examiners were the Rev. H. C. A. Tayler, formerly Fellow of Trinity College, Cambridge; Mr. R. G. Tattin, Fellow of Balliol College, Oxford; and Mr. D. M'Alister, Scholar of St. John's College, Cambridge. The Entrance Scholarships, open to young boys not already members of the school, have been awarded as follows:—On the classical side: 1. J. H. F. Peile, from the Rev. L. Sanderson's, Elstree-hill; 2. J. E. Vaughan Lee, from the same; 3. D. Terry, from the Rev. W. T. Browning's, Thorpe Mandeville; 4. C. M. Dobson, from the Rev. C. Storr's, Branchley. On the modern side: 1. J. T. Best, from Mr. A. Vernon Vines's, Cherbourg, Great Malvern; 2. W. Onalow, from the Rev. J. H. Cross's, Brighton.

At Eton the following are the results of the recent examinations for the Newcastle Scholarship:—Harmer, K.S., scholar; Goodhart, medallist and Wilder Divinity prizeman; Ashley, proxime accessit; Burrows, K.S., and Tatham, ma., K.S., sq.; Macaulay, K.S.; Mumm, K.S.; Griffiths, K.S., Lowry, K.S.; and Miets, K.S., sq.; Ashley; B. Farrer, K.S.; Hoets, K.S.; and Stephens, K.S., sq.

The annual exhibitions at Westminster were awarded on Wednesday as follows:—1. J. B. Hodge (in the school); 2. W. L. Benbow, from Rev. T. J. Nunn, Maidenhead; 3. R. H. Coke, from Arnold House School, Chester; 4. H. T. Clarke, from Rev. J. Langton Clarke, Ealing; 5. F. W. Baldwin, from Rev. L. Bailey, Grammar School, Paddington; 6. S. A. Bird, from Rev. T. J. Nunn. The next in merit was E. Harington (in the school).

Lord Derby, in reply to a resolution forwarded to him from a recent meeting held at Bristol respecting the depressed state of the sugar trade, states that the Paris Commission has prepared a draught convention for the abolition of the bounty system, and that this convention is now under the consideration of the Governments concerned.

Mr. Burt, a farmer at Llanlivery, in Cornwall, met with his death in a singular way last Saturday evening. A sheep having died, he attempted to get rid of the carcass by throwing it down an old mine-shaft adjacent to his farm. The cord by which the carcass had been dragged to the spot having twisted round Burt's leg, when he threw in the sheep, he was also dragged down the shaft, a depth of two hundred feet.

An appeal is made for donations for the temporary relief of the widow and twelve children of the late Mr. Howard Glover, the musical composer. He left England nine years ago for the United States, but never earned more than a bare subsistence, and on his death in 1875 his wife and children were plunged in deep embarrassment. By the charity of the British Consul they have been sent back to England, where they are now all but destitute. If temporary aid be given, there is a prospect of the elder children getting situations, which will enable them to keep themselves and their mother. Donations may be sent to Mitchell's Library, Old Bond-street.

In a correspondence printed in the daily papers Mr. Gladstone calls the attention of Mr. Ashbury, M.P., to a statement of his that the former had been induced to write a pamphlet on the Eastern Question for the purpose of putting money into his pocket. Mr. Ashbury, therefore, unreservedly withdrew the expression, conveyed his regret, and tendered an apology. This was at once accepted by Mr. Gladstone, who added: "The statement that a pamphlet of mine on the Eastern Question has produced me £10,000, though, I am certain, made in sincerity, was entirely fabulous, and was not sustained by any kind of presumption. I have been an author for forty years; but I am sure that my gains, by what I consider an honourable as it is also a hard labour, have not, during the entire period, come near that sum."

Mr. Ruskin announces that he has, at the request of a few Sheffield workmen, authorised the investment of £1200 in an estate of thirteen acres of land, near Sheffield, whereon the workmen may spend what spare hours they have, and for which they agree to pay 3 per cent. Mr. Ruskin says:—"Here, at least, is a little piece of England given into the English workman's hand." Mr. Ruskin also publishes his autobiography, saying his father left him £120,000, besides property at Harnhill, Denmark-hill, Greenwich, and pictures, and his mother £37,000. He gave £17,000 to his poor relations, sold the pictures, bought Brantwood, assisted a young relation in business at a cost of £15,000, spent £15,000 on harness and stables, and has given £14,000 to St. George's, besides having spent £70,000 variously. He is now worth £54,000, and announces that he will give the Marylebone property absolutely to St. George's Company. The Harnhill property he gives to his cousin, and will finally invest the remaining £12,000, and live or die upon its interest.

THE TREASURY OF ATREUS (ENTRANCE).

THE THIRD TREASURY.

THE SECOND TREASURY.

THE FOURTH TREASURY.

THE MAGAZINES.

The *Cornhill* is highly varied and very readable this month, with no peculiarly striking feature. The most generally interesting paper is, perhaps, an able review of Kingsley's life and works from the pen of Mr. Leslie Stephen, generally sympathetic in tone, yet with reserves sufficient to betray the critic's conviction that Kingsley's writings are hardly destined to a permanent place in literature. "The Rationale of Mythology" is a clear and attractive account of the six theories which have been propounded to explain the phenomenon; all of which, in the writer's opinion, possess a basis in truth, and contribute their quota towards the solution of the problem. "Sicilian Folk Songs" include several very pretty translated specimens of the Sicilian octave, that pleasing variety of the stanza where the rhyme is maintained throughout, instead of the ordinary conclusion in a couplet. "Quiet Marriages" describes the process of tying the nuptial knot at a registry office; and "The Levelling Power of Rain" expounds Lyell's theory of the manner in which great geological changes are brought to pass by the gradual operation of natural forces.

Macmillan has nothing of paramount importance except the paper on Army Reform, evidently from a competent hand; and an addition to the earnest and suggestive series of essays on Natural Religion. "Giotto's Gospel of Labour," by Professor Sidney Colvin, is an examination of the sculptures for the campanile of the Church of Santa Maria del Fiore at Florence, designed by Giotto in the last two years of his life. Mr. F. T. Palgrave contributes an able criticism on Herrick, and Mr. P. B. Marston a beautiful sonnet. The Rev. W. Barnes is so unlucky as to publish a serious discussion of the authenticity of "the Oera Linda Book," just one week after the history of this impudent imposture has been fully detailed in the *Saturday Review*. Its character had already been exposed in several English periodicals.

Blackwood begins with a highly interesting review of the present condition of the French army, evidently from the pen of a highly competent military critic. The writer's ultimate conclusion is that France is not and never will be ready for an aggressive war; but that "if another scare burst out to-morrow it would find her in a situation to efficaciously protect herself." A visitor to Crete furnishes a valuable account of that important island, and concludes by asking his readers "to decide with us that whenever it ceases to be an appanage of Turkey it must pass into the hands of England." There certainly seems small chance of good government for a mixed population of Eastern Christians and Mohammedans, except under the impartial rule of some third party. Among the other contributions are to be noticed a rather shallow review of Miss Martineau's autobiography, dealing only with the most obvious aspects of the book; the continuation of "Pauline," where the interest is gradually deepening; and a pretty little comedieta in narrative, entitled "A Railway Journey."

Fraser is very sober and serious, but the articles are generally good. The most remarkable is one from the pen of Mr. G. Simcox, dwelling on the tokens of decay in societies whose intellectual and spiritual life is on the wane, and suggesting the inquiry whether such a failure of energy should be enumerated among the many obvious resemblances between our age and the age of the Antonines. The writer of the review of British trade pursues his subject into Spain, Portugal, and the Netherlands, and hardly augurs more favourably of the economic and financial prospects of these minor States than of the Great Powers. We should be glad to know where "Portuguese Guiana" is situated. "The Popular Songs of Tuscany" are the subject of a paper containing numerous well-rendered specimens of these delightful carols—perhaps the most perfect example in literature of the alliance of rustic simplicity with exquisite refinement. The remaining contributions include an able defence of the competitive system, an interesting account of the Bedouins, and an essay on the character of Justice Shallow, pointing out the traces of Warwickshire provincialism in Shakespeare.

The most striking feature in the second number of the *Nineteenth Century* is the first of an intended series of "symposia," or amicable discussions in writing, among acknowledged authorities on important subjects of general and mutual interest. The topic of the present number is "The influence upon morality of a decline in religious belief," proposed by Sir James Stephen and successively elucidated by Lord Selborne, Dr. Martineau, Mr. F. Harrison, the Dean of St. Paul's, the Duke of Argyll, and Professor Clifford. The question lies beyond the range of our discussion, and we can only remark that while our guides, with perhaps a single exception, are unanimous in considering that morality must suffer if divorced from religion, their definitions of religion differ so widely as to admit of considerable latitude in the construction of the proposition. Dr. Carpenter's paper on the radiometer and its lessons is a tract in disguise, conveying, under the semblance of an account of the various theories which have been promulgated respecting Mr. Crookes's invention, a reproof of that gentleman's demeanour in a totally different matter. Sir James Stephen contributes a trenchant exposure of Mr. Gladstone's misconception alike of Sir George Lewis's views regarding "the influence of authority in matters of opinion" and the actual existence of such authority as deduced from any general con-

sensus of mankind on a particular class of subjects. Cardinal Manning continues to whitewash the Pope and Council; Sir John Lubbock contributes a weighty and temperate plea for legislative protection for our archaic national monuments; and Mr. Wilson a judicious review of the Presidential crisis—anticipated, however, to a considerable degree by the comments of the press. The most readable paper in the number is Mr. F. Myers's essay on Georges Sand, necessarily incomplete, but eloquently expressed and most genially appreciative.

The *Fortnightly Review* teams with important articles. Sir Henry Maine contrasts the relics of the feudal system as they existed in France and England before the French Revolution, and traces the latter event in large measure to the vexations incidental to copyhold tenure, a description of landholding more prevalent across the Channel than with us. Mr. Goldwin Smith expends much superfluous argument in enforcing the desirableness of the annexation of Canada to the United States. The question is one solely for the Canadians, and Mr. Smith may rely upon it that there is no more disposition in this country to impede such a union, should they come to desire it, than to force it upon them whether they will or no. Mr. Simcox contributes a fair and sympathetic review of Miss Martineau's autobiography, occasionally flavoured with shrewd but gentle sarcasm. Mr. Anthony Trollope's essay on Cicero's political character is rather a eulogy than an investigation, but warmth is excusable in the appreciation of the one honest statesman in an age of profligacy. Sir John Lubbock sums up a most interesting disquisition on the mutual influence of plants and insects with the general conclusion, "There is not a hair or a line, not a spot or a colour, for which there is not a reason, which has not a purpose or a meaning in the economy of nature."

The most remarkable contribution to the *Contemporary Review* is of foreign origin, being a translation of M. Rénan's exquisite, rather than eloquent, address at the recent commemoration of Spinoza. Mr. A. T. Innes discusses the complications which may beset the conclave which Europe has seemingly made up its mind to regard as imminent, but which may, nevertheless, be long postponed. An able writer on the problem of spontaneous generation exhibits a strong bias in favour of Dr. Bastian. Professor Bain advises on the effective prosecution of metaphysical research, and Mr. Mahaffy on explorations in the manner of Dr. Schliemann. The facile improvisation of Mr. Buchanan's "Balder" scarcely attains the rank of poetry.

The contents of the *North American Review* and the *International Review* are too weighty and varied to be fully noticed here. We can only direct attention to Mr. Emerson's discourse on demonology in the former, an essay quite in his wonted style; and to the estimate of Mr. Lowell's position as a literary critic in the latter. The *Month* is chiefly remarkable for Father Coleridge's endeavour—Jesuitical in every sense of the term—to claim Count Montalembert as an Ultramontane on the score of the admiration for Pope Gregory VII. which he entertains in common with many Protestants. Mr. Justin McCarthy's "Miss Misanthrope," though occasionally too deeply tinged with that mannerism of Mr. Trollope's of which a clever writer so easily acquires the knack, is a most entertaining story, and decidedly the chief attraction of the *Gentleman's Magazine*. The scene where the poet, "for art's sake," reads his verses is full of truth and humour. Lord De Mauley contributes a valuable essay on the climate of England and its influence on agriculture, betokening close observation and practical insight into the subject. "Savage Proverbs," "A Slave-Hunt in Borneo," and "A Royal Trio," are very readable papers. *Tinsley and Belgravia* are in general readable enough, although the only contribution of much mark is Mr. Proctor's account in the former of the superstitions connected with comets. "Proud Maisie" in *London Society* is this month inspired with deep pathos, agreeably relieved in the last chapter by a change of scene to the Continent. The rest of the contents are sprightly and amusing. The most important papers in the *Atlantic Monthly* are the diary of a British officer kept during the American War of Independence, a discouraging view of "South Carolina Morals," and a racy ballad by Longfellow. The *Argonaut* has an agreeable sketch of travelling in Portugal. The *Popular Science Review* (No. 2 of the new series) and *Science Gossip* contain the usual amount of solid information for which these publications are noted.

The first inquiry which has been held in Ireland under the Artisans' Dwellings Act took place in Belfast on Tuesday. The Belfast Corporation are taking steps to put the Act in operation on an area of the town between North-street and Smithfield, which has been for many years in a very dilapidated condition. New houses for the dispossessed tenants will be erected in Ross-street, about half a mile distant. No opposition was offered to the scheme.

At the opening of the eighth annual session of the Good Templar Grand Lodge on Tuesday at the Guildhall, Plymouth, 800 members received the grand lodge degree. The entire membership was shown to be 120,000; and it was stated that the order exists not for the regulation, but the extinction of the liquor traffic, endorsing the Permissive Bill as the only means. In the evening a large public meeting was held in the Guildhall. Mrs. Lucas, sister of Mr. Bright, was one of the speakers.

RIDING ACROSS A RIVER.

It will perhaps be remembered that some admiration or curiosity was excited among the lovers of horsemanship by the exploit of an officer of the Austrian army, some time last year, in riding for a wager, on the same horse, all the way from Vienna to Paris, in a certain number of days. That accomplished horseman, First Lieutenant Feodor von Zubovitz, of the Hungarian cavalry, has invented a new method and a simple apparatus for the use of cavalry in crossing a deep river; and on the 18th ult., in the presence of many thousand Viennese spectators, he gave an exhibition of the performance, near the Prince Rudolf Bridge on the Danube. He had ridden across the Danube, in this manner, above sixty times before, and had been seen by large multitudes of his countrymen at Buda-Pesth, invariably doing it with complete success. The nature of the appliance he has contrived, its arrangement and its manifest efficiency, will be shown, almost at a glance, by our two illustrations, from the sketches of a Vienna correspondent. A pair of indiarubber bags, to be inflated with air, like ordinary air-cushions, but of the shape figured separately in a corner of the first Engraving, connected by two straps behind, over the horse's crupper, and by one strap in front of the saddle, with two pairs of belly-straps, to be fastened, like the girth, under the horse's body, will suffice to hold up both horse and rider in the water, needing only the slight effort required to direct their course. Not above half the horse's body sinks in the water, so that the entire saddle, and the man's body and thighs—all, in fact, above the man's knees—will remain quite dry, with his knapsack and cartridge-box, his weapons and other accoutrements, free from risk of damage. The indiarubber bags, when not inflated, form a covering for the pommel and crupper, serving to protect the saddle from rain; but when the soldier has to ride across deep water he can fill them with air, in one minute, by raising to his mouth the two small flexible tubes attached to the front of these bags, without having to dismount or stop his horse. It really does seem remarkable that nobody has thought before now of such a very simple and obvious method for helping a horse to swim. There are many English hunters, we believe, which can, with some difficulty, in swimming, carry a rider of moderate weight for an extremely short distance; but only the horse's head and neck, and the man above his waist, can be kept above water, unless by some artificial aid.

SUBSCRIPTION

TO THE ILLUSTRATED LONDON NEWS.

Twelve months (including Christmas Number) £1 9s. 3d.
Six months, 14s.; Christmas Half-Year, 15s. 3d.
Three months, 7s.; Christmas Quarter, 8s. 3d.

Copies will be supplied direct from the Office to any part of the United Kingdom and the Channel Islands, for any period, at the rate of 6d. for each Number, paid in advance.

CHAPPELL'S ENGLISH 20-GUINEA or
SCHOOL-ROOM PIANOFORTE, with Check Action, in Canadian Walnut or Mahogany. This instrument combines good quality of tone and excellence of workmanship. Capable of enduring hard school practice without going out of order. In Solid Oak or White Ash, 22 ga.; Rosewood or Walnut Case, 27 ga.

CHAPPELL and CO.'S ORIENTAL
MODEL PIANOFORTE, Iron Frame, Trichord throughout, Check Action, Seven Octaves, Solid Walnut Case. FIFTY-FIVE GUINEAS; or, Solid Mahogany or Black Walnut Case, and Check Action, FORTY-THREE GUINEAS; with Plain Action, THIRTY EIGHT GUINEAS.
Made expressly to withstand the heat and moisture of extreme climates. Every part that is glued is also secured with screws. The felt on the hammer, &c., is fastened with pins. The back and the silk frame are lined with perforated zinc to keep out damp and insects; and every precaution taken that has been suggested by persons who have had many years' experience in the care of musical instruments in India and China.
Testimonials of the durability of these instruments can be seen at 50, New Bond-street.
The price includes—1. Packing-cases of tin and wood; 2. A suitable tuning hammer or key; 3. A tuning fork; 4. Some additional strings; 5. A Book on Tuning and Preserving the instrument; 6. And the Carriage to the Dock.
Show-Rooms, 50, New Bond-street.
Factory, Chalk Farm-road.

CHAPPELL and CO.'S MIGNON
IRON GRANDS, with Transverse-String Bars, 75 ga. to 85 ga. The smallest Horizontal Piano made; length only 5 ft. 9 in.

CHAPPELL and CO.'S THREE-YEARS'
SYSTEM of HIRING HARMONIUMS, from 6s. per year and upwards.

CHAPPELL and CO.'S ALEXANDRE
ORGAN HARMONIUMS, from 4 ga. to 120 ga. Full Illustrated List free by post.

L'HARPE EOLIENNE, ORGUE DE
SALON, with eighteen stops, fourteen half sets of reeds, percussal action, double expression, pneumatic action, &c., of the finest workmanship. This model has been commended highly by all musicians who have tried it. Price 150 ga.

INCIDENTS OF THE EASTER MONDAY VOLUNTEER REVIEW AT DUNSTABLE

THE RUINS OF MYCENÆ.

Our Special Artist, Mr. W. Simpson, whose illustrations of the recent archaeological researches and discoveries in Greece excite so much interest, continues to supply an abundance of sketches of the ruins of Agamemnon's Royal city, and of the curious sculptures, gold and silver ornaments, and other relics of antiquity, which Dr. Schliemann has lately found there. Our principal illustration, in the present Number, is a large View of the Acropolis of Mycenæ, in addition to which are given particular illustrations, with ground plans and sections, of the interior of the so-called Treasury or Tomb of Atreus, and the series of chambers called the second, third, and fourth Treasuries. The following are Mr. Simpson's notes upon these subjects:—

THE ACROPOLIS OF MYCENÆ.

This view of the Acropolis of Mycenæ is taken from a point near to the Treasury of Atreus. It shows the south-west wall which separated the Acropolis from the town; and the earth newly thrown out indicates the place where Dr. Schliemann's explorations have been made. Behind is Mount Agios Elias, with its rocky summit, where Dr. Schliemann found old walls of Cyclopean masonry, seeming as if they had been constructed for defence. There is a sacred tree in a triangular inclosure on the top, and the villagers seem to look upon the mountain as holy, for they ascend to the top with the priest when drought afflicts them. This they did last year; and after a service of prayer, at the tree on the summit, the desired rain began to fall before they got back to the village. A shepherd's hut, and some pens, made of stone and bushes, for the flocks of sheep and goats, are now the only sign of human habitation among the ruined walls and stony ground where "wide-wayed" Mycenæ once stood.

THE TREASURY OF ATREUS.

It must be understood that this is only the so-called "Treasury of Atreus." Its connection with that King is but legendary, and its character of being a Treasury is a conjecture derived from Pausanias; subsequent writers have only repeated his words referring to "subterraneous habitations of Atreus and his sons, in which they deposited their treasures." This reputation was no doubt founded on Homer's expression that Mycenæ was "rich in gold," and one of the many phrases used in the Iliad, with reference to Agamemnon, is that of his being king of "rich Mycenæ." It will naturally occur to us, however, that the Kings of Mycenæ would have constructed their treasury in the most secure part of their city, and that was within the Acropolis. This very remarkable structure is, on the contrary, upon the lower ridge, and must have been among the buildings of the city. The probability then is that this was a tomb. Those who are familiar with the Maeshowe, in Orkney, or with New-Grange, in Ireland, will be struck with the remarkable resemblance between them and this tumulus in Argos; for it undoubtedly belongs to that class of monuments. The side of the hill has been dug into, and the rock excavated; but when finished, the earth was replaced over it, and its mound character is still perceptible, rising upon the slope of the ground. Whether the walled approach, on the outside, was originally covered with earth, or not, seems to be doubtful. Lord Elgin made some excavations to get a more accurate knowledge of the place. The guides at Mycenæ state that, when the Turks explored the inner rock-cut chamber, they found some statues, as well as other articles, and some of these were of gold. One of the guides remembers that his father had seen steps below the present approach; and his explanation was that they led from the principal street of the town up to this building. If these steps belonged to it, we may almost be certain that there was some outward indication of the tumulus, and that the whole structure was not originally buried underground. At present, the visitor comes upon what may be called a walled trench, which is now the approach to the entrance. It is about 20 ft. wide, and the stones are rectangular, and small in comparison to those at the Gate of the Lions. The doorway is very simple in its style, not a trace of anything we call Greek architecture can be found in it. The sloping jambs rather suggest to our mind that an Egyptian influence may have affected the designer. The triangular opening above the great lintel might also be appealed to in support of this idea; for that construction, though not exclusively confined to Egypt, has its most developed expression in the great Pyramid of Ghizeh. On descending the slope of accumulated rubbish and entering this splendid domed hall, the effect is impressive, for its size is considerable. The diameter is stated to be 47 ft. 6 in., and the height 50 ft. The masonry is good and regular. The stones are not perfectly rectangular, but are very nearly so; here and there a stone is trimmed to fit its neighbour, showing that the influence of the old polygonal style had not yet wholly departed when this monument was raised, which is an important point as to its date of construction. One of the first things to arrest the eye is the great slab, which forms the inner part of the lintel. There are only two stones covering the doorway, and the inner one is at least 27 ft. long, about 18 ft. wide, and 3 ft. 6 in. deep—a gigantic mass to quarry and transport to its position. When the eye gets accustomed to the dimmer light within, small holes become visible all over the walls. These held the pins or nails by which it is supposed a metallic lining was attached to the inside. This is no doubt a correct supposition, as it was common to cover the interiors of buildings with bronze down to a later time in Greece. There are two lines of these holes all round the interior of the doorway, and they are very plentiful round the entrance to the inner rock-cut chamber, indicating that the metallic covering was richer at these places than in the rest of the building. There are small cup-like hollows round the holes, but these were most probably made by those who took away the metal. The entrance to the rock-cut chamber is on the north, and it is built with the same triangular form of opening above the door, to relieve the lintel, as in the principal doorway. This chamber is perfectly dark, and is rudely excavated in the rock, its size being about 23 ft. square. On striking a light the first impression is that it has a Gothic groined roof, but this turns out to be only rough ledges of the rock. The hole made by the excavation of the Turks is still visible in the centre of the chamber, and forms a dangerous trap in the dark. As caves are common in this part of Greece, it is not improbable that this may have been one; and, supposing it had been selected for a tomb, it was then no doubt extended for the purpose of constructing the dome as a sepulchral hall to it. In the Homeric age tombs are always described as "piled" or "heaped up." They are always mounds; and the fact of the earth covering this so-called "Treasury" is a strong evidence of its sepulchral character; but the rock-cut chamber and the magnificent built accessories would lead to the conclusion that it belongs to a period posterior to the Iliad and the Odyssey. Hector's tomb is described as the "hollow grave." This was the primitive cell, which became developed into an unarched dome. Of this many examples are found in the tumuli near Kertch, some of them of a very large size, and, though different in construction, they afford a good illustrative

parallel. In the Argolic example we find a developed architecture which seems to have been rich with metallic decoration. Here all resemblance to the simple cell of the hollow grave has been lost, and now the foot or two feet of earth, heaped on the top, is nearly all that is left to remind us of the original mound, from which this style of tomb had its origin.

The probability is that the tombs found by Dr. Schliemann in the Acropolis of Mycenæ are of a far higher antiquity than this building. We may suppose that the Kings of Mycenæ would only be buried out of the Acropolis when there was no more ground left there. By comparing the building of the walls of the Acropolis with this so-called "Treasury," its more modern character becomes apparent. The squared stones at the Gate of the Lions indicate a later date than that of the other part of the walls, which are polygonal. The triangular space over the Gate of the Lions, containing the sculpture from which the portal derives its name, shows that a regular principle of construction had been established. This principle was observed when the so-called Treasury was built, but the more carefully squared stones are evidence of a still later period. This only gives us so far the relative time, but no fixed date. Mycenæ was conquered early in the fifth century B.C., and it is probable that the Treasury belongs to a date approaching that period. There is another monument of the same kind, but of smaller dimensions, at Mycenæ, as well as two more, which would be unimportant if they did not serve to throw light on the larger one. I intend sending illustrations of these. Pausanias describes a similar treasury of Minyas at Orchomenos, and several others at Olympia. If we take this specimen at Mycenæ as a developed example, it presents to us an entirely separate growth of architecture from that which we usually call Greek, and the development of the one must have been going on, within certain limits, along with the other. The exceptional features of this style, which bears a resemblance to Egyptian architecture, would not justify the conclusion that it came from the banks of the Nile, for it bears no resemblance either to the Pyramids or the temples of that part of the world. Yet still less does it resemble the temples of Greece. Not a feature of the Greek temple could be traced back to the so-called Treasury of Atreus.

The exterior view shows the two walls of approach to the Treasury of Atreus. The doorway is half covered up with earth. The outside lintel-stone of the door is much smaller than the inner; still, it is a large block. There is a very curious small niche at each end of this lintel, of which I send a separate sketch, as it might help to throw light on the whole building if its purpose could be guessed at. The triangular opening, to relieve the lintel from pressure, is here carried out as a matter of principle, though the wall above is of no great height. The mound form of the earth over this monument is conveyed in this illustration. The view of the interior of the Treasury (this was engraved last week) will give some notion of the size of the inner stone of the lintel, which is 27 ft. long. The position of the holes for the nails which held on the metal plates, or ornaments, can be seen in the doorway from the two perpendicular lines of cuplike depressions made by those who extracted the metal. A couple of these holes are also given on the fifth course from the base of the dome. The interior of this splendid dome is in very good order. The triangular space over the inner lintel has given way a little, and one or two of the stones near the apex of the roof have fallen in. The drawing of the rock-cut chamber shows the doorway leading to the dome, and the hole made by the Turks, when, as already stated, they found some statues and other articles. The rough sketch plan and section will help to explain the whole arrangement of the parts of this ancient monument.

THE SECOND TREASURY.

As the dome of this monument has been long broken in, it was well enough known; but, thanks now to Mrs. Schliemann, the whole of it has been excavated and exposed to view. While her husband was busy within the walls of the Acropolis, she undertook the exploration of this relic of the past, and the approach to it, which was formerly completely concealed, is now laid bare. Its position is close to the Gate of the Lions, and it is found to differ only in slight details from the other one known as the Treasury of Atreus. This has a heavier cornice over the door, and one fragment of it has a simple leaf ornament, which was no doubt repeated along the whole length. This is an important point, for there is not a scrap of sculptured ornament on the other. The triangular opening over the lintel is, in this case, higher in its proportions than the former. The diameter of the dome within is only about a couple of feet less than that of the Treasury of Atreus; but, from being demolished at the top and the light coming in, it seems of much smaller proportions, and is far from being so impressive. There is no indication of any second chamber, which detracts from its importance. The dome is constructed on the same principle as the other—that is, with the courses placed horizontally, ignoring the principle of the arch. In relation to the Treasury of Minyas, at Orchomenos, Pausanias thus expresses himself: "They say that the topmost stone holds together the whole building." The evidence of these monuments at Mycenæ are pretty clear that this was a mere supposition, and had no foundation. The probability is that the principle of the arch in building being more widely known at the time of Pausanias, it had been adopted as an explanation without any inspection of the dome. In this Second Treasury the inner stone of the lintel over the doorway is again the largest stone in the building, and a course of large stones the same depth as the lintel is carried all round on the same level. A glimpse of one or two of these stones is seen through the doors in the illustrations. The size of the lintel-stone in this case is 20 ft. long, 7 ft. wide, and 18 in. deep. Some call this monument the Tomb of Agamemnon, since Dr. Schliemann's discoveries have given some colour to the idea that that hero was buried within the Acropolis. There is now a tendency to call this the Tomb of Cassandra. Again, Pausanias states that there was also a tomb of Clytemnestra and Ægisthus, and that they were "buried at a little distance from the walls, for they were not thought worthy of burial within the walls, where Agamemnon and those that fell with him were interred." So the names of these two persons are now given by some to it, and its short distance to the outside of the walls of the Acropolis is taken as the interpretation of what Pausanias meant. The absence of any inscription leaves the matter entirely unsettled. This also holds true in regard to all Dr. Schliemann's discoveries at Mycenæ. Amongst them he has not found anything in the form of letters or writing—they clearly belong to a pre-School-Board period. They have been called "Treasuries," from the days of Pausanias, and I have only repeated the name in relation to them, but I doubt the accuracy of the signification. The Pyramids of Egypt have long been looked upon as "Houses of Treasure" by the Arabs, and it was to get at the vast wealth within, supposed to have been stored up by the Pharaohs, that one of the Caliphs was at such trouble and expense in breaking a way into the great Pyramid of Ghizeh. The amount of gold objects, which it was the custom in ancient times to inter with the dead, a custom which Dr. Schliemann's late discoveries so well illustrate, may have been one of the causes which led to this commonly-received notion. The people about the locality call these

monuments "Furni," or ovens, for they are exactly the shape of the ovens to be seen in every village at the present day.

THE THIRD AND FOURTH TREASURES.

I send drawings and sketch plans of these two smaller Treasuries. They may have been drawn before, but if so the representations of them are not familiar to archaeologists; and they are very important as bearing on the two larger and more important monuments of the same kind, more particularly as they belong to a distinct style of architecture from that which we know as the classic school of ancient Greece. Anyone coming for the first time on one of these two smaller monuments would be quite justified in stating that it was a Cromlech, or what the French archaeologists call a Dolmen, that he had found. As there are a number of stones covering a passage, of which there are similar numerous remains in Brittany, and which are known by the descriptive title of an "Allée Couverte," that would be a more exact phraseology to use in relation to those at Mycenæ. In fact, I sketched the one called the "Fourth Treasury" under the idea that it belonged to what we call "Druidic" or "Rude Stone Monuments," and I believe that I might have also sketched the Third example without discovering their relation to the two larger Treasuries, had I not made a sketch plan of the arrangement of the stones when its real character became apparent; for I discovered the remains of the dome behind, the stones indicating this point being partly covered with earth, weeds, and stones. On finding this to be the case I returned to the other, of which I had already made the sketch plan, and found there enough to show that it also had only been a doorway to a circular construction beyond, but all so rough that it would be difficult to say whether it ought to be classed among rude stone monuments or placed in a higher scale of construction. The Third Treasury has a passage about 8 ft. or 7 ft. wide, and about 16 ft. long. Three courses of stone are visible on each side, which slope very slightly inward to the top. Most probably other courses are concealed below with accumulated rubbish. Over these are three stones in the form of lintels, the outer one being about 13 ft. by 9 ft., and the inner 11 ft. by 7 ft. 6 in. As in the two larger Treasuries, the inner stone of the lintel is here the largest. It was when drawing this stone in the sketch plan I noticed that what I must call its inner contour was a segment of a circle. On removing the weeds, the stone at one side presented a continuation of the same circle; and, on looking below, the edges of the stones are found to be bevelled to the angle of the dome. This angle is visible in the sketch, at the inner corner of the passage. The continuation of the circle is partly suggested by dotted lines on the sketch plan. The stones have been all more or less hewn; the walls of the doorway are rectangular but irregular. Their character will be better made out from the illustration and sketch plan than from any description. The dome would be nearly 20 ft. in diameter. The doorway in this case enters from the west. The Acropolis of Mycenæ comes in on the right hand in the distance, and Mount Agios Elias on the left.

The stones of the Fourth Treasury are much ruder, and have received but little work on them from a tool. There are two oblong sockets on the upper surface of the outer lintel; but, as they evidently do not belong to the original design, they are not included in this account. The doorway is so filled up with stones and rubbish that one has to crawl, in a very undignified way, to see the interior of the ruins. The passage now terminates below with a wall of small stones, under the inner lintel, as given by the dotted line on the sketch plan. This inner lintel-stone, as in all the other three, is again the largest block in the monument; and it was only upon returning a second time that I noticed the regular cutting upon it, which showed that it had fitted into the side of a circular construction. No other stones are now visible as belonging to the dome; perhaps an excavation might reveal something of the kind. The largest stone in this case is about 12 ft. by 8 ft. There are six stones in all covering the passage, and one is laid across resting on its edge, the whole passage being a little over 20 ft. long. The entrance in this structure was from the south.

A natural question arises regarding these monuments, as to whether they present a development from a primitive type to a higher, or the reverse. The first impression would be that the rudest of these remains has been the earliest, and that the Treasury of Atreus gives us the most perfect condition which this manner of building reached. Most probably this is the correct opinion; but we must not be too confident. The Treasury of Minyas, if we had details of it, would no doubt throw light on the matter; and perhaps the explorations now going on at Olympia may give us some knowledge of the Treasuries which Pausanias states to have been erected at that place. The tombs at Kertch are square or oblong in plan; in this they resemble the tomb of Regulini Galeassi, in Etruria. The excavation lately made in the ancient Via Sacra at Athens has exposed tombs of all kinds, some of them being simple stone kists of the rudest stones. I have seen a Mohammedan funeral in Pera where the body was shoved, without a coffin, into an old brick-vaulted grave, where the remains of another body could be seen. On the slope of the Mount of Olives, at Jerusalem, I have watched a Jewish burial, where a shallow trench only was dug; but before covering the body with earth, as there was no coffin, a few stones were placed over the corpse. This was only a form, but it was meant as a pledge of the construction, if their poverty would allow it, of the vaulted chamber, the hollowed-out place of death. This was the typical idea of a sepulchre; and Homer's words, when he calls it the "hollow grave," prove that the type is as old as his time. These ancient tombs at Mycenæ are interesting as showing us one of many architectural forms which this idea gave birth to in the past.

At a Board of Trade inquiry, held at Shields last week, respecting the stranding of the screw-steamer Consett, it was decided that the master, James Tait, was wholly to blame, and the Court suspended his certificate for two years.

Major W. Cornwallis West, in a letter to the Mayor of Wrexham, has pointed out the causes of the financial failure of the Art-Treasures Exhibition lately held in that town. He thus enumerates them:—First, cost of building and interior fittings, over and above what was originally intended; second, too cheap an admission, consequent on arrangement with railway companies; third, stagnation of trade, and consequent paucity of visitors; fourth, losses on grand concerts; fifth, miserable result of sale of effects at the Exhibition. Major West comments upon the fact that, notwithstanding the attractions which were offered by the contemplation of some of the rarest and most beautiful objects of art in the country, and also by daily performances on the grand organ and by an excellent band, the mass of the people were decidedly backward in their patronage. Deducting those who constantly entered the building as season-ticket holders, it is considered that no more than 50,000 persons, if so many, visited the Exhibition during the four months of its existence; and this in a town which, besides being itself the centre of a population of 50,000, is in close proximity by railroad to Chester, Birkenhead, Liverpool, Oswestry, Shrewsbury, and easily accessible to the whole of Wales, with its population of over 1,000,000.

MUSIC.

ROYAL ITALIAN OPERA.

This establishment opened on Tuesday evening with a performance of Verdi's "Un Ballo in Maschera." We have already given a summary of Mr. Gye's programme of arrangements for the new season, and have therefore now only to speak of Tuesday's inauguration thereof.

The opera selected for the occasion has been rendered so familiar by frequent repetitions, and the cast of Tuesday was so similar to that of past seasons, that little comment is required now. Mdlle. D'Angeri, as Amelia, sang with much declamatory feeling, particularly in the scene at the beginning of the third act, and the pathetic appeal to Renato, "Morri, ma prima in grazia." Mdlle. Bianchi was the same graceful page Oscar as before, and was encased in the ballata, "Volta la terra," and the canzone, "Saper vorreste." Madame Scalchi's fine voice and good style were again advantageously displayed in the music of the sorceress, Ulrica; Signor Pavan, as the Duke, sang with good effect in several instances; and Signor Graziani gave the same powerful rendering of the character of Renato as heretofore, and was encased in the aria "Eri tu." Subordinate parts were filled by Signori Capponi, Scolari, Raguer, Rossi, and Manfredi.

The ball-room scene displayed the usual splendour, and included some excellent solo dancing by Mdlle. Girod.

Previous to the opera the National Anthem was given, according to usage. Signor Vianesi, who conducted, was welcomed on his reappearance in the orchestra.

The interior of the theatre has undergone entire renovation, and presents a brilliant appearance.

For Thursday "Fra Diavolo" was announced, with Mdlle. Bianchi as Zerlina and M. Capoul as the bandit hero; and this (Saturday) evening "La Favorita" is to be the opera, with the first appearance in England of Signor Gayarré, as Fernando.

Herr Brahms's new symphony in C minor has already been spoken of, on the occasion of its first performance in England, by the Cambridge University Musical Society, on March 8, when Herr Joachim took his degree of Doctor of Music at that University. The work was given, for the second time in this country, at the Crystal Palace on Saturday, when its many and high merits were finely brought out by the admirable performance which it received. The passionate agitation and serious feeling of the first "allegro," the exquisite stream of sustained melody of the "andante," the simplicity of the opening of the following "poco allegretto," contrasted with the changed tempo and greater elaboration of its second portion; and the clear, melodious beauty and dignified joyousness of the finale, with its highly effective closing "coda"—all these characteristics, and the many charming and varied traits in the orchestral treatment, were more apparent than they could possibly be on a first hearing of a work of such extent and so high a class. Still further acquaintance, indeed, is desirable with this fine symphony, which is unquestionably one of the most important of recent additions to orchestral music. At the same concert Miss Dora Schirmer (from Leipzig) made a successful first appearance here in a performance of Mendelssohn's second pianoforte concerto (in D minor). Miss E. Thornton (also a first appearance here) was well received in her rendering of Mozart's aria "Dove sono" and Sir J. Benedict's song "I'm alone," the other vocal pieces having been Mozart's air "Dalla sua pace," and Mr. Sullivan's song "Sometimes," both finely sung by Mr. E. Lloyd. The concert began with Cherubini's overture to "Fanciulla," and closed with the ballet-music from M. Gounod's "La Reine de Saba." Mr. Manns conducted with careful zeal.

As usual, there were performances of sacred music on Good Friday at the Crystal Palace and the Royal Albert Hall. At the former place the programme consisted of a selection from various composers, the vocal solos rendered by Mesdames Lemmens-Sherrington and Patey, Miss Robertson, Mr. E. Lloyd, Mr. Barton McGuckin, Signor Foli, and Mr. Patey. Mr. Manns conducted. At the Albert Hall "The Messiah" was given, conducted by Mr. Barnby, the choruses rendered by the fine choir associated with the establishment. The solo singers were Mesdames Sherrington and Antoinette Sterling, Mr. Shakespeare, Signor Foli, and Mr. G. Fox.

Easter Monday was also celebrated musically at the Royal Albert Hall by a miscellaneous concert, given by Messrs. Nordin and Peacock, of Wells-street, Oxford-street, in aid of the funds of the Cheesemongers' Benevolent Institution. Mdlle. Chiomi, a young soprano vocalist, made a successful début.

The first concert of the fifth season of the Royal Albert Hall Amateur Orchestral Society is to take place at St. James's Hall this (Saturday) evening, when the performances will be given in aid of the funds of the London Society for Teaching the Blind. Mr. George Mount is the conductor.

On Wednesday next the Bach choir will repeat the performance of the composer's great mass in B minor ("Die hohe Messe"), as given by the same institution last year. On April 28 the same choir will give another concert of great interest, special features being the first performance here of Bach's fine motet "Ein feste Burg ist unser Gott," and Gade's cantata "Comala." The programme of the evening also includes Handel's coronation anthem "The King shall rejoice," an eight-part anthem by the late Sir W. Sterndale Bennett, and the "Sanctus" from Palestrina's "Missa Papæ Marcelli."

On Saturday afternoon next the New Philharmonic Concerts will inaugurate their twenty-sixth season, again under the joint conductorship of Dr. Wylde and Mr. W. Ganz.

The following appeal has been made by Mr. John Thomas in favour of a permanent musical scholarship for Wales:—"In consequence of the remarkable results of the first three years of the London Welsh Choral Union Scholarship at the Royal Academy of Music I ventured, in my address to the subscribers, to suggest a much more important and comprehensive scheme—viz., the establishment of a permanent musical scholarship for Wales, to be competed for by candidates from all parts of the Principality, and to be open to vocalists and instrumentalists. Since the publication of the address I have received so many subscriptions and promises of support in furtherance of the proposed scheme that I am induced to make a general appeal to my country in aid of so national a cause. Not less than £1000 will be required to endow the scholarship; and I address myself specially to choral societies and lovers of music to support my efforts. Should these efforts be crowned with success, the scholarship will be of immense advantage to all young rising musicians in Wales, and be the means of rapidly raising the general standard of musical excellence throughout the Principality. The scholarship is intended to give the successful candidate three years' musical education at the Royal Academy of Music; so that, at the termination of the period of each scholarship, another educated musician may be added to those who have already distinguished themselves, and who are indebted to that institution for the high position they occupy in their profession."

THEATRES.

OLYMPIC.

Mr. Charles Reade's promised drama, "The Scuttled Ship," forms the Easter attraction at this house. It is founded on the well-known novel, by himself and Dion Boucicault, entitled "Foul Play" (not now for the first time dramatised), and deals professedly with "those abuses of maritime insurance which have since been so fully exposed by the patriotic efforts of Mr. Plimsoll." The particulars of this controversy are too fresh in the minds of the public to require any comment here. We have but to chronicle the complete success of the drama, which abounds in effective melodramatic situations, and to augur for it a long and prosperous career. The story, which is somewhat complex in its working, may be reduced to simple elements. In the prologue Robert Penfold, a clergyman (Mr. Henry Neville), is wrongfully accused and afterwards convicted of forgery, really perpetrated by Arthur Wardlaw (Mr. Forbes Robertson), the son of Mr. John Wardlaw (Mr. Bauer), a wealthy City merchant. The scene is then transferred to Hobart Town, and presents Robert as a ticket-of-leave man, desperately in love with Helen Rolleston (Miss Bella Pateman), who is on the eve of her departure for England, in order to celebrate her nuptials with Arthur Wardlaw, to whom she is affianced. She sails in the *Proserpine*, whither she is followed by Robert, who devotes himself to the lady's welfare and preservation. But the ship is doomed to destruction. The captain and mates have been suborned by the owner, Arthur Wardlaw, who, eager for the heavy insurance money (the ship is supposed to be richly freighted with gold, which, however, is surreptitiously stowed away in another vessel), has ordered it to be "scuttled." The ship goes down. The hero and heroine are thrown on a desert island, from which they are ultimately rescued. Robert obtains the hand of Helen Rolleston; his innocence is established, and the infamous practices of Arthur Wardlaw are exposed. The piece is well mounted; the mechanical effects being admirably contrived. The acting is throughout good. Mr. Henry Neville gives a masterly rendering of the hero, Robert Penfold, his manly bearing and exceeding "naturalness," which is the acme of art, contributing greatly to the success of the experiment. Miss Bella Pateman is a charming representative of Helen Rolleston, acting throughout with grace and naïveté, and exhibiting, when occasion demands it, a display of emotional power that stamps her a true artiste, and augurs well for her future career. Mr. Pateman is excellent as Wylie; Mr. Charles Ashford makes a successful first appearance in the character of Welsh; Mr. Forbes Robertson throws considerable energy into the unthankful part of Arthur Wardlaw; and last, not least, Mrs. Seymour is irresistibly funny as the loquacious landlady, Nancy Rouse. The minor characters are efficiently rendered.

As to the other houses, French drama is at present in the ascendant, and the various managements accept new adaptations in the place of original dramas. English genius is supposed to be non-existent, or is arbitrarily placed in abeyance. Ambition, indeed, in this direction is brought to a dead stop, and hope perishes of that which makes the heart sick.

The new piece at the Prince of Wales's is of Parisian origin. Mr. Saville Rowe has gone to M. Octave Feuillet for the plot and idea of "The Vicarage," to whom we are indebted for a dramatic idyll, entitled "Le Village." The adaptor has completely Anglicised the story, though keeping closer to the dialogue than usual in such cases. The manners are exceedingly simple. We have first the Vicar and his wife engaged in an innocent game of chess, in which the latter is checkmated. A former rival of the husband appears on the scene—George Clarke, C.B. (Mr. Kendal)—and renews in the mind of Mrs. Haygarth (Mrs. Bancroft) the incidents of thirty years ago. But, as she observes, signal changes have taken place in her former lover's character. His tastes have become decidedly artificial—nothing of the natural man remains. Haygarth himself (Mr. Arthur Cecil) is compelled to admit a serious difference between his lot and that of his travelled friend. The latter, by constant exercise is still in robust health; the former, living a sequestered life, has grown prematurely old. At first he determines on altering his way of life, but is providentially withheld, by the kind influences of his wife's well-proved affection, from taking the fatal step. On the other hand, the returned wanderer is converted by the sight of the parson's domestic happiness, and ultimately determines on following their example. The subject is far from new on the English boards; many, many years ago we saw it acted on a provincial stage, and with good effect. The cast upon the present occasion is almost perfect, and several of the simple situations abound in pathos. The performance concluded with Mr. Boucicault's "London Assurance," reduced to four acts. The comedy was delightfully represented.

At the Criterion we meet with Mr. James Albery as an adaptor, transforming "Les Dominos Roses" into "The Pink Dominos," under which name it appealed to an English audience on Saturday. The fun consists in the dominos in question being worn by two ladies, who are testing the comparative fidelity of a town husband and a rustic one. The incidents belong to the life of Cremona habitués, and are involved in accidental perplexities, owing to unexpected parties interfering with the plot. Much of this is caused by a saucy lady's-maid and a volatile young lawyer, the nephew of a precise and prudish old lady, whose reputation becomes endangered by the chances of the frolic. Mr. Albery has in no way mitigated the comic element or cared to put a moral facing on the situations. He has rather exaggerated the fun by all available means. The characters are well suited to the performers. Mr. Wyndham as Mr. Charles Greythorne, Mr. H. Standing as Sir Percy Wagstaff, Mr. H. Ashley as Joskin Tubbs, and Miss Fanny Josephs as Lady Mary Wagstaff, are all entitled to the highest commendation. The remaining parts, too, are all competently filled. The mirth culminates to the end, and the curtain falls on a scene of uproarious hilarity.

At the Folly Mr. Farnie and Mr. Reece have combined in the task of preparing an extravaganza, under the title of "Oxygen; or, Gas in Burlesque Metre," founded on the "Docteur Ox" of Jules Verne and Offenbach. The scene of the fun is placed in a supposed locality called Keekendone, in Flanders, where dulness is at all seasons regnant. The writers, having determined on making a diversion, go in audaciously for the utmost amount of extravagance. Prince Fritz (Miss Lydia Thompson) and other students—to wit, Hansel (Miss Duncan), Otto (Miss Marie Williams), and Dr. Ox, professor of chemistry at Gottingen (Mr. Philip Day), have resolved by a scientific experiment to produce an excitement. It succeeds to admiration; the gas administered produces marvellous effects. At last it literally explodes, and the merriment ceases. There is a dazzling brilliancy about the piece, enough to secure its permanent popularity.

It is proposed to place a bust or statue of the late Mr. John Oxenford in the vestibule of Drury-Lane Theatre.

MUSICAL PUBLICATIONS.

Messrs. Litolf and Co.'s cheap quarto editions of the pianoforte classics are still in progress. Recent numbers comprise some of the most important works of Chopin—his concertos, scherzos, fantasias, rondos, and smaller pieces—all beautifully engraved and printed, and issued at a cost that would, only a few years ago, have been thought below any possibility. Stephen Heller's "Dans les Bois" ("Im Walde"), the three series, op. 86, op. 128, and op. 136—altogether twenty-one exquisite pieces, full of original and graceful thought—are also included in this remarkably cheap series.

Mr. W. Czerny has lately brought out several works, vocal and instrumental. Among the former are some pleasing songs. "The Three Wreaths," by Clara Gottschalk; a characteristic "Spinning Song," by J. B. Wekerlin; the "Steersman's Song," from Wagner's "Flying Dutchman;" and a graceful "Serenade" (with violoncello in addition to the pianoforte accompaniment), by Tartaglione. Mr. Czerny's octavo edition of celebrated choruses for ladies' voices has reached a second series. These cheap publications comprise a varied selection of concerted pieces. "Momens de Loisir" is the title of some transcriptions of popular and classical music, arranged by Mr. Czerny himself for violin (or violoncello) and pianoforte. "Doux Espoir," romance, by Edouard Marlois, and "Novellette," by the same, are graceful pianoforte pieces, of very moderate difficulty—also published by Mr. Czerny.

The "Amy Polka-Mazurka," by G. S. Pearson (Bussell and Co., Dublin), is a spirited piece, in which the dance rhythms implied by the title are well sustained.

A NEW SOURCE OF THE NILE.

The *Daily Telegraph* publishes a despatch from Mr. Stanley narrating some important discoveries which he has made.

Before reaching the Victoria Nyanza he struck and followed from its watershed in Urumi a new stream, the Shimeeyu, which, as a feeder of the Victoria 290 miles in length, and of volume equal to that of the Thames, at once became the highest and truest source of the Nile. This took the course of the noble Egyptian river up to 5 deg. S. or farther, and secured the palm of merit to Stanley as the discoverer of what appeared the real cradle of the Nile. But in the present despatch he gives reason to believe that he has made a still more important revelation; and that, although the Shimeeyu may, perhaps, yet retain the distinction of being the most southerly feeder of the Nile, the Kagera, Kitangule, or Ruvuvu—for by all these names has the channel been known since it was crossed by Speke and Grant in 1863—will really prove the largest and longest of the upper tributaries of that vast Nyanza which, by creating the Victoria Nile, does most to supply the Egyptian river. Speke and Grant crossed the stream near its outflow into the Victoria Nyanza, but failed to attach to the Kagera or Kitangule the dignity which it merits as a principal, if not the chief, fountain-stream of that mighty river whose secrets they were engaged in unveiling. This task has now been to a great extent discharged by Stanley, during his journey last summer from King Mtesa's country to Ujiji; and in the present communication he gives particulars of this very important new tributary of the Nile, which go far to alter our ideas of the region between the Victoria and Albert Nyanzas and Lake Tanganyika; while they add a large though yet undefined body of water to the marvellous system of inland seas which fill Equatorial Africa, and leave it still eminently possible that the Nile takes its ultimate rise in tracts as far off as Manyema, or even a yet more distant spot. Henceforward, however, we must not call this interesting stream by any one of its native appellations. The Kagera, or Kitangule, which flows into the Victoria Nyanza at Uogoro, has received from our explorer—who has traced its course through 310 miles, and found it still wearing the appearance of coming from at least an equal distance—the name of "Alexandra Nile." By that illustrious title Mr. Stanley begs that the river, with its reservoir, may be hereafter known; and the details of it which he forwards constitute, it will be allowed, a fair claim to so proud a distinction. In the map which he transmits the course of the Alexandra Nile may be tracked upwards from the point where the Kavare enters it, to the Morongo falls, where the lagoon-like Windermere empties itself into the narrower channel; and so past the hot springs of Mtagata, the town of King of Rumanika, and the many lakelets which are formed on the way from Kishakka to the spot below the Mount of Observation, where it comes down on either side of a large island that fills up the eastern extremity of a Nyanza to which Mr. Stanley's map gives a length of about sixty miles and a breadth of about thirty, and which has been hitherto only hinted at upon the maps by a small lake marked "Akanyara." His furthest point westward appears to have been the Mount of Observation, from which the high hills of Ugufu shut out the Nyanza behind it; but he had found the Alexandra Nile maintaining a remarkable depth and swift current, while his guide assured him of the remaining particulars. If they be correct, the Alexandra Nyanza is half as large as the Albert itself; and the Alexandra Nile runs through it, entering at the western extremity, in Ruanda, from a country as yet unknown.

Captain H. Talbot Price has been chosen Governor of Knutsford Gaol, in the room of the late Mr. Gallop, who held the post for more than thirty years.

The Corporation of Falmouth have obtained an order from the Board of Trade for the establishment of an oyster fishery in Falmouth harbour. The order gives the Corporation power to declare a close season for the whole of the harbour.

Lord Beaconsfield was present on Monday at the Bucks Quarter Sessions, held under the presidency of Lord Cottesloe, and took part in a discussion upon cattle-plague regulations, with regard to which a memorial was presented by the Bucks Agricultural Association.

The Session began on Feb. 8, and up to the present time six Acts have been passed. The first received the Royal assent on the 12th ult., and the second on the 16th; the others were passed on the 23rd ult., and chapter sixth on the 27th. Two relate to the Consolidated Fund, and two are on Treasury and Exchequer bills and bonds.

The Manchester City Council has received from the Derby Portrait Committee, of which Lord Chelmsford is the chairman, a portrait by Desanges of the late Earl of Derby. As his Lordship presided over the Cotton Famine Relief Committee in that city, the Council has resolved to place the likeness in the new Townhall.

Judgment has been given in the case of the ship *Albania*, which was wrecked on the French coast through the master having mistaken the light on Grimes for that at Dungeness. The Court considered the master in default, and suspended his certificate for six months. At the same time they recommended the Board of Trade to grant him a first mate's certificate for that period if requested.

LIEUTENANT ZUBOVITZ SWIMMING THE DANUBE AT THE PRINCE RUDOLF BRIDGE, VIENNA.

THE VOLUNTEER SHAM FIGHT AT DUNSTABLE ON EASTER MONDAY: THE LAST POSITION.

THE EASTER MONDAY VOLUNTEER REVIEW.

The annual Review and Sham Fight of the Volunteer Troops in or around the Metropolitan District took place on Monday, in the neighbourhood of the ancient town of Dunstable, some forty miles north-west of London. This place, which was formerly more conspicuous in English history than it has been for some generations past, is situated at the foot of the Chiltern Hills on their northern side, just over the boundary line that divides Bedfordshire from Hertfordshire. It is within the county of Bedford, and eighteen miles from Bedford town. The Romans called it *Magiovitum*, which is probably a Latin form of the original Celtic, *Maes Gwyn*, or the White Building—a name very likely to have been suggested by the aspect of the old British excavations in the sides of the chalk downs; for every geologist is aware that the Chilterns, extending from the Thames in Buckinghamshire to the southern part of Cambridgeshire, are a branch of the main chalk formation that assumes such prominence in Wilts and North Hants, in Surrey, Kent, and Sussex. It may be remarked, in this connection, that nature seems to have indicated these magnificent chalk ranges, almost surrounding Middlesex and London, within an hour's railway ride, as the proper field of defensive military operations for the protection of our populous and wealthy capital city; and it is therefore most desirable that every convenient fighting ground along the outer slopes of those hills, as well as the coast range of South Downs, should be carefully studied by our best strategists, and should be made familiar both to our regular Army and to our Volunteers, by such exercises as those of Monday last. The Romans, who had only to provide against the approach of an enemy to London from the north-east or north-west, seem to have regarded the position of Dunstable, or *Magiovitum*, as one of great military importance. It stands at the intersecting point of the two great Roman roads, afterwards called by our Saxon forefathers *Watling-street* and the *Icknield Way* (perhaps this name refers to the Icen), leading respectively through the Midlands to Chester, and through the Eastern Counties to the Norfolk shore. A considerable fortress was erected here, the advanced guard of the Roman *Verulam*, or *St. Albans*, for which they cared more than for London. But there had been, to judge from the huge ramparts of earth still remaining, extensive British fortifications, of a circular form, previously to the final Roman conquest. Near the village or hamlet of *Totternhoe*, an hour's walk eastward of Dunstable, is a steep mound of earth, with the traces of an old fosse and rampart around it, which is commonly called "*Totternhoe Castle*." This was made the central point of tactical movements in the sham fight on Monday, when a hostile force was supposed to have marched on Dunstable from the Stanbridge Ford railway station, on the London and North-Western branch line, to that town from Leighton Buzzard. The views presented in two of the Engravings on our front page will give an excellent idea of the position of Dunstable and *Totternhoe*, and of the pleasant landscape scenery in that neighbourhood, with the graceful outline of the Chilterns to close in the background. We give also two or three sketches of the pieces of ancient building and other monumental antiquities to be seen in Dunstable. There is an interesting old church, dedicated to St. Peter and St. Paul, but in great need of restoration. Only the Norman nave and aisles are now remaining of the original Priory Church, founded by King Henry I.; there are some portions of Early English and Decorated Gothic; and a Norman arch, in the front, is filled with perpendicular tracery. It was in the Lady Chapel of this Church, in 1533, that Archbishop Cranmer pronounced the divorce of Queen Catharine of Arragon, whom he had visited at her residence of *Amptill*, in Bedfordshire, and had solicited in vain her consent to the divorce. The Gateway of the old Priory, of which we give an illustration, was passed through by Cranmer when he entered the church to perform that very questionable act of subservience to King Henry VIII. Another old gateway, shown in one of our sketches, was once the entrance to the borough gaol, in the old market-place of Dunstable. The stone bearing a sculptured figure of a key and its staple, which is now stuck in the wall opposite the Priory in Church-street, on the site of King John's Royal Palace of Kingsbury, was dug up, a hundred years ago, in some old foundations near the spot. Its probable signification, like that of the "brazen nose" on the door of a College at Oxford, is a sort of pun on the name of Dunstable, or the second part of that name, the first syllable being referred to the fame of a mythical hero named "*Dun*," a formidable robber and man-slayer, who is not more of an historical personage than the *Dun Cow* slain by Guy of Warwick. The borough arms, however, as displayed in a window of the Town-hall, preserve the memory of this quaint ancestral conceit of the townsfolk that there was once a "staple" to which the mighty "*Dun*" used to tether his horse (but why not a "staple?"); and that Dunstable has no better origin for its respectable name.

The proceedings of the volunteer forces on Monday are to be shortly related, as we have made them a subject of one of our principal illustrations, besides representing a variety of lesser incidents. The troops assembled, under the general orders of Major-General Stephenson, C.B., to the number of above 13,000, which were formed into two separate divisions—one of 5700, under Colonel Sargent, C.B., to represent the attacking force in the sham fight, and the other of 7500, commanded by Colonel Lord Abinger, which was supposed to be the defending force. The first brigade of Colonel Sargent's division was commanded by Colonel Fitzroy, and was composed as follows:—St. George's, Major Waller, four companies, 264; London Irish, Lieutenant-Colonel Ward, eight companies, 450; 37th Middlesex, Major Richards, six companies, 401; 39th Middlesex, Lieutenant-Colonel Radcliffe, six companies, 351; 46th Middlesex, Colonel Routledge, four companies, 311, making the total strength of the brigade 1767. This number was about 500 short of the estimated strength. In this brigade the 37th Middlesex set a notable example, the men being thoroughly equipped with great-coats, leggings, haversacks, and water-bottles. The second brigade, under Colonel Burnaby, C.B., consisted of the 1st London Engineers, Major Drew, four companies, 299; 2nd A.B. Middlesex, Lieutenant-Colonel Warner, six companies, 336; 7th Surrey Rifles, Major Porter, and 13th Kent, four companies, 320; 1st A.B. Tower Hamlets, Lieutenant-Colonel Sir T. F. Buxton, six companies, 397: total strength of brigade, 1352, being 200 under the estimate. The 1st London Engineers, in their smart scarlet tunics, and carrying great-coats and water-bottles, were well worthy of the leading position. One of the principal features of the brigade was the 2nd Administrative Battalion, in their grey worsted busbies for head-gear. The totals were: Colonel Davis, Grenadier Guards, commanding 36th Middlesex, Lieutenant-Colonel Gordon Ives, eighth company, 576; Victorians, 2nd A.B. Herts, 4th A.B. Surrey and 3rd A.B. Essex, Lieutenant-Colonel Davis, 711; 13th Surrey, Northampton, Lieutenant-Colonel Bevington; 3rd London, Lieutenant-Colonel Laurie, nine companies, 505: total strength of brigade, 1966. This brigade had two flank battalions, the Paddington men being in the

van, and the scarlet-coated City corps bringing up the rear. The third brigade of the first division was commanded by Lieutenant-Colonel Davies, and was made up of quotas from Middlesex, Surrey, Essex, Herts, Northampton, and the City of London. Though mere fractions of many different battalions had been brought together, they formed a very creditable brigade. The 36th Middlesex was the strongest battalion, having eight companies of thirty-two files, and a body of pioneers under Lieutenant-Colonel Gordon; while the 3rd London, in their scarlet tunics, which they adopted at the outset of the volunteer movement, were nine companies strong, under Lieutenant-Colonel Laurie. There was a good company of the Victoria Rifles, the 4th Administrative Battalion Surrey, and the 2nd Administrative Battalion Herts.

In Lord Abinger's division, the first brigade was placed under the command of Colonel Fletcher, of the Scots Fusilier Guards. This was quite a "Grey Brigade," being composed of the London Scottish, under Major Lumsden; the 19th Middlesex, six companies, under Major Oxley; six of the Queen's Westminsters, under Major Tyler; four of the 29th Middlesex, under Lieutenant-Colonel Brown; four of the Artists' (38th), under Lieutenant-Colonel Leighton; and two of the 2nd or South Middlesex. Lord Ranelagh's second brigade was headed by the 33rd Lancashire, a Manchester battalion, twelve companies strong, of stout, well-drilled men; then followed the 2nd Oxford, in red tunics and black busbies, six companies; the 9th and 18th Middlesex, under Major Little; the 1st Herts, four companies; and a six-company battalion, from Dunstable—the 1st Administrative Battalion Beds—under Major Benning; and the Tower Hamlets Rifle Brigade, under Lieutenant-Colonel Mapleson, brought up the rear of this brigade. Colonel Earle's third brigade of this division was made up of five companies of the 1st Middlesex Engineers, under Lieutenant-Colonel Ransome; four companies of the London Rifle Brigade, and two of the 21st Middlesex (her Majesty's Customs), under Lieutenant-Colonel Haywood; eight companies of the 7th Administrative Battalion of Middlesex; four companies of the 2nd City of London, under Lieutenant-Colonel Vickers; one good company of the 40th Middlesex (Central London Rifle Rangers); and a company each of the 13th and 47th Lancashire and the 20th Middlesex, under Lieutenant-Colonel Charley, M.P. The ground was kept by a squadron of the Royal Bucks Yeomanry, aiding the mounted county police, under Major Warner, the chief constable.

The sham fight began shortly before noon, the attacking force of Colonel Sargent, quartered the night before at Leighton Buzzard, having advanced from Stanbridge Ford. Lord Abinger's force had partly taken possession of the mound called *Totternhoe Castle*; but this division was fiercely disputed, and the battle raged some time on the steep hillside and around the village below. The spot chosen for the sham fight was well suited, both for seeing and manœuvring. All was over in about two hours, but in that time the cartridge-pouches were most of them emptied. Major-General Stephenson stopped the contest at two o'clock, and the force assembled in quarter-distance column for the march past, in which there was nothing noteworthy. First went past the four 6-pounder guns of the Honourable Artillery Company, which had fired only one round, being short of ammunition. Then came the divisions led by Colonel Lord Abinger and Colonel Sargent. The former wheeled off to the left, and made their way across the downs to Stanbridge Ford, and the Dunstable division returned to the refreshment-field. The return trains began to run at four o'clock, and the whole force was dispatched before eight o'clock, the utmost regularity being observed on both the North-Western and Great Northern lines. There was no hitch or mishap of any kind, either to the volunteers or to the vast crowd of spectators.

At Dover also on Easter Monday there was a sham fight and review of the troops in garrison and the local volunteers. The site was in the neighbourhood of Fort Burgoyne, a fort of considerable strength, erected a few years since for the purpose of commanding the roads from Deal.

Five hundred artillery volunteers, belonging to the 1st Surrey and 9th Kent, have been at Sheerness for a short period of garrison duty and shot practice, the men being commanded by Lieutenant-Colonel Hope, V.C., and Lieutenant-Colonel Thomas Hughes. The Duke of Teck, honorary Colonel of the Surrey regiment, arrived at Sheerness on Sunday evening, and next day witnessed the practice.

A lad named Studd was struck dead by a flash of lightning during a severe thunderstorm, whilst sheltering under a haystack on Nacton-heath, near Ipswich, yesterday week.

The First Lord of the Admiralty has conferred the good-service pension of £150 per annum for marine officers upon Colonel Robert Boyle, C.B., R.M., vacant by the death of Colonel G. S. Digby, C.B.

The president of the council of the Social Science Congress has held a meeting with the representatives of the various public bodies in Aberdeen, and arranged that the annual congress shall commence its sitting on Wednesday, Sept. 19.

The memory of the late Right Hon. T. Sotheron-Estcourt is to be perpetuated by a fountain and statue, erected in the market-place, Devizes. A committee, of which Earl Nelson is chairman, has been appointed to carry out the arrangements. Mr. Woodyn has prepared the design.

The Marquis of Tavistock, M.P. for Bedfordshire, was present on Tuesday, at Luton, on the occasion of the opening of a bazaar by the Marchioness of Tavistock. Replying to an address by the Mayor and Corporation of Luton, he expressed a hope that the town would shortly be represented in Parliament.

At the annual meeting of the subscribers to the Wolverhampton Orphan Asylum on Monday the chairman, Mr. W. H. Rogers, announced that during the present year a noble personage had placed in his hands £1000, telling him to do what he liked with it for the benefit of the institution. It was also stated that during the past year a lady residing in the county of Salop had given £5000 to form a "Shropshire Trust Fund" to provide for seven orphan children in perpetuity. Including that sum, the subscriptions, donations, and bequests during the past year had amounted to £12,488.

Among the reports by her Majesty's Secretaries of Embassy and Legation for the year 1876 there is one by Mr. Phipps, giving an exhaustive account of the financial condition of Spain. It concludes as follows:—"The Spanish Treasury is undoubtedly in a moribund condition; the laws regulating financial responsibility are eluded, and not sufficiently severe; there is no administrative career, properly speaking, as admission to its ranks is obtained by backstairs influence—by that of Ministers, Senators, Deputies, and all who are in a position to impose their wishes. Experience shows that an influential person can conceal his wealth and defraud the revenue with as much impunity as an employé, who is confident of the protection of his superiors, can commit whatever abuses he may choose."

OBITUARY OF EMINENT PERSONS.

SIR W. MAXWELL, BART.

Sir William Maxwell, sixth Baronet, of Monreith, in the county of Wigton, died on the 29th ult. He was born Oct. 2, 1805, the eldest son of Sir William Maxwell, fifth Baronet, by Catharine, his wife, youngest daughter of John Fordyce, Esq., of Aytoun, Berwickshire, and succeeded to the title at his father's death, in 1838. Sir William, whose death we record, was a J.P. and D.L. for Wigtonshire: he was formerly a Captain in the Army, and Lieutenant-Colonel of the Galloway Rifles. He married, June 10, 1833, Helenora, youngest daughter of Sir Michael Shaw-Stewart, Bart., of Greenock and Blackhall, by whom, who died in October last, he leaves four daughters and an only surviving son, now Sir Herbert Eustace Maxwell, seventh Baronet, who was born Jan. 8, 1845: married Jan. 20, 1869, Mary, eldest daughter of Henry Fletcher-Campbell, Esq., of Boquhan, in the county of Stirling, and has issue.

SIR E. B. BAKER, BART.
Sir Edward Baker Baker, Bart., of Ranston, Dorsetshire, J.P. and D.L., died on the 29th ult. He was born Nov. 4, 1806, the eldest son of Sir Edward Baker Baker, Bart., by the Lady Elizabeth Mary Fitzgerald, his wife, daughter of William Robert, second Duke of Leinster, K.P., and aunt of the present Duke. His father, who was a Lieutenant-Colonel in the Army and Under-Secretary of State for Ireland, was created a Baronet Sept. 2, 1802, and assumed by Royal license in 1817 the surname of Baker in lieu of his patronymic Littlehales. He died in 1825, when the title devolved on the Baronet whose death we record, who, having never been married, is succeeded by his only surviving brother, now Sir Talbot Hastings Bendall Baker, Bart., M.A., Vicar of Preston, near Weymouth, Rural Dean and Prebendary of Salisbury Cathedral; who was born in 1820, and married, in 1850, Florence (who died in 1871), daughter of John Hutchings, Esq., of Ludlow, Shropshire; and, secondly, in 1875, Miss Amy Marryat, niece of Captain Marryat, R.N., and has issue a daughter.

SIR W. HANHAM, BART.

Sir William Hanham, eighth Baronet, of Dean's Court, Dorsetshire, Captain R.N., died on the 27th ult., in his eightieth year. He was the elder son—by Anne, his first wife, daughter of Edward Pyke, Esq., R.N.—of the Rev. Sir James Hanham, Bart., and succeeded his father, April 2, 1849. He married, November 6, 1823, Harriet, daughter of George Morgan, Esq., of Mount Clare, Surrey, and was left a widower, without issue, in 1838. The baronetcy is inherited by his nephew, son of his half-brother, now Sir John Alexander Hanham, ninth Baronet, who was born in 1854.

THE RIGHT HON. SIR DAVID DUNDAS.

The Right Hon. Sir David Dundas, P.C., Q.C., died on the 30th ult. He was born in 1799, the son of James Dundas, Esq., of Ochterbyre, Perthshire, by Elizabeth, his wife, daughter of William Graham, Esq., of Airth, in the county of Stirling, and received his education at Westminster, and at Christ Church, Oxford, where he graduated M.A. in 1822. The following year he was called to the Bar by the Hon. Society of the Inner Temple and went the Northern Circuit, and in 1840 he obtained his silk gown and became a Bencher of his inn. He was appointed Solicitor-General in 1846, and Judge Advocate-General in 1849, and he retired from the latter office in 1852. Sir David sat in Parliament for Sutherlandshire from 1840 to 1852, and from 1861 to 1867. He received the honour of knighthood in 1847, and was sworn Privy Councillor in 1849.

FIELD MARSHAL SIR J. F. FITZGERALD.

Field Marshal Sir John Forster Fitzgerald, G.C.B., Colonel 18th Foot, the senior officer in the Army, in which he held a commission for over eighty years, died on the 24th ult., aged ninety-five. He was the fourth son (by his second wife, Anne Catherine, daughter and coheir of Major Thomas Burton, 5th Dragoon Guards) of Colonel Edward Fitzgerald, of Carrygoran, Clare, member for that county in the Irish Parliament, and was brother to Sir Augustine Fitzgerald, created a Baronet in 1821. Sir John nominally entered the Army in 1793, and joined, as Captain, the 46th Regiment, at the age of sixteen. He served through the Peninsular campaign, and received the gold cross for Badajoz, Salamanca, Vittoria, and the Pyrenees. Subsequently he was for some time employed on the staff at Bombay, attained field rank in 1830, and finally became Field Marshal in 1875. He was Colonel of the 18th Foot since 1850; and from 1852 to 1857 he sat in Parliament in the Liberal interest, for the county of Clare. He married, first, in 1805, Charlotte, daughter of the Hon. Robert Hagen, of St. John's, New Brunswick, and secondly, in 1839, Jean, daughter of the Hon. David Ogilvy, of Clova, and had issue by both marriages. The Field Marshal's funeral, at Tours, was attended by the large French garrison of that town.

MRS. NASSAU SENIOR.

Mrs. Nassau Senior, whose death is announced, was the sister of Thomas Hughes, Esq., Q.C., and daughter-in-law of the late Nassau William Senior. For many years she devoted her life and energy to philanthropic work in connection with the visiting of workhouses and pauper schools, and in a private capacity effected marked improvements in the management and system of the female departments in those institutions. The ability and tact Mrs. Senior displayed in this employment having come to the knowledge of Mr. Stansfeld, the then President of the Local Government Board, he gave her, in January, 1873, the temporary appointment of Assistant Inspector, and, after the issuing of her report, which created much controversy, in January the following year, she was made Inspector of Workhouses and of Workhouse and District Pauper Schools, with a view to the necessary inquiry into the condition, training, and education of the female branches and the care of infants. Mrs. Senior discharged her duties to the complete satisfaction of the board, but was compelled to resign through ill-health in November, 1874. Her premature demise is very widely deplored.

THE PRINCESS OF WALES AT ATHENS: A SKETCH IN THE GARDENS OF THE ROYAL PALACE.

BIRTHS.

On the 5th inst., at Dunnichen, Forfarshire, the Lady Sydney, Inverurie, of a son.

On the 30th ult., at Palm Villa, Barbadoes, West Indies, the wife of Darnley C. Da Costa, of a son.

On the 31st ult., at 14, The Lees, Folkestone, Lady Mary Powys, of a daughter.

On the 5th inst., at 25, Charles-street, Berkeley-square, the Countess of Coventry, of a son, stillborn.

On the 14th inst., at Grenville-place, Queen's-gate, London, the wife of William Holmes, Esq., M.P., of a son.

On the 25th ult., at Kileberg, Sweden, the wife of Axel Dickson, Esq., of a daughter.

MARRIAGES.

On the 5th inst., at Rumboldswyke parish church, Sussex, William Cockworthy, younger son of the Rev. Theodore Compton, of Winscombe, Somerset, to Alice, second daughter of the Rev. Stanning Johnson, of The Pallant, Chichester.

On the 5th inst., at St. George's, Hanover-square, by the Rev. Middleton Onslow, assisted by the Rev. Charles Latham Browne, Charles Morant Churchill, Esq., Captain 50th ("The Queen's Own") Regiment, youngest son of George Churchill, Esq., Alderholt Park, Dorset, to Ellen Harriett Augusta, only daughter of E. W. Meade Waldo, Esq., of Hever Castle, and Stonewall Park, Kent.

On the 12th inst., at Croydon parish church, by the Rev. Canon Hodgson, Charles James, younger son of the Rev. George Grahame, late her Majesty's Consul Chaplain, Brazil, to Ada Marian, youngest daughter of the late Alexander Bevington, of Palace-road, Streatham-hill.

On the 3rd inst., at the parish church, Linton, by the Rev. J. Walker, Rector, assisted by the Rev. J. E. Torbett, Curate, the Rev. J. Hartley, Curate of Linton and eldest son of John Hartley, of Crow Nest, near Colne, in the county of Lancaster, to Margaret, youngest daughter of the late Stephen Storey, and sister of the late William Storey, of Hardy Grange, Grassington, Yorkshire.

DEATHS.

S. T. JAMES'S HALL. SIGNAL SUCCESS OF THE MOORE AND BURGESS

Every Night at EIGHT.—MONDAY, WEDNESDAY, and SATURDAY, at THREE and EIGHT.

Vide extract from the "Morning Post," April 3:—"In a burlesque performance entitled 'The Marvellous Gossard,' Messrs. T. Sully, James Moore, and Hens emulated the eccentric gymnastics of the well-known 'Gossard,' with absolute accuracy in the minutest particulars of action and expression, doing everything that the clever originals do, and as nearly as possible in the very same style and manner. A new 'Interlocutor' appeared for the first time in the person of a gentleman bearing the illustrious name of J. P. Kemble, who, being gifted with a fine voice and a keen sense of humour, is likely to prove an acquisition."

THE ILLUSTRATED LONDON NEWS.

LONDON: SATURDAY, APRIL 14, 1877.

Matters in the East of Europe are taking a bad look. The signing of the London Protocol and the declaration of Count Schouvaloff on the subject of disarmament seem to have hastened rather than retarded previous tendencies to war. Peace has not been made with Montenegro; the Protocol has not been accepted even in principle by the Porte, and no Envoy has been sent to St. Petersburg to conduct negotiations relative to disarmament. Russia is becoming impatient, and requests from the Porte a decision as soon as possible. There is some talk in St. Petersburg of the issue of a manifesto, of course to be followed by a passage of the Pruth. At any rate, war appears to be more imminent than it has been since the opening of the Eastern Question. Should it break out, it is just possible that it may be localised; but even if confined to Russia and Turkey it will have a disturbing effect upon the interests of all the European Powers, and no one can foresee how it may damage the concert which has been established between them. All hope that the crisis may be averted has not been abandoned, but the immediate outlook is as gloomy as it can well be.

The fact is that events are far more governed in this matter by forces beyond the control of statesmen and governments than by those that are wielded by the most skilful diplomacy. Even the Turks, anxiously as they may desire to escape from war, cannot give practical expression to their desire without being confronted by a danger more to be dreaded. They have brought into their European Provinces an immense horde of semi-barbarous and comparatively undisciplined soldiery, who have been told that they are to fight for the defence of Islam and of the Ottoman Empire. These men cannot be sent home without destroying the illusion in which they have been encouraged to indulge. They would carry with them, even if they obeyed the orders of their Government, the seeds of disorder and disorganisation everywhere. They do not believe in their own inferiority to the better disciplined, more numerous, and better equipped forces of Russia. They think that the concessions Russia has made in her original demands are due to fear; and nothing, probably, will convince them that, in a military sense, they are over-matched but actual conflict and calamitous losses. A large part of the Mohammedan population of the European Provinces of Turkey hold the same opinion—not, perhaps, quite so tenaciously, but with sufficient strength to put the Government of the Sultan under considerable restraint. We are not, therefore, disposed to criticise the action of the Government at Constantinople as if it were free to do what it deems most politic to be done. It is evidently aiming, in its diplomatic action, at evasion and delay. Its policy is a policy of despair tempered by a hope in the "chapter of accidents." It is rushing down an incline too steep to admit of its stopping at will. The consequences of past generations of misrule have come upon it, and it hardly lies within its own choice now to avert the doom impending over it.

A similar course of observation applies to Russia. There is no room for doubt that the Emperor Alexander and his Chancellor, Prince Gortschakoff, sincerely desire the preservation of peace. This has in the main dictated the concessions which, one after another, to the surprise of Europe and at the risk of the reputation of the Government at St. Petersburg, Russia has made. But it may prove to be beyond the power of either, or of both, to ward off the threatened conflict. No doubt, the crossing of the Pruth by the troops of the Czar will go far to fix the responsibility of war—ostensibly, at least—upon the Russian authorities. But what

can they do? The Slavonic Provinces of the Sultan have been atrociously misgoverned, and, indeed, are so still. Nay, "misgoverned" is not precisely the word which covers the fact. They know little of protection from the law. They are subjected to legalised extortion, spoliation, and outrage. Their brethren in blood, and in religion, constitute no small portion of the population of Russia. Acute sympathy is felt by the Slavs everywhere for the oppressed of their race in Herzegovina, Bosnia, and Bulgaria—a sympathy which rises to the force of indignation. Who can wonder that they demand from the Governments under which they live, but especially from Russia, such an employment of the resources within reach of them as will coerce the Turk into more reasonable behaviour. One is surprised, not so much that they have spoken imperiously, as that they have tempered their demands with some show of justice. The Czar has been compelled in some manner to yield to their impetuous temper. It is difficult to see how he can safely rein in their warlike passion much longer. But it is evident, from the part which Russia has taken in diplomatic negotiations during the past two years, that it will be with infinite reluctance that the Emperor and his Government will consent to "let slip the dogs of war."

Should the worst fears of Europe be realised by the event, and should actual conflict between Russia and Turkey be brought about, we fear we shall have to look forward to a terrible upheaval of the nations. It may be, indeed, that one or two decisive victories over the Turkish forces may bring about a sudden peace. But it is more likely that they will stir ambitions which have been long latent, and provoke apprehensions hitherto partially concealed if not smothered. This is what the world has most to fear. The fire once kindled, it is beyond human sagacity to predict the limits within which the conflagration will be confined. The materials which have been stored up by all European Governments with a view to the possibilities of war are frightful in their amount. They will be likely enough to lure both Governments and peoples beyond the bounds of a moderate and justifiable policy. In such cases we are very much the creatures of destiny. We may hope or fear; we may act, or abstain from action; but none of us can command results.

THE COURT.

The Queen, Princess Beatrice, and Prince Leopold continue at Osborne House.

Prince Leopold attained his twenty-fourth year on Saturday last: her Majesty's ship Hector (guard-ship at Cowes), Captain Simpson, fired a Royal salute, and at Windsor the birthday was observed with due honours. The Rev. Dr. Vaughan, Master of the Temple, dined with her Majesty. In the evening Herr Wilhelmj and Signor Piatti performed on the violin and violoncello before the Queen and the Royal family. Mr. Cusins presided at the pianoforte. The ladies and gentlemen in waiting joined the Royal circle in the drawing-room.

The Queen, Princess Beatrice, and Prince Leopold attended Divine service on Sunday at Osborne. The Rev. Dr. Vaughan officiated. The Right Hon. A. Layard arrived at Osborne on Wednesday and had an audience of her Majesty, after which he returned to London. The Queen, with the members of the Royal family, has driven to Newport, Cowes, and other places in the island. The Right Hon. Sir Stafford Northcote had an audience of her Majesty last week, and afterwards dined with the Royal family. Major-General Sir Dighton Probyn, K.S.I., has also dined with the Queen.

Princess Beatrice attains her twentieth year to-day (Saturday).

We are authorised to state that her Majesty's birthday will be kept on Saturday, June 2, instead of on Saturday, May 26, as originally announced.

The Queen has intimated her intention to visit the Exhibition of Choice Flowers, to be held in the conservatory of the Royal Horticultural Society, South Kensington, on Wednesday, May 2, and the flower show, which was intended to have been held on the 1st will take place on that day.

Her Majesty has subscribed £25 to the Southampton local fund for holding the Royal Agricultural Show at Southampton in June.

The Marchioness Dowager of Ely has succeeded the Duchess Dowager of Athole as Lady in Waiting to the Queen. The Hon. Ethel Cadogan has arrived at Osborne as Second Maid of Honour in Waiting. Colonel the Hon. Augustus Liddell has succeeded Rear-Admiral Sir Edmund Commerell, K.C.B., as Groom-in-Waiting to her Majesty. Major-General H. Ponsonby has left, and Lieutenant-General Sir Thomas Biddulph has arrived, at Osborne.

THE PRINCE AND PRINCESS OF WALES.

The Princess of Wales arrived at Brindisi at eleven o'clock last Sunday night. The civil authorities received her Royal Highness at the railway station. The Princess left at midnight for Athens, on board the Royal yacht Osborne. The King of the Hellenes met her Royal Highness at Corinth, and accompanied her across the Isthmus to Kalamaki, whence she proceeded in the Royal yacht to the Piræus. The Royal party entered Athens on Tuesday evening.

The Prince of Wales has recovered from his recent indisposition. His Royal Highness has paid visits to the Duchess of Cambridge, the Duke of Cambridge, and his other relatives in town; and he has received visits from Prince and Princess Christian, Princess Louise of Lorne and the Marquis of Lorne, the Duke of Cambridge, the Duke and Duchess of Teck, and Prince Edward of Saxe-Weimar.

The Prince left Marlborough House on Wednesday en route for Paris and the south of France. Prince Christian, the Duke of Teck, Count Schouvaloff, Mr. Villebois, and other gentlemen took leave of his Royal Highness at Charing-cross station, whence he travelled by a special train (which was under the charge of Mr. John Shaw) over the South-Eastern Railway to Folkestone harbour, and there embarked, at 10.20 p.m., on board the special steamer Victoria for Boulogne, where he arrived at 12.20. After supping, the Prince left by special train at 1.40 on Thursday morning for Paris, Mr. Shaw attending the train on the journey.

The Prince has inspected Mr. Wallis's (French Gallery) picture "Auf Schlechtem Wege," painted by Professor L. Knaus; M. E. Detaille's picture "En Reconnaissance," submitted by Mr. M'Lean, of the Haymarket; and Mr. E. H.

Corbould's picture of "Lady Godiva riding through Coventry," and some sketches.

The Prince has promised to be present at a dinner to be given by Sir Coutts Lindsay at the Grosvenor Gallery on the 28th inst.

His Royal Highness has sent £50 to the funds of the Seaman's Hospital Society (late Dreadnought), Greenwich; and the Princess has sent a valuable supply of flowers for the children's ward in Charing-cross Hospital.

The officers of the Prince of Wales's Own Ghosek Regiment, the famous corps which defended the women in the Flagstaff Tower during the mutiny at Delhi, have forwarded a superbly embossed Kurkurree knife, the weapon of the regiment, as a present to the Heir Apparent. The regiment were granted permission to use his Royal Highness's title during the tour of the Prince in India.

The Duke and Duchess of Edinburgh visited the Royal Naval Hospital, Malta, on the 24th ult. The Duke and Duchess dined with Dr. and Mrs. Bernard. The Duchess left Malta last Monday, on board her Majesty's ship Sultan, under the command of the Duke of Edinburgh, for Villafranca. Her Majesty's ship Antelope, having on board the suite of her Royal Highness, accompanied the Sultan. A Royal salute was fired as the Sultan left the harbour. The Duchess of Edinburgh has appointed Lady Harriet Elizabeth Grimston to be Lady in Waiting to her Royal and Imperial Highness, in the room of Lady Mary Butler, resigned; and Lady Mary Butler to be Extra Lady in Waiting.

The Duke of Connaught, who had been on a visit to Lord Cloncurry at Straffan, presented new colours to the 53rd (Shropshire) Regiment, on Thursday week, at Parsonstown. The next day the Duke visited the Earl of Clonmel at Bishops-court, and in the evening was present at the annual ball given by the members of the Kildare Hunt, in the Townhall, Naas.

The Duke of Cambridge left London on Wednesday for Hastings.

The Duke and Duchess of Bedford and the Ladies Russell have arrived in Eaton-square from Woburn Abbey.

The Duchess of Newcastle has arrived in Belgrave-square from Paris.

The Marquis and Marchioness of Bowmont have left Rutland-gate for Dublin, on a visit to his Excellency the Lord Lieutenant of Ireland and the Duchess of Marlborough.

The Marquis and Marchioness of Tavistock have returned to town from Woburn Abbey.

Lady Georgiana Hamilton, accompanied by Lady Victoria Edgcombe, have left town for Biarritz, to visit the Duke and Duchess of Abercorn.

FASHIONABLE MARRIAGES.

The marriage of Lord Ribblesdale and Miss Charlotte Tennant, daughter of Mr. Charles Tennant, of The Glen, Peeblesshire, was solemnised on Saturday last at St. George's Church, Hanover-square. The bride, who was given away by her father, wore a white satin princess dress, trimmed with Spanish rose point lace, and from a wreath of orange-blossoms a tulle veil was fastened with diamond marguerites, the gift of Colonel Tennant (her grandfather); and around her neck was a necklace of diamonds, the gift of Lord Ribblesdale. Her bridesmaids were the Misses Lucy, Laura, and Margot Tennant, her sisters; the Hon. Beatrix and the Hon. Adelaide Lister, sisters of the bridegroom; Miss Gertrude Harter, Miss Winsloe, and Miss Wolfe Murray. They wore the palest blue silk princess dresses, trimmed with Valenciennes lace, with white muslin bibs and aprons, trimmed with the same lace; white straw gipsy hats ornamented with muslin, blue ribbon, and lace rosettes. Each wore a silver filigree lace collar, the gift of the bridegroom. Lord Ribblesdale's brother, the Hon. Martin Lister, was best man. The religious ceremony was performed by the Rev. H. Montagu Villiers, M.A., Rector of Adisham, Kent. The breakfast was given at Mr. Tennant's residence, Berkeley-square, after which the bride and bridegroom left for Boulogne, en route for the north of Italy. The bride's travelling dress was of dark green velvet, hat to match, and feathers tipped with pale blue. The presents were numerous.

The marriage of the Hon. Robert Marsham, brother of the late Earl of Romney, and Miss Paley, daughter of the Rev. G. B. Paley, Rector of Freckenham, Suffolk, was solemnised on Thursday week at the parish church, by the Rev. John Paley, cousin of the bride, assisted by the Hon. and Rev. John Marsham. The bridesmaids were Miss Rosa Paley, Lady Mary Marsham, Miss Mary Fletcher, Miss I. Naper, Miss Harriett Bernard, Miss Juliet Sharp, Miss Beatrice Hoare, Lady Florence Marsham, Miss Evangeline Hoare, and Miss Ione Paley. The Hon. Henry Marsham was best man. The bride, who was given away by her father, wore a dress of pale ivory satin, trimmed with Brussels lace, and orange-blossoms; the veil was of Brussels lace, fastened at the side by a diamond star, the gift of her parents; and she wore round her neck a diamond pendant, the gift of the bridegroom. The bridesmaids were dressed in eau de Nile cashmere, made à la princesse, with muslin fichus trimmed with lace, and large mob caps. Each wore a gold locket with pearls, the gift of the bridegroom.

The marriage of Mr. Naper of Loughcrew, and the Hon. Katherine Rowley, was solemnised on Thursday week at Agher church. The bride was given away by her brother, Lord Langford. She was dressed in white satin, trimmed with Honiton lace flounces, a necklace of diamonds, and in her hair sprays of diamonds, with orange-blossoms. The bridesmaids were Miss B. Ponsonby, Miss Naper, Lady Adelaide Tylour, Miss Bruen, Miss Amy Lambart, Miss Fowler, Miss Barton, Miss Rowley, Miss Katherine Conolly, and Miss L. Conolly. They were dressed, five in pale blue silk, with white muslin jupes, and mob caps with primroses, and five, to correspond, in primrose colour with forget-me-nots. Each wore gold monogram lockets, the gift of the bridegroom. Mr. Ion Hamilton, M.P., was best man. The service was performed by the Archbishop of Armagh, assisted by the Rev. J. Hare and the Rev. G. Martin. The breakfast was at Summerhill, after which the bride and bridegroom left for Abbotstown. The bride's travelling dress was of brown silk à la princesse, sleeves and front of velvet matelassé, bonnet of lily of the valley and moss. The presents were numerous and costly.

The marriage of Sir Thomas Dancer, Bart., and Miss Gardiner is arranged to take place from her brother's house, The Temple, Goring, on Wednesday next; that of Mr. Reginald Macleod and Miss Northcote will take place on Tuesday next at Westminster Abbey; and the marriage of Mr. Walter Farquhar and Miss Bateson is arranged to take place on Tuesday, the 24th inst.

Marriages are arranged between the Hon. Philip Stanhope, brother of Earl Stanhope, and the Comtesse Alexandrine Tolstoy, daughter of the late Comte Valérie Canegrine and widow of Comte Mathieu Tolstoy, of St. Petersburg; and between Mr. William Blacker, of Castle Martin, in the county of Kildare, and the Hon. Mary Lawless, younger sister of Lord Cloncurry.

THE ROYAL GARDENS AT ATHENS.

The arrival of her Royal Highness the Princess of Wales at Athens last Tuesday afternoon is an occasion that gives special interest to a view in the gardens of the Royal palace there, from a sketch lately taken by our Special Artist in Greece. These gardens are liberally thrown open to the public during some hours of every day. They are prettily laid out, in a very picturesque, unconventional style: in some places there is a perfect labyrinth of paths and avenues of rose-trees. The remains, also, of an ancient Roman villa, with its mosaic pavement and its fish-pond, are included within these precincts. There is a peculiar charm, moreover, in the glimpses of the Acropolis and Parthenon ruins, or those of the temple of Jupiter Olympius, seen from different parts of the gardens. The broken colonnade of the last-named temple appears in the background of our Artist's sketch as shown in the Engraving on our front page. This temple, indeed, is not a genuine relic of the glorious age of fair Athens, with its history, poetry, and art. It was built long afterwards by the Roman Emperor Hadrian; and its pillars, with their Corinthian capitals, though stately and beautiful, do not at all harmonise with the purely Greek genius that reared the Doric structures of the Parthenon and the Temple of Theseus, in a style more befitting the heroic period of Greece. We shall give further illustrations of the visit of the Princess of Wales to her Royal brother and sister-in-law. His Majesty the King of the Hellenes met her at Corinth, and accompanied her across the Isthmus to Kalamaki, whence they embarked in the King's yacht for the Piræus, the port of Athens. Our Special Artist's interesting narrative, published in this week's Paper, of a journey from Athens to Mycenæ, gives some description of places on the route travelled by her Royal Highness from Corinth across the Isthmus.

THE LATE MR. F. W. TOPHAM.

It was mentioned in our last that Mr. Frank Topham, the well-known painter in water-colours, had died at Cordova, in Spain, on the Saturday before, in the seventieth year of his age. He was born at Leeds, in 1808, and began work as a steel engraver; but after practising that art, with acknowledged skill, during many years, devoted himself to water-colour painting. He was a member first of the Institute of Water-Colour Painters (the "New Society") and afterwards of the Old Society of Painters in Water Colours. It was about 1848 that he contributed to one of the exhibitions a picture designed to illustrate Samuel Lover's ballad of "Rory O'More," which attracted some notice, and won the artist his first step to popular favour. He continued, from that time, to produce a great variety of works in figure-painting of this class, taking his subjects from the most picturesque-looking races of peasantry in different countries of Europe, Scottish Highlanders, Irish bog-trotters, Italian and Spanish peasantry, or sometimes from the conceptions of recent poets and novelists. These works were distinguished by their artistic merits. Amongst them were "The Fisherman's Home," "Highland Pastime," "Whistle, and I'll come to thee, my lad," "Barnaby Rudge and his Mother," "The Cabin Door," "The Andalusian Letter-Writer," "The Gaugers are Coming," "The Zouave's Story of the War," "The Sizar and Ballad-Singer" (an incident in Goldsmith's life), "The Angel's Whisper," "The Pattern, Connemara," "At a Venetian Well," "Gathering Mulberry Leaves," "The Wayfarers," "The Spinning-Wheel," "Irish Peasant at the Foot of a Cross," and "Peasants at a Fountain, Basses Pyrenees," besides "Morning of the Pattern," a work in oils. Mr. Topham, who resided at Hampstead, was much esteemed and liked in social life. He took an active part in several local clubs, to which his neighbours and brother artists, Clarkson Stanfield, Chalon, and Edward Duncan, also belonged. He was vice-president of the Savage Club, and an amateur performer, with other men of the time, authors and artists, in the theatricals which were got up for the "Guild of Literature and Art." The portrait is engraved from a photograph by Elliott and Fry.

THE LIGHTNING TORPEDO-VESSEL.

This vessel of a new class, our readers will recollect, has been constructed by Messrs. Thornycroft and Donaldson for the Lords of the Admiralty, and was lately inspected, at Westminster-Bridge Pier, by a party of naval and military officers, members of Parliament (with the Speaker of the House of Commons), and other gentlemen, on the invitation of Mr. Ward Hunt, First Lord of the Admiralty. They went on board the vessel to test her speed, and ran down the Thames nearly as far as Long Reach, a distance of more than twenty-two miles, returning to Westminster within two hours and forty minutes of starting from there. The Lightning, indeed, although only 84 ft. in length by 10 ft. 10 in. beam, has the distinguished honour of being the fastest vessel in her Majesty's Navy, the mean speed attained on the preliminary runs being considerably over nineteen knots per hour. It is proposed to arm the Lightning with the Whitehead torpedo; and from the recent debate in the House of Commons, when this subject was brought forward by Lord Charles Beresford, it would seem that the Whitehead torpedo almost threatens to change the character of naval warfare. This explosive instrument is 14 ft. in length and 16 in. in diameter. It is made in three pieces—the head, which contains a bursting charge of 360 lb. of gun-cotton; the balance-chamber, which contains a contrivance for setting it so as to remain at any depth it is wished to travel under the water-line; and, lastly, the air-chamber, which contains the engines and the compressed air to drive them. Their length is 19 ft., and their diameter 18 in., the appearance being exactly that of a cigar pointed at both ends. The head or foremost end contains the pistol or detonator which explodes the charge. The after end supports the screws—a right and left handed screw—which propels the torpedo, and are made of the finest steel. The air-chamber is tested to 1200 lb. on the square inch, but for service it is only loaded to 800 lb. The Whitehead torpedo can be made to go at the rate of twenty knots for 1000 yards, and at any depth that is wished from 1 ft. to 30 ft. It can be set to explode either on striking an object or at any particular distance under 1000 yards. It can also be set so that if it misses the object aimed at, it would go to the bottom and explode on half cock or come to the top on half cock, so as to be recovered, as it has buoyancy enough just to float on the surface of the water when not in motion. It is fired by what is called an "impulse-tube," which, out of a frame fitted to a port, discharges the torpedo into the water. It can be fired above the water, but will at once go to the depth it was set for, and straight to the object, no matter how fast the ship from which it is discharged is going, or how fast the object aimed at may be sailing or steaming. It is calculated to make a hole on bursting of 70 ft. area, and there seems to be no doubt that if one of them hits a ship of any sort or description at present on the water she must at once go to the bottom. The torpedo-vessel need not be nearer than 1000 yards, and, supposing that the first three shots did not take effect, she could still deliver more, as the vessel fired against would be positively unaware of the attack until she was blown up.

THE LATE F. W. TOPHAM, ARTIST.

THE LIGHTNING TORPEDO-VESSEL.

A LESSON IN BOAT-BUILDING.

The Extra Supplement.

"THE TREASURE OF THE FAMILY."

In this picture, by a foreign lady artist whose works have found much favour amongst us, an incident of domestic life is represented which appeals to the cherished religious traditions and affections of every Christian people. The mother shows her children the family Bible, and tells them, we suppose, that it contains the Word of God; and that a blessing is hereby promised to them, as it was ever bestowed on their parents and forefathers, in proportion to their faith and dutiful obedience, and their perseverance in virtuous behaviour. It is a good old lesson, which needs to be taught afresh in the youth of each successive generation; and we should augur very ill of the prospects of the English nation if ever parents should neglect, as a general rule, to give their children this most needful instruction. The picture has its merits as a work of art, besides grace and truth of expression.

A LESSON IN BOAT-BUILDING.

These two brisk little boys, as the reader will see, are very happily amused for an hour, in the fisherman's hut on the sea-beach of a holiday watering-place, somewhere along our southern coast, by learning from their skilful companion the art of shaping a toy-boat of solid wood, big enough to carry a mouse. This vessel will, indeed, scarcely prove seaworthy, but may float awhile in some tranquil pool of salt water left in the sands by the last ebbing tide. Few boys, in town or country, who ever possessed a knife or chisel and a few inches of soft deal wood have not made some attempts at this simplest and most diminutive kind of naval architecture. It is further endeared to their fancy by the famous experiences of Robinson Crusoe in hollowing out his canoe or "periagua," as it was called among the Spaniards, which he could not launch, after all, when its tedious construction was finished. There is no fear of these youngsters not being able to put their boat into the water; and, if its keel be truly cut straight, with a strip of lead nailed along its length, and the weight of its sides equally balanced, the vessel will even carry a little mast and sail. They may then be reminded, perhaps, by their papa or mamma, or their aunt, how that exemplary hero of a past generation, the illustrious Peter the Great, once upon a time condescended to become a boat-builder's apprentice at Deptford.

FOREIGN AND COLONIAL NEWS.

FRANCE.

M. Jules Simon returned to Paris on Sunday morning, and reassumed the direction of public affairs. In passing through Marseilles the other day from Nice, M. Simon was waited upon by the Mayor and the members of the Municipal Council. Replying to a speech from the Mayor, M. Simon said that they were going through a trying time, and that the work of the Government was every day impeded by obstacles. Moderation, together with firmness and energy, were necessary in order to overcome those obstacles.

The General Councils of France assembled on Monday.

M. Paul de Cassagnac has been sentenced to two months' imprisonment and 3000*fr.* fine for publishing in his journal, the *Pays*, articles insulting the Chamber of Deputies; the publisher of the paper, M. Piel, being fined 1000*fr.* and costs.

Official decrees have been published in Paris commuting or remitting the sentences of thirty-three Communist convicts.

M. Mie, the irreconcilable candidate for Bordeaux, has been elected on the second ballot by 7271 votes, against M. Caduc, his Moderate Republican opponent.

M. Waddington, the Minister of Public Instruction, in distributing the prizes last Saturday to the members of the learned societies at the Sorbonne, concluded a speech by inviting delegates of the Paris societies to prepare for a congress of learned societies at the Paris Exhibition of 1878.

The Catholic Congress which has been sitting in Paris held its concluding meeting last Saturday night, under the presidency of Monsignor Freppel. There was a large attendance.

The founding of a Catholic University at Toulouse is officially announced by the bishops of that district.

Gounod's new four-act opera, "Cinq Mars," was produced on the 5th inst., according to promise, at the Opéra Comique, Paris. The libretto was written by MM. Paul Poisson and Louis Gallet, and founded on De Vigny's novel. Critics differ as to the merits of the opera; but it is splendidly put on the stage, and the ballet is said to be especially attractive.

ITALY.

The King, the Crown Prince, and three of the Ministers—viz., Signor Coppino, Signor Depretis, and Signor Nicotera—were present at the opening of the National Exhibition of Fine Arts at Naples on Sunday. The *Daily News* correspondent says that it is the best exhibition ever held in Italy.

A diplomatic green book, containing exclusively correspondence on Eastern affairs, has been distributed to the deputies. It comprises 510 documents in all, embracing the period from July 17, 1875, to Feb. 10, 1877.

Bands of Internationalists have appeared in several towns. On Sunday the police arrested eighteen at Pontemolle. At Setino a party numbering about thirty individuals took possession of the Townhall and burnt the archives, the band was defeated, and several of its members, including the leader, Cafiero, were arrested.

SPAIN.

King Alfonso and the Princess of the Asturias arrived at Madrid on Thursday evening, the 5th inst., from Cordova, and were received in the Southern Station by the authorities of the capital. Soldiers lined the streets, and several regiments of cavalry, with twenty batteries of artillery, were stationed near the Prado. After a Te Deum in the Atocha Cathedral, the King proceeded to a reception at the palace. The streets were densely crowded with people. His Majesty was greeted with cheers in some places during the course of his progress.

The majority of the senators elected on the 5th inst. are favourable to the Cabinet. The Cortes will be opened on May 1 by the King in person. At a Cabinet Council held on Tuesday a list of 108 senators appointed by the King was approved. The Ministers are engaged in discussing the new budget of expenditure.

Mr. Caleb Cushing, Minister Plenipotentiary of the United States at the Court of Madrid, had a farewell audience of King Alfonso on Sunday.

GERMANY.

After much discussion and many surmises and conflicting statements, the Chancellor crisis has resolved itself into this. In Wednesday's sitting of the German Parliament a letter was read from Prince Bismarck, in which he announced that, the state of his health not permitting him to take part in the Parliamentary proceedings, the Emperor had granted him leave of absence, and had consented that he should be represented by Herr Hofmann and Herr von Bülow. An Imperial decree to this effect has been issued. It is stated that the Emperor

reserves to himself the power of consulting Prince Bismarck even during his absence.

Prince Bismarck has received from the King of Italy a magnificent vase of alabaster as a birthday present.

Field Marshal von Manteuffel has left Berlin for his estate in Neumark.

The Emperor of Brazil on Saturday night attended a joint sitting of the Berlin Geographical and Anthropological Societies held in honour of the illustrious guest.

The Federal Council has adopted the bill establishing the Superior Imperial Tribunal at Leipsic.

The engagement is announced of his Excellency Jusshi Siozo Aoki, the Japanese Envoy to the Berlin Court, to Fräulein von Rhade, a German lady of rank. The Japanese Envoy has long resided in Berlin, where he studied at the University, and acted as Secretary of Legation prior to being appointed Minister.

AMERICA.

In accordance with the directions issued by President Hayes, the Federal troops were withdrawn on Tuesday from the State House of Columbia, capital of South Carolina. Mr. Chamberlain, the Republican Governor, has issued an address declaring that he was elected Governor of the State; but that, through Mr. Hayes's decision, he is unable to maintain his rights, and therefore abandons the contest. The American correspondent of the *Times* telegraphs that the State House, with all the official records, was handed over on Wednesday by Mr. Chamberlain's private secretary to Mr. Hampton's private secretary, and thus Mr. Hampton is now in full possession.

A public meeting, attended, it is said, by 10,000 persons, has been held at New Orleans, at which resolutions were passed expressing a desire to obliterate the past and remove the prejudices separating the whites from the negroes. An appeal was also made to President Hayes to withdraw the Federal troops from New Orleans. The Special Commission has arrived at New Orleans, and visited both Mr. Packard and Mr. Nicholls.

A letter from Mr. Blaine has been published expressing profound sympathy with Mr. Chamberlain and Mr. Packard, the Republican Governors of South Carolina and Louisiana.

The Government has decided to transfer the control of the Alaska territory from the War Department to the Treasury, and has ordered the withdrawal of the garrison hitherto stationed there.

Fifty persons—mostly female servants—are reported to have perished in the burning of the Southern Hotel at St. Louis on Wednesday morning. A *Times* telegram says that this hotel is one of the largest in St. Louis, being six stories high and containing accommodation for 700 persons.

A New York telegram reports the surrender to the authorities of the United States of 1500 hostile Indians.

Dr. Wines has been appointed United States Commissioner at the International Prison Congress, which it is proposed to hold at Stockholm.

Among the cargo landed on Wednesday at New York from the Hamburg and American Company's steam-ship *Frisia* a large box filled with dynamite cartridges was discovered in a cask of wine. The cask was shipped at Hamburg and stored in the Government warehouse.

CANADA.

Sir Edward Thornton, the British Minister at Washington, has gone on a visit to Lord Dufferin, the Governor-General of Canada. The *New York Herald* says that the object of his journey is to hold a consultation on the extradition and fishery questions.

A telegram from Ottawa reports a meeting which has been held there to consider the best means of relieving unemployed workmen. A memorial was adopted for presentation to the Senate requesting it to urge upon the Government the advantage of originating public works and prosecuting them immediately in order to alleviate the present destitution.

THE CAPE COLONIES.

The news from Cape Town is to March 20. Sir Theophilus Shepstone, replying to the Transvaal Government, has informed them that he was prepared to entertain any terms which were not derogatory to the prerogative of the Queen, but he refused to accept the provisions of the treaty proposing that the independence of the Transvaal should be maintained. In a special despatch to the *Daily News* we read:—"A despatch from Kimberley, dated March 20, announces that the Volksraad has passed President Burgers's New Constitution Bill. A correspondent at Pretoria writes that the independence of the Transvaal is gone, and that President Burgers's bill is too late, the exchequer being bankrupt, and that British aid alone can save the State from anarchy."

INDIA.

Mr. Egerton, the new Lieutenant-Governor of the Punjab, assumed office on Monday.

The Viceroy has given £500 to the building fund of the Women's Hospital of the Society for the Propagation of the Gospel Mission at Delhi, in commemoration of the Queen's assumption of the title of Empress. His Highness the Nizam gave £50 on the same occasion.

There is, says the Calcutta correspondent of the *Times*, in a telegram on Sunday, little change in the aspect of the famine.

It is stated in a telegram from Copenhagen that the Crown Prince and Princess of Denmark will visit England next month.

The Chinese Government has sanctioned the immediate opening of two additional ports—Wen-Chow and Wuha.

The English cricketers in Australia have won a match against a combined Victoria and New South Wales Eleven.

Navigation is again open in the Baltic. Three steamers arrived in the harbour of Königsberg on Sunday, and at Riga the ice is reported to be rapidly breaking up.

An Egyptian despatch to the *Daily Telegraph* says that a man who claims to own the ground upon which Cleopatra's Needle—recently presented to the United Kingdom by the Khedive—lies has fenced it round, and demands several thousands of pounds compensation before he will allow the monument to be removed.

The *Standard* says that Captain Sir William Hewett, K.C.B., who has lately returned from the West Coast of Africa, has received from the Foreign Office an expression of approval at the manner in which the blockade of the Dahomey coast has been maintained, and the various difficulties with the natives on the West Coast have been met, during the period of his service as Commodore on that station.

At the request of the Australian colonies, her Majesty's Government have selected Sir W. Jervois, K.C.M.G., R.E., Governor of the Straits Settlements, and Lieutenant-Colonel Scratchley, R.E., to advise the respective Colonial Governments on a scheme of defence for the chief Australian ports. Colonel Scratchley has already left England, and will join Sir W. Jervois at Sydney.

Crewe has received a charter of incorporation as a municipal borough.

RUSSIA AND TURKEY.

The course of events, to all appearance, during the past has been unfavourable to the hopes of a pacific settlement of the Eastern Question. Turkey will by no means assent to resolutions of the European Powers in their joint diplomatic Protocol, the text of which was given in our last; a Porte also declines to send a special Ambassador to St. Petersburg unless Russia at the same time sends one to Constantinople. This announcement, it is said, was not conveyed by formal despatch, but was communicated to the Government by its Chargé-d'Affaires in the Turkish capital. Further, the Porte has sent a circular to its representatives abroad, containing its views upon the Peace. In this Circular stress is laid upon the desire of the Turkish Government for peace, and its wish to carry reforms. It rejects, however, all foreign intervention in domestic affairs of Turkey, and refuses to send an Ambassador to St. Petersburg or to disarm unless Russia will disarm at the same time. In conclusion the Circular asks the Powers to induce Montenegro to display a more conciliatory attitude. The Turkish Chamber of Deputies decided on Tuesday votes to 18, to reject all the demands of Montenegro for cession of territory. The Senate, however, has not conformed to this resolution.

The impressions prevailing in diplomatic circles regarding the state of affairs are very gloomy. The tone of the Press is warlike.

LAW.

The various divisions of the High Court of Justice reassembled on Tuesday, after the Easter vacation.

In the Probate Court at Dublin last Saturday Mr. J. Warren gave judgment in the Cooke will case, on the report by Lord Longford to set aside the verdict for the Purdon estate on the ground that it was against the evidence. The testator, a man of eccentric habits, had made fifteen wills, and of these appointed Lord Longford sole executor in his last will, and it was propounded by him. The defendant in the suit were Wellington Purdon and Dr. Charles Purdon, younger son of the grand uncle of the testator, and two of Wellington Purdon. The jury found that the will was duly executed, but that the testator was not of sound mind, and that the will had been procured by the Rev. Mr. Lyndue influence. The Judge now ruled that the will should be set aside, but gave the defendants liberty to state. It is stated they will carry the case to the House of Lords.

At the Central Criminal Court on Monday an elderly man named Scott, was found guilty of having committed perjury in the Chancery Court in having sworn that the signature on the deeds transferring an estate which he had sold was his. Sentence was deferred. A railway porter, who stole from a bag of money which two clerks of the National Provincial Bank had left in a railway carriage, was sentenced to six months' imprisonment. Mrs. Ramsden, the prime in the conspiracy against the matron of the Jewish lunatic asylum, which led to Mrs. Moses and her daughter's falsely charged with felony at the Surrey Sessions, was found guilty of perjury and conspiracy, and sentenced to five years' penal servitude. Three women whom she suborned to commit perjury were sentenced at the same time to whom had pleaded guilty, and the other was convicted by the jury. Vandervoort was sentenced to eighteen months' imprisonment, and Frenberg and Fla'ow to twelve months' each. In the Court presided over by the Recorder, Mr. Hunt pleaded guilty to a charge of defrauding his employer by pawning, for £500 or £600, goods of the value of £100 entrusted to him as agent. He was sentenced to five years' penal servitude. George Melville, seventy years of age, who alleged to have been a magistrate and deputy lieutenant of Welsh county, pleaded guilty to a charge of obtaining money by false pretences from various persons by giving cheques on banks where he had no account, and was sentenced to twelve months' hard labour. John Lassarade, who, it was stated, had been convicted upwards of thirty times, was found guilty of stealing a watch from Mr. William Williams, ex-Mr. Melbourne, who is on a visit to this country, and was sentenced to ten years' penal servitude. In Mr. Commissioner K. court, a young man, named John Joseph Lardner, pleaded guilty to five indictments charging him with forging banknotes to the value of upwards of £150, and was sentenced to twelve months' hard labour. On Wednesday Mr. B. was tried for attempting to poison his wife and father. Arsenic was found in the water of the kettle from which the tea was made on Feb. 14; but, as there was evidence that the prisoner put it in, the Judge stayed the case at the close of the prosecution, and directed the prisoner's acquittal. A hairdresser named Wymers charged with having murdered Robert Cole. The prisoner occupied rooms in the same house in a street near Fitzsquare, and Wymers is a volunteer. Late in February parties went home in liquor one night, and the deceased quarrelled with his wife. Wymers interfered, and went to fetch his gun, which was discharged through the door of the room and killed Cole. The defence was that Wymers did not know the gun was loaded, and that it went off accidentally, and the jury, believing this, acquitted him.

Henry Bunker, a milk-carrier, was on Monday convicted of the Middlesex Sessions of stealing five quarts of milk, the property of his employer. He was found to have been in the act of selling milk to a wholesale dealer, and making up the water the quantity of milk abstracted. He was sentenced to six months' hard labour.

The Society of Arts' gold medal for the best, cheapest, and simplest railway light has been awarded to Mr. Pintech. The Society of Arts offer to Cornish miners prizes of £5, £3, and £1, respectively, with certificates, for proficiency in qualitative blowpipe analysis. The examination will be held in June.

Bishop Beckles held his first confirmations in Scotland at St. Thomas and St. Vincent's English Episcopal Church, Edinburgh, on Sunday. Seventy candidates were present for confirmation. He preached in the evening at St. Thomas Church. He is to be at Glasgow next Sunday; afterwards proceeding to Dundee, Montrose, Aberdeen, and Nairn.

The General Synod of the Church of Ireland was opened in Dublin on Tuesday. The Lord Primate presided, and in his address referred to the perilous controversy in the English Church, which was in danger of being unprotestantised. He warned the synod against the opposite extreme. The practical reference was made to the question of the Divinity School. A claim was made for a sufficient sum from the Church surplus to endow such an institution. On Wednesday the Bishop of Ossory brought forward a motion appointing a committee to prepare a statement of the Church claims in relation to the Divinity School, to be submitted on the part of the synod to a Royal Commission, and giving the committee power to attend thereto, with right of further action. This was carried.

THE CHURCH.

PREFEMENTS AND APPOINTMENTS.

Adem, G. R., to be Vicar of Shoulton.
 Baldwin, Francis; Vicar of Maltby.
 Bowly, Henry Bond; Honorary Canon of Worcester Cathedral.
 Burns, W.; Sole Charge of Blackrod.
 Cartwright, Arthur Rogers; Rector of Butcombe.
 Cave-Brown-Cave, F. A.; Vicar of Longridge, near Preston.
 Dyer-Thistleton, T. F.; Vicar of St. Paul's, Penzance.
 Eccott, Hay Sweet; Rector of Kilve-cum-Strington.
 Fisher, Robert; Perpetual Curate of Sewerby, with Marton and Grissall and Ergham.
 Helmore, F. J. O.; Precentor of the Church of the Holy Trinity, Stratford-on-Avon, and Curate of Luddington.
 Hes, Archdeacon; Canon in Lichfield Cathedral.
 Kroyh, George Patrick; Rector of Huggate.
 Leigh, J. W.; Priest-in-Charge of St. James's Church, Stratford-on-Avon.
 Nash, R. S.; Vicar of Old Sodbury; Honorary Canon of Bristol Cathedral.
 Nash, T. A.; Vicar of St. Paul's, Lillington.
 Needley, J. B.; Assistant Inspector of Schools, Diocese of Bath and Wells.
 Newton, Horace; Perpetual Curate of Great Driffield with Little Driffield.
 Parker, S. Hadden; Rural Dean of South Lympe, diocese of Canterbury.
 Pixell, Charles Henry V.; Rector of Frampton Cuttrell, Gloucestershire.
 Rodd, F. A.; Incumbent of Kensington Chapel, Bath.
 Rose, Henry; Assistant Inspector of Schools, diocese of Bath and Wells.
 Thomas, William Rees; Perpetual Curate of Abersychan.—*Guardian*.

The window at the west end of the north aisle of the nave of St. Paul's Cathedral has been filled with stained glass.

The parish church of Bishopstrow, near Warminster, was reopened last week, after restoration at a cost of £1300.

Herliard church, Hants, which has been restored through the munificence of Mr. F. J. E. Jervoise, the lord of the manor, was reopened by the Bishop of Winchester on the 5th inst.

A magnificent screen has been erected at the entrance to the recently restored choir of Salisbury Cathedral, by Mrs. Sydney Lear, in memory of her late husband.

St. John's Church, Portland, which has recently undergone restoration and enlargement, has been reopened for Divine service. The alterations effected have cost about £1000.

On Sunday last, at the first of the evening services in the nave of Westminster Abbey, the building was thronged, and the Dean of Westminster preached an impressive sermon.

The chancel of North Creak church, Norfolk, which has been lately restored at the cost of the Rector, the Rev. J. N. Simpkinson, and under the direction of Mr. F. Preedy, was reopened with a choral service on the 4th inst.

The Bishop of Chester on the 5th inst. laid the foundation-stone of the mission church of St. Barnabas, Chester, a building destined to accommodate 300 people. It is situated in one corner of the parish of St. John, which contains 9000 persons.

A deputation from Sheffield have had an interview with the Home Secretary, to protest against the proposed scheme by which it is sought to unite Sheffield with the suggested new bishopric of Wakefield. Mr. Cross asked if Sheffield itself would consent to become the centre of a new bishopric; but the deputation being unable to give an answer to the question at once, Mr. Cross remarked that a bill of this kind could not be allowed to occupy the time of Parliament session after session, and therefore he should like to have information on this point as soon as was convenient.

The Archbishop of Canterbury has sent to the Dean of St. Paul's a reply to the address to the Archbishops and Bishops which was published last week. His Grace states that he is unable to perceive the exact meaning of some parts of the address, and points out that it does not accurately distinguish between judicial and legislative matters. Presuming, however, that the memorialists desire some alteration in the arrangements of the ecclesiastical courts, the Archbishop says he thinks it has escaped their attention that for the past five years Convocation has been engaged in the task which they rightly consider to be its peculiar function—a work, he adds, which it has not yet accomplished.

The testimonial of esteem to the Bishop-designate of Truro from his friends at Lincoln was presented on the 5th inst. by Colonel Amcotts. The most remarkable feature of the proceedings was a letter from the superintendent of the Wesleyan circuit expressing his admiration of Dr. Benson's many virtues, of his wise and loving care of young men, and his untiring efforts to benefit the citizens of Lincoln.—On the same day the Duke of Westminster presented, at the Townhall, Chester, on behalf of a numerous body of subscribers in Chester and the neighbourhood, a magnificent silver salver and a purse of 150 sovereigns to the Rev. E. L. Y. Deale, for eleven years Precentor of Chester Cathedral, on the occasion of his preferment to the rectory of Northenden.—A testimonial, consisting of a purse containing £100, and a silver-gilt salver, has been presented to the Rev. J. B. Early, on his resignation of the curacy of All Saints, Fulham.—The Rev. J. H. Barber, Curate in Charge, St. Barnabas', South Lambeth, has received a cheque for £50, with the best wishes and kind regards of the members of his congregation.

THE UNIVERSITIES AND PUBLIC SCHOOLS.

The vacant fellowship at Oriel College, Oxford, has been awarded to Mr. L. R. Phelps, scholar of this society.

At a meeting of the Society of King's College, Cambridge, held on Monday, Mr. George William Dondon, B.A., was elected to a Fellowship.

The following is a list of the candidates who have passed the recent matriculation examinations held in the colonies, in connection with London University:—West Indies: Honours division (the number prefixed to the name indicates the number in the original honours list immediately after which that name have been placed had the candidate been examined in England)—4, William Blandford Griffith, Harrison's College, Barbadoes (obtained the number of marks qualifying for a prize); 16, Arnold Bertram Williams, Harrison's College, Barbadoes. First division: Hubert Outram Searle, Lodge School and Codrington College, Barbadoes. Mauritius:—First division: Fernand Henry Bonnetin, Royal College, Mauritius; Louis Henri Despeissis, Royal College, Mauritius; Henri Octave Laurent, Royal College, Mauritius.

The Mercers' Company have given notice that the lectures founded by Sir Thomas Gresham will be read to the public gratuitously in April, May, and June, at six o'clock, in the theatre of Gresham College, Basinghall-street, in the following order:—Astronomy (the Rev. E. Ledger), April 17, 18, 19, 20; Law (Dr. J. T. Abdy), April 24, 25, 26, 27; Physic (Dr. Symes Thompson), May 1, 2, 3, 4; Divinity (the Dean of Chichester), May 7, 8, 9, 11; Geometry (the Dean of Manchester), May 15, 16, 17, 18; Rhetoric (Mr. T. F. Dallin), May 22, 23, 24, 25; and Music (Dr. Henry Wylde), May 29, 30, 31, and June 1.

On Tuesday the whole of the troops in the garrison at Aldershot were engaged in a field-day, in the Long Valley, under Lieutenant-General Sir Thomas Steele, K.C.B.—About 38,000 men will take part in this year's summer drills in the vicinity of Aldershot.

NEW BOOKS.

It is always, we think, a task of public usefulness to report on the progress of our great industrial colonies beyond the western and the southern ocean. *An Essay on New South Wales*, the "Mother Colony of the Australias," as she is affectionately styled by the author, Mr. G. H. Reid, has been sent us, through Messrs. Triibner, from the Government printer at Sydney. We fully believe that this oldest or earliest of the British Australasian provinces, which occupies, within temperate latitudes, the eastern coast of the vast island-continent, looking over the Pacific Ocean, will soon again become the richest and most populous, though it has for a time been outstripped by Victoria in its rapidity of growth. The mineral wealth of New South Wales, including coal and iron, tin and copper, as well as gold, is scarcely equalled by that of any country of the same extent in all the world. Its geographical position will also prove the most favourable in Australia, both for maritime and overland commerce, being situated between Victoria and Queensland, with its face set towards New Zealand and the South Sea Islands, and on the probable route of traffic, in future, with China and California. It must be admitted, indeed, that the agricultural industry of New South Wales, at least in the produce of cereals, has not been so well managed as that of South Australia, which actually supplies the best of wheat to the sister provinces and to the home market. But in the pastoral, mining, and manufacturing departments of enterprise, taken altogether, New South Wales holds the foremost place. Mr. Reid's account of its condition and prospects is not exaggerated, if we may judge from a comparison of many different sources of information; and we would especially commend its perusal to any of those negligent observers who are too apt to regard Melbourne, or the province of Victoria, as the type of Australian progress. There is greater diversity and variety of resources, as well as of climate, scenery, and social life, in the province of New South Wales. Notwithstanding this remark, we should be sorry to allow the reader of our passing notices to form a disparaging opinion of Victoria, which has been, till within the last few years, the most successful and prosperous of all British colonies, and is still likely to continue, in future generations, a highly profitable field of investment for labour and capital. A second edition, revised and corrected up to 1876, of *Notes on the Colony of Victoria*, otherwise called the Victorian Year-Book, by Mr. H. Heylin Hayter, Government Statist, has been published by official authority at Melbourne. This work is likewise to be had in London, of Messrs. Triibner, and we should advise the intending emigrant or mercantile speculator to consult it, as well as Mr. Reid's treatise on New South Wales. A publication of the same character, statistical and descriptive, compiled by order of the Government of South Australia, was noticed in this Journal some time ago. Queensland has also found a competent literary spokesman, who only went little too far, perhaps, in giving his book the title, "Queen of the Colonies." There is much to be fairly said, without going beyond the truth, in praise of each one of the Australian provinces; yet we should rather scruple to encourage the hasty emigration of persons unaccustomed to real labour and possessing but small capital to any place in that bustling region of the Far South. The facilities of profitable investment, more particularly, for such an amount as £500 or £1000, even with the personal superintendence and industry of the owner, would be found much less in Australia than in New Zealand; but these colonies nowhere present such opportunities, in 1877, as they did twenty or twenty-five years ago. Large capitalists, however, and men or women of the working classes, both in country and in town employments, can make sure of fair success in Australia, if they will go prudently and steadily to work, and keep a sharp look out for the new openings there in view. We should certainly prefer New Zealand, at the present time, even to New South Wales, as a more remunerative field of activity; besides which, its climate is far more congenial than that of Australia to the English constitution, and incomparably better for a wife and family of young children. But emigrants must be allowed, after all, to please themselves in their choice of a new home.

A very pleasing book of light, musical, well-turned verses, giving lyrical expression to sentiments arising from incidents of personal experience, or from reflection upon stories current in the literature of romantic narrative, is presented to the world by Mr. Jemmett Browne. He announces it with the title *Songs of Many Seasons*; and its first piece, called "A Year," briefly touches the changing times of Spring, Summer, Autumn, and Winter, in harmony with the quickly passing life of a beloved maiden, finally laid at rest beneath the snow. Italy and Germany, as well as our own country, have furnished themes or local suggestions for the author's graceful Muse to play upon, more commonly, indeed, in a pensive or rather mournful strain of feeling, as in his confession of a not unworthy act performed at "the Feast of the Dead," in the Florentine churchyard. Some tales of chivalrous gallantry or religious devotion in the Middle Ages have also been chosen for subjects of the ballad class of poems. In many pieces of another kind he has preferred to deal with the ordinary ways and manners of English social life, and to relate, with a certain archness or smartness, the imaginary, or, perhaps, the real conduct of harmless love affairs—a game of chess with Miss Ethel, or a Sunday meeting in Piccadilly, with an honest pretty girl, who once served at a bonnet shop. Mr. Jemmett Browne, on the whole, has a degree of talent, as well as taste, for lyrical compositions, and he may yet produce something more considerable than these, if he will cultivate a deeper and fuller vein of thought. The volume, illustrated with several engravings, from designs by Messrs. Du Maurier, Walter Crane, and C. W. Morgan, is published by Simpkin, Marshall, and Co.

In another book of poetry, bearing a somewhat similar title, *Poems of the Months*, by M. A. Baines (publishers, Sampson Low and Co.), we find a stricter propriety of the appellation. Its subject, indeed, from the first to the last of its pages, which are not engraved, but very finely etched by Wilhelmus Baines, concerns the varying aspects of Nature throughout the year. Each of the twelve months is duly celebrated by Mrs. Baines, whose literary attainments were already proved, with a few lines, couplets, or stanzas, of passable verse, simply bearing testimony to the loveliness of the creation, and to the bounty of God its Maker. The flowers of each month, or other seasonable forms, are copied from nature, to supply the decorations of the pages. This elegant volume should be in request about New-Year's Day, for a suitable gift to a young lady; but it is not amiss to speak of it even now, on the threshold of charming May.

The Hon. Captain Legge has been appointed Chief Constable of Lancashire, in the place of Colonel Bruce, resigned.

A fine statue in terra-cotta of the late Prince Consort, by Theod. presented to the town of Southampton by Sir F. Perkins, M.P., has been mounted on a pedestal on a vacant piece of ground under the walls of the old castle, near the platform, looking eastward down the Southampton Water.

MUSIC.

ROYAL ITALIAN OPERA.

The opening of this establishment on Tuesday week, *vi Verdi's "Un Ballo in Maschera,"* has already been recorded.

The following performances of the past week consisted "Fra Diavolo" on the Thursday, and "La Favorita" on Saturday. On the earlier of these occasions Mdle. Blanc assumed, for the first time, the character of Zerlina, in which she sang and acted with much grace and vivacity; her effort having been in the air "Or non sola," at the beginning of the second act, in which the singer produced so much effect as to necessitate a repetition. M. Capoul made his first appearance at this establishment as Fra Diavolo, which part he was to have performed here last season, but was prevented by illness. He sang with much artistic feeling, his greatest effect having been made in the scene at the beginning of the last act, which was very effectively declaimed.

The cast of the opera was otherwise as before, having included Mdle. Scacchi as Lady Koburg, Signor Ciampi as Lord Koburg and Signori Tagliafico and Capponi as the pair of bandits, Beppo and Giacomo (their comic duet in the last act enclosed).

Saturday's performance introduced M. Gayarré, his first appearance in England. As Fernando, in Donizetti's tragic opera, the débutant displayed a tenor voice of great power and resonant quality, and at once produced a highly favourable impression in the opening scene of the opera, that was enhanced during the progress of his performance, which was most successful in the declamatory situations, such as that in which Fernando upbraids Alfonso with his treachery, and in the final passionate duet with Leonora. The air "Spirto gentil" was given by Signor Gayarré with some rather extreme contrasts of piano and forte, its delivery having called forth enthusiastic applause and an encore.

Madame Scacchi's Leonora improves by repetition. She sang with great effect on Saturday, particularly in the duet with Alfonso, in the second act (the latter part of which was encored), in Leonora's aria, "O mio Fernando!" and the closing duet with her lover.

The cast in other respects was the same as in previous seasons—Mdle. Cottino as Inez, Signor Graziani as Alfonso, Signor Baggiolo as Baldassare, &c. In each of the operas now referred to the clever dancing of Mdle. Girod in the incidental divertissement was a special feature. Signor Bevilacqua conducted on Thursday, and Signor Vianesi on Saturday.

This week's performances began on Monday with "Guglielmo Tell," which was given with a cast generally similar to that of last season—the part of Tell, however, having been assumed on this occasion (for the first time in England) by Signor Cotogni, who sang with great effect in the duet with Arnoldo, and the trio with that character and Walter; and still greater in the scene where Gessler sets Tell to shoot the apple from his son's head. Here Signor Cotogni's declamation was excellent, and called forth several deserved tributes of applause. Mdle. Bianchi, as the Princess Mathilde, sang with the same grace and refinement as before; Mdle. Cottino gave the music of Jenny (Tell's son) as satisfactorily as heretofore; Mdle. Ghiotti represented Edwige (Tell's wife); and Signor Marini, as Arnoldo, gave the difficult and trying music of the character as successfully as in his previous performances of the part. Signor Baggiolo was again the Walter, and Signor Sabater the Fisherman; Signor Scollari, as Gessler, having contributed to the efficiency of the cast, which was completed by Signori Raguer, Rossi, and Manfredi in subordinate parts. The "Tyrolienne" was cleverly danced by Mdles. Girod and L. and H. Reuters. The overture was brilliantly played—the incidental solos in the opening movement skilfully executed by Mr. E. Howell (violin), Mr. Radcliff (flute), and M. Castagnier (cornu Inglese). The "Allegro" was repeated in answer to an encore. Signor Vianesi conducted.

On Tuesday "La Favorita" was repeated; for Thursday "Don Pasquale" was announced, with the return of Mdle. Marimon; and to-night (Saturday) Signor Gayarré is to appear as Raoul, in "Les Huguenots."

Last Saturday's Crystal Palace concert brought forward an interesting "Suite" for pianoforte and orchestra by Joachim Raff, one of the recent productions of this prolific composer. Like all his music, it contains much that is striking and individual in style, and abounds with passages for the brilliant display of the solo instrument. In the execution of these Mr. Franz Rummel (who made his first appearance here) displayed highly cultivated powers of mechanism, and proved himself a pianist of an exceptional order. The concert included Beethoven's overture to "Egmont," Mendelssohn's first symphony (in C minor), and the "Danse des Pirates et des Jeunes Filles" of Henri Reber. The vocalists were Madame Ostmann-Goldberg and Mr. Hollins, each a first appearance. Of their merits we must take another opportunity to speak.

The "Bach Choir" gave a grand performance of Bach's sublime Mass in B minor, at St. James's Hall, on Wednesday evening, when the work was rendered with similar grand effect to that with which it was given by the same institution last year. The magnificent choruses were very finely sung by the excellent amateur choir, Madame Goldschmidt (Jenny Lind) having been among the choristers; and the solo portions were efficiently rendered by Mesdames Lemmens-Sherrington and Patey, Mr. W. H. Cummings, and Signor Foli. A fine orchestra was assembled, led by Herr Straus, who played the violin obbligato to the soprano and tenor airs, "Laudamus te" and "Benedictus;" other skilfully-rendered obbligati having been that for flute, by Mr. Svendsen, in the duet for soprano and tenor, "Domine Deus," and that for horn, by Mr. Wendland, in the bass air, "Quoniam." Mr. Otto Goldschmidt conducted, and Mr. T. Pettit presided at the organ. A second concert is to be given by the society on April 25, when Bach's motet, "Ein feste Burg," Gade's cantata, "Cornelia," and other interesting works are to be performed.

Four of the new series of classical subscription concerts at Langham Hall have now taken place. The programme of the last occasion (on Tuesday evening) included Brahms's new string quartet, Sterndale Bennett's pianoforte sonata in A flat, and Bargiel's pianoforte trio. Miss Florence Saunders was the pianist, and Mdle. Redeker the vocalist.

This (Saturday) afternoon the New Philharmonic Concerts enter on their twenty-sixth season. The programme includes Rubinstein's "Ocean" symphony; Wagner's prelude to "Die Meistersinger von Nurnberg;" and "Huldigung's March;" Schumann's pianoforte concerto in A minor (with Mrs. Besley as pianist); and Raff's "Ode au Printemps."

A map was opportunely published by the *Daily News* on Wednesday showing the Russian position at Kisheneff, the lines of Turkish defence formed by the Danube and the Balkans, and the limits within which, in the event of war between Turkey and Russia, the first operations in Europe would necessarily be confined. Accompanying the map is a compact account of the strength of the forces on both sides, the distances between various points, and a description of the mountain passes.

A SITTING OF THE NEW TURKISH

LIAMENT AT CONSTANTINOPLE.

A SITTING OF THE NEW TURKISH

PARLIAMENT AT CONSTANTINOPLE.

PARLIAMENT. COMMONS.

The Thursdays of the past and present weeks have both been noteworthy from a financial point of view. On the evening that hon. members resumed their labours after the Easter Recess, when the Prisons Bill, as amended, had been reported, despite the persistent opposition of that pachydermatous member Mr. Parnell, and the Scotch Prisons Bill had been read the second time, Mr. W. H. Smith exhibited no mean qualification for the chancellorship of the Exchequer of these days by delivering a characteristically clear speech on the Civil Service Budget, which this year stands at £21,755,575, showing an increase of £399,146 over the past twelvemonth. Reasons were given for this increase by the Financial Secretary to the Treasury, who could not get into Committee of Supply, however, until Mr. Gorst had aired his ideas on the evils of charging the costs of criminal prosecutions in part on local rates, and Mr. Gregory had further stopped the way with an abortive motion aimed against barristers and solicitors acting as registrars. The votes of £34,105 for the maintenance and repair of Royal palaces, and £117,645 for the Royal parks, led to an animated discussion, in the course of which the versatile Sir George Balfour evoked some cheering by the remark that St. James's Palace was not suitable to the dignity of the Crown of England, and ought to be rebuilt; and Sir Charles Dilke fruitlessly moved certain reductions in the sums demanded for Richmond Park.

Business, from a Ministerial point of view—voting supply—was not begun yesterday till many questions had been discussed, the subjects ranging from new standing orders affecting railway or tramway deposits and gas companies to executions, in speaking on which last topic the Home Secretary opined that hanging is as rapid and little painful a mode of capital punishment as is known. It was in vain Mr. A. Brown moved a resolution affirming that local authorities should have further powers to improve the rural water supply the bad state of which provoked Mr. Cowen into parody:—

The cottage homes of England,
How fearfully they smell;
There's fever in the cesspool,
And sewage in the well.

Mr. Selater-Booth, in reply, pointed out that the evil was gradually being remedied, and the motion was rejected by 64 to 37 votes. A grand scheme for acquiring the land between the new Foreign Office and Westminster Abbey for the mere trifle of £4,000,000, in order to build thereupon Government Offices worthy the nation, was propounded by Mr. Baillie Cochrane; but Sir Stafford Northcote (excoagulating his Budget, maybe, as he sat with his legs crossed) was in no Pactolian mood, though he saw no objection to the appointment of a Committee on the subject at a future date. Then the need of enlarging the commercial department of the Foreign Office was enlarged upon by Mr. Samuelson, and the Government reached the haven of Supply at last. Various votes for the Civil Service were agreed to, the grants for the South Kensington Museum not being allowed till vigorous protests had been entered against the expenses of the art-library and other items. Ere the House adjourned Mr. Cross brought in a bill to consolidate and amend the Factories and Workshops Acts by reducing the existing sixteen statutes into one Act of a hundred clauses.

As the Nasmyth hammer will crack the shell of a filibuster and leave the kernel intact with the ease with which it will flatten a bulky iron bar of many tons weight, so the right hon. gentlemen who sit on the Treasury Bench can, in the opinion of certain hon. and inquisitive members who are always wanting "to know, you know," with omniscient power, see that Sunday trading in Leather-lane is not interfered with by such uncommon means as the free discharge of carbolic acid upon the goods on sale there, say whether or not 300 women were sold as slaves the other day at Cairo, whether the affairs of Jamaica are as they should be, and whether the Turks are continuing their iniquitous persecutions of the Christians in Bosnia and in Bulgaria. These and many other questions were touched upon on Monday; and, with regard to the last-named point, Mr. Bourke read from Consul Holmes a distinct denial of recent outrages, though the Under-Secretary for Foreign Affairs could not satisfy Mr. Forster that Mr. Holmes had been explicitly asked whether certain specified barbarities had been perpetrated. This discussion preceded the following important notice by the Marquis of Hartington:—

I wish to give notice that on Friday next, on going into Committee of Supply, I shall move for further papers on the affairs of Turkey, and particularly for the draught of the Protocol submitted to Lord Derby by the Russian Ambassador on March 11, and also any further information with reference to the Russian Circular of Jan. 19 and the Protocol of March 12.

£4,046,000 on account was granted in Committee of Supply on the Civil Service Estimates, though not without great efforts on the part of Mr. Rylands to reduce the sum considerably; and various other sums were voted, after much discussion. Sir A. Gordon moved that it was not desirable to bring Militia officers, with certain exceptions, under the provisions of the Mutiny Act, and Mr. J. Holms seconded the resolution, which was supported also by Mr. Henry Samuelson, Earl Percy, Mr. Campbell-Bannerman, and Sir Henry Havelock, but was opposed by Mr. Stanley and Mr. Hardy, and eventually negatived without a division. Mr. P. A. Taylor being joined by Mr. Biggar and Mr. Parnell (who have almost arrogated to themselves the titles of champion obstructives) in opposing the proposal to go into Committee on the Mutiny Act, Mr. Hardy laughingly said he would not engage the House in a conflict on the matter, and allowed progress to be reported.

If Mr. Tenniel be in want of a subject for a *Punch* cartoon he might portray Sir Stafford Northcote in his favourite impersonation of the Byronic heroine, who, "swearing she would never consent, consented." Such has been the action of the Chancellor of the Exchequer on many occasions this Session, as when he argued quite against the Stock Exchange motion, and yet accepted it, and as when, on Tuesday last he officially opposed Sir R. Anstruther's motion for a measure of justice to the memory of the late Lord Dundonald, and yet by silence gave consent to it when the resolution was about to be put to the test of a division. Previous to this question coming on, Mr. P. A. Taylor's periodical motion for the abolition of flogging in the Navy had come on. That annual proposition having been rejected by 164 to 122 votes, Sir R. Anstruther brought forward the motion, which was evidently sympathized with on both sides the House. The motion was for a Select Committee to inquire into Lord Cochrane's petition praying her Majesty to complete the act of Royal justice which restored the late Lord Dundonald to his rank and honours by refunding to his heir the half-pay due to the naval hero. Sir R. Anstruther repeated the well-known history of the late Lord Dundonald's martyrdom; and Dr. Lyon Playfair, with dramatic effect, produced the autograph will of the late Lord, reading therefrom the following passage:—

I leave exclusively to my grandson Douglas all the sums due to me by the British Government for my important services, as well as the sums of money refused under perjured evidence, for the commission of a fraud on the Stock Exchange. Given under my trembling hand, this 21st February, 1820, the anniversary of my ruin.

This was the pith of the case for the petitioner, in point of fact; but the Chancellor of the Exchequer, whilst fully sympathizing with Lord Cochrane, saw difficulties in the way of granting the prayer, and contented himself with promising papers on the matter. But, in the end, the House was so manifestly in favour of the motion that the Ministry did not venture to divide, and the resolution was agreed to. A different fate befell Mr. James's motion that, "in the opinion of this House, it is the duty of her Majesty's Government to introduce some legislative measure empowering the Crown to make full investigation into the present condition and revenues of the eighty-nine companies mentioned in the second report of the Municipal Commissioners, 1837." Much stress was laid upon the gastronomic proclivities of modern members of these City companies by their critics, whilst Mr. Alderman Cotton found in their epicurianism a strong reason for supporting them. The whole debate, in fact, may almost be said to have smacked of feasts and toasts; and, whether it was the recollection of past or the anticipation of future civic banquets, certain it was the Solicitor-General made ample amends for his awkward debut by delivering a trenchant speech in defence of the City companies, which the House resolved to leave alone, and rejected Mr. James's motion by 168 to 72 votes. On the passing through Committee of the bill abolishing property qualifications for town councillors, Mr. Biggar vainly proposed a new clause to extend its operation to Ireland.

Wednesday was mainly taken up with the consideration of Mr. Waddy's Newspaper Registration Bill and with a lively scene arising from its discussion. Mr. Waddy wished by his bill, among many other details, to render it imperative that declarations should be made at the Crown Office stating the name of every paper to be published, where it was to be printed and issued, who were to be printer and publisher, and who the real proprietors. The hon. member for Barnstaple was answered by more than one newspaper proprietor that his bill proposed needlessly exacting regulations; and Mr. Cowen, in a spirited speech against the proposal, moved as an amendment—"That, in the opinion of this House, no legislation for the compulsory registration of the proprietorship of newspapers can be considered satisfactory which does not provide for the repeal of the exceptional law which renders newspaper proprietors criminally as well as civilly responsible for the acts of their employés." Criticism generally, in fact, was adverse to the measure, the Attorney-General, in particular, opposing it on the grounds that the newspapers of this country were, as a rule, excellently conducted, and that they ought not, therefore, to be needlessly embarrassed, as they would be by the cumbrous clauses of this measure. Mr. W. J. Ingram, following the same line of argument, assured the House that it was the desire of the proprietors of respectable papers to remove from their midst any black sheep who might bring the profession into disrepute; and added that, granted the motive of the bill was good, it would yet not effect the object aimed at, as any newspaper proprietor wishing to publish a malicious libel could evade the provisions of the bill by having other persons registered as proprietors. Mr. Hutchinson and Mr. Hermon having also spoken against the bill, Dr. Kenealy rose and, with an air of virtuous indignation, said if anyone should dare to libel him he would soon face a jury. For "foul and abominable libels" the present law was ample. Ironical cheers came from the Ministerial benches below the gangway as the hon. member for Stoke said he was no advocate for libels, whereupon he retorted that he could bear with philosophy the interruption that came from "that miserable quarter" of the House. It happened that Mr. Sullivan was for the nonce seated in "that miserable quarter," and he appeared to imagine he was personally attacked, for he soundly rated Dr. Kenealy by implication with a fluency and a warmth that must have inflamed the hon. member for Stoke to a white heat, for, on the rejection of the bill by 149 to 80 votes, Mr. Sullivan addressed the Speaker from his ordinary seat on the Opposition side, and accused Dr. Kenealy of having addressed him thus forcibly in the lobby, "Sir, you are a liar!" The hon. member for Stoke explained that he was provoked to use this language by the contemptuous epithets applied to him in Mr. Sullivan's speech. He then withdrew from the House whilst a resolution calling upon him to apologise was adopted, on the motion of Mr. Forster, seconded by Mr. Cross. Dr. Kenealy, in a penitent mood, having made the desired apology, the excitement subsided, and the House next allowed Mr. Monk's Congé-d'Elire Bill to be read the first time.

THE BUDGET.

The Chancellor of the Exchequer having at length been permitted by the sheer exhaustion of a vast variety of topics, and the petty as well as petulant loquacity of certain members who had insisted on a priority of hearing, rose at a quarter before six o'clock on Thursday to make his annual financial statement. Plunging at once into *medias res*, the right hon. gentleman said that the estimate of revenue last year was £78,412,000, and the actual revenue was £78,565,000, showing an increase of £153,000. But, on the other hand, the expenditure, which was estimated at £78,043,000, turned out to be £78,125,000, or an excess of £81,380. The result therefore was that the surplus which was expected to be £368,000 turned out to be £443,000; and though that was not a very brilliant result it was, considering the circumstances of the year, a subject for congratulation. The deficiency in the Customs Revenue, as compared with the estimate, was chiefly in spirits and tobacco. If the amounts voted in Supplementary Estimates had to be added to the ordinary votes the expenditure would have been £79,020,000, but the saving upon the votes had almost reached the amount of the Supplementary Estimates. The estimated expenditure for the year 1877 was as follows:—Debt charge, £28,000,000; Interest on local loans, £220,000; Suez Loan, £200,000; Consolidated Fund charges, £1,600,000; Army, £14,538,700; Home charge for Forces in India, £1,000,000; Army Purchase, £500,000; Navy, £10,978,800; Civil Service, £13,726,000; Customs and Inland Revenue, £2,767,000; Post Office, £3,261,000; Telegraph Service, £1,232,000; and Packet Service, £767,000. Total estimated expenditure, £78,794,000, or an increase of £663,000. In regard to revenue he regretted he could not form a very satisfactory estimate. At the same time he saw no reason for taking a very desponding view, as there were signs of improvement in the resources of the country; but under all circumstances it was felt advisable to take a very moderate estimate of the revenue. The Estimates were—Customs, £19,859,000; Excise, £27,500,000; Stamps, £10,920,000; Land Tax and House Duty, £2,560,000; Income Tax, £5,540,000; Post Office, £6,100,000; Telegraphs, £1,300,000; Crown Lands, £410,000; and Miscellaneous, £4,810,000. The result was an estimated revenue for the current year of £79,020,000, and expenditure £78,794,000, leaving an excess of income over expenditure of £225,000. They had, therefore (observed the Chancellor of the Exchequer), a Budget ready to their hands; for it was pretty clear that no increase of taxation was necessary and that there could be no remission. At first sight the burden upon the taxpayer might

be regarded as excessive, but it must be remembered that £13,400,000 of the expenditure brought a return; and the actual charge upon the taxpayer was only £65,600,000. The National Debt amounted to £779,283,000 when the present Government came into office—it now amounted to £775,590,000. Besides that decrease £4,000,000 had been expended on the purchase of the Suez Canal shares; £7,417,000 had been lent to local bodies in excess of the repayments; and there were other items which brought up the total expenditure on capital account in the last three years to £15,654,000. The pressure which during the last two or three years had been keeping down the elasticity of the revenue, unfortunately still continued, and the signs of the revival of commercial prosperity were as yet but feeble; nevertheless, the taxation of the country was not exceptionally burdensome. There existed resources which could be called upon if necessary. Our strength was in the endeavour to husband our resources; and our finances were in a sound and healthy condition in case it should be necessary to face contingencies which he did not care to contemplate. The statement of the right hon. gentleman, which occupied about an hour and a quarter, was generally well though not enthusiastically received. In the course of the discussion which followed much stress was laid upon the increasing expenditure of the country, and anticipations were expressed that the Government would be ultimately forced to effect a considerable reduction of the expenditure in many of the departments of the State. The usual formal resolutions were ultimately agreed to.

NATIONAL SPORTS.

Some fair racing was witnessed at Warwick last week, and Fasting Girl, a nice filly by Broomielaw—Abstinence, was probably superior to anything that ran at Lincoln. She secured a couple of races in good style, Violet Melrose being second to her on each occasion. Ray, a well-named filly by Speculum—Moonbeam, was another two-year-old winner; and the Great Warwickshire Handicap fell to Bloomfield (7st. 5lb.), who only had a couple of opponents to beat. One of these was Rosy Cross (7st.), who has scarcely fulfilled her early promise, though the weight is a heavy one for a three-year-old at this time of year. Meetings have been held during the present week at Bristol, Croydon, Thirsk, and other places; but there is little of more than passing interest to chronicle. The Fitzhardinge Two-Year-Old Plate at Bristol fell to Windfall, who is one of the first to credit Favonius with a race. Only five came out for the Bristol Steeplechase, which was won by Palm (10st. 10lb.), who was the worst favourite of the lot.

On Tuesday the subscribers and members of the Belvoir Hunt presented the Duke of Rutland with a testimonial consisting of four candelabra, which had cost £2500, in recognition of his great liberality in providing sport for them during more than twenty years. The presentation, which took place at Belvoir Castle, was made by Sir W. Earle Welby-Gregory, M.P.

The tenth annual competition for the Public Schools Racket Challenge Cup was brought off at Prince's last week. Marlborough, Wellington, Harrow, Cheltenham, Eton, and Rugby, were all represented, and a great sensation was created in the first ties, when Marlborough beat Harrow by four games to one. The final tie was splendidly fought out, the Hon. Ivo Bligh and C. A. C. Ponsonby, representing Eton, against G. M. Butterworth and F. M. Lucas, for Marlborough. The service of the Hon. Ivo Bligh was exceptionally brilliant, and contributed greatly to Eton's victory by four games to one; but this success was not so easily gained as it might appear to be at first sight, for in two of the games the score was "14 all," and they had to be "sett."

At about eleven o'clock last Saturday night the greatest feat in the annals of pedestrianism was brought to a conclusion at the Agricultural Hall, Islington, when D. O'Leary and E. P. Weston finished their six-day's walk—the former covering 520 miles, against the 510 miles of his opponent. Both men have considerably exceeded anything that has ever been done before in the annals of long-distance walking, and we can truly say of Weston's defeat that it does him far more credit than any of his previous victories. Some particulars of this well-contested match will be found at page 355, and an illustration of it on the following page.

Lady Burdett-Coutts distributed prizes to the successful students of the Torquay Science and Art School yesterday week.

The returns as to the emigration from the Mersey last month give a total of 2985 persons—a number lower by 1330 than that for March, 1876.

An estimate of the amount required in the current financial year to defray the cost of the Army Purchase Commission has been issued. The total, £500,000, shows a net decrease for the year of £14,190.

The Mayor of Salford received on Thursday morning the writ for the election of a member in the place of the late Mr. Cawley. He has fixed the nomination for Monday next, and the polling for Thursday.

A cocoa and coffee house (erected at the cost of Mrs. F. T. Mappin), the object of which is to afford to working men refreshment unminged with intoxicating liquor, was opened at Sheffield on Monday evening, when addresses were delivered by Mr. Roebuck, M.P., Mr. Mundella, M.P., and Sir Harcourt Johnstone, M.P. Alderman Bassett, the Mayor, presided.

At a meeting on Monday of bondholders of the Turkish 1854 Loan a resolution was passed requesting the Council of Foreign Bondholders to co-operate with Messrs. Dent, Palmer, and Co. in their efforts to obtain from the Turkish Government authority for the payment to the bondholders of the unpaid half coupons out of the funds held by the Bank of England.

The Yorkshire Congregational Union began its sittings at Dewsbury on Monday. It was resolved by the Executive Council to accept an invitation to hold the next annual conference at Scarborough. Meetings were held at Dewsbury, Earlsheaton, and Batley in connection with the conference. The great public meeting took place on Tuesday. Mr. Byles, of Bradford, presided, and gave an address, in which he said that the denomination was spreading, but there was a want of stronger spiritual life. Their ministers ought to take example by the late Rev. Norman Macleod. They needed more help from the many; but at present the chief contributors to their funds were the wealthy. The Free Church of Scotland was a marvellous illustration of what combined help and small contributions from all parties associated could do. The example was one the Congregationalists might advantageously follow. Subsequently, on the motion of the Rev. Dr. Mellor, a resolution was unanimously passed disapproving of the Government Burials Bill, and petitions against it were ordered to be sent to both Houses of Parliament. The Rev. C. Lyte, of Rotherham College, was unanimously appointed chairman of the Union for next year. At night a large public meeting was held in Trinity Church, in connection with the conference.

METROPOLITAN NEWS.

All the Ministers were present at the Cabinet Council held on Wednesday.

Arrangements have been made for holding the Carlton Exhibition in the western galleries of the Exhibition buildings, Queen's-road, South Kensington.

At a General Court of the Bank of England Mr. Edward Howley Palmer has been elected governor, and Mr. John William Birch deputy-governor for the next two years.

Mr. James Dewar, F.R.S.E., Jacksonian Professor of Natural Experimental Philosophy in the University of Cambridge, has been elected Fullerian Professor of Chemistry in the Royal Institution, in the room of Dr. J. H. Gladstone, resigned.

The twenty-third annual meeting of the Society for the Promotion of Wesleyan Methodist Education was held on Tuesday evening at Exeter Hall, under the presidency of Mr. Alderman Mitchell.

Lord Aberdare presided on Tuesday at a conference of representatives of discharged prisoners' aid societies, called to consider the questions which have arisen since the conference of 1871. Several papers were read, followed by discussions.

Sir Charles Reed, chairman of the London School Board, presided on Monday evening at the public opening of a new school in the Bellenden-road, Peckham, with accommodation for 817 children.

Princess Christian has promised some contributions to a bazaar to be opened by the Lord Mayor and the Lady Mayoress at the City Terminus Hotel, Cannon-street, May 26, on behalf of Mrs. Hilton's Crèche and branches in Stepney-causeway.

At the annual general meeting of the Household Fire and Carriage Accident Insurance Company (Limited), held at the offices, 4, St. Paul's-churchyard, on Monday, a dividend of 6 per cent per annum was declared.

The council of the Yorkshire College of Science has been officially notified of the decision of the Clothworkers' Company to expend the sum of £10,000 in providing adequate accommodation for the textile industries department of the college.

The annual dinner in aid of the London Coffee and Eating-House Keepers' Benevolent Association will take place at the Cannon-street Hotel, on Wednesday next, under the presidency of Mr. Sheriff East.

Dr. Schliemann read a paper on Troy and its analogy to Mycenæ, last Wednesday, before a brilliant gathering of members of the British Archaeological Society and their friends—Lord Houghton in the chair. The society has conferred on him a diploma of honorary membership.

About £110 has been received for the poor-box at the Mansion House in answer to a recent appeal made by the Lord Mayor. This sum is described as being entirely inadequate to the daily increasing wants of the poor who come for temporary assistance in times of distress and emergency.

The officers and members of the light cavalry attached to the Honourable Artillery Company gave a soirée dansante at their head-quarters, Finsbury, yesterday week. The Lady Mayoress honoured the ball with her presence; ill-health preventing the Lord Mayor from being present.

Asitting was held at the Society of Arts on Tuesday evening (under the presidency of Mr. Campbell Johnston) to hear Mr. R. Richards read a paper on the Social State and Prospects of the South African Communities. Mr. Richards's paper was rather long, but in substance it gave a highly favourable account of our South African communities.

A conference of Nonconformists, presided over by Mr. Richard, M.P., was held at the Westminster Palace Hotel on Tuesday, when several resolutions against the Burials Bill of the Government were passed. Sir H. Havelock, Mr. O. Morgan, and Mr. Stansfeld were the members of Parliament who made the principal speeches against the measure.

An exhibition of paintings, comprising, among other works six by Mr. Alma Tadema, A.R.A., two by Guido Bach, and fourteen by H. Herkomer, is on view at the German Athenæum, 51, Mortimer-street.—The collected sketches and drawings of the late Mr. R. T. Landells are to be sold, on April 20, by Messrs. Puttick and Simpson.

The attention of the City Commissioners of Sewers having been directed to the great want of a proper inquest-room within the City of London, the medical officer of health has made inquiries, and on a report from that gentleman the Commissioners have determined to provide the required accommodation.

The receipts at the Albert Hall on Easter Monday evening, at the concert given by Messrs. Nurdin and Peacock for the benefit of the Cheesemongers' Benevolent Institution, amounted to £1000. This sum will be handed over to the institution intact; the expenses, amounting to between £500 and £700, being defrayed by Messrs. Nurdin and Peacock.

Last month the officers of the Fishmongers' Company seized at Billingsgate Market and destroyed 7 tons 2 cwt. of diseased fish, which had been consigned there for sale. The fish included 2100 herrings, 68 cod, 500 haddocks, 36 ling, 467 plaice, 40 salmon, and 200 whiting; and there were seized besides, 4 baskets of oysters, 25 baskets of smelts, several bushels of mussels, and 42 bushels of periwinkles.

Schools provided by the new scheme which has amalgamated the endowments of four educational institutions in Westminster were opened on Wednesday by Dean Stanley. It was stated that, whereas the old endowments clothed and boarded 166 children, in the new schools 600 children will be educated as day scholars, in addition to 300 in the boarding-school, who will be also boarded and clothed.

The Working Men's College, 91, Blackfriars-road, which was opened in January, 1868, for the purpose of giving to the working men of South London and their families the means of a thorough education, reopened on Monday. Among the new classes are technical classes for carpenters and bricklayers, elementary classes in chemistry, modelling, and in mathematics, and a civil service class.

Dr. D. G. F. Macdonald writes to us:—"The genial weather of the past few days has already induced many of our summer migrants to come over. On Sunday last I heard the cuckoo and nightingale in full song at Chiselhurst, whilst martins and swallows were hawking for insects over the common. It is a remarkable fact that summer birds appear earlier within a short distance of London than in any other part of England."

For the first time for several years the weekly return of metropolitan pauperism shows an increase compared with the corresponding week in the preceding year. The total number of paupers at the end of last week (the first week of April) was 85,021, of whom 38,667 were in workhouses and 46,354 received outdoor relief. This is an increase of 1003 over the corresponding week in 1876, but a decrease of 7477 and 9366

compared with 1875 and 1874 respectively. The increase is in indoor paupers, who numbered last week upwards of 2000 more than in the corresponding week in either of the three preceding years. Outdoor paupers have fallen off 1287 compared with last year, and 10,591 and 22,462 compared with 1875 and 1874. The number of vagrants relieved on the last day of the week was 670, of whom 493 were men, 132 women, and 45 children.

Last week 2525 births and 1922 deaths were registered in London, the former having exceeded by 13 and the latter by 266 the average numbers. The deaths included 78 from small-pox, 50 from measles, 16 from scarlet fever, 4 from diphtheria, 69 from whooping-cough, 27 from different forms of fever, 9 from diarrhoea, 366 from bronchitis, and 131 from pneumonia. At the Royal Observatory, Greenwich, last week the mean temperature was 47 deg., or 3 deg. above the average.

The triennial festival in aid of the Royal General Dispensary, which was founded in 1770, was held, on Wednesday evening, at the Albion Tavern, Aldersgate-street, under the presidency of the Lord Mayor, who was supported by the Sheriffs. The subscriptions amounted to about £450. A good selection of vocal music was given, under the direction of Mr. Lester, by Madame Clara Suter, Miss Marion Severn, Mr. M. Watson, and Mr. Chaplin Henry.

Lord Derby, in reply to a deputation from Coventry, Derby, Leicester, and other places respecting the depressed state of the ribbon and silk trade of England, which they attributed to the operation of the Anglo-French Commercial Treaty of 1860, entered fully into the question, and assured the deputation that all the details they had submitted to him would be considered, and that they would be forwarded to the gentlemen in Paris who are engaged in the negotiation of a fresh treaty.

The London School Board reassembled on Wednesday after the Easter recess. A recommendation of the finance committee to pay a small sum of money to the Clerkenwell vestry gave rise to a discussion on church rates, which resulted in the passing of a resolution declaring it to be undesirable for the board to pay voluntary church rates in any case. The works committee were authorised to erect babies' rooms in connection with those schools where, in their opinion, they were required.

At the half-yearly meeting of the London Financial Association on Monday a statement was made as to the relationship in which the association stands to the Alexandra Palace. The report stated that the directors had bought the palace, the estate, and chattels for £390,000, together with sixteen acres of freehold land for £18,000, making a total of £408,000, the first cost having been £760,000. The palace and park have been let on lease, and about 250 acres of building-land will be dealt with separately. The approval of the shareholders was given to a bill in Parliament to authorise the sale of a portion of the palace grounds.

Mr. Nichols, one of the Commissioners appointed under the provisions of the Artisans' and Labourers' Dwellings Act, has held an inquiry as to the provisions of a scheme for the improvement of certain areas in Westminster. By the demolition of the houses scheduled in the scheme 1380 persons would be displaced in the Old Pye-street district who at present occupy 510 rooms. The dwellings proposed to be constructed in their stead would be built in blocks five stories high, and would contain in the aggregate not less than 500 tenements, half of one room, and half of two rooms each, thus providing 750 rooms for the accommodation of 1380 persons.

The first meeting of the new Metropolitan Asylums Board was held last Saturday. Dr. Brewer, who was re-elected chairman, presided. The clerk, Mr. Jebb, read letters from the vestries and medical officers of health of the metropolis, in reply to a circular sent to them asking their opinion upon the subject of a board being formed with power to treat all cases of fever and smallpox, whether of the pauper or non-pauper classes. The majority of the vestries were in favour of a central authority being formed, but some objected. The reports from the several asylums under the management of the board showed that in all the asylums there were 979 cases of smallpox, and that sixty-nine patients had died during the fortnight.

A statement was made by the coroner's officer for Lambeth, last Saturday, with reference to the property of the lady named Eliza Rogers, of 6, Queen-street, Webber-street, Lambeth, upon whose body an inquest was held a short time ago, and for whose property an heir is wanted. The officer said that since the inquiry he had found among a quantity of rubbish in a chest of drawers a bank-book relating to £180 17s. 4d., which had been deposited in the Lambeth Bank, in addition to bonds of the value of upwards of £500 in the Three per Cent Consols. The whole of the property amounted to £737. He had had the body interred and the furniture and effects valued by two sworn brokers. A number of letters had been received from all parts of the country from persons who thought they were related to the deceased lady, and he had placed all the documents in the hands of a firm of solicitors.

A public meeting was held on Monday evening at the Masonic Hall, Camberwell New-road, with the view of promoting the success of the Surrey Association for the Advancement of Science, Art, and Literature. The chair was taken by Mr. W. H. Stone, from whose opening observations it appears that the objects to be promoted by the new association will include first-class lectures in science and art, a gradual acquisition of philosophical apparatus, music, conversazioni, teaching of languages, reading-room, and library. The scheme contemplates subscribers at a guinea a year each, and an affiliation if possible with South Kensington. Resolutions pledging the meeting to the promotion of the above objects were proposed by Mr. D. Rogers, Mr. Puckle, Dr. Lempière, and others. It was intimated in the course of the evening that the names of one hundred life-subscribers to the association had already been enrolled. Mr. H. H. M. Smith acted as secretary.

The Lord Mayor on Wednesday received a communication from M. Mignot, the President of the Chambre Syndicale des Ouvriers Menuisiers en Bâtiment at Paris, stating that that body had determined to offer a sculptured monumental pulpit, of the value of from £1200 to £1400, for erection in St. Paul's Cathedral, as a recognition of the aid rendered by England to the French sufferers during the war of 1870. The cost will be defrayed by a voluntary subscription, and the pulpit will be exhibited at the Paris Exhibition next year. The Lord Mayor, in reply, thanked the Chamber for their very handsome offer, and promised to lose no time in laying their communication before the Dean and Chapter of St. Paul's, with whom the decision would rest. It is also announced that, as the result of an appeal made last year to many of the City guilds, asking for their support towards providing a peal of twelve bells for St. Paul's, seven of the companies have agreed to contribute a bell each. The Corporation of London have provided the great tenor bell, and Baroness Burdett-Coutts, in connection with the Turners' Company, has given the remaining four. About £1000 is still wanted to furnish the necessary machinery and to prepare the tower for the reception of the bells and chimes.

Professor Wace, M.A., read a paper last Monday on the Ethics of Belief, at a meeting of the Victoria Philosophical Society. This paper was mainly a reply to Professor Clifford's article in a recent number of the *Contemporary Review*, which raised the question whether we have the right or not to question the authority of religious belief. Professor Wace maintained that if they were to be guided by the experience of mankind, faith and not science must determine the practical order of life. The just, according to Professor Clifford, should live by doubt, but Professor Wace maintained that the lesson of ordinary life and of the Scriptures was that the just should live by faith alone. He considered that a man must act every day of his life on the basis of certain moral, political, and religious assumptions, of which few men could be competent judges, and he thought all that could be asked of him was, that he should give as thorough a consideration as was possible to objections raised respecting them. His whole presumption was in favour of faith, and opposed to doubt, and he thought it safer in matters of practice, both for individuals and society, to err on the side of belief and trust than on the side of doubt and hesitation. A discussion lasting an hour and a half followed. The speakers were the Rev. Principal Rigg, D.D., the Rev. Principal Angus, D.D., both of whom expressed disagreement in various points with the paper; the Rev. Prebendary Irons, D.D., who showed that these objections had, for the most part, been anticipated and met by Professor Wace; the Rev. A. G. Pemberton, who held that Bishop Butler had fairly answered every possible objection to Christianity; the Rev. G. Warburton Weldon, who said the paper had the three great merits of being short, modest, and to the point, and that its critics had admirably answered one another; the Rev. C. E. Edgington, the Rev. A. C. Macpherson, the Rev. Prebendary Row and Mr. T. Harriott. Professor Wace replied.—At the meeting next Monday a paper on recent Assyrian research will be read.

WILLS AND BEQUESTS.

The will, dated Jan. 18, 1876, of the Right Hon. Jane, Countess of Egremont, late of Orchard Wyndham, Somersetshire, who died on Dec. 18 last, was proved on the 5th inst. by the Rev. George Richard Dupuis, the nephew, and John Philip Martineau, the acting executors, the personal estate being sworn under £120,000. The testatrix gives the advowson of the rectory and parish church of Clysstodon, Devon, with the next presentation, to the said Rev. G. R. Dupuis, and the advowson of the rectory and parish church of Alphington, Devon, to her nephew the Rev. Edward John Gore Dupuis. There are many annuities and legacies, both pecuniary and specific, to relatives, servants, and others; and the residue of her property the deceased Countess leaves to nine of her nephews and nieces.

The will and codicil, dated July 4 and 21, 1873, of the Hon. Mrs. Julia Bathurst, late of Hyams, Chobham, Surrey, who died on Feb. 22 last, at No. 22, Grosvenor-gardens, were proved on the 31st ult. by Allen Alexander Bathurst, the son, and Richard Musgrave Harvey, the acting executors, the personal estate being sworn under £120,000. The testatrix leaves to her daughter, Mary Selina, £21,000 and £1000 per annum; and there are some other legacies. The residue of her personalty and all her real estate, including the estate called Hyams, she gives to her said son.

The will, with two codicils, dated Aug. 8, 1868, July 26, 1873, and March 28, 1874, of Mr. Benjamin Hyde, late of Southfield House, Louth, Lincolnshire, who died on Oct. 6 last, was proved on the 27th ult. by Samuel Hyde and William Hyde, the brothers, and William Hyde, jun., the nephew, the executors, the personal estate being sworn under £120,000. There are considerable bequests to his brothers, nephews, and nieces, the relatives of his late wife, and servants; and the residue of his real and personal estate is given to his nephew, the said William Hyde the younger.

The will, dated March 20, 1876, of Mr. Stephen Cox, late of No. 11, Stamford-street, Blackfriars-road, who died on Jan. 30 last, was proved on the 6th ult. by John Roalfe Cox, the son, and Francis Woodhouse Braine, the executors, the personal estate being sworn under £40,000. There are numerous legacies to members of his family and others; and the residue of his property he leaves to his three sons, Zechariah Stephen Cox, John Roalfe Cox, and George Cox.

The will, dated April 6, 1876, of Mr. John Morgan Cobbett, M.P., late of Skynes, Edenbridge, Kent, who died on Feb. 15 last, was proved on the 14th ult. by Frederick Waller, George Marrable, and John Fielden Cobbett, the son, the acting executors, the personal estate being sworn under £16,000. The testator gives to his wife, Mrs. Mary Cobbett, all his furniture, plate, and household effects; to his daughter Mary his freehold house at Brighton; annuities to his three sisters, and the rest of his property to his two sons.

The will, dated Nov. 18, 1870, of Admiral Henry Gossett, R.N., late of No. 11, Old Quebec-street, Portman-square, who died on the 1st ult., was proved on the 15th ult. by Arthur Gossett, the brother, and Arthur Wellesley Gossett, the nephew, the acting executors, the personal estate being sworn under £7000. The testator bequeaths legacies to his nephews and nieces, and the remainder of his estate to his said brother.

ELEPHANT-SHOOTING BY MOONLIGHT.

That well-known writer of many tales of wild sporting exploits and surprising adventures, best known as "The Old Shikarry," whose death we announced with due regret some twelve months ago, furnished this sketch of an African hunting scene. The mighty beast whose life is aimed at by the Englishman, with a loaded rifle now about to send its steel-pointed shot or explosive shell into a vital part of the huge body, has come down at night, the leader of a female herd, to drink of the placid lake. His foes, the accomplished and well-equipped European, with the native Kafir servant, have concealed themselves in ambush, behind a thick screen of foliage, upon a rude platform of logs erected in the midst of the shallow water, surrounded by the broad floating leaves and gorgeous flowers of a magnificent aquatic plant. Short will be the respite and sure is the death of this doomed animal, the monarch of neighbouring swamps and forests, whose tusks of finest ivory, when they are sent to this country, will bear a goodly price in the market at the east end of London. It seems very probable that, before the expiration of the present century, the races of the wild elephants, rhinoceros, and hippopotamus, will have become almost extinct, in those parts of East Africa and South Africa to which there is increasing facility of access. They will then be preserved only, for two or three generations, in the menageries and zoological collections of Europe, or of some colonial towns; but the time will come, perhaps within one hundred years, when not a single living specimen will remain on earth. They should not, in any case, be allowed to infest the vicinity of inhabited and cultivated districts, for their ravages in every kind of agricultural produce are often most grievously felt by the poor native people.

AFRICAN ELEPHANT-SHOOTING BY MOONLIGHT

THE BUILDING IN WHICH THE TURKISH PARLIAMENT HOLDS ITS SITTINGS AT CONSTANTINOPLE.

THE LATE MRS. CHISHOLM.

We have mentioned the death of this benevolent lady, whose efforts to improve the condition of British female emigrants to the Australian colonies have long been held in public esteem. She was, before her marriage, Miss Caroline Jones, daughter of Mr. William Jones, of Wootton, Northamptonshire, where she was born about the year 1810. Her energy was exercised for the benefit of the needy of her own neighbourhood, until her marriage to Captain Alexander Chisholm, of the Indian Army, in her twentieth year, removed her to a more extended sphere of usefulness. On her arrival at Madras, Mrs. Chisholm's attention was directed to the neglected and dangerous position of the soldiers' daughters; and, by the co-operation of the Governor and others, she established an industrial home, in which young girls were sheltered from all evil association, and instructed in practical knowledge. Captain Chisholm removed with his family to Australia, as his health required a temporary change of climate. At Sydney Mrs. Chisholm's sympathies were enlisted by the sufferings of the emigrants, who frequently arrived friendless and penniless. When Captain Chisholm returned to India, it was deemed desirable that his family should remain for a time at Sydney; and his wife devoted all her spare time to the schemes of usefulness which she had matured during her three years' residence in the colony. The protection of her own sex seemed to claim Mrs. Chisholm's most earnest efforts, and for them, after great difficulties, she succeeded in establishing a temporary home. She undertook several journeys into the interior for the purpose of forming committees and establishing country homes, taking with her, at the same time, parties of young women, varying in number from fifteen to sixty, whom she placed in service at the farms on the route. Their travelling expenses were at first borne by herself, and afterwards refunded. No sooner, however, did the settlers become acquainted with her praiseworthy object than they offered to find conveyance as well as food; and Mrs. Chisholm records the fact that her own expenses during seven years amounted only to £1 18s. 6d. When labourers were required in the interior, though there was an excess in Sydney, she undertook, at the Government expense, many journeys of 300 miles into the bush for the purpose of planting families, sharing the hardships of her companions, and performing the duties of leader, adviser, and commissary-general. Mrs. Chisholm established an office in Sydney, at which all persons needing employment might attend daily; and by her disinterested efforts has placed many thousands in positions of respectability and comfort. Having collected a quantity of facts bearing on the history and prospects of settlers in the colony, she published them under the title of "Voluntary Information of the People of New South Wales." Early in 1845 Captain Chisholm rejoined his wife, and gave her the benefit of his hearty co-operation. In 1846 they found it necessary to revisit their native land; and Mrs. Chisholm left Australia, having accepted a public testimonial of £150, which she set aside for the furtherance of her benevolent views. In fact, she returned to England, not to rest from her labours, but to carry them out more effectually. Possessing neither rank nor influence, and with

an income scarcely amounting to a competency, Mrs. Chisholm began her contest with Government officials for the rights of her poor clients. She secured attention to her representations by the confidence she inspired, and at length the order was given which consigned two shiploads of children from various workhouses to their parents in Australia, at the expense of Government. Similar success attended her efforts on behalf of the convicts' wives, who had been promised a free passage in certain cases of meritorious behaviour on the part of their husbands. But the great achievement of her visit to England was the establishment of the Female Colonization Loan Society, for the promotion of family emigration. She went again to Australia in 1854, and, after devoting many years to the philanthropic objects she had at heart, returned to England in 1866. Our Portrait of Mrs. Chisholm is copied from the photograph of a life-sized painting of her, taken by Mr. Angelo Hayter in 1850. She is represented with a letter in her hand, which was the letter written to her by a poor emigrant girl in the interior of New South Wales, imploring Mrs. Chisholm to

send out a near relative of hers. The letter was addressed thus—"Mrs. Caroline Chisholm, the Emigrants' Friend, England or elsewhere." It reached the post-office in London, and was at once delivered to Mrs. Chisholm.

THE TURKISH PARLIAMENT.

An illustration of the opening of the new Parliament of the Turkish Empire by his Majesty the Sultan, in the Grand Throne-Room of the Imperial Palace of Dolma-Bagché, formed the Extra Supplement given with last week's Number of this Journal. We now present an exterior view of the building at Constantinople, in which the sittings of the Parliament are held, and one of the interior of the Chamber of Deputies, with that important deliberative assembly in full session.

The building, in which both the Senate and the Chamber of Deputies at present find accommodation, in two separate halls, is one called the Dar el Fanoum, situated near the Mosque and ancient Greek Cathedral of St. Sophia. It was partially constructed in the reign of Sultan Abdul Medjid, from the year 1840, to be occupied by the projected Turkish University, but remained in an unfinished state at the period of the Crimean War, in 1854. During that campaign it was used as a military hospital for the sick and wounded soldiers of the British army. Some time after the termination of the war, an attempt was made by the Turkish Government to carry out its design of the University here. Something was done in the way of repairing and completing a portion of the building, and professors of literary, historical, scientific, and other studies were appointed. One of these was Ahmed Vefik Effendi, who is now President of the Chamber of Deputies. He delivered but two lectures at the University, his subject being the philosophy of history. The only other professor who ever put in an appearance was the professor of chemistry, and it is reported that his one lecture was occupied with the old marvels of alchemy, instead of the principles of modern science. The Ottoman University, in short, proved an utter abortion, and the project was dropped, like many other liberal and useful designs in Turkey, after a sad waste of public money. Some time afterwards, to make the vast empty building available for the Government service, the Ministers of Commerce and of Public Works took possession of different parts of it. The two floors which were lately abandoned by the Ministry of Commerce have been fitted up for the two legislative bodies under the new Constitution. These halls are exactly alike, and are similarly decorated and furnished, except in the position of the "tribune," or platform and desk at which the member who is speaking has to stand while addressing the House. The length of the hall is 52 ft., and its breadth 36 ft. Its decorations are a mixture of the Renaissance, the Moorsque, and the modern styles; the ceiling is adorned with rectilinear patterns of diverse colours, and with some gilding; while the fronts of the galleries have a Saracenic form of ornamentation. There are, in the side galleries, special boxes for the Sultan, the foreign Ambassadors, and other illustrious visitors; there is also a Reporters' Gallery.

THE LATE MRS. CHISHOLM.

The members of the Chamber, as in other Continental Parliaments, sit on benches, with desks before them, confronting the lofty magisterial platform of the President and Secretaries. This is ascended by a flight of steps from the upper part of the floor, which rises in a slight inclined plane; the "tribune," or pulpit for the member speaking, stands rather lower, in front of the President's platform. It is placed in the Chamber of Deputies, to the left hand of the President's chair, but in the Senate it is on the President's right hand.

A SKETCH AT THE JETTY, YOKOHAMA: TROOPS ABOUT TO EMBARK FOR THE SEAT OF WAR.

EMBARKATION OF GOVERNMENT TROOPS FOR SATSUMA AT THE JETTY, YOKOHAMA.

THE CIVIL WAR IN JAPAN.

Our Correspondent and Special Artist at Yokohama, Mr. C. Wirgman, writes as follows, on Feb. 27, upon the subject of his two sketches:—

"Japan being a volcanic country, it is but natural that frequent eruptions should take place there. Indeed, since last October, when the garrison of Kumamoto, in the province of Hiogo, was attacked in the dead of night, and numbers of officers and soldiers were massacred by 'Old Japan' fanatics, rebellions and risings of the farmers have occurred in nearly all parts of this country. But they have been separately put down by the Imperial Government. During all these outbreaks the powerful clan of Satsuma remained perfectly quiet, even during the Mayebara insurrection in Chô-shin, which threatened at one time to involve the whole of Japan in a civil war. In order to appease the farmers, their taxes were reduced, and all was apparently quiet throughout the land. Still, from time to time, rumours reached Yeddo to the effect that Satsuma was much agitated. It was reported at one time that Saigo, at the head of seventeen battalions, was marching on the capital, to present a memorial asking for the removal of obnoxious Ministers. These rumours were, however, contradicted, and everything seemed going on smoothly, when the Mikado went down to Kiyoto to open the railway on the 5th of this month. But hardly had that ceremony been satisfactorily performed when news reached here that a Government steamer, removing powder from Kagoshima (the capital of Satsuma), had been sent away by armed Samurai, who refused to allow the powder to be removed from their province. This was, indeed, the beginning of the troubles. The schoolboys, the Samurai, and the army in Satsuma, then took up arms and invaded the next province, that of Hiogo. The Mikado and his councillors had before wished to pursue a policy of conciliation. But, on their receiving a telegram to the effect that the insurgents had acted in this manner, they were obliged to declare war. The Mikado then appointed Arisugawa no Mita Commander-in-Chief, with full powers to crush the rebellion as speedily as possible. Since then the Government has forbidden the publication of any news by the native newspapers; but frequent rumours of battles having been fought have reached Yokohama. The Satsuma men have, since the revolution of 1868, been the spoilt children of Japan; but they evidently wish to keep their *Imperium in imperio*, which is a thing not to be tolerated. The Imperial Government is now sending against them a large military force. Thousands of troops have been sent down in the mail steamers belonging to the Mitsubishi Company (Japanese), which were purchased from the Pacific Mail Steam-Ship Company (American) some time ago. These troops look splendid; they are armed with short sniders, well clothed, and well fed; each soldier has an extra pair of shoes attached to his knapsack, and a red, blue, green, or purple blanket. During the last fortnight Yokohama has been enlivened by their presence. They came down from Yeddo in the train, and are here embarked on board the steamers. Yesterday 2000 men went south, and 300 policemen, fine-looking fellows, armed with quarter-staves, which they will exchange for rifles and revolvers when they arrive at their destination. I inclose a few sketches from life, to show how Yokohama looks during an insurrection; and I will send you more."

The Japanese official paper denies that General Saigo is taking any part in the insurrection; but the very fact of that denial, looking to the terms in which it is made, and to the fact that General Saigo is down in the province where the insurrection is going on, rather tends to confirm the report that he is promoting the insurrection. There is a telegram from San Francisco, dated the 21st ult., stating that Kagoshima was captured by the Imperial troops, after a sharp and severe conflict. It will be remembered that this place was bombarded by a British squadron, or ship of war, to punish the Prince of Satsuma for some injuries done to British property some fourteen years ago.

LEGAL EDUCATION.

The Professor of Jurisprudence and Roman Civil Law, Sir G. S. Creasy, will, during the ensuing educational term, deliver a course of about eight lectures on the History of Roman Law, and also a course of about eight exegetical lectures on Roman Civil Law. The first lecture of this course will be given on Tuesday, April 17, at eleven. The subsequent lectures will be delivered on Tuesdays and Wednesdays, at the same hour. The lectures on this subject will be suspended after Wednesday, May 2, and be resumed on Tuesday, May 29, at the usual hour. The lectures will be given in the Middle Temple Hall.

The Professor of Equity (Mr. Eddis, Q.C.) will give during the ensuing educational term fourteen lectures, commencing with Equity as applied to the Raising of Portions or other Charges on Land. The first lecture on this subject will be given on Wednesday, April 11, at 4.15, and the subsequent lectures, at the same hour, on Wednesdays and Fridays during the term. The lectures on this subject will be suspended after Wednesday, May 2, and be resumed on Wednesday, May 30, at the usual hour. The lectures will be given in the room under the library at Lincoln's Inn Hall.

The Professor of the Law of Real and Personal Property (Mr. Joshua Williams, Q.C.) will give, during the ensuing educational term, twelve public lectures on the following subject: On Prescriptive Rights, including Rights of Common. The first lecture on this subject will be delivered on Saturday, April 14, at 3.15. The subsequent lectures on this subject will be delivered on Tuesdays at 4.15, and on Saturdays at 3.15. The lectures on this subject will be suspended on Tuesday, May 1, and be resumed on Saturday, June 2, at the usual hour. The lectures will be given in Gray's Inn Hall.

The Professor on the Common Law (Sir James Fitzjames Stephen, Q.C.) will give, during the ensuing educational term, thirteen public lectures on Criminal Law. The first lecture on this subject will be delivered on Thursday, April 12, at 4.15. The subsequent lectures on this subject will be delivered on Mondays and Thursdays, at the same hour. The lectures on this subject will be suspended after Thursday, May 3, and be resumed on Thursday, May 31, at the usual hour. The lectures will be delivered in the Inner Temple Hall.

The order for the reorganisation of the Royal Artillery has been issued. On July 1 the service will be divided into three brigades of horse artillery, six of field artillery, five of garrison artillery, and one brigade of coast artillery.

Daniel Kelleher, late captain of the British barque Ethel, was found guilty at Liverpool Borough Sessions of neglecting to use means for saving the life of Adam Brest, cook and steward of the vessel, who had fallen overboard in August last, and was sentenced to three months' imprisonment.

According to the Board of Trade returns for March, the declared value of the exports of British produce and manufacture was 4½ per cent less than in the corresponding month last year, but the import value total is 28½ per cent in excess of that presented in March, 1876.

THEATRES.

HAYMARKET.

On Saturday a new comedy in three acts entitled "Fame," by Mr. C. M. Rae, was produced. The writer has been previously accredited as a good playwright, and his present work deserves consideration. There are two aspects under which Fame may be considered—one, in which it is sought by an ambitious candidate, and another, in which it is accidentally won by a deserving but indifferent person. "What's fame?" asks our didactic poet—

A fabled life in other's breath,
A thing beyond us e'en before our death.

This is the case with those who emulate its direct rewards and live uneasy lives in chasing an ever-retreating phantom. A few, however, seek only to do good; they do it "by stealth, and blush to find it fame." Mr. Rae has endeavoured to depict the passion under its two aspects—the former, a selfish passion, the latter, a benevolent aspiration. He has two heroines—one a novelist, who weds a tradesman whom she treats as an inferior; and the other a well-meaning young lady who becomes the wife of a barrister, does her duty by him and society, and finds unexpectedly that she has won an abiding reputation by her sincerity and humility. The former heroine, Miss Dryden Rolles (Miss A. Lafontaine), falls under the notice of Lord Tarleton (Mr. W. Gordon), who would console the lady for a literary disappointment in a fashion not at all pleasing to her husband. Dick Lyttleton (Mr. Howe) acts the part of a man on the occasion, and extorts the admiration of the haughty authoress. The second heroine, Rose Wentworth (Miss Marion Terry), is next shown as revelling in domestic bliss, and providing for the happiness of an increasing family. In this there is an idea, but not a story. Instead of such a narrative, we have to accept a series of pictures, accompanied with pretty dialogue, and to recognise the valuable service of dramatic artistes in their endeavours to realise the intended characters. The new piece had a quiet reception, and will probably gain on the esteem of the audience.

SURREY.

A revival of some interest has been effected at this theatre—namely, that of Moncrieff's version of Pierce Egan's "Life in London; or, the Day and Night Scenes of Jerry Hawthorn and his elegant friend Corinthian Tom." In days less fastidious than the present, these broad caricatures of existing society were received with public favour. They certainly offended against morals, or rather decency, but they abounded in provocations of mirth, and a laughter-loving people compounded for all the rest. In these days, all Mr. Albery's delicate wit and genial humour fail to palliate for similar situations in "The Pink Dominoes," or, rather, are perhaps condemned for exaggerating them, by increasing their tendency to promote the hilarity of the audience. The picture presented by the old Tom-and-Jerry play was that of low life, the coarseness of which was at the time rather an element of popularity than otherwise. A transpontine audience has much of the old leaven remaining, and welcomes the literal rendering of vulgar experience. The realistic element still pleases, and the Cruikshank costumes have yet their admirers. The drama is very well acted, and may continue to delight the ordinary playgoer for the remainder of the season.

STRAND.

Mr. Vernon, a good comic actor, made his first appeal to the audience on Saturday afternoon in the character of a benefactor, and was rewarded by the attendance of numerous admirers. The pieces performed were "A Rough Diamond" and a new three-act comedy, altered, under the title of "Mammon," from M. Octave Feuillet's "Montjoie," which presents some rather strong dramatic points of interest, and ought to command popular favour. Mr. Vernon supported the character of Sir George Heriott, a money-making speculator, who has a wife and daughter whom he loves well enough, but not so well as he loves his gold. The part is made the medium for many satirical remarks on the money-market. A plot of considerable ingenuity supervenes. Lady Heriott (Mrs. Fairfax) has her suspicions aroused as to her money-loving lord's marital fidelity; a scene of violent passion ensues, and Violet, their daughter, has to choose whether she will stay with her father or her mother in case of their separation. Ultimately the Mammon-worshipper becomes a ruined man; it is then that his wife and daughter appeal to his better nature, and the play is brought to a pleasing conclusion.

In the evening Mr. John S. Clarke appeared in a drama by Mr. Tom Taylor called "Babes and Beetles," an eccentric title, appropriate enough to an eccentric performance.

LIFE-BOAT SERVICES.

At a meeting of the Royal National Life-Boat Institution, held at its house, John-street, Adelphi, on Thursday week, rewards amounting to £127 were granted to the crews of life-boats of the institution for services rendered during the past month. The Drogheda No. 2 life-boat had saved the crew of three men from the wrecked schooner Mary, of Liverpool. The Dunbar life-boat had rescued four men from the steamer James, of Greenock. The Caistor, Drogheda, Penarth, and Palling life-boats had also severally rendered services to vessels in distress. The Ramsgate life-boat had saved from death the crew of four men of the schooner Jessie, of Perth, which was wrecked on the Goodwin Sands. The Howth life-boat had also gallantly saved three men from the barque Eva, of Dublin, wrecked on Baldoyle Sands. The silver medal of the institution and its thanks inscribed on vellum, were voted to Edward Weldrake, one of the crew of the Spurn Point life-boat, in acknowledgment of his gallant conduct in jumping into the sea from the life-boat and saving the master of the sloop Grace Darling, of Hull, which was wrecked on the Middle Banks, off Spurn Point, during a strong easterly gale on Dec. 24. Other rewards were granted to the crews of shore-boats for saving life from wrecks on our coasts, and payments amounting to £3100 were ordered to be made on the 256 life-boat establishments of the institution. Amongst the contributions recently received were £800 from Miss Adamson, to defray the cost of a life-boat establishment; £500 from the employes of the late Mr. George Moore, for a life-boat to be named after him; and £300 from Mrs. Garratt. Reports were read from Inspectors Ward, Gray Jones, R.N., and Macdonald, on their recent visits to the coast.

The appointment of Lieutenant-General Clement Alexander Edwards, C.B., to be Colonel of the 2nd Foot, in the room of the late General Spink, has been gazetted.

Telegrams state that the Dundee ships have been very successful at Newfoundland seal fishing. The Arctic, Captain Adams, arrived at St. John's on the 5th inst., with 25,000 seals, which will yield 250 tons of oil. The Neptune is full, with 30,000 seals, calculated to yield 300 tons of oil. The Panther has 20,000 seals, and the Aurora, another Dundee steamer, has 13,000 seals, and when Captain Adams left she was still prosecuting fishing. After discharging at St. John's, the Dundee steamers will at once proceed to the Greenland fishery.

BOOKS ABOUT TURKEY.

Mournfully mindful of what has lately happened, and anxiously foreboding what is yet to come—the fact of our Government having signed the Protocol notwithstanding—the intelligent observer of current events could not have a better opportunity of preparing for the worst than is afforded by the publication of *Russian Wars with Turkey*: by Major Frank S. Russell (Henry S. King and Co.), a volume from which the military probabilities of the future may be calculated, with a difference, perhaps, from the lessons of the past. The book, as its author candidly admits, is very little more than a compilation; but then it is compiled from the most trustworthy sources, and, in the account of the wars of 1828 and 1829, which are dealt with in detail, we find among the authorities such weighty names as those of Colonel Cheesey and Count Moltke. The latter was at that time but a simple Prussian Captain attached to the Russian staff; but, though he had as yet acquired little or no celebrity, his observations were made with the self-same faculties which, when their maturity was ripe and their vigour perhaps less, were to render him celebrated as the greatest strategist of our age. The author commences with an introduction, in which he briefly, but to good purpose, remarks upon the reasons which should make us more apprehensive than our forefathers were wont to be about "the near approach of Russian armies to Constantinople;" upon the sameness of position "as regards interest and causes for disagreement," existing between Russia and Turkey, though the former has become "more powerful for attack" and the latter "weaker for defence," during the last hundred and fifty years; and upon the many wonderful escapes which the Ottoman empire has had from impending destruction, escapes which, in the case of Mussulmans, no Christian would probably feel justified in terming providential, but which are certainly so miraculous as to suggest the idea that Turkey, like "poor Jack," has "a sweet little cherub that sits up aloft" and watches over its preservation. Eight times, as our author points out, since 1709, "has Russia made war against Turkey;" each time Russia "has invariably been the aggressor, and nearly always has added to her territory;" and in nearly every case Turkey has escaped from her extreme peril by the skin of her teeth: "twice, in 1711 and 1739, she has saved herself by force of her own arms; twice, in 1774 and 1829, has she been saved by the plague; once, in 1807, has she been saved by accidental circumstances; and three times, in 1791, 1812, and 1853, has she been saved by the intervention of other Powers." Her escapes, in the author's opinion, have been "fortunate perhaps for her, but most unfortunate for other nations, since indirectly, from her gross mismanagement, from her apparent helplessness, and the temptation she affords for attack, Turkey is the chronic and inveterate disturber of peace in Europe." From all which it would appear that the author, in common with many other equally competent and even more competent judges, seems to think that the destruction of the Ottoman empire would of itself suffice to put an end to the evil condition of South-Eastern Europe; not considering that such a catastrophe would almost certainly be followed by "red ruin and the breaking up of laws" to an extent in comparison with which the present state of things might be regarded as a Saturnian reign of content and social order. And yet he cannot really think so; for he himself says elsewhere that, before the Eastern Question can be theoretically solved, it is necessary to ascertain "how the Turks can be made to govern properly, or, if that is an impossibility, how they may be satisfactorily replaced." We follow him with the most pleasure and confidence when he confines himself to what may be called his own legitimate province, when he describes the early wars between Russia and Turkey up to 1828; when he makes his professional remarks upon various campaigns; when he discusses the present resources of these two Powers and compares their respective chances of success in the event of war; and when he dwells upon the "historical absurdity" of asserting that "Russia as a nation has no designs upon Constantinople." He writes openly, frankly, boldly, impartially, like a soldier; he does not, apparently, love the Turk, and he certainly is not blind to the faults of the Russians; he considers that, as things now are, "a transfer from the rule of Turkey to that of Russia would—to use a common expression—be a transfer from the frying-pan to the fire." He also draws attention to the shrewd remark made not long ago by Mr. Alfred Austin: "that the solicitude of Russia for the welfare of Turkish subjects is of recent date, whereas the interest of Russia in Turkish territories is as old as Turkish decline in defensive capacity and Russia's consciousness of offensive strength." But public morality has improved, at any rate so far as externals are concerned, since Alexander and Napoleon coolly arranged a partition of Turkey at the peace of Tilsit, without any pretence of Christian benevolence: the wolf is nowadays expected to make at least so much concession to the opinion of the civilised world as to put on sheep's clothing. The author does not omit to show how far the key of the situation is held by Austria; and, in case Austria should not forbid, he passes in review the altered conditions of invasion since 1828 and 1829, the probable marches of the Russians, and the probable strategy of the Turks. Nor are maps wanting to assist the reader, who cannot fail to rise from a perusal of the pages with a good general idea of what war between Turkey and Russia has hitherto been, and is likely to be. Whatever it may be, if it is to come, it can scarcely bring in its train any horrors more dreadful, so far as the armies are concerned, than those of 1829, which are described in some pages extracted from Count Moltke's book, and which cause the shuddering reader to wonder, not that Diebitsch "magnanimously" refrained from marching upon Constantinople, but that he ever got to Adrianople, so critical was the situation of his army.

A great deal of seasonable information, contained within a comparatively small compass, is to be found in *The Rise and Decay of the Rule of Islam*, by Archibald J. Dunn (Samuel Tinsley), the author of which was prompted to his task by the laudable desire of putting "into a popular shape the materials for forming a true judgment" upon the "general scope and bearing" of the Eastern Question. He has evidently been at great pains to combine comprehensiveness with brevity. He starts with a sketch of Mahomet's life and teaching, followed by "a history of the Saracenic Empire which he founded, and of the Turkish Empire which succeeded it." He gallops along, but not too hastily to notice what is most prominent in his course, through two-and-twenty chapters; after which we find ourselves, with memories refreshed and scenes of the past revived, in the midst of recent occurrences. The causes of the Bulgarian rising, the depositions and accessions of the various Sultans, the murder of the Ministers, Serbia's declaration of war, Lord Russell's expression of opinion, Mr. Gladstone's pamphlet, Lord Stratford de Redcliffe's proposals, the Conference, the Turkish Constitution—all the well-worn topics of dispute, in fact—are once more brought to the front. The degraded position of the Christians in Turkey is insisted upon with more than ordinary vehemence: for it is declared that the "worst barbarities" of negro slavery "pale before the frightful crimes and atrocities which have

been for more than a thousand years the everyday history of those unhappy Eastern nations," although it is not distinctly stated that the Turkish oppressor can sell for money the oppressed Christians and their families. From which it may be surmised that the author is not very favourably inclined towards the Turks, against whom he cites the testimony of Lord Bacon, Dr. Johnson, Dr. Newman, M. Guizot, and so on. But neither is he more amiably disposed towards the Russians, whom he includes among the competitors for the privilege of replacing the Turks. "There is not much to choose," he says, "between the Turk and the Russian, except that the former is said to be somewhat more truthful and straightforward than the latter, having generally a higher sense of personal dignity." He is good enough to propound his own scheme for the settlement of the Eastern Question. His propositions are only eight in number; but they occupy too much space to be set forth here at length, which is the less to be regretted inasmuch as they do not appear calculated to command general assent. It may be mentioned, however, that he would have the Turkish provinces "in Europe, Asia, and Africa" occupied "by a combined army composed of contingents from the forces of all the European Powers, under the supreme command of an English General;" that, if he be rightly understood, the Sultan should be "pensioned off," after the fashion of certain Indian Potentates, and that there should be, instead of an Ottoman Empire, a Byzantine Federation, with the Duke of Edinburgh as President. If this may not be, he looks forward to a time when England will be compelled to "step into the arena as the St. George of modern Europe, to do battle with the Dragon of Barbarism," and when "the greatest iniquity which has ever stained the annals of the human race" will "be put an end to by the final abolition of the reign of Islam." It is only just to the author, lest the taste which has been given of his quality should mislead anybody, to mention that he has full confidence in the present Government, and, though freely admitting the hopelessness of the Turkish character, does not by any means commend the intemperate zeal of the so-called "agitators." As for the virulent abuse bestowed upon the "unspeakable" and the "anti-human" Turk, it leads to some curious results. You may plead that to talk in such a way is contrary to the Christianity that the talker professes, and you will be answered that it is the Turk's religion, it is the Koran, which makes him an exception to the general Christian rule; his very faith is anti-Christian, anti-human, unspeakable; there were more hope of a heathen. But you may plead, again, that the Koran did not prevent the Saracens from being models to even the Christians in Spain, so that the difficulty of religion is evidently not insurmountable; it must be the difference between the Turk and the Saracen in origin, for the Turk is a Tartar, and so, if you scratch him, is the Russian. Where, then, should be the reason for pronouncing the Turk hopeless? He is as human as the Russian, and his religion was not fatal in the case of the Saracen to intellectual as well as moral graces. Besides, a cynic might ask why Mussulmans should be more bound by their religion than Christians, according to experience, are by theirs. No doubt the Turk could learn the art of "explaining away" or "reconciling with modern progress."

If, as we are confidently informed, "Turkey remains just what she was when Mr. Layard used to assure the House of Commons that her regeneration was at last about to begin," the charge of being antiquated cannot be justly advanced in depreciation of *Turkey: being Sketches from Life*, by the "Roving Englishman" (George Routledge and Sons); for the book deals with just the time at which Mr. Layard was "studying Turkish affairs closely on the spot"—that is, about a quarter of a century ago. Certainly no other depreciatory charge can be brought against the volume; it is singularly vigorous and incisive, and at the same time good-humoured and very amusing. Some of the sketches might have been written by him who wrote "Eöthen." It was undoubtedly a "happy thought" to republish the work, which contains a collection of papers not only highly entertaining, but so trustworthy in their information that such authorities as the late Lord Palmerston, the late Lord Dalling, and other competent judges are said to have borne witness to the "intimate knowledge of Turkey" they displayed. It is to be hoped, however, that since they were first published we have changed, if Turkey has not; that we do not nowadays choose for our representative at the Porte or elsewhere such a stony, tyrannical ruffian as Sir Hector Stubble, and that we have mended matters as regards the interpreters attached to the British Embassy at Constantinople. It is to be feared that the paper, excellent as it is, which unfolds the author's experience at a Turkish bath will have partially lost the charm of novelty; for though in 1853 the Turkish bath was a rarity in this country, it has for some time been established as a British institution, even if it be less popular than it was ten years ago. There is something very ludicrous, and at the same time very pathetic, in the narrative which describes a visit paid to the Sultan, the "wiggling" administered to that sublime Potentate by an Ambassador, the sublime Potentate's dread of the Ambassador, even as a schoolboy's dread of his master, the Ambassador's complacent swagger, and the Turkish Minister's impotent red-faced wrath at sight of his august master's humiliation. Such a spectacle as that might, no doubt, be seen again in these days. How different from the time when a Sultan would keep Ambassadors waiting from sunrise to sunset, if it seemed good, without the gate, and would not, even at last, admit them to any close proximity, whilst the High Chamberlain himself ducked down their heads lest they should fall short of the proper reverence. Ichabod! the glory hath indeed departed, and the mighty have indeed fallen. The opinion held by the "Roving Englishman," with all his intimate knowledge, about the Turks in general is not favourable; he owns to having met individual Turks whom he loved like brothers and highly esteemed, but he is doubtful about the character of the Turkish nation. Still, a little leaven, properly handled, will leaven the whole lump.

The *Globe* understands that Mr. Thomas William Gorst has been appointed to succeed Mr. Watson as solicitor to the Office of Woods.

Last week a match took place between teams of the men of the 105th Regiment and the 6th Essex (Colchester) Volunteers, at Middlewich, the volunteers using the Snider and the regulars the Martini-Henry. At the 200-yards range the volunteers led by two points, making 255 against 253; but at 500 yards the regulars made 231, while the volunteers only scored 178, leaving the former the winners by 51 points. The highest score on the winning side was made by Captain Ferrier, 60 points; and, on the losing side, by Private Farmer, 62 points.—The Bristol Rifles held a competition at Avonmouth. Private Leaker took first place, the next best scores being made by Private Gouldsmith, Captain Blackburne, and Sergeant Wookey.—The first triangular match of the season for the Highland companies challenge cup of the Queen's Edinburgh Brigade took place in the Hunter's Bog. The fourth company scored an easy victory, making 320 points against 244 by the fifth, and 206 by the seventh company.

NOVELS.
